Gemini Enterprise Agent Kit · Delivery

Gemini Enterprise Agent Kit — «TIER»

Technical and Commercial Proposal

Set-up of Gemini Enterprise, ready agents adapted to the organisation, and agent operations

Proposal No: KOMTAS-«CUSTOMER ABBREVIATION»-GAK-«YEAR»-«SEQUENCE»

Proposal Date: «dd Month yyyy»

Validity: «proposal date + 1 month»

VARIABLE GLOSSARY — in this template only the fields inside « » change per customer. All other text is fixed.

Identity: «CUSTOMER» short customer name used in the text · «CUSTOMER NAME» full legal name (cover) · «CUSTOMER ABBREVIATION» short code in the proposal number · «YEAR» year · «SEQUENCE» proposal sequence number · «dd Month yyyy» proposal date · «proposal date + 1 month» end of validity · «price validity date» latest start date for which the fees stay valid · «TIER» selected tier or tiers: Launch, Agent Pack, Run

Context: «CUSTOMER CONTEXT» one paragraph: company or group, sector, current use of Google Workspace / Microsoft 365 and Gemini, reason for the request · «GROUP COMPANIES» group companies in scope; delete the line for a single company

Scope: «LICENCE STATUS» existing licence, new licence or licence expansion · «WORKSPACE» Google Workspace or Microsoft 365 · «IDENTITY PROVIDER» Google Workspace (Cloud Identity) or Microsoft Entra ID · «USER GROUPS» user groups or departments in scope · «DATA SOURCES» sources to connect (e.g. Google Drive, Microsoft SharePoint, SAP, BigQuery) · «COUNTRIES AND LANGUAGES» countries and languages followed by the regulation tracking agent · «FREQUENCY» alert frequency of the regulation tracking agent (e.g. daily, weekly) · «BAND» sizing band S, M or L from the proposal input form

Agents: «AGENT NAME» name of an agent or skill selected from the catalogue, or of a new agent · «...» detail to be completed for the agent concerned

Tier: «TIER BLOCK — A LAUNCH» text that applies only to tier A Launch · «TIER BLOCK — B AGENT PACK» text that applies only to tier B Agent Pack · «TIER BLOCK — C RUN» text that applies only to tier C Run

Values: «NUMBER» numeric value (count, days, weeks, months, hours) · «%» percentage

Commercial: «fee» fee excl. VAT · «monthly fee» monthly fee of tier C Run excl. VAT · «amount» payment amount excl. VAT · «day rate» person-day rate (change requests) · «hour rate» hourly rate for work above the monthly capacity of tier C Run · «CITY» city where on-site meetings are free of charge · «LICENCE PROPOSAL REF» number of the separate Gemini Enterprise licence proposal

Annex: «REFERENCE PROJECT» reference project approved for this proposal (no names without permission)

Contacts: «full name» contact name · «title» contact title · «e-mail / phone» contact details

Markers: TIER BLOCK markers are resolved as described in the first fill note; if a block is kept, only its marker is deleted. The orange GÜNER DOĞRULASIN tag marks a draft statement to be verified before use. FILL NOTE boxes are internal and are deleted before sending.

Contents

FILL NOTE — this template covers the three tiers of Gemini Enterprise Agent Kit: A Launch, B Agent Pack and C Run. The tiers can be combined: A alone, A + C, A + B + C, or B (with or without C) for a customer that already uses Gemini Enterprise. Delete every section, paragraph, bullet and table row carrying the marker of a tier that is not offered («TIER BLOCK — A LAUNCH», «TIER BLOCK — B AGENT PACK» or «TIER BLOCK — C RUN»), delete the markers of the tiers kept, and renumber. «GÜNER DOĞRULASIN»

Statements followed by the orange GÜNER DOĞRULASIN tag are draft assumptions of the package (agents, sources, durations, effort, roles, acceptance criteria, scope). They are verified with Cloud Solutions before the template is used; after verification only the tag is deleted. No proposal is sent with a tag in it.

Order of completion: tiers → environment and agents (Tables 2 and 3) → one sub-section per agent in Section 4.2 → band, duration and effort from the proposal input form (Section 10) → fees and payment schedule → licence proposal reference (Section 11) → Annex 1 (keep only the selected agents) → remaining placeholder fields. Licence prices, margin, discount or incentive figures are never written into this proposal.

