APPLICATION MODERNIZATION · TIER C · INTERNAL

Platform Ops — Proposal Input Form

Information to be collected for the monthly operation of the container platform (GKE / AKS) and the applications on it — Platform Ops (C). Sections follow the Proposal Set codes (M1, M2, M5, M8). Once the form is completed and returned, the proposal text (file 4c) is produced. Statements followed by the orange verification tag are drafts to be verified by Güner Hacıoğlu.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the Assumptions and Out of Scope section.

The "WHERE IT FILLS IN THE PROPOSAL" column of each row names the section or variable field of the proposal template (file 4c). This form uses the Proposal Set codes M1, M2, M5, M8; the A·B·C mark in each code heading shows the tiers in which the code is asked.

If the answer to a question is "we don't know", that is also an answer — it is often the first finding and goes into the proposal as an assumption.

LIMIT OF TIER C: C is the monthly operation of the container platform and the applications on it; it is priced by monthly capacity hours. Moving new applications is not done from C capacity; additional waves are a separate B proposal.

ACTIVITIES: GKE / AKS operations; version upgrades; GitOps pipeline maintenance; monitoring and alerting; incident support (support hours and priorities); cost follow-up; small changes from the monthly capacity. «GÜNER DOĞRULASIN»

CAPACITY AND TERM: monthly S 40 h · M 80 h · L 160 h; minimum term 12 months (draft); unused hours are not carried over to the next month; work above capacity at the «hour rate». «GÜNER DOĞRULASIN»

OUT OF SCOPE: application code development and functional change; end-user support; changes by third-party software vendors; cloud consumption (invoiced separately).

NEIGHBOURING PACKAGES: ETL Modernization on Google Cloud moves data pipelines; Data Modernization consolidates analytic databases on BigQuery; this package moves the application layer (and optionally the application's own operational database). Cloud Checkup can identify modernisation candidates.

M1 · A·B·C · IDENTITY — Organisation and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER»	
○	Legal entities and group companies in scope — names; for a single company the row is deleted	Cover «GROUP COMPANIES», Scope	
○	Sector and reason for the request — for the one-paragraph context	Purpose «CUSTOMER CONTEXT»	
○	Is there an RFP, specification or requirements list; its number, response format and deadline	Structure and response format of the proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», Commercial Terms «proposal date + 1 month»	
○	Procurement process, approved budget and expected invoice payment term; is monthly invoicing accepted	Effort and Fees, Commercial Terms «NUMBER» days payment term	
○	Where is cloud consumption bought today — directly, through Komtaş, through another partner or reseller	internal: Commercial frame	
○	Are there competitors, and who (another partner, the cloud provider's own team etc.)	Emphasis and section weights	

M2 · A·B·C · DECISION — Trigger, Tier, Target Cloud and Date

For a platform Komtaş did not build, an onboarding review is carried out before C starts; effort «NUMBER» pd, written as a separate item. «GÜNER DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Source of the operations need — the platform Komtaş built in B, the customer's existing cluster, or a platform taken over from another partner**	Scope «MIGRATION REF» / «ASSESSMENT REF», Purpose, Assumptions and Out of Scope	
○	Which tiers are wanted — C only, or is there interest in additional waves (B)	Next Step, Service Selection Check	
●	**Target cloud — Google Cloud or Azure; is there an existing organisation / subscription, landing zone or commitment**	Scope «TARGET CLOUD», Approach	
○	Requested start date — end of B hypercare or end of the existing support contract	Activities and Timeline, Commercial Terms	
○	Who operates the platform today; is there an existing support contract	Customer Responsibilities, Assumptions and Out of Scope	

M5 · A·B·C · ENVIRONMENT — Environments, SLA, Network and Security

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of environments to operate — dev / test / prod, others**	Scope	
●	**Target SLA — 99.5% / 99.9% / 99.95%+ (multi-zone / region)**	Scope, support hours	
○	Network constraints — hybrid connectivity (Cloud Interconnect / VPN / ExpressRoute), firewall rules, IP plan	Assumptions and Out of Scope, Customer Responsibilities	
○	Security constraints — security team approvals, secret management, image scanning, regulation (BDDK, KVKK) and any requirement to keep data in Türkiye	Assumptions and Out of Scope, Customer Responsibilities	
○	Existing CI/CD and Git tooling — GitLab, GitHub, Jenkins, Azure DevOps	Approach	
○	Monitoring and logging tools in use today	Approach	
○	Access model for the operations team — VPN, bastion, permission approval; lead time for access	Customer Responsibilities, Assumptions and Out of Scope	

