GEMINI ENTERPRISE AGENT KIT

Blueprint — internal reference

A Launch · B Agent Pack · C Run · Gemini Enterprise licence + agent and skill library + adaptation + operations

1 **Positioning and commercial logic**
Package summary, commercial logic, evidence and status, target customers, scope boundary.
p. 2 – 6

2 **Architecture and agent catalogue**
Package architecture, technology mapping, catalogue, regulation tracking agent, contract skill, module candidates.
p. 7 – 12

3 **Delivery**
Launch, Agent Pack and Run flows, team, sizing and effort, acceptance criteria.
p. 13 – 18

4 **Follow-on and status**
Follow-on map, risks, open points, verification summary.
p. 19 – 22

Package Summary — What, for Whom, When

KOMTAS

Gemini Enterprise licence with a ready agent and skill library, adapted to the customer and operated monthly. Source: internal meeting with Güner Hacıoğlu (Cloud Solutions), 15.10.2026.

01 · SUMMARY

WHAT IT IS

Gemini Enterprise licence

sold through Komtaş; quoted in a separate licence proposal

Ready agent and skill library

regulation tracking agent, contract skill, four module candidates

Adaptation to the customer

sources, prompts and instructions, tools, tests against acceptance criteria

Operations

usage and answer quality monitoring, maintenance, new skills each month

THREE TIERS

A — Launch

tenant, identity, connectors, one catalogue agent, training, adoption

15–30 working days by band «GÜNER DOĞRULASIN»

B — Agent Pack

two to three agents or skills adapted, priced per agent

about 4–6 weeks «GÜNER DOĞRULASIN»

C — Run

monthly agent operations and new skill development

monthly, min. 12 months «GÜNER DOĞRULASIN»

BASIS — KNOWN FACTS

- Gemini Enterprise for 1,100 users delivered at Şişecam
- Regulation tracking agent confirmed as a sector-independent search and agent asset
- Contract preparation and review skills exist
- Four further Gemini use cases built at the same customer
- Komtaş is a Google Cloud Premier partner
- Komtaş holds 10 Gemini Enterprise licences for internal use

Status: draft. Built from one meeting and candidate notes. Effort, durations, agent details and acceptance thresholds are drafts. Every drafted item carries the orange verification tag and is listed for Güner Hacıoğlu's review (p. 22).

Commercial Logic — Profit Comes from Adaptation and Operations

internal only

KOMTAS

Internal only. Margin figures never appear in the customer deck or in the proposal template.

LICENCE MARGIN · INTERNAL

PROVIDER	CONDITION	MARGIN
Google	Premier partner, base	12%
Google	with incentives and funds	13–15%
Google	large deals (as at Şişecam)	~5–6%
Azure	starting level	3%

Thin licence margin.
In a large Gemini Enterprise deal the licence margin is about half of the base. The licence opens the account; it does not carry the profit.

WHERE THE PROFIT IS

Gemini Enterprise licence
thin margin, separate proposal

↓

A Launch
paid set-up service

↓

B Agent Pack
adaptation, priced per agent

↓

C Run
recurring monthly revenue

B and C carry the profit. A sale that stops at the licence and Launch leaves most of the value unsold.

PRICING RULES

1. Licence price is never in the service proposal; it is referenced as «LICENCE PROPOSAL REF»
2. B is priced per agent: catalogue agent and new agent at different rates
3. C is a monthly fee for a fixed hour capacity with a minimum term
4. Each Launch proposal names the B and C step that follows

Open: fee levels. Day rates, the per-agent price for B and the monthly fee for C are not set. Fees are not part of this blueprint.

Evidence and Status

KOMTAS

What the package rests on today. Internal only: the customer is named here and in the input form, never in customer-facing files.

01 · EVIDENCE

EVIDENCE

1,100

Gemini Enterprise users — Şişecam

Delivered and sold by Komtaş. Described internally as the largest Gemini Enterprise licence sale in Türkiye.

10

Gemini Enterprise licences at Komtaş

Internal use; 2 of the 10 are unused. Internal information only.

