Gemini Enterprise Agent Kit — Proposal Input Form

Information to be collected to price the Gemini Enterprise setup, the adaptation of ready agents / skills to the customer and their operation in three tiers — A Launch, B Agent Pack and C Run. Sections follow the Proposal Set codes (G1–G8). Once the form is completed and returned, the proposal text (file 4) is produced. Statements followed by the orange verification tag are drafts to be verified by Güner Hacıoğlu.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the Assumptions and Out of Scope section.

The "WHERE IT FILLS IN THE PROPOSAL" column of each row names the section or variable field of the proposal template (file 4). Scope limits are written into the proposal as «NUMBER»; users, data sources and agents beyond the limit are out of scope. G1–G3 are asked for all three tiers; G4–G6 are for A and B (G6 only if the Regulation Tracking Agent is selected); G7 is for A only, G8 for C only.

LIMIT OF THE SERVICE: Gemini Enterprise Agent Kit = Gemini Enterprise licence + ready agent / skill library + adaptation to the customer + operations. The package builds and operates agents. The licence price is not written into this proposal; the separate licence proposal is referenced with «LICENCE PROPOSAL REF».

A Launch: licence activation and tenant setup, identity (Google Workspace or Microsoft Entra ID), data connections (connectors), 1 ready agent from the catalogue, user training, adoption support. «GÜNER DOĞRULASIN»

B Agent Pack: 2–3 agents / skills adapted; priced per agent. «GÜNER DOĞRULASIN»

C Run: monthly agent operations and new skill development from a monthly capacity; minimum term 12 months (draft). «GÜNER DOĞRULASIN»

OUT OF SCOPE: governance framework (AI policy, risk classification, inventory, approval); licence price (separate proposal); legal advice and final legal judgement (agent output is support); custom model training; data cleansing of source systems; integration with systems that have no connector or API. «GÜNER DOĞRULASIN»

NEIGHBOURING PACKAGES: governance framework → AI Governance Readiness and the Agent governance candidate (aday-12); organisational readiness assessment → AI Readiness; ML models → Predictive Analytics.

G1 · A·B·C · IDENTITY — Organisation and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER»	
○	Legal entities and group companies that will use the licence — names; for a single company the row is deleted	Cover «GROUP COMPANIES», Scope	
○	Sector and reason for the request — for the one-paragraph context	Purpose «CUSTOMER CONTEXT»	
●	**Is there an RFP, specification or requirements list; its number, response format and deadline**	Structure and response format of the proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», Commercial Terms «proposal date + 1 month»	
○	Procurement process, approved budget and expected invoice payment term; is monthly invoicing accepted for C Run	Effort and Fees, Commercial Terms «NUMBER» days payment term	
○	Where are Google Workspace / Gemini Enterprise licences bought today — directly, through Komtaş, through another partner or reseller	Licence, internal: Commercial frame	
○	Are there competitors, and who (another partner, Microsoft Copilot etc.)	Emphasis and section weights	

G2 · A·B·C · DECISION — Trigger, Tier Choice and Licence Status

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**What triggers the work — Google Workspace or Gemini Enterprise licence already bought but low use; regulated sector with many legal sources; high contract volume; need to search internal documents** «GÜNER DOĞRULASIN»	Purpose «CUSTOMER CONTEXT»	
●	**Which tiers are wanted — A Launch / B Agent Pack / C Run; together (e.g. A + C, A + B + C) or in sequence**	Cover «TIER», Tier blocks A / B / C, Service Selection Check	
●	**Licence status — existing / new / expansion; number of licences, edition, end date; who prepares the licence proposal and when**	Licence «LICENCE STATUS», «LICENCE PROPOSAL REF», Assumptions and Out of Scope	
○	Which decision will the results support — user expansion, new use cases, licence renewal, rollout by business unit	Purpose «CUSTOMER CONTEXT»	
○	Is there a target date — go-live, licence start or renewal, budget period	Activities and Timeline	
○	Has there been an earlier Gemini / generative AI pilot or an agent built in house; what was the outcome	Approach, Assumptions and Out of Scope	
○	Are an AI policy, usage rules and an approval process in place (the governance framework is outside this package)	Assumptions and Out of Scope, Next Step (AI Governance Readiness)	

> The value of the package lies in the recurring work the agents take over and in the licence actually being used. If the work to be handed to agents cannot be written, the Purpose section stays weak and the work reads as a licence installation only.