M8 · C · OPERATIONS — Clusters, Support Hours, Capacity and Term

> The price of C is the monthly capacity in hours. Capacity is set by the band from the cluster and application count; support hours and priorities set the service conditions, not the capacity.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of clusters to operate and number of applications on them**	Scope, Drivers 1–2	
●	**Support hours — business hours (weekdays 09:00–18:00), extended hours or 24×7** «GÜNER DOĞRULASIN»	Support Hours and Priorities «SUPPORT HOURS», Effort and Fees	
○	Expected response and resolution time per priority (table below)	Support Hours and Priorities	
○	Monthly capacity — S / M / L (from the band estimate); expected number of small changes	Effort and Fees	
○	Term — minimum 12 months is a draft	Commercial Terms	
○	The customer's own operations team and the split of responsibilities (RACI); owner of application-level incidents	Customer Responsibilities	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Ticketing tool and escalation path	Customer Responsibilities, Approach	
○	Maintenance / upgrade windows	Activities and Timeline, Assumptions and Out of Scope	
○	Reporting cadence (monthly operations and cost report); expectation on carrying over unused hours	Commercial Terms, Deliverables and Acceptance	

Priorities — write the times agreed with the customer.

#	PRIORITY	DEFINITION	RESPONSE TIME	RESOLUTION TARGET	NOTE
P1	Critical «GÜNER DOĞRULASIN»	Production platform or a critical application is down	«NUMBER» h	«NUMBER» h	
P2	High	Performance loss or partial outage; a workaround exists	«NUMBER» h	«NUMBER» working days	
P3	Normal	Question, small change request, improvement	«NUMBER» working days	From the monthly capacity	

Band Estimate — Tier C

Completed after the answers are collected. In C the band is set from the cluster and application count and gives the monthly capacity. The band is the higher of the two drivers. Number of environments and SLA do not change the band; they affect support hours and priorities. «GÜNER DOĞRULASIN»

DRAFT — no recorded effort; bands and unit efforts are to be updated with Güner Hacıoğlu's data. Komtaş effort is not written into the proposal before the cloud team confirms it.

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Clusters to operate (M8) «GÜNER DOĞRULASIN»	≤ 2	3 – 5	> 5	
2	Applications in operation (M8) «GÜNER DOĞRULASIN»	≤ 10	11 – 30	> 30	
	RESULT — monthly capacity «GÜNER DOĞRULASIN»	40 h / month	80 h / month	160 h / month	

TEAM — Platform Ops Lead + Platform / Kubernetes Engineer; from the cloud team. «GÜNER DOĞRULASIN»

CONDITIONS — unused hours are not carried over to the next month; work above capacity is invoiced at the «hour rate» with the customer's approval; the monthly usage report shows how the capacity was used.

TARGET ARCHITECTURE — GCP: GKE, Terraform (IaC), Helm charts, Argo CD (GitOps), CI/CD (Cloud Build or GitLab / GitHub Actions / Jenkins), Artifact Registry, Secret Manager, Cloud Monitoring / Logging (or Prometheus / Grafana), Cloud SQL (optional), Cloud Load Balancing, VPC. Azure: AKS, Terraform, Helm, Argo CD, Azure DevOps / GitHub Actions, Azure Container Registry, Key Vault, Azure Monitor, Azure SQL / PostgreSQL Flexible Server, Application Gateway. «GÜNER DOĞRULASIN»