GEMINI WORK AT THE SAME CUSTOMER

Regulation tracking agent Resmi Gazete, foreign legislation	core
Contract preparation / review skills legal team	core
Conversational analytics on SAP data sales and marketing	module
Product video and image generation marketing	module
Image generation for catalogue enrichment product management	module
Looker + Gemini Enterprise analytics	module

Done at any other customer: not known.

STATUS AND RISK

Single-customer evidence

All evidence comes from one customer. Selection criterion S1 (demand beyond one customer) can eliminate the candidate.

Ask Sales: pipeline

Open Gemini Enterprise opportunities «NUMBER» · Google Workspace customers without Gemini Enterprise «NUMBER»

Ask Güner Hacıoğlu

Effort spent at Şişecam per agent, team, and what can be reused at another customer.

Customer naming. Customer deck and proposal use the anonymous line "Türkiye's largest Gemini Enterprise deployment, 1,100 users" with a verification tag, until use of the name and of the "largest" claim is approved.

Target Customers and Triggers

KOMTAS

Who is approached and on what occasion. Profiles and triggers are drafted; they are not drawn from recorded deals.

TARGET CUSTOMER PROFILES «GÜNER DOĞRULASIN»

Google Workspace customer
uses Workspace; no Gemini Enterprise yet

Gemini Enterprise already bought
licences in place, low use; no agents beyond the standard assistant

Regulated company with many legal sources
export manufacturing, energy, finance, health, food

Legal team with high contract volume
standard contracts drafted and reviewed every week

TRIGGERS «GÜNER DOĞRULASIN»

Licence bought, low use

Google Workspace or Gemini Enterprise licences are paid for but few users work with them; the licence owner needs a use case.

Many legal sources

a regulated sector; changes in Resmi Gazete and foreign legislation are followed by hand.

High contract volume

the legal team spends time on first drafts and on checking contracts against the company's position.

Internal documents hard to find

policies, procedures and contracts sit in Drive or SharePoint and are searched by hand.

First call. Licence status (existing, new, expansion), user count, Google Workspace or Microsoft 365, identity provider, sources to connect, agent of interest. The answers feed the input form (file 3).

Scope Boundary — What It Is Not

KOMTAS

What the package does not do, and the Komtaş packages it links to without absorbing them.

01 · BOUNDARY

OUT OF SCOPE

- AI governance framework: policy, risk classification, inventory, approval
- Licence price — separate licence proposal
- Legal advice or final legal judgement — agent output is support
- Custom model training «GÜNER DOĞRULASIN»
- Data cleansing in source systems «GÜNER DOĞRULASIN»
- Integration with systems that have no connector or API «GÜNER DOĞRULASIN»

BOUNDARY TO GOVERNANCE

This package builds and operates agents.

It does not set the rules for them. The AI governance framework — AI policy, risk classification, the inventory of AI systems and the approval process — is the work of AI Governance Readiness and of the agent governance candidate (aday-12). Where a customer has no such framework, Agent Kit names the gap and refers to these packages; it applies the customer's existing rules to its own agents.

OTHER PACKAGES

AI Readiness assesses organisational readiness for AI; not this package.

Predictive Analytics builds ML models (churn, demand, recommendation); not this package.

Boundary rule. Agent Kit sets up, adapts and runs agents on Gemini Enterprise. Governance, readiness assessment, ML models and licence pricing are separate packages or proposals.

Package Architecture

KOMTAS

Four layers between the user and the data. Tier A builds the platform layers and one agent; B adds agents; C runs both.

02 · ARCHITECTURE «GÜNER DOĞRULASIN»

USERS — legal / compliance · sales and marketing · product management · all employees

GEMINI ENTERPRISE

- **Agent gallery** — users find and run agents
- **Agent Designer** — no-code agents
- **Search and assistant** — answers over company data

AGENT / SKILL LAYER

- **Regulation tracking** — catalogue agent
- **Contract skill** — catalogue skill
- **Module agents** — SAP, media, catalogue, Looker
- **Custom agents** — ADK / Vertex AI

CONNECTORS — Google Drive · Microsoft SharePoint · SAP · BigQuery · others «...»

