INDUSTRY DATA MODELS · TIER B · INTERNAL

Model Implementation — Proposal Input Form

Information to be collected for a Model Implementation (B) proposal that builds the industry model on the target platform — the foundation once (physical model, core entities, standards, historisation, ETL framework, DQ, semantic layer base), then per subject area mapping, ETL, KPI set, reports base and parallel validation — and the proposal field (file 4b) each item fills. Sections follow the Proposal Set codes (P1–P7). Orange tags mark draft statements to be verified: the DIGITALLENCY tag for Banking, Investment Banking and Telco (subject areas, KPI sets, references, regulation links, efforts and bands, the A / B / C structure and the generic method); the DAMALINK tag for Insurance (domains, datamarts, KPI set, DWH rules, delivery documents, insurance efforts, the Allianz SCV question); the SAHİPLİK (ownership) tag for model ownership, IP and licence — answered by Komtaş management. This form is for internal use; customer, partner and model names are not written into customer files.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the Assumptions and Out of Scope section.

The “WHERE IT FILLS IN THE PROPOSAL” column of each row names the section or variable field of the proposal template (file 4b). This form uses the Proposal Set codes P1–P7; the A·B·C mark in each code heading shows the tiers in which the code is asked.

If the answer to a question is “not known”, that is also an answer — it is often the first finding and goes into the proposal as an assumption.

LIMIT OF TIER B: Model Implementation builds the model of the selected industry on the target platform: the foundation once, then the subject areas one by one. The prerequisite is A or an equivalent fit / gap study («A REF»); without it A is proposed first and form 3a is used. New subject areas and the monthly run after go-live are C.

FOUNDATION (once): physical model for the target platform; core / shared entities (party, product, time, organisation); naming and loading standards; historisation; ETL framework (delta, parametric, recovery); DQ checks; semantic layer base. «DIGITALLENCY DOĞRULASIN»

PER SUBJECT AREA: source-to-target matrix, ETL, KPI set, reports base, parallel validation with current reports, handover. Acceptance: reconciliation with the agreed KPIs within tolerance «NUMBER» and loads running. «DIGITALLENCY DOĞRULASIN»

«INDUSTRY — INSURANCE» only: the foundation follows the insurance DWH rules — core tables are not extended (customer-specific attributes in custom tables), delta detection, standard header attributes, default values for empty columns, null trimming in strings; multi-currency, multi-lingual, multi-tenancy. «DAMALINK DOĞRULASIN»

INDUSTRY BLOCKS: the industry is selected in P2; in the proposal each industry is one block — «INDUSTRY — BANKING» · «INDUSTRY — INVESTMENT BANKING» · «INDUSTRY — TELCO» · «INDUSTRY — INSURANCE»; the blocks of the industries not selected are deleted. In the proposal the model name is written as «MODEL» and the platform as «PLATFORM».

MODEL RULE: for every model the ownership, the licence and the right of Komtaş to deliver, adapt and resell the model are open; the proposal is not sent before P5 is answered and Komtaş management approves. The model licence fee «FIELD» is outside the Komtaş fee and is a separate line. «SAHİPLİK DOĞRULANSIN»

OUT OF SCOPE: source system changes; a rebuild of the full BI report portfolio; platform licences; model licence fees «FIELD». These items are written as separate lines where needed. «DIGITALLENCY DOĞRULASIN»

BOUNDARY: regulatory-reporting builds the regulatory reporting chain (common regulatory layer, data demand layer, DQ / validation for reports); this package builds the industry model and the EDW that can feed it. The DWH Assessment evaluates the platform as a whole and the target state; this package implements an industry model once the target is set.

