«GROUP COMPANIES»

Data Privacy & Test Data (KVKK) · Service C

Archive & Run

Technical and Commercial Proposal

C1 Archive: one-time set-up of retention-based archiving of relational records. C2 Run: monthly capacity for new sources, rule maintenance, test data refreshes, monitoring and reporting for «CUSTOMER»

Proposal No: KOMTAS-«CUSTOMER ABBREVIATION»-DPR-C-«YEAR»-«SEQUENCE»

Proposal Date: «dd Month yyyy»

Validity: «proposal date + 1 month»

VARIABLE GLOSSARY — in this template only the fields inside « » change per customer. All other text is fixed.

Identity: «CUSTOMER» short customer name used in the text · «CUSTOMER NAME» full legal name (cover) · «GROUP COMPANIES» group companies in scope; delete the line for a single company · «CUSTOMER ABBREVIATION» short code in the proposal number · «YEAR» year (proposal number; year of a reference project) · «SEQUENCE» proposal sequence number · «dd Month yyyy» proposal date · «proposal date + 1 month» end of validity · «price validity date» latest start date for which the fees stay valid

Context: «CUSTOMER CONTEXT» one paragraph: sector, main applications and databases, non-production environments (test, development, outsourced teams), current practice for personal data outside production, reason for the request · «TRIGGER» reason for the work (e.g. KVKK requirements, an audit finding, real personal data in test environments, a planned move of data to the cloud, data given to outsourced development teams, follow-up of a data breach, data subject requests)

Scope: «PLATFORM» technology option chosen for the work: on-premises Informatica products or Informatica IDMC (cloud); see the technology options table · «BAND» sizing band S, M or L from the proposal input form · «SUPPORT HOURS» support hours (e.g. weekdays 09:00–18:00 Türkiye time)

Commercial: «OPTIONAL» item kept or deleted by sales; if kept, delete the marker · «fee» fee excl. VAT · «monthly fee» monthly fee excl. VAT · «day rate» person-day rate (change requests) · «hour rate» hourly rate for work above the monthly capacity · «CITY» city where on-site meetings are free of charge

Values: «NUMBER» numeric value (count, sample size, days, weeks, months, hours) · «%» percentage (payment rate, match threshold) · «FIELD» free text (e.g. names of applications or data stores, a product name, a term agreed separately)

Annex: «REFERENCE PROJECT» further reference project approved for this proposal (no names without permission); otherwise delete the row · «RESULT» measured result of a reference project, only if measured and approved for use; otherwise delete the line

Contacts: «full name» contact name · «title» contact title · «e-mail / phone» contact details

Markers: «OPTIONAL» items are kept or deleted by sales. The orange DAMALINK DOĞRULASIN and DIGITALLENCY DOĞRULASIN tags mark draft statements to be verified before use. FILL NOTE boxes are internal and are deleted before sending.

Contents

FILL NOTE — this template is for service C (Archive & Run) of the Data Privacy & Test Data (KVKK) package. It has two lines in the same file: C1 Archive, a one-time project at a fixed fee, and C2 Run, a monthly service. If only one line is requested, delete the headings, rows and bullets of the other line.

C2 Run applies to protection that is in operation: built under service B or existing at «CUSTOMER». Protection not built by Komtaş is taken over through the onboarding in Section 4.2.

Technology option: the work is carried out either with on-premises Informatica products or with Informatica IDMC (cloud); the choice is a scope item («PLATFORM», Table 5). Licences are not part of this proposal. Product names and versions are confirmed with the licence position of «CUSTOMER» before sending.

Statements followed by an orange tag are draft assumptions of the package and are verified before the template is used. DAMALINK DOĞRULASIN: approach, phases, durations, effort, bands, roles, tools and their IDMC equivalents, accelerators, discovery and masking rules, acceptance criteria. DIGITALLENCY DOĞRULASIN: the private bank reference and the integration-time masking mapplets. After verification only the tag is deleted. No proposal is sent with a tag in it.