1. Purpose

«CUSTOMER CONTEXT»

The aim of this proposal is to put Gemini Enterprise into use at «CUSTOMER» with agents that take over defined, recurring knowledge work. Gemini Enterprise Agent Kit combines the Gemini Enterprise licence (offered in a separate licence proposal), a library of ready agents and skills, their adaptation to the sources and processes of «CUSTOMER», and the operation of the agents after go-live.

Typical work that the agents support is:

- Following changes in legislation and regulation across many sources and countries, and routing the relevant changes to the responsible owners.
- Preparing contracts from templates and reviewing contracts against the position of the company.
- Finding information in internal documents, reports and business systems.

Gemini Enterprise Agent Kit is offered in three tiers. This proposal covers the tiers below:

- **«TIER BLOCK — A LAUNCH» Launch:** licence activation and tenant set-up, identity integration, data connections, one ready agent from the catalogue adapted to «CUSTOMER», user training and adoption support.
- **«TIER BLOCK — B AGENT PACK» Agent Pack:** further agents or skills, each adapted to the sources and processes of «CUSTOMER» and tested against agreed acceptance criteria.
- **«TIER BLOCK — C RUN» Run:** monthly operation of the agents in use and development of new skills from a monthly capacity.

2. Scope

2.1 Package Components

Component	Content	Tier
Gemini Enterprise licence	Licence edition, number of users and term (separate licence proposal, Section 11)	—
Tenant set-up and identity	Licence activation, tenant configuration, integration with Google Workspace or Microsoft Entra ID, user and group assignment «GÜNER DOĞRULASIN»	A
Data connections	Connectors to the agreed data sources (e.g. Google Drive, Microsoft SharePoint, SAP, BigQuery) «GÜNER DOĞRULASIN»	A · B
Agents and skills	One catalogue agent in Launch; two to three agents or skills per Agent Pack «GÜNER DOĞRULASIN»	A · B
Training and adoption	User training, key-user training, adoption support and hypercare after go-live	A
Operations	Monitoring, maintenance, user support and new skills from a monthly capacity	C

Table 1 — Package components.

2.2 Users, Identity and Data Sources

The environment in scope for «CUSTOMER» is:

Item	Scope
Licence status	«LICENCE STATUS»
Users in scope	«NUMBER»
User groups	«USER GROUPS»
Productivity suite	«WORKSPACE»
Identity provider	«IDENTITY PROVIDER»
Data sources to connect	«DATA SOURCES»
Sizing band	«BAND»

Table 2 — Environment in scope.

Each data source is connected through a Gemini Enterprise connector or an available API. A source without a connector or API is not connected within this proposal. «GÜNER DOĞRULASIN»

2.3 Selected Agents

FILL NOTE — list each agent or skill selected for this proposal and the tier it belongs to. The descriptions of the catalogue agents are in Annex 1; keep only the selected ones there.

#	Agent or Skill	Source	Tier
1	«AGENT NAME»	Catalogue (Annex 1)	«TIER BLOCK — A LAUNCH» Launch
2	«AGENT NAME»	Catalogue (Annex 1) or new agent	«TIER BLOCK — B AGENT PACK» Agent Pack
3	«AGENT NAME»	Catalogue (Annex 1) or new agent	«TIER BLOCK — B AGENT PACK» Agent Pack

Table 3 — Selected agents and skills.

If the regulation tracking agent is selected, its parameters are:

Parameter	Value
Countries and languages followed	«COUNTRIES AND LANGUAGES»
Sources	Resmi Gazete; official gazettes and regulator sites of the countries above «GÜNER DOĞRULASIN»
Topics and keywords	«NUMBER» topics, list supplied by «CUSTOMER»
Alert recipients	«NUMBER» responsible owners
Alert frequency	«FREQUENCY»

Table 4 — Regulation tracking agent parameters.

2.4 Boundaries to Other Services

- **AI Governance Readiness:** this package builds and operates agents. The governance framework for AI (AI policy, risk classification, AI inventory, approval process) is set up in a separate service.
- **AI Readiness:** the assessment of organisational readiness for AI is a separate service.
- **Predictive analytics:** machine learning models for forecasting and prediction are a separate service.