P1 · A·B·C · IDENTITY — Customer and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the customer and the short name used in the text; single company or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER»	
○	Companies in scope — group companies, subsidiaries; for a single company the row is deleted	Cover «GROUP COMPANIES», Scope	
○	Reason for the request and context — for the one-paragraph context	Purpose «CUSTOMER CONTEXT»	
○	Is there an RFP, technical specification or service definition; its number, response format and deadline	Structure and response format of the proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», Commercial Terms «proposal date + 1 month»	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Procurement process, approved budget and payment term; is a supplier assessment (information security, outsourcing regulations) required	Effort and Fees, Commercial Terms «NUMBER» days payment term	
○	Are there competitors, and who (a platform vendor or another model provider, another DWH partner, a global systems integrator, the customer's own team)	Emphasis and section weights	

P2 · A·B·C · DECISION — Industry, Trigger, Tier and Sponsor

> B is not offered for a scope without a fit / gap study. If the answer to the first row of this section is "no", the proposal is not written and Tier A is proposed first.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Has A (Model Fit Assessment) been carried out, or is there an equivalent fit / gap study (fit ratio per subject area, adapted logical model, KPI mapping)**	Whether the proposal is written, «A REF»	
○	A reference — report / proposal number and date; the subject area order, platform and estimate recommended in A	«A REF», Scope, Activities and Timeline	
●	**Industry — «INDUSTRY — BANKING» · «INDUSTRY — INVESTMENT BANKING» · «INDUSTRY — TELCO» · «INDUSTRY — INSURANCE»; in banking, conventional or participation bank; if there are several companies, which ones**	Scope, ANNEX 1 — Industry Page, Driver 1	
●	**Trigger — new DWH or DWH renewal, platform migration (on-prem → cloud), merger, regulatory programme, inconsistent KPIs across datamarts, new core system**	Purpose «CUSTOMER CONTEXT» · «TRIGGER»	
○	Sponsor and decision maker — CDO, CIO, DWH / BI unit, finance or risk unit; who makes the proposal decision, and by what date	Team, Customer Responsibilities, Commercial Terms	
●	**Target dates — go-live of the first subject area; the calendar it depends on (end of the current DWH licence, migration plan, regulatory date)**	Activities and Timeline, Commercial Terms	

Industry selection — one industry is selected; the rows and blocks of those not selected are deleted. In the Banking, Investment Banking and Telco rows only the listed subject areas are known; the additions marked draft, the KPIs and the regulation links are Komtaş proposals (rows 1–3). «DIGITALLENCY DOĞRULASIN» The Insurance row is adapted from the Damalink Insurance Layer (row 4). «DAMALINK DOĞRULASIN»

#	INDUSTRY (PROPOSAL BLOCK)	SUBJECT AREAS	KPI SETS	REGULATION	SELECTED
1	«INDUSTRY — BANKING»	party, event, channel, campaign, media, contract (+ product, account, collateral, GL — draft)	Customer 360; sales and profitability; campaign and marketing (+ risk / regulatory feed — draft)	BDDK	
2	«INDUSTRY — INVESTMENT BANKING»	customer / account, order and transaction, portfolio / position, instrument, market data, fee / commission, channel (draft)	trading volume, commission income, AUM / portfolio, active customers, channel share (draft)	SPK / MKK	
3	«INDUSTRY — TELCO»	party, event, finance, network, contract, product (+ usage / CDR, billing — draft)	churn, ARPU, usage, campaign response (draft)	BTK	
4	«INDUSTRY — INSURANCE»	Health · P&C · Life & Pension; ~30 DWH domains; datamarts (P4)	renewal rate, loss and combined ratios, hit ratio, STP, provision speed, earned premium, budget tracking	SEDDK	

Triggers → Package Response

Typical triggers and the package response. Those seen at the customer are marked in the last column; they feed the Purpose section of the proposal. The trigger → tier mappings are drafts (table as a whole). «DIGITALLENCY DOĞRULASIN»