G3 · A·B·C · USERS — Users, Groups and Identity Provider

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of users — total licences and users in the first rollout**	Scope «NUMBER» users, Driver 1	
○	User groups and units — e.g. legal, compliance, marketing, sales, product management; which group starts first	Scope «USER GROUPS», Customer Responsibilities, Activities and Timeline	
●	**Productivity suite — Google Workspace, Microsoft 365 or both**	Scope «WORKSPACE», Approach	
●	**Identity provider — Google Cloud Identity / Workspace or Microsoft Entra ID; SSO and federation status; user and group synchronisation**	Scope «IDENTITY PROVIDER», Customer Responsibilities, Assumptions and Out of Scope	
○	Is there a GCP organisation and a project to be used for Gemini Enterprise; who administers it (customer IT, another partner)	Customer Responsibilities	
○	Working languages of the users (Turkish, English, other)	Scope, G7 training language	
○	Is there a company rule on data location (region) or transfer of data abroad	Assumptions and Out of Scope, G4 KVKK approval	

G4 · A·B · DATA — Data Sources to Connect, Access and Data Owner

> Gemini Enterprise connects to sources such as Google Drive, Microsoft SharePoint, SAP, BigQuery through connectors; the permission model of the sources is kept. Integration with systems that have no connector or API is out of scope. «GÜNER DOĞRULASIN»
>
> No data cleansing is done in the source systems. Legal / KVKK approval for sending documents to the service is a blocker.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Sources to connect — Google Drive, SharePoint, SAP, BigQuery, other; their number (table below)**	Scope «DATA SOURCES», Driver 2	
●	**Access method per source — ready connector, API, export; service account or user permission**	Approach, Customer Responsibilities, Assumptions and Out of Scope	
●	**Data owner of each source and the person / unit that grants access**	Customer Responsibilities	
●	**Has legal / KVKK approval been given for sending documents to Gemini Enterprise; if not, who approves and when**	Customer Responsibilities, Assumptions and Out of Scope	
○	Approximate volume per source — number of documents, tables / reports	Scope	
○	Sources containing personal or confidential data and access restrictions	Assumptions and Out of Scope	
○	Known data quality issues (data cleansing is out of scope)	Assumptions and Out of Scope	

Data sources to connect — the first row is an example; rows are added as needed.

#	SOURCE	SYSTEM	ACCESS METHOD	DATA OWNER	NOTE
–	Example: Contract archive	SharePoint	Connector	Legal Department	
1					
2					
3					
4					
5					

G5 · A·B · AGENTS — Catalogue Agents Selected and New Agent Need

A Launch includes 1 ready agent from the catalogue; B Agent Pack adapts 2–3 agents / skills. Catalogue (Annex 1 of the proposal):

1 Regulation Tracking Agent — scans Resmi Gazete and foreign countries' legislation; sector-independent. 2 Contract preparation / review skill — its output supports the legal team; final review stays with the lawyers.

Module candidates (done at Şişecam only): 3 conversational analytics on SAP data · 4 product video and image generation · 5 image generation for catalogue enrichment · 6 Looker + Gemini Enterprise. «GÜNER DOĞRULASIN»

Acceptance: a test set agreed with the customer for each agent; criteria e.g. source coverage, relevance of alerts, answer correctness on a sample; thresholds «NUMBER». «GÜNER DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Catalogue agents selected — 1 in A, 2–3 in B (table below)**	Annex 1 «AGENT NAME», «TIER BLOCK — A LAUNCH», «TIER BLOCK — B AGENT PACK», Driver 3	
●	**Need for a new agent not in the catalogue — problem to solve, input sources, expected output**	«TIER BLOCK — B AGENT PACK», Effort and Fees	
○	Business owner and test users for each agent	Customer Responsibilities, Deliverables and Acceptance	
○	Who prepares the test set; customer expectation for acceptance thresholds	Deliverables and Acceptance	
○	If the contract skill is selected — are contract templates, a clause library, a review playbook / red lines available	Customer Responsibilities, Assumptions and Out of Scope	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	If conversational analytics is selected — SAP version (ECC, S/4HANA), BW or copy in BigQuery; which sales / marketing data	Scope, G4 source table	
○	Channel for the agent output — Gemini Enterprise interface, e-mail, Google Chat / Microsoft Teams	Approach, Assumptions and Out of Scope	

Agents selected — write A or B in the tier column; new agents are added as “New”.