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the effort calculation, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	KOMTAS-«CUSTOMER ABBREVIATION»-APM-C-«YEAR»-«SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month» · «price validity date»	Cover, Commercial Terms	Send date + 1 month (M1); sales sets the price validity date	
3	«CUSTOMER CONTEXT»	Purpose	M1 and M2 answers	
4	«TARGET CLOUD» · «NUMBER» clusters · «NUMBER» applications · «NUMBER» environments · SLA «%»	Scope	M2, M5 and M8 answers	
5	«BAND» · «NUMBER» h / month · «NUMBER» months	Effort and Fees, Commercial Terms	Band estimate, M8	
6	«ASSESSMENT REF» · «MIGRATION REF»	Scope	M2 — source of the platform; deleted if Komtaş did not build it	
7	«monthly fee» · «hour rate» · «amount» · «day rate» · onboarding «fee»	Effort and Fees	Monthly capacity × hour rate; work above capacity at the hour rate; change requests at the day rate; onboarding review as a separate item (M2)	
8	«SUPPORT HOURS» · «NUMBER» h (per priority)	Support Hours and Priorities	M8 support hours and priority table	
9	Next step items	Next Step	Follow-on Interest table; no margin figures	
10	«REFERENCE PROJECT»	Annex 1 About Komtaş	Only references approved for this proposal; no customer name without approval. «GÜNER DOĞRULASIN»	
11	«full name» · «title» · «e-mail / phone» · «CITY»	Commercial Terms	Komtaş commercial and technical contact; city for free on-site meetings	

Service Selection Check

Before filling in the form, make sure that Tier C is the right service. One request can match more than one row.

STATUS	RIGHT SERVICE
The application estate has not been measured; effort, duration and price of the migration are unknown	A — Assessment
An inventory from A or an equivalent study exists; a migration proposal is requested	B — Migration
The customer wants a turnkey fixed price without measurement	A — B is not offered turnkey
The container platform is live; operations, upgrades and support are wanted	C — Platform Ops
The request is moving ETL / data pipelines	ETL Modernization on Google Cloud
The request is consolidating analytic databases / the DWH on BigQuery	Data Modernization
The request is a cost, security and configuration check of the existing cloud estate	Cloud Checkup
The request is mainframe migration or functional rewrite	Out of scope — this package is not used
The application or data must stay in Türkiye by regulation (BDDK or similar)	Clarified with Cloud Solutions before the proposal

Follow-on Interest

Follow-on work the customer may be interested in; feeds the Next Step section of the proposal. No margin figures appear in the proposal.

#	FOLLOW-ON WORK	RELATED TRIGGER	INTEREST (YES / NO / LATER)	NOTE
1	Additional waves (another B)	Remaining applications		
2	Cloud Checkup after go-live	Cost and security check		
3	Data side — ETL Modernization on Google Cloud, Data Modernization	Data pipelines and analytic databases		
4	Cloud consumption (through Komtaş)	Moved workloads		

COMMERCIAL FRAME — INTERNAL ONLY. This box, its rates and the customer name are not written into the customer deck or the proposal.

The Google consumption margin is thin: Premier base 12%, 13–15% with incentives, ~5–6% in large deals; Azure 3%. Value comes from B migration and C Platform Ops (recurring revenue); consumption growth is indirect.

Evidence: the Komtaş cloud team containerised on-prem applications at Ecofin and moved them to the cloud with Kubernetes, Terraform, Helm and Argo CD. The proposal and the deck do not name the customer; the anonymous wording is used.

Capacity risk: delivery capacity sits in the cloud team (not in the SAT data / AI core); there is a single reference and a person dependency in the cloud team (selection criterion S11). Timeline and team are confirmed with the cloud team before they are written into the proposal.

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
M1	Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries	
M2	Source of the operations need — the platform Komtaş built in B, the customer's existing cluster, or a platform taken over from another partner	
M2	Target cloud — Google Cloud or Azure; is there an existing organisation / subscription, landing zone or commitment	
M5	Number of environments to operate — dev / test / prod, others	

SECTION	BLOCKER QUESTION	ANSWERED?
M5	Target SLA — 99.5% / 99.9% / 99.95%+ (multi-zone / region)	
M8	Number of clusters to operate and number of applications on them	
M8	Support hours — business hours (weekdays 09:00–18:00), extended hours or 24×7	

Blocking conditions and their effect on the proposal

#	CONDITION	EFFECT ON THE PROPOSAL	ACTION	STATUS
1	Platform not built by Komtaş	An onboarding review precedes C	Clarify the source in M2	
2	Support hours and priorities unknown	Service conditions cannot be written	Agree with the customer in M8	
3	No access model for the operations team	No start date can be given	Clarify access in M5	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the Assumptions and Out of Scope section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold.

The first two rows of M8 have a special place: without the cluster / application count the band and capacity cannot be written, and without support hours the service conditions cannot be written.