SOURCES — documents and contracts · SAP and BigQuery data · public: Resmi Gazete, foreign gazettes, regulators via Google Search grounding «GÜNER DOĞRULASIN»

Identity

Google Workspace or Microsoft Entra ID; users and groups from the customer's directory

Access

agents see only what the user may see in the source; legal / KVKK approval before documents are sent to the service

Layers and tiers. A: tenant, identity, connectors and one catalogue agent. B: further agents in the agent layer, catalogue or new. C: monitoring, maintenance and new skills across the agent layer.

Technology Mapping

KOMTAS

Google components per purpose. Which of them were used in the delivered work, and how, is not yet confirmed.

COMPONENT → ROLE IN THE PACKAGE «GÜNER DOĞRULASIN»

COMPONENT	ROLE IN THE PACKAGE	TIER	USED AT ŞİŞECAM
Gemini Enterprise — agent gallery	users find and run the agents adapted for them	A · B · C	«...»
Agent Designer (no-code agents)	catalogue agents built and adapted without code	A · B	«...»
Connectors	Google Drive, Microsoft SharePoint, SAP, BigQuery and others; source permissions apply	A · B	«...»
Agent Development Kit (ADK) / Vertex AI	custom agents where no-code is not enough	B	«...»
Google Search grounding	public sources for the regulation agent: Resmi Gazete, foreign gazettes, regulators	B	«...»
BigQuery	structured data for analytics agents	B	«...»
Looker	Looker + Gemini Enterprise module	B	«...»
Google Workspace / Microsoft Entra ID	identity: sign-in, users, groups	A	«...»

Open: how the agents were built. Agent Designer, ADK or own code; how public sources are read (Search grounding, scheduled crawl or feed). The last column is filled after review.

Agent Catalogue — Overview

KOMTAS

Two filled entries and four module candidates. The catalogue is the core of the package; the same columns appear in the deck and in the proposal annex.

CATALOGUE «GÜNER DOĞRULASIN»

#	AGENT / SKILL	PROBLEM	INPUT SOURCES	OUTPUT	SECTOR FIT	EFFORT	STATUS
1	Regulation tracking agent	regulatory change followed by hand across many sources and countries	Resmi Gazete, foreign gazettes, regulator sites, topic list	alert summary with relevance tag and link, routed to owner	any regulated sector	~10–15 pd	filled
2	Contract preparation / review skill	drafting and checking contracts takes legal time	templates, clause library, review playbook	first draft; review note with flagged clauses	all sectors	~10–15 pd	filled
3	Conversational analytics on SAP data	«...»	SAP sales / marketing data «...»	«...»	«...»	«NUMBER» pd	candidate
4	Product video and image generation	«...»	product data, brand assets «...»	«...»	«...»	«NUMBER» pd	candidate
5	Catalogue image enrichment	«...»	product catalogue «...»	«...»	«...»	«NUMBER» pd	candidate
6	Looker + Gemini Enterprise	«...»	Looker models, BigQuery «...»	«...»	«...»	«NUMBER» pd	candidate

Adaptation effort per agent. «GÜNER DOĞRULASIN»
Catalogue agent ~10–15 pd per customer; new agent not in the catalogue ~25–40 pd.

Candidates 3–6.
Built at the same customer; fields stay open until the work is described and reuse is checked (p. 12).

Regulation Tracking Agent

confirmed asset

KOMTAS

Core agent of the catalogue. Confirmed in the meeting; the details below are drafted.

02 · CATALOGUE · 1

PROBLEM

Legal and compliance teams follow regulatory change by hand across many sources and countries. Relevant changes are found late or reach the wrong person.