3. Approach

3.1 From Catalogue to Production

Each agent starts from a ready agent or skill in the Komtaş catalogue, not from a blank page. It is adapted to «CUSTOMER» in four steps:

Step	Content
Discovery	Use case, users and business owner, sources, expected output, examples; the test set is agreed with «CUSTOMER» «GÜNER DOĞRULASIN»
Adaptation	Sources connected, instructions and prompts written, tools and output format set, access rights checked «GÜNER DOĞRULASIN»
Test	The agent is run on the agreed test set and the results are checked against the acceptance criteria (Section 6.2)
Go-live	The agent is opened to the user group, users are informed, and the agent passes to operation

Table 5 — Adaptation steps per agent.

Each agent has a business owner at «CUSTOMER» who agrees the test set, takes part in the test and accepts the agent.

3.2 Technology

The agents are built on the Google Cloud products below. «GÜNER DOĞRULASIN»

Product	Use
Gemini Enterprise	User interface, agent gallery, no-code agents (Agent Designer), connectors to data sources
Agent Development Kit (ADK) and Vertex AI	Custom agents where the no-code options are not sufficient
Grounding with Google Search	Agents that work on public sources (e.g. official gazettes and regulator sites)
BigQuery	Structured data used by agents, and storage of agent outputs where needed
Looker	Dashboards and conversational analytics on company data

Table 6 — Products used.

3.3 Data Access and Security

- The agents access the data sources with the permissions of the user: a user sees only the content that the user can already open in the source system. «GÜNER DOĞRULASIN»
- Under the Gemini Enterprise terms, the data of «CUSTOMER» is not used to train Google models. «GÜNER DOĞRULASIN»
- Documents are sent to the service only after «CUSTOMER» has given its legal and KVKK approval for the sources concerned.
- Agent outputs support the work of the users. Decisions, and in particular legal judgements, remain with the responsible persons at «CUSTOMER».

4. Service Tiers

> *FILL NOTE — keep the sub-sections of the tiers offered and delete the others, together with every paragraph, bullet and table row carrying their markers elsewhere in the document.*

4.1 «TIER BLOCK — A LAUNCH» Launch

Launch puts Gemini Enterprise into use with one adapted agent. Depending on the band, it takes 3 to 6 weeks. «GÜNER DOĞRULASIN»

Launch includes:

- Kick-off, confirmation of scope and set-up of administrator access.
- Licence activation and tenant configuration.
- Identity integration with «IDENTITY PROVIDER» and assignment of users and groups.

- Connectors to the data sources in Table 2.
- Adaptation of one catalogue agent (Table 3, row 1) in the four steps of Section 3.1.
- Test and user acceptance.
- User training and key-user training. «GÜNER DOĞRULASIN»
- Go-live, adoption support and hypercare for «NUMBER» weeks. «GÜNER DOĞRULASIN»

4.2 «TIER BLOCK — B AGENT PACK» Agent Pack

Agent Pack adds two to three agents or skills. Each agent is priced separately and goes through discovery, adaptation, test and go-live. A pack of two to three agents takes about 4 to 6 weeks. «GÜNER DOĞRULASIN»

Agents taken from the catalogue need less effort than new agents that are not in the catalogue. «GÜNER DOĞRULASIN»

> *FILL NOTE — repeat Section 4.2.1 for each agent in the pack and number the sub-sections 4.2.1, 4.2.2, 4.2.3.*

4.2.1 Agent: «AGENT NAME»

Item	Description
Catalogue or new agent	«...»
Problem addressed	«...»
Users and business owner	«USER GROUPS»; business owner «full name»
Input sources	«...»
Output	«...»
Tools and connectors	«...»
Test set	«NUMBER» test items agreed with «CUSTOMER»
Effort	«NUMBER» person-days

Table 7 — Agent «AGENT NAME».

4.3 «TIER BLOCK — C RUN» Run

Run is the monthly operation of the agents in use and the development of new skills. It starts after the go-live of the first agent.