#	TRIGGER	PACKAGE RESPONSE	IN A	IN B / C	PRESENT AT CUSTOMER
1	New DWH or DWH renewal	The model as the base of the target DWH	Fit / gap, platform note	B	
2	Platform migration (on-prem → cloud)	Using the migration as a chance to adopt a model	Fit / gap with the current model	B	
3	Merger	Bringing two structures together in one model	Source mapping of both sides	B, C1	
4	Regulatory programme	An EDW that feeds regulatory reporting	Regulatory needs (P6)	B	
5	Inconsistent KPIs across datamarts	Shared KPI sets and definitions	KPI mapping	B, C1	
6	New core system	Mapping the new source to the model	Source mapping	B, C1	

P3 · A·B · LANDSCAPE — Sources, Existing DWH / Datamarts, Platform and ETL

TYPICAL SOURCES — Banking: core banking, cards, loans, treasury, channel and campaign systems · Investment Banking: order management, back office, custody, market data · Telco: billing, CRM, network and CDR mediation, product catalogue. «DIGITALLENCY DOĞRULASIN»

«INDUSTRY — INSURANCE» — Health, P&C and Life & Pension operational systems; external sources SBM, KPS, EGM, KKB; marketing data (SMS, social media, calls, chat, campaigns). Flow: CDC / ETL / batch → ODS / staging → DWH → datamarts → BI, CRM, advanced analytics. «DAMALINK DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Source systems — count, technology, owners; which are in scope (core banking, cards, loans; order management and back office; billing, CRM, network / CDR mediation; policy, claims, agency)**	Scope, Driver 2	
○	Existing DWH and datamarts — platform, age, modelling approach (3NF, star, data vault), size, number of datamarts; overlapping datamarts	Purpose, Approach	
●	**Platform — current and target («PLATFORM»): Teradata, cloud DWH on GCP / Azure, other; has the target been decided**	Scope «PLATFORM», Approach	
○	Reports and KPIs — number of reports, BI tools; are KPI definitions written down; is there a business glossary	Scope, Approach	
○	ETL tool and scheduling — Informatica, ODI, platform-native tools, other; existing ETL framework, CDC	Approach, «PLATFORM»	
○	Documentation — data dictionaries, source system documents, existing data model documents	Approach, Assumptions and Out of Scope	
●	**Environments and access — development / test / production; access to production data for parallel validation; approval process and lead time**	Customer Responsibilities, Activities and Timeline, Blocker Checklist	

Source inventory — the sources to be connected in B (from the output of A). One row is one source system.

#	SOURCE SYSTEM	AREA / LINE OF BUSINESS	TECHNOLOGY	OWNER	IN SCOPE
1					
2					
3					
4					
5					
6					

P4 · A·B·C · SCOPE — Subject Areas, KPIs, History and Volume

«INDUSTRY — INSURANCE» — LINES OF BUSINESS: Health (policy / group policy, customer, policyholder / insured, coverage, underwriting, product, provision, network, institution, agency, TPA) · P&C (customer, policy, insured, coverage, claim, product, property, network, service) · Life & Pension (customer, policy, insured, business object, agent, loss event, reinsurance, commission account, coverage, claim, product, booking basis, location). «DAMALINK DOĞRULASIN»

DATAMARTS: Customer Value Management (single customer across lines of business), VIP customer, retail customer segmentation, call centre performance, fraud, health (provision and underwriting performance), sales (premium by agency, plan vs actual), cross-sell and penetration, agency representative incentive. «DAMALINK DOĞRULASIN»

KPI SET: new / lost / existing customers and policies; renewal rate; loss and combined ratios; hit ratio (quote → policy); STP rate; provision speed; exposure and earned premium; budget tracking (NEP, GLR, NLR, CR, CoR; MTD / YTD). «DAMALINK DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Subject areas in B and their order — from the A roadmap; the fit ratio and customisation level of each from A**	Scope, Activities and Timeline, Effort calculation	
○	KPI sets — the agreed KPIs and their definitions per subject area (from the KPI mapping of A)	Scope, Deliverables and Acceptance, Driver 5	
○	History depth — number of years to be loaded; historisation need (tracking of changes)	Scope, Driver 4	
○	Data volume — TB, daily delta, growth over the last 12 months	Scope, Driver 3	
○	Load frequency — daily, intraday, monthly; time reports must be ready	Approach, Assumptions and Out of Scope	
○	Consumers — BI, regulatory reporting, analytics, CRM; is there a golden record for Customer 360 (mdm-customer-360)	Scope, Next Step	

Subject area list — from the output of A; the fit ratio and customisation level set the band of each subject area (B Effort Calculation).