INPUT SOURCES «GÜNER DOĞRULASIN»

- Resmi Gazete (Official Gazette of Türkiye)
- Foreign official gazettes and regulator sites
- The customer's topic list and keywords
- Internal policy owners per topic

HOW IT WORKS «GÜNER DOĞRULASIN»

1. **Collect** — read the listed sources on a schedule
2. **Match** — compare new items with the topic list and keywords
3. **Summarise** — short summary, relevance tag, link to the source
4. **Route and store** — send to the responsible owner; keep a searchable history

OUTPUT — ALERT «GÜNER DOĞRULASIN»

mock

Topic	«TOPIC»
Source	Resmi Gazete, «DATE»
Relevance	High / Medium / Low
Summary	«...»
Owner	«POLICY OWNER»
Link	source document

SECTOR FIT «GÜNER DOĞRULASIN»

manufacturing / export · energy · finance · health · food

ADAPTATION EFFORT ~10–15 pd per customer «GÜNER DOĞRULASIN»

Confirmed asset. Confirmed on 15.10.2026 as a sector-independent search and agent asset. The agent reports; the legal reading of a change stays with the customer's legal or compliance team.

Contract Preparation / Review Skill

skills exist

KOMTAS

Second filled catalogue entry. Two uses: a first draft from a template, and a review against the company's position.

PROBLEM

Drafting contracts from templates and checking incoming contracts against the company's position takes legal time on routine work.

INPUT SOURCES «GÜNER DOĞRULASIN»

Contract templates
approved templates per contract type

Clause library
standard and fallback clauses

Review playbook / red lines
the company's position per clause

HOW IT WORKS «GÜNER DOĞRULASIN»

Preparation

1. user selects contract type and enters deal data
2. skill fills the template from the clause library
3. legal team edits and approves the draft

Review

1. user uploads the counterparty's contract
2. skill compares clauses with the playbook
3. review note lists flagged clauses and deviations

OUTPUT «GÜNER DOĞRULASIN»

First draft
contract text from the approved template and clauses

Review note
flagged clauses, deviations from the playbook, suggested fallback clause

SECTOR FIT all sectors «GÜNER DOĞRULASIN»

ADAPTATION EFFORT ~10–15 pd per customer «GÜNER DOĞRULASIN»

Customer provides.
Templates, clause library and playbook in usable form; a legal owner for tests.

Support, not legal advice. The output supports the legal team. The final review and the decision on every contract stay with the customer's lawyers.

Module Candidates

KOMTAS

Four Gemini use cases built at the same customer. Fields stay open until each is described and checked for reuse.

02 · MODULES

«GÜNER DOĞRULASIN»

To complete with Güner Hacıoğlu. What was built, with which component, at what effort, and whether it runs without customer-specific code. Asset register candidates aday-05 and aday-14 to aday-17 are recorded as modules of this package.

