INDUSTRY DATA MODELS

Blueprint v1 — internal reference, draft for Digitallency, Damalink and Komtaş management

Banking · Investment Banking · Telco · Insurance | A Model Fit Assessment · B Model Implementation · C Extension

1 **Positioning and commercial logic**
Summary, commercial logic, evidence, target customers, scope, model ownership, what a model gives, approach. p. 2 – 9

2 **Four industry branches**
Banking, Investment Banking, Telco, Insurance: subject areas, KPI sets, references, regulation, ownership. p. 10 – 14

3 **Tiers and method**
A flow and timeline, fit/gap method, B foundation and subject areas, C Extension, platform options. p. 15 – 19

4 **Delivery and status**
Team, sizing, acceptance, accelerators, follow-on, risks, verification summary. p. 20 – 26

Package Summary — What, for Whom, When

KOMTAS

Sector-specific enterprise data model and EDW with ready subject areas and KPI sets. One package, four industry branches, three tiers.

01 · SUMMARY

WHAT THE PACKAGE DELIVERS

Industry logical model
shared core and subject areas per branch

Fit/gap against the customer
fit ratio per subject area, customisation list

EDW on the target platform
physical model, ETL framework, historisation

KPI sets
Customer 360, sales, profitability, sector KPIs

Parallel validation
reconciled with current reports per subject area

THREE TIERS «DIGITALLENCY DOĞRULASIN»

A — Model Fit Assessment

landscape, fit/gap mapping, fit ratio, adapted logical model draft, B roadmap

4–8 weeks, fixed fee

B — Model Implementation

foundation once, then subject areas: mapping, ETL, KPI set, parallel validation

foundation + per subject area

C — Extension

C1 new subject area, KPI set or source; C2 run and model maintenance

per item; C2 monthly «OPTIONAL»

BASIS — KNOWN FACTS

- Digitallency 2025 deck: Banking DM, Investment BDW, Telco DM (Teradata cLDM) at summary level
- Digitallency references: three investment firms, a telecom group, two participation banks, a Gulf bank via Softtech
- Damalink Insurance Layer: domains by line of business, ~30 DWH domains, datamarts, KPI set
- Joint Komtaş–Damalink insurance programme deck (updated 2025)
- Asset Portfolio candidates aday-36 and aday-33 merged into one package
- Model ownership, licences and partner terms not yet settled

Status: draft v1. Only the subject area names, KPI set names and references are known from the sources. Everything else carries an orange tag naming who verifies it: Digitallency, Damalink or model ownership (p. 26).

Commercial Logic — IP and Partnerships Open

internal only

KOMTAS

Internal only. Model owners, partner terms, references by name and insurance targets never appear in customer files.

MODEL IP AND PARTNER TERMS · OPEN «SAHİPLİK DOĞRULANSIN»

ITEM	STATUS
Banking DM, Investment BDW	«FIELD»
Teradata cLDM licence	«FIELD»
Insurance Layer	«FIELD»
Revenue share, proposal lead	«FIELD»
Licence / royalty per project	«FIELD»

Softtech route. «DIGITALLENCY DOĞRULASIN»
The Gulf bank reference was delivered via Softtech. A Softtech subcontract route and a regional narrative for Gulf banks are possible; terms «FIELD».

WHERE THE VALUE IS

A Model Fit Assessment
fixed fee; fit ratio, roadmap

↓

B Model Implementation
foundation + subject areas; largest share

↓

C Extension
new subject areas, KPI sets; run

↓

Pull-through
platform, regulatory, MDM, governance

Insurance targets. Sabancı group (AgeSA, Aksigorta, Medisa), Generali, Sompo. Internal only; linked to the joint insurance programme.

COMMERCIAL POINTS

1. The model shortens EDW delivery; the fit ratio from A makes the estimate defensible
2. Platform pull-through: Teradata, cloud DWH on GCP or Azure
3. Bank branch feeds regulatory-reporting; model is the target for datamart-consolidation
4. Customer 360 KPIs use the mdm-customer-360 golden record; model definitions seed data-governance
5. Partner and licence cost per project «FIELD» before any price is set

Gulf narrative. The banking EDW reference in the Gulf (via Softtech) and the participation bank references support a regional offer for Islamic banks. Use of these references is agreed with Digitallency and Softtech first.

Evidence and Sources

KOMTAS

What the package rests on today. Internal only: partners, models and references are named here; customer files use anonymous references.

01 · EVIDENCE

SOURCES

3 models

Digitallency — 2025 deck
«DIGITALLENCY DOĞRULASIN»

Banking DM: party, event, channel, campaign, media, contract; KPI sets Customer 360, sales & profitability, campaign and marketing. Investment BDW. Telco DM on Teradata cLDM: party, event, finance, network, contract, product.