#	AGENT / SKILL	CATALOGUE / NEW	TIER (A / B)	BUSINESS OWNER	NOTE
1	Regulation Tracking Agent	Catalogue			Fill in G6
2	Contract preparation / review	Catalogue			
3	SAP data — conversational analytics	Module candidate			
4	Product video and image generation	Module candidate			
5	Catalogue image enrichment	Module candidate			
6	Looker + Gemini Enterprise	Module candidate			
7		New			
8		New			

G6 · A·B · REGULATION — Regulation Tracking Agent (only if this agent is selected)

> If the Regulation Tracking Agent is not selected, this section is skipped and the country / language driver does not enter the band calculation.
>
> Input: Resmi Gazete, foreign official gazettes and regulator sites, the customer’s topic list / keywords, internal policy owners. «GÜNER DOĞRULASIN»
>
> Output: periodic alert summary with a relevance tag and source link; routing to the responsible owner; searchable history. «GÜNER DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Countries and languages to track (table below)**	Scope «COUNTRIES AND LANGUAGES», Driver 4	
●	**Topic list and keywords — who prepares it, how many topics**	Customer Responsibilities, «TIER BLOCK — A LAUNCH», «TIER BLOCK — B AGENT PACK»	
○	Alert recipients — responsible person / unit per topic	Customer Responsibilities	
○	Alert frequency (daily, weekly) and channel	Scope «FREQUENCY», Approach	
○	Sources to watch besides Resmi Gazete — sector regulator sites, foreign official gazettes, other	Scope, Assumptions and Out of Scope	
○	How much history is to be loaded (start date)	Scope, Assumptions and Out of Scope	
○	Review step of the legal / compliance team for the agent output — final legal judgement stays with the legal team	Assumptions and Out of Scope, Customer Responsibilities	

Countries to track — the first row is an example; rows are added as needed.

#	COUNTRY	LANGUAGE	SOURCES	TOPICS	ALERT RECIPIENT
–	Example: Türkiye	Turkish	Resmi Gazete	Example: export, environment	Compliance Department
1					
2					
3					
4					
5					

G7 · A · TRAINING — User Training and Adoption (A only)

> A Launch includes user training, hypercare after go-live and adoption support (usage tracking, key user support). «GÜNER DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Training model — remote / on-site, train-the-trainer or all users; number of sessions**	«TIER BLOCK — A LAUNCH», Activities and Timeline	
○	Participants — number, groups; key users / champions	«TIER BLOCK — A LAUNCH», Customer Responsibilities	
○	Language of training and material	Deliverables and Acceptance	
○	Expected hypercare duration («NUMBER» weeks)	Activities and Timeline, Assumptions and Out of Scope	
○	If on-site, city and room / equipment	Assumptions «CITY», Customer Responsibilities	

G8 · C · OPERATIONS — Monthly Capacity, Support and Term (C only)

> C Run activities: monitoring of usage and answer quality, source and prompt maintenance, product-change follow-up, user support, new skill requests from the monthly capacity. «GÜNER DOĞRULASIN»
>
> A new skill request is raised by the customer and its effort is deducted from the monthly capacity; a request beyond the capacity is proposed as a separate B Agent Pack. «GÜNER DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Expected monthly capacity — which of the S / M / L hours of the band table**	«TIER BLOCK — C RUN», Effort and Fees «monthly fee», «hour rate»	
●	**Term — minimum term and start date**	«TIER BLOCK — C RUN», Commercial Terms	
○	Support hours and channel (business hours, ticket, e-mail); expected response time	«TIER BLOCK — C RUN», Assumptions and Out of Scope	
○	Expected number of new skills per period and their topics	«TIER BLOCK — C RUN»	
○	Person on the customer side responsible for the agents (product owner)	Customer Responsibilities	
○	Reporting cadence (monthly usage and quality report); expectation on carrying over unused capacity	«TIER BLOCK — C RUN», Commercial Terms	

Band Estimate — A Launch, B Agent Pack and C Run

Completed after the answers are collected. The band sets the A Launch duration and the C Run monthly capacity; B Agent Pack is calculated per agent. The band is the highest band reached by at least three drivers. The country / language driver counts only if the Regulation Tracking Agent is selected; otherwise the rule works on three drivers and the highest band reached by at least two of them is selected. «GÜNER DOĞRULASIN»

DRAFT — no recorded effort; the bands are to be updated with Güner Hacıoğlu's data. Komtaş effort is not written into the proposal before delivery confirms it.