#	SUBJECT AREA	FIT RATIO (A) %	CUSTOMISATION (A)	SOURCE SYSTEMS	ORDER
1					
2					
3					
4					
5					
6					

P5 · A·B·C · MODEL — Model Choice, Licence / IP Status and Customisation Tolerance

> CUSTOMISATION RULE: the core tables of the model are not extended; customer-specific attributes go to custom tables; the customisation level from the gap analysis (low / medium / high) is a band driver. The rule is taken from the insurance DWH rules. «DAMALINK DOĞRULASIN» Applying it to the other industries is a Komtaş proposal. «DIGITALLENCY DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Model choice — the model of the selected industry («MODEL»), the customer's own model or a mix; does the customer already hold a licensed model (e.g. through the platform vendor)**	Scope, Approach, ANNEX 1 — Industry Page	
●	**Licence / IP status — does the customer hold a model licence; is a licence purchase acceptable; the model licence fee «FIELD» is a separate line from the Komtaş fee**	Effort and Fees, Assumptions and Out of Scope, Commercial Terms, Blocker Checklist	
○	Customisation tolerance — how far the customer accepts the structure and naming of the model, or insists on its own definitions	Approach, Assumptions and Out of Scope, Driver 6	
○	Language and naming — model names in English, business names in Turkish in the glossary; current naming standard	Approach	
○	Glossary link — is there a business glossary; should the model definitions seed the glossary (data-governance)	Deliverables and Acceptance, Next Step	

Model ownership — internal use; the model and owner names are not written in customer files, the model is described as an "industry-specific enterprise data model". The ownership columns are filled by Komtaş management.

#	MODEL (INDUSTRY)	OWNER	LICENCE	KOMTAŞ MAY DELIVER / ADAPT / RESELL	SELECTED
1	Banking DM («INDUSTRY — BANKING»)	Digitallency IP? «SAHİPLİK DOĞRULANSIN»	«FIELD»	«FIELD»	
2	Investment BDW («INDUSTRY — INVESTMENT BANKING»)	Digitallency IP? «SAHİPLİK DOĞRULANSIN»	«FIELD»	«FIELD»	
3	Teradata cLDM («INDUSTRY — TELCO»)	Teradata product, under licence «SAHİPLİK DOĞRULANSIN»	«FIELD»	«FIELD»	
4	Insurance Layer («INDUSTRY — INSURANCE»)	Damalink IP? «SAHİPLİK DOĞRULANSIN»	«FIELD»	«FIELD»	

P6 · A·B · REGULATION — Sector Regulation, Reporting Needs and Data Residency

> REGULATION LINKS (generic; no article numbers): Banking — BDDK; participation banks also BDDK, with interest-free product specifics · Investment Banking — SPK / MKK (Komtaş proposal) · Telco — BTK (Komtaş proposal). «DIGITALLENCY DOĞRULASIN»
>
> «INDUSTRY — INSURANCE» — SEDDK; link to mdm-customer-360 for the single customer view. «DAMALINK DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Regulatory reporting the EDW is expected to feed — BDDK, SPK / MKK, BTK, SEDDK; which reports; how they are produced today	Purpose, Scope, ANNEX 1 — Industry Page	
○	Is a regulatory reporting programme running or planned (regulatory-reporting package)	Next Step, Assumptions and Out of Scope	
●	**Data residency and cloud — do sector regulation and internal policy allow the target platform to be on cloud**	«PLATFORM», Assumptions and Out of Scope, Blocker Checklist	
○	Personal data — KVKK; masking in non-production environments; sample data used in A and B	Customer Responsibilities, Assumptions and Out of Scope	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	If a participation bank — how the interest-free product specifics (profit share, partnership-based products) are covered in the model	ANNEX 1 — Industry Page, Assumptions and Out of Scope	
○	Audit and retention — history needed for audit, retention periods	Scope, Driver 4	