~30 domains

Damalink — Insurance Layer
«DAMALINK DOĞRULASIN»

Reference architecture, OLTP domains by line of business, ~30 DWH domains, nine datamarts, insurance KPI set, analytics use cases, DWH rules and delivery documents; joint programme deck.

SOURCE STATUS

Digitallency — three models summary level only; no entity lists	source
Damalink — Insurance Layer domains, datamarts, KPIs, documents	source
Joint insurance programme deck Komtaş–Damalink, updated 2025	source
Model ownership and licences per model; Komtaş rights	to confirm
Allianz Single Customer View MDM project; claimed in both decks	to confirm
Insurance model implementation «REFERENCE PROJECT»	no reference

Reference years, scope and results not in the decks «RESULT».
«DIGITALLENCY DOĞRULASIN»

FINDINGS

Allianz SCV in both decks «DAMALINK DOĞRULASIN»

The Insurance Layer data model document comes from a single customer view project with Allianz; the Digitallency deck lists it too. Who delivered it is open.

MDM, not a model rollout

The Allianz work is a customer MDM project. It is used as an insurance customer data reference, not as a data model implementation.

Model age

Damalink material dates from about 2012–2021; some references are old. Years are confirmed before use.

Customer naming. Customer files use: three investment firms — investment banking data warehouse; a telecom group — EDW on an industry logical data model; two participation banks and a Gulf bank — banking EDW; an insurance group — customer data across group systems (single customer view).

Target Customers and Triggers

KOMTAS

Who is approached and the situations that start the conversation. Drafted from the references and the insurance programme.

TARGET CUSTOMER PROFILES «DIGITALLENCY DOĞRULASIN»

Banks
incl. participation banks

Investment firms
brokerage, asset management

Telecom operators
mobile, fixed, internet

Insurance groups
Sabancı group, Generali, Sompo

Gulf banks
via Softtech «FIELD»

TRIGGERS «DIGITALLENCY DOĞRULASIN»

New DWH or renewal

the current warehouse is rebuilt or replaced.

Platform migration

on-prem to cloud: a chance to adopt a model.

Merger

two banks or insurers bring two data models.

Regulatory programme

new reporting demand needs a common model.

Inconsistent KPIs

every datamart has its own definitions.

New core system

core banking, billing or policy system change.

Slow new reports

each new report needs new data work.

Customer 360 initiative

one customer view across products or LoBs.

First call. Industry branch, current DWH and datamarts, source systems, target platform, reports and KPIs in use, regulatory demand, history depth, planned migration. The answers feed input form 3a.

Scope Boundary — What It Is Not

KOMTAS

What the package does not do, and the Komtaş packages it links to without absorbing them.

01 · BOUNDARY

OUT OF SCOPE «DIGITALLENCY DOĞRULASIN»

- Changes to source systems
- Full rebuild of the BI report portfolio
- Platform licences
- Model licence fees «FIELD»
- The regulatory reporting chain itself

BOUNDARY TO REGULATORY REPORTING AND DWH ASSESSMENT

This package builds the industry model and the EDW.

regulatory-reporting builds the regulatory reporting chain (common regulatory layer, data demand layer, DQ and validation for reports); this package builds the industry model and EDW that can feed it. DWH Assessment evaluates the overall platform and target state; this package implements an industry model once the target is set.

RELATED PACKAGES

datamart-consolidation the model is the consolidation target.

mdm-customer-360 the golden record feeds the Customer 360 KPIs.

data-governance model definitions seed the business glossary.

data-platform-ops runs the EDW after go-live.

Boundary rule. Model and EDW: this package. Regulatory reports: regulatory-reporting. Target state: DWH Assessment. Golden record: mdm-customer-360. Run: data-platform-ops or C2.

Model Ownership Overview

internal only

KOMTAS

Internal only. Who owns each model and what Komtaş may do with it. Answered by Komtaş management (partner agreements, Teradata relationship).

OWNERSHIP AND RIGHTS PER MODEL

MODEL	BRANCH	OWNER (TO CONFIRM)	LICENCE / FEE	MAY KOMTAŞ DELIVER, ADAPT, RESELL?
Banking DM	Banking	Digitallency IP?	«FIELD»	«FIELD» «SAHİPLİK DOĞRULANSIN»
Investment BDW	Investment Banking	Digitallency IP?	«FIELD»	«FIELD» «SAHİPLİK DOĞRULANSIN»
Telco cLDM	Telco	Teradata product, under licence	Teradata licence «FIELD»	«FIELD» «SAHİPLİK DOĞRULANSIN»
Insurance Layer	Insurance	Damalink IP?	«FIELD»	«FIELD» «SAHİPLİK DOĞRULANSIN»

Questions per model.
Owner; licence type; right to deliver, adapt and resell; royalty per project «FIELD»; use on non-Teradata platforms; customer ownership of the adapted model after B.