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Users (G3) «GÜNER DOĞRULASIN»	≤ 100	101 – 500	> 500	
2	Data sources to connect (G4) «GÜNER DOĞRULASIN»	≤ 2	3 – 5	> 5	
3	Agents / skills (G5) «GÜNER DOĞRULASIN»	1	2 – 3	> 3	
4	Countries / languages — Regulation Tracking Agent only (G6) «GÜNER DOĞRULASIN»	1	2 – 5	> 5	
	RESULT — selected band	S	M	L	

Duration and effort — mark the chosen tier and band. Duration in working days (calendar duration), effort in person-days (pd, total effort).

#	TIER	SMALL (S)	MEDIUM (M)	LARGE (L)	SELECTED
A	Launch «GÜNER DOĞRULASIN»	15 working days ~20 pd	20 working days ~30 pd	30 working days ~45 pd	
C	Run — monthly capacity «GÜNER DOĞRULASIN»	40 h / month	80 h / month	160 h / month	

B Agent Pack — write each selected agent on a row; the effort is taken from the reference range for its type.

#	B AGENT PACK — AGENT (G5)	CATALOGUE / NEW	EFFORT / AGENT	DURATION	SELECTED pd
–	Reference: catalogue agent adaptation «GÜNER DOĞRULASIN»	Catalogue	~10–15 pd		
–	Reference: new agent not in the catalogue «GÜNER DOĞRULASIN»	New	~25–40 pd		
1					
2					
3					
	TOTAL — 2–3 agents «GÜNER DOĞRULASIN»			≈ 4–6 weeks	

PHASES (A) — P0 kick-off and access · P1 setup and connectors · P2 agent adaptation · P3 test and user acceptance · P4 go-live, training, hypercare. «GÜNER DOĞRULASIN»

FLOW (B, per agent) — discovery → adaptation (sources, prompts / instructions, tools) → test against acceptance criteria → go-live. «GÜNER DOĞRULASIN»

TECHNOLOGY — Gemini Enterprise (agent gallery, Agent Designer / no-code agents, connectors); Agent Development Kit (ADK) / Vertex AI for custom agents; Google Search grounding for public sources; BigQuery; Looker. «GÜNER DOĞRULASIN»

TEAM — Engagement Lead · AI / Agent Engineer · Cloud Engineer (identity, connectors) · Business Analyst (agent discovery); C: Run Lead + Agent Engineer. «GÜNER DOĞRULASIN»

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	KOMTAS-«CUSTOMER ABBREVIATION»-GAK-«YEAR»-«SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month» · «price validity date»	Cover, Commercial Terms	Send date + 1 month (G1)	
3	Cover «TIER» · Tier A / B / C	Tier blocks, Activities and Timeline, Deliverables and Acceptance	G2 answer and Service Selection Check; blocks not chosen are deleted	
4	«AGENT NAME» (one sub-section per agent)	«TIER BLOCK — B AGENT PACK», Annex 1 Agent Catalogue	G5 table; the B sub-section is copied for each agent	
5	«BAND» · «NUMBER» working days · «NUMBER» person-days	Activities and Timeline, Effort and Fees	Band worksheet, delivery confirmation	
6	«fee» · «amount» · «monthly fee» · «day rate» · «hour rate»	Effort and Fees	A and B: band / agent × role-based day rate; C: monthly capacity, work above it at the hour rate; sales sets the payment pattern	
7	«LICENCE PROPOSAL REF»	Licence	Number and date of the separate licence proposal; no licence figure in this proposal	
8	«NUMBER» users · «LICENCE STATUS» · «WORKSPACE» · «IDENTITY PROVIDER» · «USER GROUPS» · «DATA SOURCES» · «COUNTRIES AND LANGUAGES» · «FREQUENCY»	Scope	G2, G3, G4 and G6 answers	
9	Next step items	Next Step	Follow-on Interest table; no margin figures	
10	«REFERENCE PROJECT»	Annex 2 About Komtaş	Only references approved for this proposal; no customer name without approval. «GÜNER DOĞRULASIN»	
11	«full name» · «title» · «e-mail / phone»	Commercial Terms	Komtaş commercial and technical contact	

Service Selection Check

Before filling in the form, make sure that Gemini Enterprise Agent Kit (A, B or C) is the right service. One request can match more than one row.