Run includes:

- Monitoring of usage and of answer quality, with a monthly report. «GÜNER DOĞRULASIN»
- Maintenance of sources, instructions and prompts when the sources or the needs of «CUSTOMER» change. «GÜNER DOĞRULASIN»
- Follow-up of Gemini Enterprise product changes and adjustment of the agents where a change affects them. «GÜNER DOĞRULASIN»
- User support during business hours. «GÜNER DOĞRULASIN»
- New skills requested by «CUSTOMER», developed from the monthly capacity. «GÜNER DOĞRULASIN»

The monthly capacity is «NUMBER» hours. The minimum term is 12 months. «GÜNER DOĞRULASIN»

Unused hours are not carried over to the next month. Work above the monthly capacity is carried out after written approval of «CUSTOMER» at the hourly rate in Section 10. «GÜNER DOĞRULASIN»

5. Activities and Timeline

The timeline starts on the day the administrator access and the licences are active. Activities and weeks per tier are given below.

5.1 «TIER BLOCK — A LAUNCH» Launch Plan

> *FILL NOTE — the weeks below are for band M (about 4 weeks). Band S takes about 3 weeks and band L about 6 weeks; adjust the weeks to the band in Section 10.*

Phase	Activities	Week
P0 Kick-off and access	Kick-off meeting, confirmation of scope, administrator access, licence status checked	Week 1 «GÜNER DOĞRULASIN»
P1 Set-up and connectors	Tenant configuration, identity integration, users and groups, connectors to the data sources	Week 1–2 «GÜNER DOĞRULASIN»
P2 Agent adaptation	Discovery and adaptation of the catalogue agent; test set agreed	Week 2–3 «GÜNER DOĞRULASIN»
P3 Test and user acceptance	Test against the acceptance criteria, corrections, user acceptance	Week 3–4 «GÜNER DOĞRULASIN»
P4 Go-live, training and hypercare	Go-live, user and key-user training, adoption support, hypercare	Week 4, then hypercare «GÜNER DOĞRULASIN»

Table 8 — Launch plan.

5.2 «TIER BLOCK — B AGENT PACK» Agent Pack Plan

Each agent follows the plan below. The agents in a pack start with an offset of about one week, so that a pack of two to three agents is completed in about 4 to 6 weeks. «GÜNER DOĞRULASIN»

Step	Activities	Week
Discovery	Use case, users, sources and examples; test set agreed	Week 1 «GÜNER DOĞRULASIN»
Adaptation	Sources, instructions and prompts, tools, output format	Week 1–2 «GÜNER DOĞRULASIN»
Test	Run on the test set, corrections, acceptance by the business owner	Week 2–3 «GÜNER DOĞRULASIN»
Go-live	Opening to the user group, short user briefing	Week 3 «GÜNER DOĞRULASIN»

Table 9 — Agent Pack plan per catalogue agent.

5.3 «TIER BLOCK — C RUN» Run Monthly Cycle

Activity	Content	Frequency
Usage and quality report	Usage per agent, answer quality on a sample, open issues	Monthly «GÜNER DOĞRULASIN»
Review meeting	Report, change needs, new skill requests and their priority	Monthly «GÜNER DOĞRULASIN»
Maintenance	Sources, instructions and prompts; product changes	As needed, within the capacity
New skill requests	Request → estimate → approval by «CUSTOMER» → development → test → go-live	As agreed in the review meeting
User support	Questions and issues of the users	Business hours

Table 10 — Run monthly cycle.

6. Deliverables and Acceptance

6.1 Deliverables

Documents are delivered in Turkish, in editable format (Microsoft Word / Excel / PowerPoint) together with a PDF copy.

#	Deliverable	Content
D1	«TIER BLOCK — A LAUNCH» Configured Gemini Enterprise tenant	Tenant configuration, identity integration, users and groups, connectors to the agreed sources
D2	«TIER BLOCK — A LAUNCH» Set-up document	Configuration, identity, connectors, administrator roles and the steps for adding users and sources «GÜNER DOĞRULASIN»
D3	Agents in production	Each agent in Table 3, adapted, tested and opened to its user group
D4	Agent document per agent	Purpose, sources, instructions and prompts, tools, output format, business owner, known limits «GÜNER DOĞRULASIN»
D5	Test and acceptance report per agent	Test set, results per test item, comparison with the acceptance criteria, acceptance record
D6	«TIER BLOCK — A LAUNCH» Training	Training material, user sessions and a key-user session «GÜNER DOĞRULASIN»
D7	«TIER BLOCK — A LAUNCH» Adoption report	Usage at the end of hypercare and recommended next agents «GÜNER DOĞRULASIN»
D8	«TIER BLOCK — C RUN» Monthly operations report	Usage, answer quality, changes made, requests and use of the capacity
D9	«TIER BLOCK — C RUN» New skills	Skills developed from the monthly capacity, each with an agent document and test record

Table 11 — Deliverables.