Until answered.
Customer files describe 'an industry-specific enterprise data model «MODEL»' with no owner or model name. No price is set before licence cost is known.

What an Industry Data Model Gives

KOMTAS

A tested structure for the sector, so analysis and design start from a model rather than from a blank page.

01 · MODEL

Shared core
one definition across the warehouse

- party (customer, counterparty)
- product
- time and calendar
- organisation, branch, channel
- conformed codes and reference data

same keys in every area

Subject areas
built and loaded one by one

- sector entities and relationships
- attributes with definitions
- source-to-target mapping per area
- delivered in priority order
- extended without changing the core

fit ratio per area from A

KPI sets
calculated once, used everywhere

- Customer 360
- sales and profitability
- campaign and marketing
- sector KPIs (churn, loss ratio…)
- one definition per KPI

KPI catalogue per branch

History
the warehouse keeps change over time

- historisation by design
- full and delta load
- standard header attributes
- point-in-time reporting
- audit of loads

history depth is a sizing driver

Why it is faster. Analysis starts from mapped subject areas and agreed KPI definitions instead of interviews from zero. The gain depends on the fit ratio measured in A; no fixed saving is promised. «DIGITALLENCY DOĞRULASIN»

Approach — Fit, Implement, Extend

KOMTAS

A measures how well the model fits the customer; B builds the foundation and the subject areas; C adds more areas and can run the model.

01 · APPROACH

A — Model Fit Assessment

fixed fee by band

«DIGITALLENCY DOĞRULASIN»

- kick-off, branch and scope
- current landscape: sources, DWH, KPIs
- fit mapping to subject areas and KPI sets
- gap analysis, fit ratio per area
- adapted model draft, B roadmap, estimate

S 4 · M 6 · L 8 weeks

B — Model Implementation

foundation once + per subject area

«DIGITALLENCY DOĞRULASIN»

- physical model for the target platform
- core entities, standards, historisation
- parametric ETL framework, DQ checks
- per area: mapping, ETL, KPI set, reports base
- parallel validation, handover

foundation + areas × band

C — Extension

per item; run monthly «OPTIONAL»

«DIGITALLENCY DOĞRULASIN»

- C1 new subject area
- C1 new KPI set or source
- same steps as a B subject area
- C2 run and model maintenance
- or route to data-platform-ops

C1 per item · C2 monthly

INDUSTRY BRANCH — CHOSEN IN A

Banking | Investment Banking | Telco | Insurance

Entry point. B is not offered without A or an equivalent fit/gap «A REF». The fit ratio from A sets the customisation driver and the number of subject areas in B.

Banking — Enterprise Data Model

internal only

KOMTAŞ

For banks, including participation banks. Subject area and KPI set names from the Digitallency deck; orange-outlined items are Komtaş drafts.

SUBJECT AREAS «DIGITALLENCY DOĞRULASIN»

in source deck draft

- Party
- Event
- Channel
- Campaign
- Media
- Contract
- Product
- Account
- Collateral
- General ledger

REFERENCES «DIGITALLENCY DOĞRULASIN»

1. Kuveyt Türk — banking EDW (participation bank)
2. Vakıf Katılım — banking EDW (participation bank)
3. Boubyan Bank — banking EDW, via Softtech

KPI SETS «DIGITALLENCY DOĞRULASIN»

Customer 360 profile, product holding, channel use, customer value

Sales & profitability sales by product, channel, branch; profitability by customer and product

Campaign & marketing response, conversion, campaign return

Risk / regulatory feed (draft) inputs for the regulatory layer

REGULATION AND LINKS

BDDK. «DIGITALLENCY DOĞRULASIN»
Model feeds BDDK reporting through regulatory-reporting. Participation banks: also BDDK; interest-free product structures modelled separately. Customer 360 KPIs: mdm-customer-360.

Ownership and source. «SAHİPLİK DOĞRULANSIN»
Banking DM — Digitallency IP?; Komtaş rights and licence «FIELD». Source: Digitallency 2025 deck.

Investment Banking — Data Warehouse Model

internal only

KOMTAS

For brokerage and investment firms. Only the model name is known from the deck; all subject areas and KPIs are Komtaş drafts.