Order of completion: «PLATFORM» (Table 5) → C1 scope (Table 2) → Table 4 → capacity package (Table 13) → request handling (Table 6) → fees (Section 9) → Annex 2 → remaining « » fields. No commercial figures other than the fees in Section 9 are written into this proposal.

1. Purpose

«CUSTOMER CONTEXT»

The aim of this proposal is twofold. Records whose retention period has ended are moved out of the production databases of «CUSTOMER» into an archive, with deletion from the source and restore where agreed. The protection of sensitive data is kept current as new sources, tables and test needs arrive. The reason for the work is «TRIGGER».

The proposal has two lines:

- **C1 Archive (one-time):** retention-based archiving of relational records, optional deletion from the source and restore, filters and scheduling; fixed fee.
- **C2 Run (monthly):** new sources scanned and classified, rule maintenance, test data refreshes, monitoring and a monthly report from a monthly capacity of hours; monthly fee.

2. Scope

2.1 Service Structure

Service	Focus	Result	Pricing
A — Data Discovery Assessment	Discovery and classification of sensitive data, risk map, draft masking rule catalogue, target architecture and roadmap; 4 to 8 weeks «DAMALINK DOĞRULASIN»	Sensitive data inventory, rules, roadmap and estimate for B	Fixed fee
B — Protect	Foundation once; modules Discovery Layer, Masking and Secure Test Data	Continuous discovery, masked non-production copies, secure test data	Foundation once + fee per module
C — Archive & Run	C1 Archive (one-time): retention-based archiving, delete and restore. C2 Run (monthly): new sources, rule maintenance, test data refreshes, monitoring, monthly report	Records past their retention period archived; protection kept current	C1 fixed fee; C2 monthly fee

Table 1 — Service structure. This proposal covers service C.

2.2 C1 Archive — Scope

C1 sets up the archiving of records in the relational databases in scope according to the retention rules of «CUSTOMER». It uses the archive accelerator (accelerator 5, Annex 1), which runs on Persistent Data Masking on premises; with IDMC or another archive product the approach is «FIELD». «DAMALINK DOĞRULASIN»

Item	Value
Systems / databases in scope	«NUMBER»
Tables with records to archive	«NUMBER»
Retention rules (set by «CUSTOMER»)	«FIELD»
Deletion from the source after archiving	«OPTIONAL»
Restore from the archive	«OPTIONAL»
Archive frequency	«FIELD»

Table 2 — C1 Archive scope.

2.3 C2 Run — Services Included

The monthly service covers the items below. All items are delivered from the monthly capacity of hours in Table 13. «DAMALINK DOĞRULASIN»

#	Service	Content
1	New sources	New data stores, tables and columns scanned and classified; masking rules assigned to new sensitive fields
2	Rule maintenance	Discovery and masking rules, reference dictionaries and thresholds kept current with the decisions of «CUSTOMER»
3	Test data refreshes	Planned refreshes of the test environments with masked subsets
4	Monitoring	Scans, masking, test data and archive jobs checked; failures analysed and corrected
5	Monthly report	Use of the capacity, new sensitive data found, rule changes, refreshes, job results, open items

Table 3 — Services included in the monthly service.

2.4 Sizing Basis

Sizing Input	Value
Databases / schemas under protection	«NUMBER»
Sensitive data types	«NUMBER»
Masked environments / test environments refreshed	«NUMBER» / «NUMBER»
Applications	«NUMBER»
Data volume (TB)	«NUMBER»
Technology option	«PLATFORM»
Sizing band	«BAND»

Table 4 — Values on which sizing is based. Source: the proposal input form.