6.2 Acceptance

Each agent is accepted against a test set agreed with «CUSTOMER» during discovery. The test set contains «NUMBER» items that reflect the real use of the agent. The criteria and thresholds are: «GÜNER DOĞRULASIN»

Agent Type	Criterion	Threshold
Regulation tracking	Source coverage: the agreed sources are scanned at the agreed frequency	All agreed sources «GÜNER DOĞRULASIN»
Regulation tracking	Relevance of alerts: share of sampled alerts judged relevant by the owner; each alert carries a source link	At least «NUMBER» of «NUMBER» alerts «GÜNER DOĞRULASIN»
Contract preparation and review	Drafts follow the template and clause library; review notes flag the known deviations in the test contracts	At least «NUMBER» of «NUMBER» test items «GÜNER DOĞRULASIN»
Other agents	Answer correctness on the test questions, with the source shown	At least «NUMBER» of «NUMBER» test questions «GÜNER DOĞRULASIN»

Table 12 — Acceptance criteria.

The business owner reviews the test report within «NUMBER» working days. If no written objection is received in that period, the agent is deemed accepted. «GÜNER DOĞRULASIN»

An answer outside the test set that is incorrect does not by itself mean that the agent has failed acceptance; it is handled as an improvement in hypercare or in Run.

7. Customer Responsibilities

«CUSTOMER» is responsible for the items below. A delay in any of them moves the timeline by the same amount.

- Appoint a project coordinator who is available throughout the work, and a business owner for each agent.
- Ensure that the Gemini Enterprise licences are active by the start of P1 (Section 11).
- Provide administrator access to the tenant and to «IDENTITY PROVIDER» for the set-up. «GÜNER DOĞRULASIN»
- Provide access to the data sources in Table 2 and name a data owner for each source.

- Obtain the legal and KVKK approval for sending the documents of the agreed sources to the service, before adaptation starts.
- Supply the topic and keyword list and the alert recipients if the regulation tracking agent is selected.
- Supply the contract templates, clause library and review playbook if the contract skill is selected.
- Define the user group and make the users available for training.
- Prepare the test set together with Komtaş and review the test results within the agreed period.

8. Assumptions and Out of Scope

8.1 Assumptions

The duration, effort and fee in this proposal are based on the assumptions below. If they do not hold, the impact is assessed through a change request.

- The work starts within «NUMBER» working days of contract signature.
- The environment in scope matches Table 2 and the agents match Table 3. If the number of users, sources or agents changes, the effort is reassessed.
- The data in the connected sources is used as it is; its quality is the responsibility of «CUSTOMER». «GÜNER DOĞRULASIN»
- The agents are built with the features of Gemini Enterprise available at the time of the work. If Google changes or withdraws a feature, the effect is handled in Run or through a change request. «GÜNER DOĞRULASIN»
- The work is carried out remotely; the kick-off meeting and training sessions can be held on site in «CITY». «GÜNER DOĞRULASIN»
- The project language and the deliverable language is Turkish. The agents work in the languages agreed for each agent.

8.2 Out of Scope

The topics below are outside the scope of this proposal. If requested, they are assessed and proposed separately.

- The AI governance framework (AI policy, risk classification, AI inventory, approval process); see Section 2.4.
- Gemini Enterprise licence prices; they are set out in the separate licence proposal (Section 11).
- Legal advice and final legal judgement; agent outputs support the legal team and the final review stays with the lawyers.
- Training of custom models.
- Data cleansing in the source systems.
- Integration with systems that have no connector or API. «GÜNER DOĞRULASIN»
- Organisational AI readiness assessment and predictive analytics models (separate services, Section 2.4).