SUBJECT AREAS «DIGITALLENCY DOĞRULASIN»

■ in source deck ☐ draft

- Customer & account
- Order & transaction
- Portfolio & position
- Instrument
- Market data
- Fee & commission
- Channel

REFERENCES «DIGITALLENCY DOĞRULASIN»

1. Garanti Yatırım — investment BDW
2. Osmanlı Yatırım — investment BDW
3. QNB Finansinvest — investment BDW

KPI SETS (DRAFT) «DIGITALLENCY DOĞRULASIN»

- **Trading volume** by instrument, market, channel, customer segment
- **Commission income** by product, channel, customer
- **AUM / portfolio** assets under management, portfolio value
- **Customers and channels** active customers, channel share

REGULATION AND LINKS

SPK / MKK (Komtaş proposal). «DIGITALLENCY DOĞRULASIN»
Model can feed capital markets reporting to SPK and MKK; the reporting chain itself is regulatory-reporting scope. Customer data: mdm-customer-360.

Ownership and source. «SAHİPLİK DOĞRULANSIN»
Investment BDW — Digitallency IP?; Komtaş rights and licence «FIELD». Source: Digitallency 2025 deck.

Telco — Industry Logical Data Model

internal only

KOMTAS

For mobile, fixed and internet operators. Subject area names from the Digitallency deck (Teradata cLDM); orange-outlined items are Komtaş drafts.

SUBJECT AREAS «DIGITALLENCY DOĞRULASIN»

in source deck draft

- Party
- Event
- Finance
- Network
- Contract
- Product
- Usage / CDR
- Billing

REFERENCES «DIGITALLENCY DOĞRULASIN»

1. Türk Telekom — EDW on Teradata cLDM
2. TTNET — EDW on Teradata cLDM

KPI SETS (DRAFT) «DIGITALLENCY DOĞRULASIN»

Churn churn rate and churn risk by segment and product

ARPU average revenue per user by segment, product, channel

Usage voice, data, SMS usage trends

Campaign response offer take-up and retention campaigns

REGULATION AND LINKS

BTK (Komtaş proposal). «DIGITALLENCY DOĞRULASIN»
Model can feed BTK reporting; the reporting chain itself is out of scope. Customer 360 KPIs: mdm-customer-360.

Ownership and source. «SAHİPLİK DOĞRULANSIN»
Teradata cLDM — Teradata product under licence; Komtaş delivery rights and use off Teradata «FIELD». Source: Digitallency 2025 deck.

Insurance — Domains by Line of Business

KOMTAS

Adapted from the Damalink Insurance Layer: source domains per line of business, the DWH domain catalogue, architecture and DWH rules.

02 · INSURANCE

SOURCE DOMAINS BY LINE OF BUSINESS «DAMALINK DOĞRULASIN»

Health

policy and group policy · customer · policyholder and insured · coverage · underwriting · product · provision · network · institution · agency · company (TPA) · external (SBM, KKB, call data)

P&C

customer · policy and group policy · policyholder and insured · coverage · claim · product · property · network · service · external

Life & Pension

customer · company · employee · communication · policy · policyholder and insured · business object · agent · loss event · reinsurance · commission account · coverage · claim · product · booking basis · location

Other sources

SBM · KPS · EGM · KKB · marketing data: SMS, social media, calls, chat, campaigns

DWH DOMAIN CATALOGUE (~30) «DAMALINK DOĞRULASIN»

agency · agent · animal · bank · booking basis · building · business object · business partner · claim · coinsurance · commission account · communication · company (TPA, bancassurance) · coverage · customer · damage · employee · external · health · institution · insured · life · litigation · location · loss event · network · policy · policyholder · product · property · provision · reinsurance · service · underwriting · vehicle

Architecture. Health, P&C, Life & Pension and other sources → CDC, ETL, batch → ODS / staging → DWH → datamarts → BI, CRM, analytics; data management layer: integration, quality, MDM, metadata, security. «DAMALINK DOĞRULASIN»

DWH rules. Historisation; full and delta load; definitions for every table and column; core tables not extended (custom attributes in custom tables); standard header attributes; multi-currency, multi-language, multi-tenant. «DAMALINK DOĞRULASIN»

Insurance — Datamarts, KPIs and Analytics

internal only

KOMTAS

Datamart patterns and the insurance KPI set adapted from the Damalink material. Regulation and ownership open.