The band (S / M / L) is the highest band reached by at least three of the drivers: databases / schemas (S ≤10 · M 11–50 · L >50), sensitive data types (S ≤10 · M 11–25 · L >25), environments (S 1–2 · M 3–5 · L >5), applications (S ≤5 · M 6–20 · L >20) and data volume (S ≤1 TB · M 1–10 TB · L >10 TB). The band sets the C1 effort and the C2 capacity package. «DAMALINK DOĞRULASIN»

2.5 Technology Options

Need	On-premises (Informatica)	IDMC (cloud)
Discovery and classification	Data Privacy Management (formerly Secure@Source) / Enterprise Data Catalog data domains	Cloud Data Governance and Catalog (CDGC) data classification «DAMALINK DOĞRULASIN»
Persistent masking	Persistent Data Masking (PDM) / Test Data Management (TDM)	Cloud Data Masking (CDM)
Test data subset and synthetic data	Test Data Management (TDM)	Cloud Test Data Management (CTDM)
Dynamic masking	Dynamic Data Masking (DDM)	«FIELD»
Archive	Archive accelerator on PDM (Annex 1, accelerator 5) / Informatica Data Archive	«FIELD»
Masking during integration	PowerCenter mapplets	IDMC mappings / mapplets

Table 5 — Technology options. Option chosen: «PLATFORM».

2.6 Boundaries to Other Services

- **Data Governance:** the classification policy, data ownership, the business glossary and the data catalogue belong to the Data Governance service. This package turns the policy into technical protection. If a catalogue is in operation (for example CDGC or Enterprise Data Catalog), the classification results are written to it; no second catalogue is built.
- **AI Governance Readiness:** the use of personal data in AI training data is assessed in the AI Governance Readiness service; this package supplies the masking and anonymisation technique.
- **Cloud migration:** moving data and data flows to the cloud is the subject of the Data Modernization and ETL Modernization on Google Cloud services. This package masks the data before it leaves for the cloud or for test environments.
- **Legal advice:** the package is technical. KVKK legal advice (for example VERBIS registration, privacy notices and consent texts) is not provided.
- **Service B and change requests:** a further module, or a requirement larger than the monthly capacity, is offered as a separate proposal (Section 9.5).

3. Approach

3.1 C1 Archive — Approach

The retention rules are set by «CUSTOMER» (legal, data protection officer and the data owners). For each system, the tables with records to archive or delete are identified with their physical and logical constraints, the filters of the retention rules are defined and the archive definitions are generated and imported (Define → Generate → Import → Archive-Delete → Restore). Each run is scheduled, logged and reported with alerts per step; new tables are added in a few steps. «DAMALINK DOĞRULASIN»

Deletion from the source starts only after a successful archive and restore test and the written approval of the data owner.

3.2 C2 Run — Monthly Cycle

Each month has the same steps:

- **Planning:** at the start of the month, the requests, the planned refreshes and the use of the capacity are agreed with the service owner of «CUSTOMER».
- **Delivery:** new sources, rule changes and refreshes are carried out and checked.
- **Monitoring:** the results of the scans, masking, test data and archive jobs are checked and failures corrected.
- **Reporting:** at the end of the month, the monthly report is presented.

3.3 C2 Run — New Sources and Rule Maintenance

New data stores, tables and columns are scanned with the rules in operation; new sensitive fields are classified and proposed to the data protection officer with a masking rule. A rule or a threshold is changed only with the written decision of «CUSTOMER»; the previous version and the date of the change are kept. «DAMALINK DOĞRULASIN»

Changes to data integration flows that carry sensitive data are checked for the integration-time masking mapplets (accelerator 4, Annex 1). «DIGITALLENCY DOĞRULASIN»

3.4 C2 Run — Request Handling

Requests are handled during «SUPPORT HOURS» with the response times below: «DAMALINK DOĞRULASIN»

Priority	Definition	Response Time
High	Unmasked sensitive data found in a non-production environment, or a failed masking or test data refresh before a planned test	«NUMBER» hours
Normal	New sources, rule changes, refresh requests, questions and improvements	«NUMBER» working days

Table 6 — Request priorities and response times.

4. Activities and Timeline

4.1 C1 Archive — Phases

Phase	Activities	Exit Criterion
P0 Kick-off and retention rules	Systems, connections, database constraints, retention rules, data model	Retention rules approved in writing «DAMALINK DOĞRULASIN»
P1 Design and build	Archive definitions, filters, delete and restore flows, scheduling	Archive built in the test environment
P2 Archive and restore test	Test runs, record counts, restore of a sample, performance	Acceptance criterion of Table 10 met
P3 Go-live and handover	First production run, schedule, alerts, documents, training	Handover approved

Table 7 — C1 phases and exit criteria.