9. Team

The work is led by an Engagement Lead. The team and its roles are:

Role	Responsibility	Involvement
Engagement Lead	Scope, plan, coordination with «CUSTOMER», acceptance	Part time, throughout the work «GÜNER DOĞRULASIN»
AI / Agent Engineer	Agent adaptation: sources, instructions and prompts, tools, tests	Throughout the work «GÜNER DOĞRULASIN»
«TIER BLOCK — A LAUNCH» Cloud Engineer	Tenant configuration, identity integration, connectors	P0–P1, then as needed «GÜNER DOĞRULASIN»
Business Analyst	Agent discovery, test set, training and adoption support	Discovery, test and training «GÜNER DOĞRULASIN»
«TIER BLOCK — C RUN» Run Lead	Monthly report and review meeting, request management	Monthly «GÜNER DOĞRULASIN»
«TIER BLOCK — C RUN» Agent Engineer	Maintenance, user support, new skills	Within the monthly capacity «GÜNER DOĞRULASIN»

Table 13 — Komtaş team and roles.

- All team members assigned to the work are full-time employees of Komtaş; no subcontractors are used. «GÜNER DOĞRULASIN»
- If a change in the team is needed, the replacement has at least equivalent qualifications and is notified to «CUSTOMER» in advance.

10. Effort and Fees

> *FILL NOTE — take the band (S / M / L), the duration and the effort from the proposal input form (gemini-agent-kit-3-teklif-girdi-formu). Draft values:*
> *Launch: S 15 working days / ~20 pd · M 20 working days / ~30 pd · L 30 working days / ~45 pd.* «GÜNER DOĞRULASIN»
> *Agent Pack: catalogue agent ~10–15 pd per agent; new agent not in the catalogue ~25–40 pd per agent.* «GÜNER DOĞRULASIN»
> *Run: monthly capacity S 40 h · M 80 h · L 160 h.* «GÜNER DOĞRULASIN»
> *The values are not based on recorded effort and are updated with the data of Cloud Solutions. Delete this box before sending.*

The fees of Launch and of each agent in Agent Pack are fixed prices. Run is charged as a monthly fee.

Item	Band	Duration	Effort	Fee (excl. VAT)
«TIER BLOCK — A LAUNCH» Launch	«BAND»	«NUMBER» working days	«NUMBER» person-days	«fee»
«TIER BLOCK — B AGENT PACK» Agent Pack — «AGENT NAME»	—	«NUMBER» working days	«NUMBER» person-days	«fee»
«TIER BLOCK — B AGENT PACK» Agent Pack — «AGENT NAME»	—	«NUMBER» working days	«NUMBER» person-days	«fee»
«TIER BLOCK — C RUN» Run	«BAND»	«NUMBER» months minimum	«NUMBER» hours per month	«monthly fee» per month
Work above the Run capacity	—	—	Per hour	«hour rate»
Change requests	—	—	Per person-day	«day rate»

Table 14 — Fees. All fees exclude VAT.

Payment Item	Rate	Amount (excl. VAT)
«TIER BLOCK — A LAUNCH» Launch — kick-off	«%»	«amount»
«TIER BLOCK — A LAUNCH» Launch — go-live	«%»	«amount»
«TIER BLOCK — A LAUNCH» Launch — end of hypercare	«%»	«amount»
«TIER BLOCK — B AGENT PACK» Agent Pack — acceptance of each agent	«%»	«amount»
«TIER BLOCK — C RUN» Run — monthly, at the end of each month	—	«monthly fee»

Table 15 — Payment schedule. All fees exclude VAT.

Gemini Enterprise licence fees and Google Cloud consumption are not part of this proposal (Section 11).

11. Licence

The Gemini Enterprise licences are offered in the separate licence proposal «LICENCE PROPOSAL REF». The licence edition, the number of users, the term and the fees are set out there. This proposal contains no licence figures.

Licence status of «CUSTOMER»: «LICENCE STATUS».

- The services in this proposal assume that the licences for the users in Table 2 are active by the start of P1. «GÜNER DOĞRULASIN»
- Custom agents built with the Agent Development Kit and Vertex AI, and the use of BigQuery, create Google Cloud consumption in addition to the licence. This consumption is offered in the licence proposal or separately. «GÜNER DOĞRULASIN»

12. Next Step

After go-live, the use of Gemini Enterprise at «CUSTOMER» can be extended step by step. The usual follow-on work is:

Need	Follow-On Work
Further recurring work to support	Further agents or skills from the catalogue or new agents (another Agent Pack)
More users and departments	Licence expansion (separate licence proposal) and training for the new user groups
Stable operation of the agents in use	Run: monthly operation and new skills
Questions on company data and reports	Looker and BigQuery work; conversational analytics on business data
Rules for the use of AI and agents	AI Governance Readiness (separate service)

Table 16 — Follow-on work.