P7 · B · DELIVERY — Platform, ETL, Parallel Validation and Team

TEAM — engagement lead · industry data modeller / architect · ETL developers · BI developer · business analyst with sector knowledge. Customer side: business owners per subject area, DWH team, source system owners. «DIGITALLENCY DOĞRULASIN»

«INDUSTRY — INSURANCE» delivery documents: per layer BRD, analysis, design, technical architecture, source-to-target matrix, data model document, naming conventions, parametric ETL structure with recovery strategy, technical and operational documents. «DAMALINK DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Target platform («PLATFORM») and environments (development / test / production) — who provides them, are they ready, capacity**	Scope «PLATFORM», Customer Responsibilities, Blocker Checklist	
●	**ETL tool — Informatica, ODI, platform-native tools, other; is the licence held by the customer; is the ETL framework (delta, parametric, recovery) reused or built**	Approach, Assumptions and Out of Scope	
●	**Parallel validation — current reports to reconcile against per subject area; tolerance «NUMBER»; parallel run period; who signs off the reconciliation**	Deliverables and Acceptance, Activities and Timeline, Blocker Checklist	
●	**Business owner / sector SME — per subject area, the business owner and a person with sector knowledge on the customer side; hours per week available**	Customer Responsibilities, Team, Blocker Checklist	
○	Semantic layer and BI — BI tool; reports base per subject area; a rebuild of the full report portfolio is out of scope	Scope, Assumptions and Out of Scope	
○	Customer team — DWH team, source system owners; expectation of joint development and knowledge transfer	Customer Responsibilities, Team	
○	Run after go-live — the customer's DWH team, C2 or data-platform-ops	Next Step, Assumptions and Out of Scope	

Band and Effort Calculation — Tier B

Completed after the answers are collected. In B the effort consists of the foundation (once) and the subject areas (each with its own band); parallel validation is added separately. The band is the highest band reached by at least three drivers. A driver reaches a band when its value falls in that band or a higher one; if three drivers do not reach M or L, the band is S. The foundation band is set with the whole scope; the band of each subject area is set separately with the same table and the values of that subject area (driver 1 excluded). The values are taken from A («A REF»). «DIGITALLENCY DOĞRULASIN»

CALIBRATION NOTE — DRAFT: Foundation (~60 / ~100 / ~150 pd) and subject area (~40 / ~70 / ~110 pd) efforts are not based on recorded Komtaş effort. Komtaş values are not written into the proposal before the delivery team confirms them. For Banking, Investment Banking and Telco the calibration source is the actual effort of the reference implementations. «DIGITALLENCY DOĞRULASIN» For Insurance the Damalink material has no effort source. «DAMALINK DOĞRULASIN»

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Subject areas in scope (P4 · A)	≤ 3	4 – 7	> 7	
2	Source systems (P3 · A)	≤ 5	6 – 15	> 15	
3	Data volume — TB (P4)	≤ 5	> 5 – 50	> 50	
4	History depth — years (P4)	≤ 2	3 – 5	> 5	
5	KPIs (P4 · A)	≤ 50	51 – 200	> 200	
6	Model customisation — from A (P5 · A)	low	medium	high	
	RESULT — foundation effort (band) «DIGITALLENCY DOĞRULASIN»	~60 pd	~100 pd	~150 pd	

Effort calculation — foundation × subject areas × band. Row 1 always; rows 2–5 for each subject area in P4 (rows are added where needed, unused ones deleted); row 6 with the number of subject areas. The model licence fee is not part of this table. The subject area efforts and counting parallel validation separately are drafts. «DIGITALLENCY DOĞRULASIN»