4.2 C2 Run — Onboarding

The monthly service starts with an onboarding of «NUMBER» weeks: review of the rules, jobs, schedules and documents in operation, access to the environments and agreement of the request process. If the protection was not built by Komtaş, the findings of the review are reported with the actions needed before the service starts. «DAMALINK DOĞRULASIN»

4.3 C2 Run — Monthly Activities and Term

Timing	Activity	Output
Start of month	Monthly planning with the service owner	Agreed list of requests and refreshes
During the month	New sources, rule changes, test data refreshes, monitoring	Changes delivered and checked
End of month	Job results review, monthly report	Monthly report

Table 8 — C2 monthly cycle.

The monthly service runs for a minimum term of 12 months from the end of the onboarding and is renewed for periods of «NUMBER» months unless terminated with «NUMBER» months' notice. «DAMALINK DOĞRULASIN»

5. Deliverables and Acceptance

5.1 Deliverables

#	Deliverable	Line / Frequency	Content
D1	Archive design	C1, once	Retention rules, tables, constraints, filters, delete and restore flows
D2	Archive in operation	C1, once	Scheduled archive jobs with alerts and logs
D3	Archive and restore test report	C1, once	Record counts, restored sample, run times
D4	Archive technical guide and training	C1, once	Operation, addition of new tables, restore procedure
D5	Onboarding report	C2, once	Findings of the review and actions needed
D6	Monthly report	C2, monthly	Content in Table 3, item 5
D7	Change records	C2, per change	Request, rules or jobs changed, checks, approval

Table 9 — Deliverables.

5.2 Acceptance

Line	Acceptance Criterion
C1 Archive	Archive and restore test passed: archived record counts agree with the source for the agreed filters, and a sample of «NUMBER» records is restored complete and readable «DAMALINK DOĞRULASIN»
C2 Run	Monthly report reviewed; each change accepted after its check, or deemed accepted if no written objection is received within «NUMBER» working days

Table 10 — Acceptance criteria per line.

C1 is accepted once; C2 is reviewed every month. Each C1 deliverable is reviewed by «CUSTOMER» within «NUMBER» working days of delivery.

6. Customer Responsibilities

«CUSTOMER» is responsible for the items below.

- Set the retention rules in writing through its legal function, data protection officer and data owners (C1).
- Provide the archive storage, the database privileges needed for archiving and deletion, and a test environment for the restore test (C1).
- Appoint a service owner as the single point for requests and priorities (C2).
- Approve new rules and rule changes through the data protection officer within «NUMBER» working days (C2).
- Provide access to the environments and keep the licences of the chosen option («PLATFORM») valid.

7. Assumptions and Out of Scope

7.1 Assumptions

- The C1 effort is based on the values in Table 2; a different number of systems or tables is handled through a change request.
- Unused hours of C2 are not carried over to the following month. «DAMALINK DOĞRULASIN»
- Work above the monthly capacity is carried out only after written approval and is invoiced at «hour rate» per hour.
- The rules, jobs and schedules in operation are documented at the start of C2, or are brought up to date in the onboarding.
- The service is delivered remotely with access to the environments of «CUSTOMER»; meetings can be held on site in «CITY».
- The working language and the language of the deliverables is Turkish.

7.2 Out of Scope

The topics below are outside the scope of this proposal. If requested, they are assessed and proposed separately. «DAMALINK DOĞRULASIN»

- Setting the retention periods and KVKK legal advice, including VERBIS registration, privacy notices and consent texts.
- Archiving of unstructured data, e-mail and files.
- New modules and requirements larger than the monthly capacity (separate proposal).
- Identity and access management, data loss prevention and encryption key management.
- Procurement of licences and storage.