12.1 New Agents

New use cases found during discovery, training or Run are collected in a list. Each one can be added through a new Agent Pack or, if small, as a skill from the Run capacity.

12.2 User Expansion

The number of users can be increased as the agents are adopted. The licences for new users are offered in a separate licence proposal.

12.3 Operations

If Run is not part of this proposal, it can be started after the go-live of the first agent.

12.4 Consumption

Komtaş is a Google Cloud Premier partner. The Gemini Enterprise licences and the Google Cloud consumption of «CUSTOMER» can be purchased through Komtaş; the commercial terms are set out in a separate proposal.

13. Commercial Terms

13.1 General Terms

- All fees in this proposal are stated in Turkish lira and exclude VAT. Statutory taxes, duties and charges are not included in the fees.
- The proposal is valid until «proposal date + 1 month».
- The fees are valid on condition that the work starts by «price validity date». If the start moves beyond that date for any reason, the fees and pricing terms are reassessed by mutual agreement in the light of the economic and financial conditions at the time of the work.
- Gemini Enterprise licences and Google Cloud consumption are not part of this proposal; they are covered by the licence proposal «LICENCE PROPOSAL REF».
- The start date of the work is agreed with «CUSTOMER». All activities are carried out mainly online; on-site meetings take place within «CITY».
- Payment follows the payment schedule in Section 10. Invoices are payable within «NUMBER» days of the invoice date.
- **«TIER BLOCK — C RUN»** Run has a minimum term of «NUMBER» months. After the minimum term it continues month by month and can be ended by either party with «NUMBER» months' written notice.
- Scope changes are managed through a written change request; no change is implemented before its impact analysis is approved.
- The parties keep confidential all information they access within the scope of the work. A separate non-disclosure agreement is signed where needed.
- The rights of use of the deliverables belong to «CUSTOMER»; Komtaş retains its intellectual property rights in its methodology, templates, catalogue agents and general know-how.

- This proposal forms an integral annex to the contract to be signed by the parties. In the event of a conflict between the contract and the proposal, the contract prevails.
- In the event of force majeure, the parties inform each other in writing and the impact on the schedule is reassessed by mutual agreement.

13.2 Proposal Contact Details

Questions on this proposal and its scope can be addressed to the contacts below.

Area of Responsibility	Full Name	Title	Contact
Commercial	«full name»	«title»	«e-mail / phone»
Technical	«full name»	«title»	«e-mail / phone»

13.3 Proposal Annexes

This proposal is submitted with the following annexes:

- ANNEX-1 — Agent Catalogue
- ANNEX-2 — About Komtaş

ANNEX-1 — Agent Catalogue

> *FILL NOTE — keep only the agents selected in Table 3 and delete the others. The last four agents are module candidates: complete the «...» fields during discovery.*

The Komtaş catalogue contains ready agents and skills that are adapted to the sources and processes of each customer. The agents selected for this proposal are described below.

Regulation Tracking Agent

Item	Description
Problem	Legal and compliance teams follow changes in legislation and regulation by hand, across many sources and countries.
Input sources	Resmi Gazete; official gazettes and regulator sites of other countries; the topic and keyword list of «CUSTOMER»; the policy owners of «CUSTOMER». «GÜNER DOĞRULASIN»
Output	Periodic alert summary with a relevance tag and a source link, routed to the responsible owner; searchable history of alerts. «GÜNER DOĞRULASIN»
Sector fit	Any regulated sector, e.g. manufacturing and export, energy, finance, health, food. «GÜNER DOĞRULASIN»
Adaptation effort	About 10–15 person-days, depending on the number of countries, languages and topics. «GÜNER DOĞRULASIN»

Table 17 — Regulation tracking agent.