#	ITEM	BAND	UNIT EFFORT	COUNT	EFFORT (pd)
1	Foundation — physical model, core entities, standards, historisation, ETL framework, DQ checks, semantic layer base		S ~60 · M ~100 · L ~150 pd	1	
2	Subject area 1 — «FIELD»		S ~40 · M ~70 · L ~110 pd	1	
3	Subject area 2 — «FIELD»		S ~40 · M ~70 · L ~110 pd	1	
4	Subject area 3 — «FIELD»		S ~40 · M ~70 · L ~110 pd	1	
5	Subject area 4 — «FIELD»		S ~40 · M ~70 · L ~110 pd	1	
6	Parallel validation — per subject area	—	«NUMBER» pd / subject area	«NUMBER»	
	TOTAL — foundation + subject areas + parallel validation				

FORMULA — Total effort = foundation (value of the band) + Σ subject areas (value of the band of each) + parallel validation (number of subject areas × unit effort). In the proposal the foundation and each subject area are separate lines.

ILLUSTRATION (invented values, not customer data) — foundation M, three subject areas (M, M, S), parallel validation 3 × 10 pd: 100 + 70 + 70 + 40 + 30 = 310 pd.

ACCEPTANCE — per subject area: reconciliation with the agreed KPIs within tolerance «NUMBER», loads running, source-to-target matrix and documents delivered. «DIGITALLENCY DOĞRULASIN»

CUSTOMER EFFORT — per subject area, the business owner and sector SME «NUMBER» hours per week; the DWH team and source system owners for mapping and validation. Written into the Customer Responsibilities section of the proposal. «DIGITALLENCY DOĞRULASIN»

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the effort calculation, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	KOMTAS-«CUSTOMER ABBREVIATION»-IDM-B-«YEAR»-«SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month» · «price validity date»	Cover, Commercial Terms	Send date + 1 month (P1); sales sets the price validity date	
3	«CUSTOMER CONTEXT» · «TRIGGER»	Purpose	P1 and P2 answers	
4	«INDUSTRY — BANKING» · «INDUSTRY — INVESTMENT BANKING» · «INDUSTRY — TELCO» · «INDUSTRY — INSURANCE»	Scope, ANNEX 1 — Industry Page	P2 industry table; the blocks and Annex 1 pages of the industries not selected are deleted	
5	«MODEL»	Scope, Approach	P5 — the model of the selected industry; the model and owner names are not written in the customer file, it is described as an “industry-specific enterprise data model”	
6	«PLATFORM»	Scope, Approach	P3 and P7 — target platform	
7	Accelerator list	ANNEX 2 — Accelerators	Source-to-target matrix, naming and loading standards, parametric ETL framework, KPI catalogues; the domain catalogue if Insurance is selected	
8	«A REF»	Scope, Assumptions and Out of Scope	P2 — number and date of the A report or the equivalent fit / gap	
9	«BAND» foundation · «NUMBER» subject areas × «BAND» · «NUMBER» pd	Activities and Timeline, Team, Effort and Fees	B Effort Calculation, delivery team confirmation	
10	Model licence fee «FIELD»	Effort and Fees, Assumptions and Out of Scope	P5 and Komtaş management; a separate line from the Komtaş fee	
11	Foundation «fee» · «fee» per subject area · «day rate» · «%» · «amount»	Effort and Fees, Commercial Terms	Each a separate line; sales sets the payment pattern	
12	Next step items	Next Step	Follow-on Interest table; no margin figures	
13	References table (anonymous)	ANNEX 3 — About Komtaş	The anonymous wording in the “IN THE PROPOSAL” column of the References table below; no customer, partner or model name is written.	
14	«full name» · «title» · «e-mail / phone» · «CITY»	Commercial Terms	Komtaş commercial and technical contact; city for free on-site meetings	

References — Source of the About Komtaş Annex

In customer files (2, 4a / 4b / 4c) only the anonymous wording in the last column is written; partner, model, reference customer and target customer names are not named; where a year is unknown, «YEAR» stays. The Banking, Investment Banking and Telco references are written anonymously in a customer file with one tag per reference list (rows 1–3). «DIGITALLENCY DOĞRULASIN» The insurance rows are open (rows 4–5). «DAMALINK DOĞRULASIN»