8. Team

8.1 Komtaş Team

Role	Responsibility	Participation
Engagement Lead	C1 plan and acceptance; C2 monthly planning, priorities, monthly report	C1 P0 – P3; C2 from the monthly capacity «DAMALINK DOĞRULASIN»
Senior Data Security Specialist	Archive design, constraints, restore procedure	C1 P0 – P2
Data Engineer / Informatica Developer	Archive build, scheduling, tests	C1 P1 – P3
Data Security Specialist	New sources, rules, refreshes, monitoring	C2 from the monthly capacity

Table 11 — Komtaş team and roles.

8.2 Governance

- C1: weekly progress meeting until handover.
- C2: monthly service meeting on the monthly report and the plan for the next month; quarterly review with the sponsor on the capacity needed.

9. Effort and Fees

FILL NOTE — take the band, the C1 effort and the C2 capacity package from the proposal input form (data-privacy-3c-archive-run-girdi-formu). Fees are entered by sales. Draft values:

C1 Archive: S ~30 pd · M ~50 pd · L ~80 pd. C2 Run monthly capacity: S 40 hours · M 80 hours · L 160 hours; minimum term 12 months. «DAMALINK DOĞRULASIN»

The values are not based on recorded effort. Delete this box before sending.

9.1 C1 Archive — Fee

Item	Effort (pd)	Fee (excl. VAT)
C1 Archive (P0 – P3), one-time	«NUMBER»	«fee»

Table 12 — C1 fee. Band: «BAND». All fees exclude VAT.

9.2 C2 Run — Capacity Packages

Package	Hours per Month	Monthly Fee (excl. VAT)
S — up to 10 databases / schemas under protection	«NUMBER»	«monthly fee»
M — 11 to 50 databases / schemas	«NUMBER»	«monthly fee»
L — more than 50 databases / schemas	«NUMBER»	«monthly fee»

Table 13 — Capacity packages. Selected package: «BAND». Keep only the row of the selected package.

9.3 Fees

Line	Item	Basis	Fee (excl. VAT)
C1	Archive	One-time	«fee»
C2	Onboarding	Once	«fee»
C2	Monthly service, package «BAND»	Per month	«monthly fee»
C2	Work above the monthly capacity	Per hour	«hour rate»

Table 14 — Fees. All fees exclude VAT.

9.4 Payment Schedule

C1: «%» of the fee at the exit approval of P1 and the remaining «%» at the acceptance in Table 10. C2: the onboarding fee is invoiced at the end of the onboarding; the monthly fee is invoiced at the end of each month together with the monthly report; work above the capacity is invoiced in the month in which it is carried out.

9.5 Larger Changes

A further module or a requirement larger than the monthly capacity is offered as a separate proposal on the basis of person-days × day rate («day rate», excl. VAT), or as an additional module under service B.

9.6 Not Included in the Fee

- Licence and infrastructure costs of the chosen option («PLATFORM»), including archive storage.
- Work above the monthly capacity unless approved in writing.
- Travel and accommodation outside «CITY».

10. Next Step

The monthly service shows where the protection of sensitive data needs further work. The usual follow-on work is:

Need	Follow-On Work
Further modules or data stores	Service B: additional modules on the same foundation
Classification policy, data ownership, data catalogue	Data Governance
Move of data to the cloud	Data Modernization, ETL Modernization on Google Cloud
Personal data in AI training data	AI Governance Readiness

Table 15 — Follow-on work.

The first step is the signature of this proposal and the start of C1 and of the C2 onboarding on dates agreed with «CUSTOMER».

11. Commercial Terms

11.1 General Terms

- All fees in this proposal are stated in Turkish lira and exclude VAT. Statutory taxes, duties and charges are not included in the fees.
- The proposal is valid until «proposal date + 1 month».
- The fees are valid on condition that the work starts by «price validity date». If the start moves beyond that date for any reason, the fees and pricing terms are reassessed by mutual agreement in the light of the economic and financial conditions at the time of the work.
- C1 is offered at a fixed fee based on Table 2. The C2 monthly fee covers the capacity of the selected package; unused hours are not carried over (Section 7.1).
- The minimum term and the renewal of C2 follow Section 4.3. The package can be changed at the end of each quarter with «NUMBER» days' notice.
- The monthly fee is reviewed once a year on the anniversary of the start of the service, by mutual agreement.