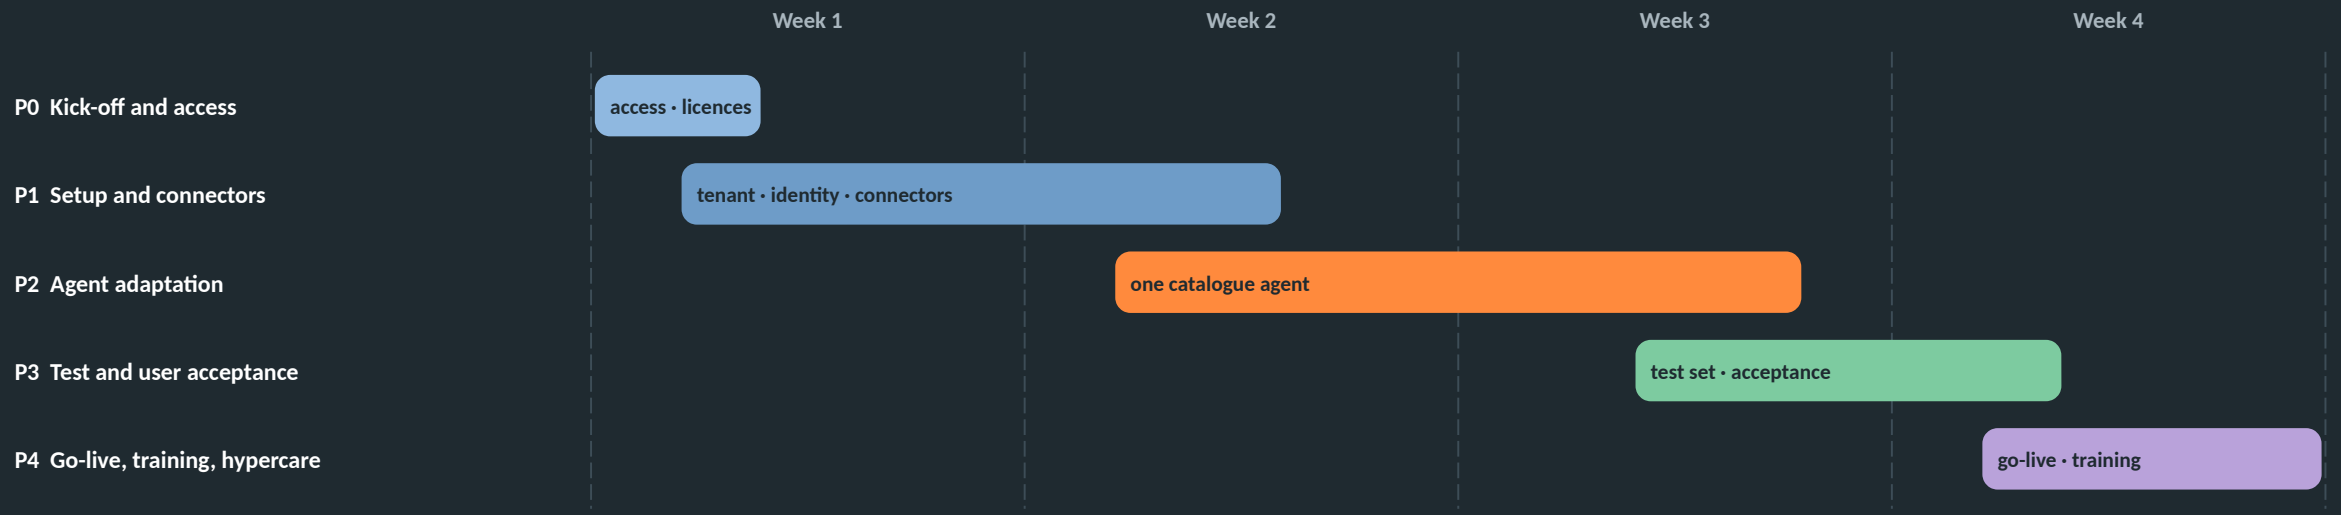

A — Launch: Flow and Timeline

KOMTAS

Licence activation to go-live with one catalogue agent. Customer joins kick-off, user acceptance and training.

03 · TIER A

PLAN · BAND M, 20 WORKING DAYS «GÜNER DOĞRULASIN»

Band S 15 working days, band L 30 working days. Hypercare after go-live: «NUMBER» weeks. «GÜNER DOĞRULASIN»

SCOPE «GÜNER DOĞRULASIN»

Licence and tenant
activation, tenant settings, admin roles

Identity
Google Workspace or Microsoft Entra ID; groups

Connectors
data connections to the agreed sources

One catalogue agent
adapted, tested, live

Training and adoption
user training, adoption support

Entry tier. A ends with one working agent and trained users. The adoption figures after go-live are the basis for offering B and C.

B — Agent Pack: Flow per Agent

KOMTAS

Two to three agents or skills, each through the same four steps. Agents run in parallel with an offset.

