KOMTAS

# MASTER DATA MANAGEMENT / CUSTOMER 360

Blueprint v1 — internal reference, draft for Damalink and Digitallency

A MDM Assessment · B Domain Foundation · C Multi-domain & Run · golden record, match & merge, survivorship, hierarchy, stewardship and distribution

1 **Positioning and commercial logic**
Summary, commercial logic and partnerships, evidence, target customers and triggers, scope, CDP boundary, master data. p. 2 – 8

2 **Approach and accelerators**
Approach, two B paths, technology options, modules, match & merge, eight accelerators. p. 9 – 15

3 **Delivery**
Assessment, Domain Foundation, additional domains and Run, team, sizing and effort, acceptance. p. 16 – 22

4 **Follow-on and status**
Follow-on map, risks and open points, verification summary. p. 23 – 25

# Package Summary — What, for Whom, When

KOMTAS

Master data management with Customer 360 as the lead domain: one golden record per customer, kept current and distributed to operational and analytical systems.

01 · SUMMARY

## WHAT THE PACKAGE DELIVERS

**Profile and duplicate findings**
DQ per field; duplicate rate within and across systems

**Rule documents**
DQ rule catalogue, match rules, merge and survivorship rules

**Golden record**
one customer record with cross-reference to every source

**Hierarchy and relationships**
household, group companies, customer–product

**Stewardship and distribution**
steward workflow; batch and real-time delivery

## THREE TIERS · B IN TWO PATHS «DAMALINK DOĞRULASIN»

**A — MDM Assessment**

profiling, duplicate analysis, match and merge rule drafts, model, architecture, B roadmap

4–8 weeks, fixed fee

**B — Domain Foundation**

one domain on the Consolidation path (IDQ) or the Hub path (MDM)

foundation once + path × band

**C — Multi-domain & Run**

C1 additional domain; C2 monthly tuning, stewardship support, monitoring

C1 per domain · C2 monthly

## BASIS — KNOWN FACTS

- Damalink 03 Master Data Management Framework: MDM Assessment, Customer 360 Solution, Reference Data Management
- Damalink catalogue also lists a Centralized Customer System (IDQ) and PIM
- Material dated 2018–2021; on-prem Informatica MDM 10.x, IDQ, IDD, SIF
- Digitallency deck: Allianz single customer view; Hepsiburada PIM
- Demand signal: YeşimTech asked about Informatica MDM SaaS licences
- Partnership models with Damalink and Digitallency not yet settled

**Status: draft v1.** Built from the Damalink framework material and the Digitallency references. Durations, efforts, packs, bands, tools, IDMC names, rule thresholds, roles and acceptance criteria carry an orange tag naming the owner who verifies them (p. 25).

# Commercial Logic — Partnerships Open

internal only

KOMTAS

Internal only. Partner terms, licence routes and the demand signal never appear in the customer deck or in the proposal templates.

## PARTNERSHIP WITH DAMALINK · OPEN «DAMALINK DOĞRULASIN»

| ITEM | STATUS |
|---|---|
| Delivery capacity | «FIELD» |
| Use of rule documents and templates | «FIELD» |
| Revenue share | «FIELD» |
| Proposal lead | «FIELD» |
| Day rates | «FIELD» |

**Digitallency.** «DIGITALLENCY DOĞRULASIN»
Use of the Allianz single customer view and the Hepsiburada PIM references in Komtaş proposals: «FIELD». Until agreed, customer files use anonymous wording only.

## WHERE THE VALUE IS

**A Assessment**
fixed fee; rules, duplicate rate, roadmap

↓

**Informatica licences**
MDM on-prem, or MDM SaaS on IPUs

↓

**B Domain Foundation**
one domain; optional IDMC licence + onboarding

↓

**C Multi-domain & Run**
C1 per domain; C2 monthly, recurring

**Demand signal.** YeşimTech asked licence questions for Informatica MDM SaaS (IDMC) in the RFP folder. Not a reference; basis for the optional IDMC line in B.

## PRICING RULES

1. A is a fixed fee by band
2. B: foundation once, plus the domain on the chosen path by band
3. Optional lines: IDMC licence + onboarding; history migration
4. C1 one-time fee per domain; C2 monthly fee for a fixed hour capacity
5. Licences quoted by Informatica or a reseller «FIELD»

**Door to other work.** Stewardship opens data-governance; DQ findings open the DQ work; personal data in MDM copies opens data-privacy; a golden ID opens the CDP packages; insurance groups open the insurance programme.