#	SOURCE (INTERNAL)	CONTENT	USE IN THE PROPOSAL	YEAR	IN THE PROPOSAL (ANONYMOUS)
1	Garanti Yatırım, Osmanlı Yatırım, QNB Finansinvest	Investment BDW implementation (Digitallency deck)	Reference; Investment Banking	«YEAR»	three investment firms — investment banking data warehouse
2	Türk Telekom, TTNET	EDW on Teradata cLDM (Digitallency deck)	Reference; Telco	«YEAR»	a telecom group — enterprise data warehouse on an industry logical data model
3	Kuveyt Türk, Vakıf Katılım, Boubyan Bank	Banking EDW; Boubyan Bank via Softtech (Digitallency deck)	Reference; Banking	«YEAR»	two participation banks and a Gulf bank — banking EDW
4	Allianz	Single Customer View — MDM project; in both the Digitallency deck and the Damalink material	Customer data reference; not a model implementation	«YEAR»	an insurance group — customer data across group systems (single customer view)
5	«REFERENCE PROJECT»	Insurance model implementation — reference open	Reference if any; Insurance	«YEAR»	«REFERENCE PROJECT»
6	Damalink Insurance Layer	Reference architecture, domain catalogue, DWH / datamart patterns, delivery documents	Source of method and accelerators; not a reference	~2012–2021	Not written (the method is described as the Komtaş approach)
7	Sabancı Sigorta (AgeSA, Aksigorta, Medisa), Generali, Sompo	Insurance target customers	Target; not a reference	—	Not written

Service Selection Check

Before filling in the form, make sure that Tier B is the right service. One request can match more than one row.

STATUS	RIGHT SERVICE
The fit of an industry model to the customer's sources and KPIs is not known	A — Model Fit Assessment
A fit / gap has been done; the model is to be built on the target platform	B — Model Implementation
The model is live; a new subject area, KPI set or source is wanted	C — C1
The model is live; a monthly run and model maintenance are wanted	C — C2 «OPTIONAL» or data-platform-ops
A regulatory reporting chain is wanted	regulatory-reporting
An assessment of the platform as a whole and the target state is wanted	DWH Assessment
Consolidation of many datamarts is wanted	datamart-consolidation (model as consolidation target)
A single customer view / golden record is wanted	mdm-customer-360
A business glossary and data ownership are wanted	data-governance
Only a platform licence or a source system change is wanted	Out of scope

Follow-on Interest

Follow-on work the customer may be interested in; feeds the Next Step section of the proposal. No margin figures appear in the proposal.

#	FOLLOW-ON WORK	RELATED TRIGGER	INTEREST (YES / NO / LATER)	NOTE
1	C — Extension (C1 items, C2 run)	New subject area, run after go-live		
2	Platform (Teradata, cloud DWH on GCP / Azure)	Platform migration		
3	regulatory-reporting	Regulatory programme		
4	datamart-consolidation	Inconsistent KPIs, many datamarts		
5	mdm-customer-360	Customer 360 KPIs, single customer view		
6	data-governance	Glossary from model definitions		
7	data-platform-ops	Run after go-live		

COMMERCIAL FRAME — INTERNAL ONLY. This box, the partner names (Digitallency, Damalink, Softtech), the model names (Teradata cLDM, Banking DM, Investment BDW, Insurance Layer), the reference customer names and the target customers are not written into the customer deck or the proposal.

The model accelerates EDW delivery. Pull-through: platform (Teradata, cloud DWH on GCP / Azure), regulatory-reporting (banks), datamart-consolidation (the model as consolidation target), mdm-customer-360 (Customer 360 KPIs use the golden record), data-governance (model definitions seed the glossary), the insurance programme.