DATAMARTS «DAMALINK DOĞRULASIN»

DATAMART	CONTENT
Customer value management	one customer across lines of business
VIP customer	~20 value rules: age, premium, collection, savings, coverage
Retail segmentation	customer value = earned premium − paid and outstanding claims
Call centre performance	IVR, complaints, messaging logs, NPS
Fraud	15+ internal and 25+ customer fraud rules
Health	provision and underwriting performance, simulation, actuarial base
Sales	agency GWP, annualised new premium by region, agent, channel, LoB; plan vs actual
Cross-sell & penetration	products per customer across lines of business
Agency incentive	representative incentive calculation

INSURANCE KPI SET «DAMALINK DOĞRULASIN»

- New, lost and existing customers and policies
- Renewal rate
- Loss ratio and combined ratio
- Hit ratio (quote → policy)
- STP rate, provision speed
- End-to-end production performance
- Exposure and earned premium
- Budget tracking: NEP, GLR, NLR, CR, CoR (MTD / YTD)

Analytics use cases. «DAMALINK DOĞRULASIN»
Complaint analytics; geographic and weather risk; social media interaction; health policy renewal prediction.

Regulation and links. «DAMALINK DOĞRULASIN»
SEDDK reporting needs «FIELD». Customer value datamart uses the mdm-customer-360 golden record.

Reference. «DAMALINK DOĞRULASIN»
Allianz SCV is an MDM reference. Insurance model implementation «REFERENCE PROJECT».

Ownership and source. «SAHİPLİK DOĞRULANSIN»
Insurance Layer — Damalink IP?; Komtaş rights «FIELD». Source: Damalink material, joint deck.

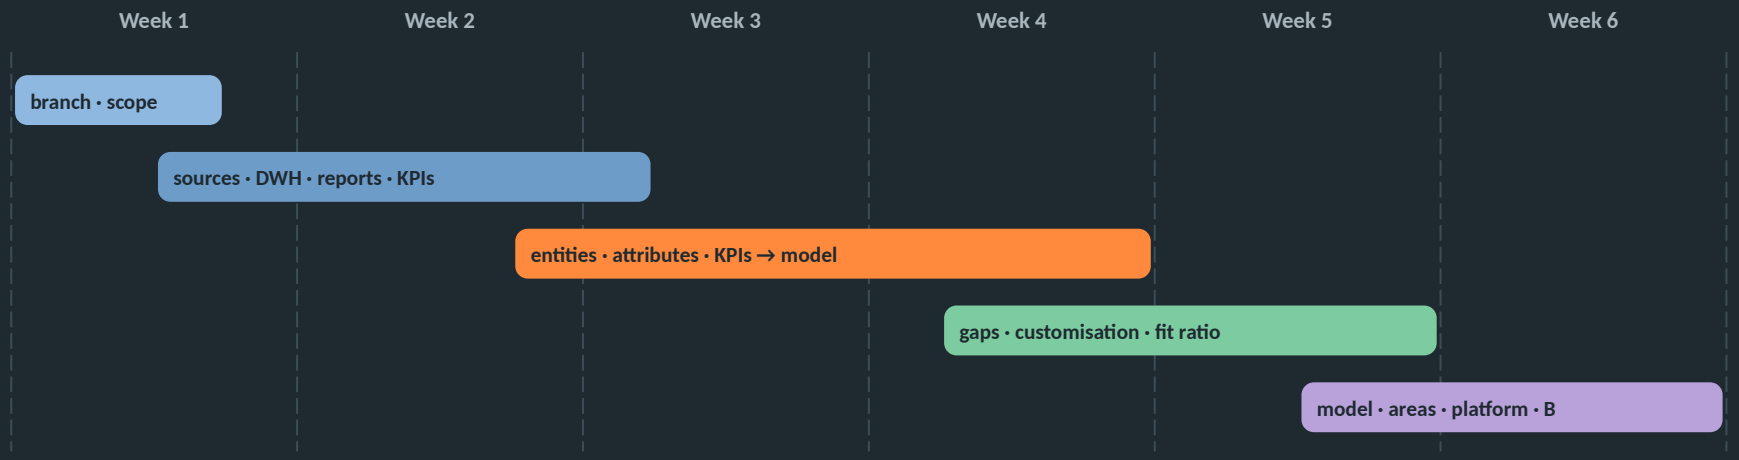

A — Model Fit Assessment: Flow and Timeline

KOMTAS

Kick-off, landscape, fit mapping, gap analysis and the adapted model draft in phases P0–P4. Fixed fee by band.

03 · TIER A

PLAN · BAND M, 6 WEEKS

Band S 4 weeks / ~25 pd, band M 6 weeks / ~40 pd, band L 8 weeks / ~60 pd. «DIGITALLENCY DOĞRULASIN»

DECISION FOR B

Adapted model and B roadmap

The report gives the fit ratio per subject area, the customisation list, prioritised subject areas, the platform choice, B scope, roadmap and estimate. The customer decides.