Contract Preparation and Review Skill

Item	Description
Problem	Drafting contracts from templates and checking contracts against the position of the company takes time from the legal team.
Input sources	Contract templates, clause library, review playbook and red lines of «CUSTOMER». «GÜNER DOĞRULASIN»
Output	First draft from a template; review note with flagged clauses and deviations from the playbook. The output supports the legal team; the final review stays with the lawyers. «GÜNER DOĞRULASIN»
Sector fit	All sectors. «GÜNER DOĞRULASIN»
Adaptation effort	About 10–15 person-days, depending on the number of contract types. «GÜNER DOĞRULASIN»

Table 18 — Contract preparation and review skill.

Conversational Analytics on SAP Data

Item	Description
Problem	Sales and marketing users ask questions on SAP data in natural language and receive answers with tables and charts. «GÜNER DOĞRULASIN»
Input sources	«...»
Output	«...»
Sector fit	«...»
Adaptation effort	«NUMBER» person-days

Table 19 — Conversational analytics on SAP data.

Product Video and Image Generation

Item	Description
Problem	Marketing teams produce product videos and images for campaigns and channels. «GÜNER DOĞRULASIN»
Input sources	«...»
Output	«...»
Sector fit	«...»
Adaptation effort	«NUMBER» person-days

Table 20 — Product video and image generation.

Catalogue Image Enrichment

Item	Description
Problem	Product management enriches catalogue entries with generated images. «GÜNER DOĞRULASIN»
Input sources	«…»
Output	«…»
Sector fit	«…»
Adaptation effort	«NUMBER» person-days

Table 21 — Catalogue image enrichment.

Looker with Gemini Enterprise

Item	Description
Problem	Users reach Looker dashboards and metrics through Gemini Enterprise. «GÜNER DOĞRULASIN»
Input sources	«…»
Output	«…»
Sector fit	«…»
Adaptation effort	«NUMBER» person-days

Table 22 — Looker with Gemini Enterprise.

ANNEX-2 — About Komtaş

> *FILL NOTE — the figures in Table 23 and in the bullets below come from the proposals of 2026. Check them against the current corporate profile before sending.*

Komtaş is an independent information technology company that has specialised in enterprise data management in Türkiye since 1989. More than 35 years of focus on a single field has given it an end-to-end view that follows data from the moment it is created to the moment a decision is taken.

Indicator	Value
Founded	1989 — more than 35 years of continuous data-focused activity
Specialist staff	250+ data engineers, architects, consultants and analysts
Offices	Istanbul, Ankara, Izmir, Dubai
Strategic partnerships	10+ global technology vendors
Focus area	Data governance, data architecture, analytics, artificial intelligence and AI agent based solutions
Positioning	"From Data to Agents" — integrated capability from data to AI agents

Table 23 — Komtaş corporate profile.

Service Capabilities

The service portfolio of Komtaş covers the whole life cycle of a data initiative:

- **Data Governance and Data Management:** data governance maturity assessment, framework and organisation design, policy and process design, data catalogue, business glossary, data quality management, master data management, data privacy and classification.
- **Data Architecture and Engineering:** data warehouse and data lake architectures, lakehouse design, data integration and streaming architectures, cloud and on-premises modernisation.
- **Analytics and Artificial Intelligence:** enterprise reporting, advanced analytics, machine learning models, generative AI applications and AI governance.
- **Managed Services and Support:** P1 / P2 / P3 support for production systems, capacity and performance management, continuous improvement services.
- **Training and Capability Building:** product training, role-based data governance training, train-the-trainer programmes.

Google Cloud Partnership

Komtaş is a Google Cloud Premier partner. Gemini Enterprise licences, their set-up and the agents built on them are provided by the same organisation.

Gemini Enterprise Experience

Komtaş has delivered Türkiye’s largest Gemini Enterprise deployment, with 1,100 users. «GÜNER DOĞRULASIN»

The catalogue agents in Annex 1 are based on this work.

Why Komtaş

- **Focus:** Komtaş has worked only in the data field for more than 35 years, with more than 250 specialists and 4 offices.
- **Ready agents:** the catalogue agents have already been used in a Gemini Enterprise deployment; adaptation starts from them, not from a blank page.
- **From set-up to operation:** licence, set-up, agents and monthly operation are provided by the same organisation (Section 12).

References

Reference projects comparable to the scope of this proposal are listed below. Reference calls with the customers concerned can be arranged on request. «GÜNER DOĞRULASIN»