FLOW PER AGENT «GÜNER DOĞRULASIN»

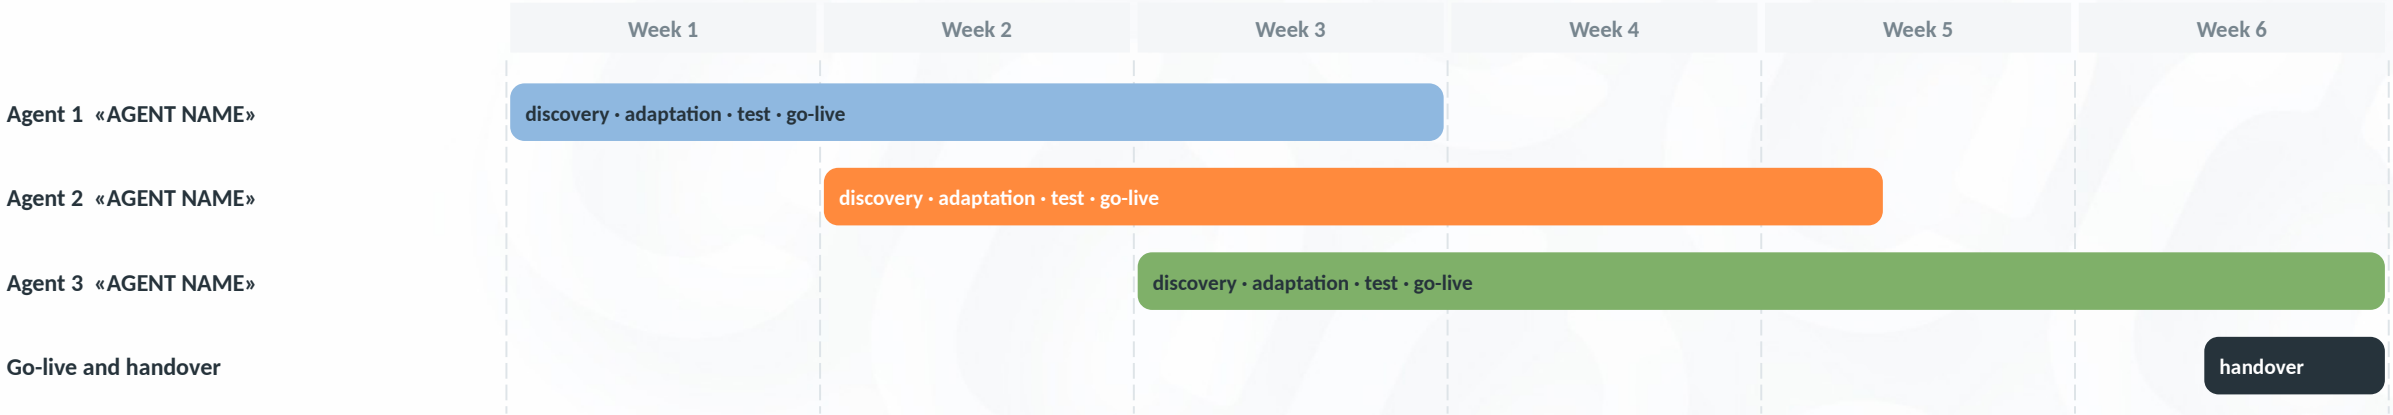

Discovery
use case, users, sources, test set agreed

Adaptation
sources, prompts and instructions, tools

Test
test set run against acceptance criteria

Go-live
release to the user group, handover to C

PLAN · THREE AGENTS, ABOUT 6 WEEKS «GÜNER DOĞRULASIN»

EFFORT PER AGENT «GÜNER DOĞRULASIN»

AGENT TYPE	EFFORT	NOTE
Catalogue agent, adapted	~10–15 pd	sources and prompts change
New agent, not in catalogue	~25–40 pd	built from discovery

Priced per agent. «GÜNER DOĞRULASIN»
B is quoted as a sum of agents, each at the catalogue or new-agent rate. A new agent that proves reusable is added to the catalogue.

C — Run: Monthly Operations and New Skills

KOMTAS

A monthly hour capacity for operating live agents and building new skills. Recurring revenue.