DELIVERABLES «DIGITALLENCY DOĞRULASIN»

- Fit/gap matrix
- Fit ratio table
- Adapted logical model draft
- KPI mapping
- B roadmap
- B estimate

Precondition. Source metadata, the current DWH model and the report and KPI list. Showing model documentation to the customer in A needs the owner's consent. «SAHİPLİK DOĞRULANSIN»

Fit/Gap Method — Matrix and Fit Ratio

KOMTAS

Each source entity and attribute and each KPI requirement is mapped to the model and classed. The fit ratio is calculated per subject area.

FIT CLASSES «DIGITALLENCY DOĞRULASIN»

CLASS	COUNTS AS	MEANING
Full fit	fit	source item maps to a model entity and attribute as is
Fit with mapping	fit	maps after a code or format transformation
Partial fit	½ fit	maps in part; model attribute needs a change
In model, not in source	info	model item not filled; kept, not loaded
In source, not in model	gap	needs a custom attribute or entity
KPI not covered	gap	KPI needs data or logic outside the model

Fit ratio per subject area.
(full fit + fit with mapping + ½ partial fit) ÷ source items and KPIs in scope. Gaps become the customisation list; core tables are not changed.

Matrix.
One row per source attribute or KPI: source system, entity, attribute, model entity, model attribute, class, note, owner.

FIT RATIO → DECISION «DIGITALLENCY DOĞRULASIN»

≥ 80%	adopt; small extensions
60–79%	adopt; customise
40–59%	adopt core only; review area
< 40%	custom design for this area

Feeds sizing. «DIGITALLENCY DOĞRULASIN»
Average fit ratio and the number of gaps set the model customisation driver (low / medium / high) for B.

B — Model Implementation: Foundation and Subject Areas

foundation + per subject area

KOMTAS

The foundation is built once; subject areas follow in the order set in A. Each area is accepted after parallel validation.

Prerequisite: a Model Fit Assessment or an equivalent fit/gap «A REF».

FOUNDATION «DIGITALLENCY DOĞRULASIN»

- **Physical model** — for the target platform «PLATFORM»
- **Core entities** — party, product, time, organisation
- **Standards** — naming and loading standards
- **Historisation** — history rules, delta detection
- **ETL framework** — delta, parametric, recovery
- **DQ and semantic base** — DQ checks, semantic layer base

EFFORT FORMULA «DIGITALLENCY DOĞRULASIN»

B EFFORT (pd)

foundation + Σ subject areas × band + parallel validation

FOUNDATION

S ~60 pd · M ~100 pd · L ~150 pd

PER SUBJECT AREA

S ~40 pd · M ~70 pd · L ~110 pd

Optional line «OPTIONAL». «DIGITALLENCY DOĞRULASIN»
History load beyond the agreed depth; migration of existing reports onto the new model.

PER SUBJECT AREA «DIGITALLENCY DOĞRULASIN»

STEP	CONTENT	EXIT	LEAD
Mapping	source-to-target matrix	matrix signed	joint
ETL	loads, DQ checks	loads running	Komtaş
KPI set	KPI logic, reports base	KPIs agreed	joint
Parallel validation	vs current reports	within «NUMBER»	joint
Handover	documents, training	signed	Komtaş

Areas can overlap; validation of one runs while the next is mapped.

C — Extension

KOMTAS

After B: more subject areas, KPI sets or sources as one-time items, and an optional monthly run of the model.

03 · TIER C

C1 New subject area

one-time per item

«DIGITALLENCY DOĞRULASIN»

- same steps as a B subject area
- mapping, ETL, KPI set, validation
- sized with the B per-area band
- uses the foundation as built
- accepted per item

per item

C1 New KPI set or source

one-time per item

«DIGITALLENCY DOĞRULASIN»

- new KPI set on existing areas
- new source into existing areas
- fit/gap for the new item
- core tables not changed
- accepted per item

per item

C2 Run and model maintenance

monthly «OPTIONAL»

«DIGITALLENCY DOĞRULASIN»

- load monitoring and fixes
- model changes and new attributes
- KPI definition changes
- 40 / 80 / 160 h per month
- or route to data-platform-ops

monthly pool

Term. C2 minimum term and pool rules follow data-platform-ops «FIELD». Where the customer has a run vendor, only model maintenance is offered. «DIGITALLENCY DOĞRULASIN»

Platform Options — On-premises and Cloud

KOMTAS

The model is logical; the physical model is built for the platform chosen in A «PLATFORM».