- The classification policy, the decision on which data is masked and the approval of rules remain with «CUSTOMER» (data protection officer, legal and information security); Komtaş implements the decisions recorded in writing. «CUSTOMER» remains the data controller for the personal data processed in the work.
- Payment follows the payment schedule in Section 9. Invoices are payable within «NUMBER» days of the invoice date.
- Scope changes are managed through a written change request; no change is implemented before its impact analysis is approved.
- The parties keep confidential all information they access within the scope of the work. A separate non-disclosure agreement is signed where needed.
- The rights of use of the deliverables, including rule documents, masking and test data configurations and documentation, belong to «CUSTOMER»; Komtaş retains its intellectual property rights in its methodology, templates, accelerators and general know-how. The terms of use of the packaged accelerators (Annex 1, accelerators 1 and 5) are «FIELD».
- This proposal forms an integral annex to the contract to be signed by the parties. In the event of a conflict between the contract and the proposal, the contract prevails.

11.2 Proposal Contact Details

Questions on this proposal and its scope can be addressed to the contacts below.

Area of Responsibility	Full Name	Title	Contact
Commercial	«full name»	«title»	«e-mail / phone»
Technical	«full name»	«title»	«e-mail / phone»

11.3 Proposal Annexes

This proposal is submitted with the following annexes:

- ANNEX-1 — Accelerators
- ANNEX-2 — About Komtaş

ANNEX-1 — Accelerators

The work uses six accelerators: packaged applications, rule sets, libraries and templates that shorten the analysis and the implementation. Each accelerator is described below with the place where it is used in this service.

1. Masking Automation Accelerator

Item	Description
Purpose	Set up persistent masking for a high number of tables and columns without building each rule, plan and assignment by hand in the masking tool «DAMALINK DOĞRULASIN»
How it works	A data model holds the tables, columns, rules, assignments, relationships, entities, groups, plans and connections. The accelerator generates the masking definitions from this model, imports them into Persistent Data Masking and generates and runs the plans (Define → Generate → Import → Process)
Output	More than 100 pre-built masking rules for personal data; batch input from modelling, discovery and catalogue tools; new tables in the data model masked according to the discovery results; shorter implementation than manual set-up
Use in this service	C2: new tables masked through the rule and assignment model (Section 3.3)
Terms of use	«FIELD»

Table 16 — Masking automation accelerator.

2. Discovery Rule Set and Turkish Reference Dictionaries

Item	Description
Purpose	Find Turkish personal data reliably, on the content of the data and on the column names «DAMALINK DOĞRULASIN»
How it works	Data rules (reference dictionary match, pattern, algorithm) combined with column-name rules (regular expressions for Turkish and English names). Reference dictionaries for first names, surnames, company titles, cities and districts, professions and postcodes
Output	Rules for name, surname, TCKN (with checksum), VKN, phone, e-mail, address, city and district, credit card, IBAN, vehicle chassis number and for these values inside free text
Use in this service	C2: scans of new sources and rule maintenance (Section 3.3)

Table 17 — Discovery rule set and Turkish reference dictionaries.

3. Masking Rule Catalogue

Item	Description
Purpose	Give each type of sensitive field a tested set of masking techniques with their constraints «DAMALINK DOĞRULASIN»
How it works	Per field: technique options (encryption, expression, key with seed, nullification, random, substitution from a reference dictionary, mapplet, advanced multi-field rules such as gender-consistent names), naming standard and constraints
Output	Masking rules document per field; constraints such as a valid and unique TCKN, a date of birth shifted within a limit and consistent values across tables through the same seed
Use in this service	C2: masking rules for new sensitive fields (Section 3.3)

Table 18 — Masking rule catalogue.