03 · TIER C

MONTHLY CAPACITY «GÜNER DOĞRULASIN»

S — **40 h / month**
one or two live agents

M — **80 h / month**
three to five live agents

L — **160 h / month**
more agents or regular new skills

ACTIVITIES «GÜNER DOĞRULASIN»

Usage and answer quality
monthly usage report; answers checked on a sample

Source and prompt maintenance
new sources, changed topics, prompt fixes

Product change follow-up
Gemini Enterprise releases checked against live agents

User support
questions and issues from the user group

New skill requests
built from the monthly capacity

NEW SKILL REQUEST «GÜNER DOĞRULASIN»

1. **Request**
the customer's product owner submits the need

2. **Sizing**
hours estimated against the capacity

3. **Priority**
ordered within the month's capacity

4. **Build, test, release**
larger requests quoted as B

Term. Minimum term 12 months. Unused hours and their carry-over rule are set in the proposal. «GÜNER DOĞRULASIN»

Team and Roles

KOMTAS

Four roles in A and B; a Run Lead and an Agent Engineer in C. Effort split by role is not yet known.

ROLES «GÜNER DOĞRULASIN»

ROLE	RESPONSIBILITY	A	B	C
Engagement Lead	scope, customer contact, adoption plan, steering	lead	lead	—
AI / Agent Engineer	agent adaptation: sources, prompts and instructions, tools, tests	●	●	●
Cloud Engineer	tenant, identity, connectors, access	●	part	—
Business Analyst	agent discovery, test set with the customer, training material	●	●	—
Run Lead	monthly operations, capacity, usage and quality reporting	—	—	lead

● takes part lead accountable for delivery part part time — not staffed

CUSTOMER-SIDE CONTACTS «GÜNER DOĞRULASIN»

Product owner
owns the agents, approves test sets and acceptance, submits new skill requests

IT and identity admin
licences, identity, connector access; data owners per source

Legal and compliance
topic list, playbook, legal / KVKK approval for documents

Person dependency.
People who built the agents at Şişecam: «NUMBER». Selling at volume needs a second team trained on the catalogue.

Staffing facts to collect.
People with Gemini Enterprise delivery experience «NUMBER» · ADK «NUMBER» · certifications «NUMBER»

Sizing — Drivers, S / M / L Bands and Effort

draft — no recorded effort

KOMTAS

Drivers come from the input form (file 3). Durations in working days, effort in person-days (pd), C in hours per month.

SIZING DRIVERS «GÜNER DOĞRULASIN»

DRIVER	S	M	L
Users	≤100	101–500	>500
Data sources to connect	≤2	3–5	>5
Agents / skills	1	2–3	>3
Countries / languages (regulation agent only)	1	2–5	>5

Band rule. «GÜNER DOĞRULASIN»
The band is the highest band reached by at least three drivers. The country / language driver counts only when the regulation agent is selected; otherwise the rule works on three drivers and needs two of them. A driver at L also counts as reaching M.

Example.
600 users (L), 4 sources (M), 3 agents (M), 6 countries (L), regulation agent selected → three drivers at M or above, two at L → band M.

DURATION / EFFORT «GÜNER DOĞRULASIN»

TIER	S	M	L
A Launch	15 working days ~20 pd	20 working days ~30 pd	30 working days ~45 pd
C Run	40 h / month	80 h / month	160 h / month

B Agent Pack per agent, not by band: catalogue agent ~10–15 pd, new agent ~25–40 pd; 2–3 agents ≈ 4–6 weeks

Calibration.
Draft — no recorded effort. Bands and person-days are updated with Güner Hacıoğlu's data from the Şişecam work.

HOW THE BAND IS USED

1. The input form (file 3) records the drivers
2. The band rule gives S, M or L
3. A duration and C capacity are read from the table; B is summed per agent
4. Effort goes into the proposal template (file 4)

Acceptance Criteria

KOMTAS

Each agent is accepted against a test set agreed with the customer. Thresholds are set per customer; no accuracy figure is promised in advance.