PLATFORMS BY NEED «DIGITALLENCY DOĞRULASIN»

NEED	ON-PREMISES	CLOUD
Data warehouse	Teradata, Oracle, SQL Server	BigQuery (GCP), Azure Synapse / Fabric «PLATFORM»
Data integration	Informatica PowerCenter, ODI	Informatica IDMC, Dataflow / Dataform «PLATFORM»
Modelling tool	erwin, PowerDesigner «FIELD»	same; DDL generated per platform
Semantic layer, BI	Power BI, Qlik, SAP BusinessObjects	Looker, Power BI service «PLATFORM»
Model form	logical model + physical DDL	logical model + physical DDL

Choice per customer «PLATFORM».
Platform is chosen in A P4. A platform migration (on-prem → cloud) is a common moment to adopt a model.

Model and platform. «SAHİPLİK DOĞRULANSIN»
Use of the Teradata cLDM on a non-Teradata platform, and of the other models on any platform, depends on licence terms «FIELD».

Team and Roles

KOMTAS

An engagement lead runs delivery with an industry data modeller, ETL and BI developers and a business analyst who knows the sector.

ROLES «DIGITALLENCY DOĞRULASIN»

ROLE	RESPONSIBILITY	A	B	C
Engagement lead	plan, scope, acceptance, customer contacts	lead	lead	lead
Industry data modeller / architect	model fit, adaptation, physical model, standards	●	●	part
Business analyst (sector)	landscape, KPI requirements, mapping review	●	●	part
ETL developers	ETL framework, loads, DQ checks	—	●	●
BI developer	KPI sets, reports base, semantic layer	part	●	part

● takes part lead accountable for delivery part part time — not staffed

CUSTOMER-SIDE CONTACTS «DIGITALLENCY DOĞRULASIN»

Business owners
one per subject area

DWH team
current model, loads, platform

Source system owners
access, metadata, data

Report owners
parallel validation

Sector SME. «DIGITALLENCY DOĞRULASIN»
One analyst or modeller with sector knowledge per branch: banking, investment banking, telco, insurance. Availability per branch «NUMBER»; partner share «FIELD».

Staffing facts to collect.
Modellers per branch «NUMBER» · partner share «FIELD» · on-site or remote «FIELD»

Sizing — Drivers, Bands and Effort

draft — to calibrate

KOMTAS

Drivers come from the input forms (files 3a–3c). Durations in weeks, effort in person-days (pd), C2 in hours per month.

SIZING DRIVERS «DIGITALLENCY DOĞRULASIN»

DRIVER	S	M	L
Subject areas in scope	≤3	4–7	>7
Source systems	≤5	6–15	>15
Data volume (TB)	≤5	5–50	>50
History depth (years)	≤2	3–5	>5
KPIs	≤50	51–200	>200
Model customisation (A)	low	medium	high

Band rule. «DIGITALLENCY DOĞRULASIN»
The band is the highest band reached by at least three drivers. B effort = foundation band + subject areas × per-area band.

Insurance branch. «DAMALINK DOĞRULASIN»
Insurance efforts are calibrated with Damalink delivery data; the same bands are used until then.

DURATION / EFFORT «DIGITALLENCY DOĞRULASIN»

ITEM	S	M	L
A duration	4 weeks	6 weeks	8 weeks
A effort	~25 pd	~40 pd	~60 pd
B foundation	~60 pd	~100 pd	~150 pd
B per subject area	~40 pd	~70 pd	~110 pd
B parallel validation	«NUMBER» weeks	«NUMBER» weeks	«NUMBER» weeks
C1 per item	as B area	as B area	as B area
C2 run	40 h / month	80 h / month	160 h / month

Fees «…» by band; model licence fees not included «FIELD». «SAHİPLİK DOĞRULANSIN»

Calibration.
Draft. Banking, investment banking and telco values to be calibrated with Digitallency delivery data.

Acceptance Criteria

KOMTAS

Each tier is accepted on agreed evidence. Subject areas are accepted one by one after parallel validation.

ACCEPTANCE STEPS

1. **Criteria agreed**
   per tier and subject area, at start
2. **Evidence collected**
   matrix, reconciliation, load logs
3. **Review**
   open points fixed or explained
4. **Sign-off**
   business owner per subject area

CRITERIA «DIGITALLENCY DOĞRULASIN»

TIER / ITEM	CRITERION	EVIDENCE	THRESHOLD
A	fit/gap and model draft accepted	report, read-out	accepted at read-out
B foundation	physical model, standards, ETL framework	documents, test loads	loads running
B mapping	source-to-target matrix signed	matrix	all areas in scope
B validation	agreed KPIs reconcile with current reports	reconciliation report	within «NUMBER»
B handover	documents and training	sign-off sheet	signed
C1 / C2	same per item; monthly report for C2	report	per item / month

Tolerance agreed first.
The reconciliation tolerance per KPI is agreed before validation starts; differences caused by known current-report errors are recorded.