Insurance targets: the Sabancı Sigorta group (AgeSA, Aksigorta, Medisa), Generali, Sompo. Gulf: Boubyan Bank via Softtech supports a regional narrative and a Softtech subcontracting route.

Partnership and IP terms are open. IP, licence and royalty terms per model «FIELD»; the Komtaş fee and the model licence fee are separate lines. «SAHİPLİK DOĞRULANSIN»

Finding: the Allianz Single Customer View work (customer portfolio consolidation over group systems, MDM data model) appears in the Damalink Insurance Layer material; it is an MDM project, not an insurance data-model implementation. «DAMALINK DOĞRULASIN» The same work is also listed as a reference in the Digitallency deck. «DIGITALLENCY DOĞRULASIN»

Risks: model IP / licence; model age (some references are old); customisation creep; sector SME availability; references through third parties (Softtech).

Blocker Checklist

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the Assumptions and Out of Scope section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold. The model licence / IP cannot be covered by an assumption.

The first row of P2 and the licence row have a special place: without a fit / gap no B proposal is written; without a resolved licence the model cannot be built.

Blocking conditions and their effect on the proposal

#	CONDITION	EFFECT ON THE PROPOSAL	ACTION	STATUS
1	No A or equivalent fit / gap	No B proposal is written	Propose A first; use form 3a	
2	No industry selected	The scope, model and band cannot be written	Clarify in P2	
3	Model licence / IP unresolved	The model cannot be offered; the proposal is not sent	P5 and Komtaş management (ownership)	
4	No sector SME / business owner on the customer side	Subject area acceptance cannot be given	Clarify in P7	
5	No access to sources (metadata / sample data)	Mapping, ETL and parallel validation cannot be carried out	Clarify in P3	
6	No target platform or parallel validation baseline	The foundation cannot be planned; subject area acceptance cannot be defined	Clarify in P7	

Blocker questions — these rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
P1	Full legal name of the customer and the short name used in the text; single company or group with subsidiaries	
P2	Has A (Model Fit Assessment) been carried out, or is there an equivalent fit / gap study (fit ratio per subject area, adapted logical model, KPI mapping)	
P2	Industry — «INDUSTRY — BANKING» · «INDUSTRY — INVESTMENT BANKING» · «INDUSTRY — TELCO» · «INDUSTRY — INSURANCE»; in banking, conventional or participation bank; if there are several companies, which ones	
P2	Trigger — new DWH or DWH renewal, platform migration (on-prem → cloud), merger, regulatory programme, inconsistent KPIs across datamarts, new core system	
P2	Target dates — go-live of the first subject area; the calendar it depends on (end of the current DWH licence, migration plan, regulatory date)	
P3	Source systems — count, technology, owners; which are in scope (core banking, cards, loans; order management and back office; billing, CRM, network / CDR mediation; policy, claims, agency)	
P3	Platform — current and target («PLATFORM»): Teradata, cloud DWH on GCP / Azure, other; has the target been decided	
P3	Environments and access — development / test / production; access to production data for parallel validation; approval process and lead time	
P4	Subject areas in B and their order — from the A roadmap; the fit ratio and customisation level of each from A	
P5	Model choice — the model of the selected industry («MODEL»), the customer's own model or a mix; does the customer already hold a licensed model (e.g. through the platform vendor)	
P5	Licence / IP status — does the customer hold a model licence; is a licence purchase acceptable; the model licence fee «FIELD» is a separate line from the Komtaş fee	
P6	Data residency and cloud — do sector regulation and internal policy allow the target platform to be on cloud	
P7	Target platform («PLATFORM») and environments (development / test / production) — who provides them, are they ready, capacity	
P7	ETL tool — Informatica, ODI, platform-native tools, other; is the licence held by the customer; is the ETL framework (delta, parametric, recovery) reused or built	
P7	Parallel validation — current reports to reconcile against per subject area; tolerance «NUMBER»; parallel run period; who signs off the reconciliation	
P7	Business owner / sector SME — per subject area, the business owner and a person with sector knowledge on the customer side; hours per week available