ACCEPTANCE PER AGENT «GÜNER DOĞRULASIN»

1. **Test set agreed**
   in discovery: sample questions, documents or a past period with known changes
2. **Expected results written**
   the product owner marks what a correct answer or alert is
3. **Test run before go-live**
   agent output compared with the expected results
4. **Sign-off**
   product owner signs off; open items go to C

CRITERIA AND THRESHOLDS «GÜNER DOĞRULASIN»

AGENT	CRITERION	MEASURE	THRESHOLD
Regulation	source coverage	listed sources read in the test period	«NUMBER»%
Regulation	alert relevance	alerts rated relevant by the owner	«NUMBER»%
Regulation	timeliness	time from publication to alert	«NUMBER» h
Contract	flagged clauses	playbook deviations found in the sample	«NUMBER»%
All agents	answer correctness	correct answers on the sample questions	«NUMBER»%
All agents	source link	answers that cite a valid source	«NUMBER»%

No figure without a test set.
Thresholds are agreed with the customer on its own sample. Results from other customers are not quoted as a promise.

Outside acceptance.
The legal correctness of an interpretation, and the quality of the customer's source data, are not acceptance criteria of the agent.

Follow-on Map

KOMTAS

Each tier leads to a named next step. In the proposal template this is the section 'Next step', without margin figures.

AFTER → NEXT STEP «GÜNER DOĞRULASIN»

AFTER	NEXT STEP	TYPE
A Launch	B Agent Pack: more agents from the catalogue or new agents	service project
A or B go-live	C Run: monthly operations and new skills	recurring service
Adoption grows	user expansion: more Gemini Enterprise licences	licence (separate proposal)
Analytics agents in use	Looker and BigQuery work	project
Many agents live	AI Governance Readiness; agent governance (aday-12)	assessment / project
Overall	Google Cloud consumption through Komtaş	consumption

In the proposal template.
Section 'Next step': new agents, user expansion, operations, consumption. No margin figures, no prices.

From C to B.
New skill requests larger than the monthly capacity are quoted as a new Agent Pack.

Risks

KOMTAS

Known risks of the package as drafted.

RISKS

RISK	EFFECT	HANDLING
Single-customer evidence	S1 elimination; weak reference for sales	pipeline from Sales; second customer as pilot
Data access and quality	agent answers limited by source data	sources and access checked in discovery; cleansing out of scope
Gemini Enterprise product changes	agents or connectors change behaviour	product change follow-up in C; retest after releases
Person dependency	delivery capacity tied to the people who built the agents	second team trained on the catalogue
Legal / KVKK approval	start delayed until documents may be sent to the service	approval asked at the first call; blocker in the input form
Answer quality expectations	customer expects exact answers	test set and thresholds agreed in discovery; output framed as support

Biggest risk. Single-customer evidence. Until a second customer or a named pipeline exists, the package stays a candidate under criterion S1.

Open Points

KOMTAS

Questions that stay open after the 15.10.2026 meeting, by owner.

04 · OPEN POINTS

Güner Hacıoğlu — delivery

- Effort spent per agent at Şişecam
- How the agents were built: Agent Designer, ADK, own code
- Module candidates 3–6: what was built, reusable or not
- Test sets and acceptance used so far

Sales

- Gemini Enterprise pipeline and Workspace customers
- Per-agent price for B and monthly fee for C
- Licence proposal process and reference format
- Second customer for a pilot

Legal / KVKK

- Standard approval text for sending documents
- Data location and retention in Gemini Enterprise
- Disclaimer wording for agent output
- Regulation sources that may be read

Management

- Use of the name Şişecam in customer files
- Use of the "largest in Türkiye" claim (Google confirmation)
- Boundary with aday-12 agent governance
- Unused internal licences: demo use

Reference projects. Customer-facing files use «REFERENCE PROJECT» placeholders until references are approved.

Verification Summary

KOMTAS

Draft for Güner Hacıoğlu's review. Every drafted statement carries the orange verification tag and has one question in the sidecar file.

05 · VERIFICATION

TAGS IN THIS FILE

46

tags, same in EN and TR

sidecar: gemini-agent-kit-1-blueprint-tr.json