4. Integration-Time Masking Mapplet Library

Item	Description
Purpose	Detect and mask sensitive data while it moves between systems, so that it does not arrive unmasked in the target «DIGITALLENCY DOĞRULASIN»
How it works	Reusable mapplets for the main sensitive field types are inserted into the data integration flows; the classification decides which fields pass through which mapplet
Output	Integration flows that deliver masked data to the target
Use in this service	C2: changes to data integration flows checked (Section 3.3)
Origin	Applied at a private bank in HR data integrations

Table 19 — Integration-time masking mapplet library.

5. Archive Accelerator

Item	Description
Purpose	Archive records of relational databases whose retention period has ended, with optional deletion from the source and restore from the archive «DAMALINK DOĞRULASIN»
How it works	Packaged application on top of Persistent Data Masking. It finds the tables with records to archive or delete, respects physical and logical constraints and applies filters at several points (Define → Generate → Import → Archive-Delete → Restore); scheduling, alerts per step, logs and user authorisation
Output	Archived records, deletion and restore records, run logs; new tables added in a few steps
Use in this service	C1: archiving, deletion and restore (Section 3.1)
Terms of use	«FIELD»

Table 20 — Archive accelerator.

6. Document Templates

Item	Description
Purpose	Start each phase from tested document structures instead of empty pages «DAMALINK DOĞRULASIN»
How it works	Business requirement document with its question sheet, discovery analysis report template, source-to-target matrix and naming standards
Output	Deliverables in a known structure that the teams of «CUSTOMER» can maintain
Use in this service	C1: business requirement document and archive technical guide

Table 21 — Document templates.

ANNEX-2 — About Komtaş

> *FILL NOTE — the figures in Table 22 and in the bullets below come from the proposals of 2026. Check them against the current corporate profile before sending.*

Komtaş is an independent information technology company that has specialised in enterprise data management in Türkiye since 1989. More than 35 years of focus on a single field has given it an end-to-end view that follows data from the moment it is created to the moment a decision is taken.

Indicator	Value
Founded	1989 — more than 35 years of continuous data-focused activity
Specialist staff	250+ data engineers, architects, consultants and analysts
Offices	Istanbul, Ankara, Izmir, Dubai
Strategic partnerships	10+ global technology vendors
Focus area	Data governance, data architecture, analytics, artificial intelligence and AI agent based solutions
Positioning	"From Data to Agents" — integrated capability from data to AI agents

Table 22 — Komtaş corporate profile.

Service Capabilities

The service portfolio of Komtaş covers the whole life cycle of a data initiative:

- **Data Governance and Data Management:** data governance maturity assessment, framework and organisation design, policy and process design, data catalogue, business glossary, data quality management, master data management, data privacy and classification.
- **Data Architecture and Engineering:** data warehouse and data lake architectures, lakehouse design, data integration and streaming architectures, cloud and on-premises modernisation.
- **Analytics and Artificial Intelligence:** enterprise reporting, advanced analytics, machine learning models, generative AI applications and AI governance.
- **Managed Services and Support:** P1 / P2 / P3 support for production systems, capacity and performance management, continuous improvement services.
- **Training and Capability Building:** product training, role-based data governance training, train-the-trainer programmes.

Data Privacy Experience

> *FILL NOTE — the reference in Table 23 is anonymous. Do not add institution names, contact persons or result figures without written approval; «YEAR» is filled once the year of the project is confirmed, and the «REFERENCE PROJECT» row is deleted if there is no further approved reference.*

Data privacy work in the scope of this package is listed below. Reference calls can be arranged on request, subject to the approval of the institutions concerned. «DIGITALLENCY DOĞRULASIN»

Institution	Work	Measured Result	Year
A private bank — HR data integrations	KVKK classification of HR data; detection of sensitive data during integration; masking mapplets in the integration flows	«RESULT»	«YEAR»
«REFERENCE PROJECT»	«RESULT»		«YEAR»

Table 23 — Data privacy references (anonymous).

Why Komtaş

- **Focus:** Komtaş has worked only in the data field for more than 35 years, with more than 250 specialists and 4 offices.
- **Continuity:** assessment, protection, archiving and monthly run are provided by the same organisation (Section 10).