Outside acceptance.
Errors in source data, out-of-scope reports and platform issues are recorded but do not block acceptance.

Accelerators

KOMTAS

Six reusable assets. 1, 2 and 5 are Komtaş templates on the Digitallency models; 3, 4 and 6 are adapted from the Damalink delivery documents.

04 · ACCELERATORS

1 Fit/gap matrix template
«DIGITALLENCY DOĞRULASIN»

Mapping of source attributes and KPIs to the model, with class and fit ratio.

classes · fit ratio per area · customisation list

Komtaş template — A

2 Source-to-target matrix
«DIGITALLENCY DOĞRULASIN»

Attribute-level mapping with rules, used per subject area.

source · rule · target · DQ check · owner

Komtaş template — B · C

3 Naming and loading standards
«DAMALINK DOĞRULASIN»

Object naming, header attributes, defaults, delta detection rules.

naming · headers · defaults · delta · history

adapted from Damalink — B

4 Parametric ETL framework
«DAMALINK DOĞRULASIN»

Parameter-driven loads with restart and recovery.

parameters · full / delta · recovery · logging

adapted from Damalink — B · C

5 KPI catalogues per branch
«DIGITALLENCY DOĞRULASIN»

KPI name, definition, formula, subject areas, owner.

banking · investment · telco · insurance

Komtaş template — A · B

6 Insurance domain catalogue
«DAMALINK DOĞRULASIN»

Source domains by line of business, ~30 DWH domains, datamarts.

Health · P&C · Life & Pension · datamarts

adapted from Damalink — A · B

Rewritten, not copied. All six are written in Komtaş structure and language. Model content itself (entities, attributes) is used only within the licence terms agreed per model.

Follow-on Map

KOMTAS

Each tier leads to a named next step. In the proposal templates this is the section 'Next step', without partner terms.

AFTER → NEXT STEP «DIGITALLENCY DOĞRULASIN»

AFTER	NEXT STEP	TYPE
A report	B Model Implementation	project
B foundation and first areas	C1 more subject areas and KPI sets	per item
Banking model live	regulatory-reporting (common regulatory layer)	package
Several datamarts on the platform	datamart-consolidation onto the model	package
Customer 360 KPIs	mdm-customer-360 (golden record)	package
Model definitions	data-governance (business glossary)	package
Go-live	C2 or data-platform-ops	recurring service
Insurance customer	insurance programme with Damalink «FIELD»	programme

In the proposal templates.
Section 'Next step': more subject areas, regulatory reporting, consolidation, golden record, glossary, run. No partner terms, no prices.

Pull-through.
Platform (Teradata, cloud DWH on GCP or Azure) and licences come with B; the model anchors later packages.

Risks and Open Points

KOMTAS

Known risks of the package as drafted, how they are handled, and the questions still open.

RISKS «DIGITALLENCY DOĞRULASIN»

RISK	EFFECT	HANDLING
Model IP and licence	model cannot be delivered or priced	ownership confirmed per model before any proposal
Model age	references and structures dated	years and current versions confirmed by the partners
Customisation creep	core changed, effort grows	core not extended; gaps in custom tables; change control
Sector SME availability	weak mapping and KPI review	named SME per branch before B starts
References via third parties	references not usable by name	Softtech and Digitallency permission; anonymous wording
Allianz SCV attribution	same reference claimed twice	confirm with both partners; use as MDM reference only

OPEN POINTS BY OWNER

Digitallency

- Model content beyond subject areas
- Reference years, scope, permission
- Efforts and bands per branch
- Softtech route terms

Damalink

- Insurance domains and datamarts current?
- Allianz SCV delivery
- Insurance implementation reference
- Insurance efforts

Komtaş management

- Ownership and licence per model
- Delivery, adaptation, resale rights
- Teradata cLDM relationship
- Revenue share and proposal lead

Verification Summary

KOMTAS

Draft for review by Digitallency, Damalink and Komtaş management. Every drafted statement carries an orange tag naming its owner and has one question in the sidecar file.

PACKAGE FILES

		TAGS
1	Blueprint (this file)	76
2	Customer deck	«...»
3a–c	Input forms	«...»
4a–c	Proposal templates	«...»

Package total: «...» tags; same in EN and TR.
One sidecar per document; one question per tag; owner per tag.

HOW THE REVIEW WORKS

1. Each owner answers its questions in the sidecar
2. Confirmed: tag removed; changed: EN and TR updated
3. Ownership answers decide what customer files may say
4. Durations, efforts and bands recalibrated; placeholders filled

Known facts carry no tag: the subject area and KPI set names and references as listed in the Digitallency deck, the structure of the Damalink insurance material, the insurance targets; partnerships and ownership open.