STATUS	RIGHT SERVICE
A licence is bought or will be bought; setup, identity, connectors and a first agent are wanted	A — Launch
Gemini Enterprise is in place; 2–3 more agents / skills are wanted	B — Agent Pack
A new setup and several agents are wanted together	A + B
Agents are live; monitoring, maintenance, support and new skills are wanted	C — Run
Only a licence purchase or user expansion is wanted; no service	Separate licence proposal — this package is not used
The request is an AI policy, risk classification, inventory and approval process	AI Governance Readiness / Agent governance (aday-12)
The request is an assessment of the organisation’s readiness for AI	AI Readiness
The request concerns prediction models (ML)	Predictive Analytics

STATUS	RIGHT SERVICE
The request is question answering with Gemini on Looker reports / BigQuery data	B — module candidate 6 (Looker + Gemini Enterprise); Looker interest is recorded
The request is custom model training	Out of scope — this package is not used

Follow-on Interest

Follow-on work the customer may be interested in; feeds the Next Step section of the proposal. No margin figures appear in the proposal.

#	FOLLOW-ON WORK	RELATED TRIGGER	INTEREST (YES / NO / LATER)	NOTE
1	More agents (another B Agent Pack)	New use case, new unit		
2	User expansion (licence)	Rollout		
3	C Run — agent operations	Agents in production		
4	Looker / BigQuery work	Reporting and conversational analytics		
5	AI Governance Readiness	AI policy and approval process missing		

COMMERCIAL FRAME — INTERNAL ONLY. This box, its rates and the customer name are not written into the customer deck or the proposal.

The Google licence margin is thin: Premier base 12%, 13–15% with incentives, ~5–6% in large deals of this size; Azure 3%. Profit comes from adaptation (B Agent Pack) and operations (C Run, recurring revenue). The licence price sits in the separate licence proposal («LICENCE PROPOSAL REF»).

Evidence: Gemini Enterprise deployment for 1,100 users at Şişecam (internally recorded as the largest Gemini Enterprise licence sale in Türkiye); Komtaş's own 10 licences (2 unused). The proposal and the deck do not name the customer; the anonymous wording is used.

Single-customer risk: today there is evidence from one customer only (elimination risk under selection criterion S1). The Gemini Enterprise pipeline is requested from Sales.

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
G1	Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries	
G1	Is there an RFP, specification or requirements list; its number, response format and deadline	
G2	What triggers the work — Google Workspace or Gemini Enterprise licence already bought but low use; regulated sector with many legal sources; high contract volume; need to search internal documents	
G2	Which tiers are wanted — A Launch / B Agent Pack / C Run; together (e.g. A + C, A + B + C) or in sequence	
G2	Licence status — existing / new / expansion; number of licences, edition, end date; who prepares the licence proposal and when	
G3	Number of users — total licences and users in the first rollout	
G3	Productivity suite — Google Workspace, Microsoft 365 or both	
G3	Identity provider — Google Cloud Identity / Workspace or Microsoft Entra ID; SSO and federation status; user and group synchronisation	
G4	Sources to connect — Google Drive, SharePoint, SAP, BigQuery, other; their number (table below)	

SECTION	BLOCKER QUESTION	ANSWERED?
G4	Access method per source — ready connector, API, export; service account or user permission	
G4	Data owner of each source and the person / unit that grants access	
G4	Has legal / KVKK approval been given for sending documents to Gemini Enterprise; if not, who approves and when	
G5	Catalogue agents selected — 1 in A, 2–3 in B (table below)	
G5	Need for a new agent not in the catalogue — problem to solve, input sources, expected output	
G6	Countries and languages to track (table below)	
G6	Topic list and keywords — who prepares it, how many topics	
G7	Training model — remote / on-site, train-the-trainer or all users; number of sessions	
G8	Expected monthly capacity — which of the S / M / L hours of the band table	
G8	Term — minimum term and start date	

Blocking conditions and their effect on the proposal

#	CONDITION	EFFECT ON THE PROPOSAL	ACTION	STATUS
1	No licence approval	The tenant cannot be set up; the proposal is not written or the start date is tied to the day the licence is active	Clarify the status of the licence proposal in G2	
2	No data access permission	Connectors cannot be set up; the agent works only with accessible sources; written into Scope and Assumptions	Identify the data owners in G4	
3	No legal / KVKK approval for documents	Documents cannot be sent to the service; the related agents cannot start	Get the approver and the lead time in G4	
4	No connector for a key source	Integration is out of scope; the agent scope is narrowed or the source is provided by export	Fix the source and the alternative in G4	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the Assumptions and Out of Scope section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold.

The second and third rows of G2 have a special place: without a tier choice the Tier blocks, timeline and effort cannot be written; without the licence status the Licence section cannot be written. If the customer wants a licence only, the right work is a separate licence proposal.