# Evidence and Sources

KOMTAS

What the package rests on today. Internal only: partners and references are named here; customer files use anonymous references.

01 · EVIDENCE

## SOURCES

### 3 offerings

**Damalink — 03 MDM Framework**
«DAMALINK DOĞRULASIN»

MDM Assessment, Customer 360 Solution, Reference Data Management. Presentations, requirement document, DQ analysis report, DQ rule catalogue, match and merge rule documents, source-to-target matrix, sample data, reference dictionaries, question list.

### 4 systems → 1

**Digitallency — Allianz single customer view**
«DIGITALLENCY DOĞRULASIN»

AZS, AZHE, AZYE and YKS brought into one environment; duplicate customers cleaned within and across group companies; PowerCenter + IDQ + Informatica MDM; report access from one week to one day.

## SOURCE STATUS

| | |
|---|---|
| **Damalink framework — 3 offerings**<br>approach, phases, deliverables, question list | source |
| **Damalink rule documents (2020)**<br>DQ, match, merge rules; SMX; dictionaries | source |
| **Allianz — single customer view**<br>Digitallency reference; 4 systems | source |
| **Content dates**<br>2018–2021; Informatica MDM 10.x on-prem | to confirm |
| **Use in Komtaş proposals**<br>permission; partner or Komtaş reference | to confirm |
| **Komtaş own reference**<br>«REFERENCE PROJECT» | no reference |

**Hepsiburada PIM: no detail in the deck «RESULT». «DIGITALLENCY DOĞRULASIN»**

## GAPS AND OPPORTUNITY

### Old material

Content dates from 2018–2021 and on-prem Informatica MDM 10.x. Product names and support status have changed; IDMC equivalents are drafted (p. 11).

### Partner IP and references

Use of the Damalink rule documents and of the Digitallency references in Komtaş proposals is open.

### Door to CDP and insurance

A golden customer ID is an input to CDP work; group-wide customer views are a fit for insurance groups.

**Customer naming.** Customer files use: an insurance group — single customer view across four group systems; an e-commerce company — PIM («RESULT»). No system codes, no partner names in customer files.

# Target Customers and Triggers

KOMTAS

Who is approached and the situations that start the conversation. Drafted from the framework material and the references.

## TARGET CUSTOMER PROFILES «DAMALINK DOĞRULASIN»

**Banks and insurance groups**
several companies, one customer

**Telecom and utilities**
large customer bases, many channels

**Retail and e-commerce**
customers and product catalogues

**Automotive and fleet**
customer, vehicle and contract links

## TRIGGERS «DAMALINK DOĞRULASIN»

**Duplicate customers**

the same customer in several systems or group companies.

**KVKK data subject requests**

one person must be found across all systems.

**Group risk and legal reporting**

customer relationships and groups on clean data.

**CRM or core system renewal**

data cleaned and keyed before migration.

**Mergers**

customer bases of two companies brought together.

**Omnichannel and digital**

one customer view behind every channel.

**CDP projects**

a CDP needs a golden customer ID to build on.

**Product catalogue chaos**

retail and e-commerce products with no single source.

**First call.** Which systems hold customers, how many records (active / passive), existing match rules, consuming systems, real-time needs, Informatica licences, business owner for match rules. The answers feed the input form (file 3a).

# Scope Boundary — What It Is Not

KOMTAS

What the package does not do, and the Komtaş packages it links to without absorbing them.

01 · BOUNDARY

## OUT OF SCOPE «DAMALINK DOĞRULASIN»

- CDP, campaign management and channel activation
- Changes to source systems
- Enterprise DQ programme outside master data
- Steward organisation, ownership and policies
- Licence procurement (except the optional IDMC line)

## BOUNDARY TO DATA-GOVERNANCE

**Governance sets the organisation; this package configures it in the tool.**

Steward roles, data ownership and policies belong to data-governance. This package builds the steward workflow, queues and approval flow in the MDM tool and agrees the steward process with the DG office. If a catalogue exists, master data definitions are written there.

## RELATED PACKAGES

**data-privacy** masking of personal data in non-production MDM copies.

**DQ in data-governance** enterprise DQ; this package applies DQ to master data in scope.

**CDP packages** marketing activation on top of the golden ID (p. 7).

**Boundary rule.** Organisation and policy: data-governance. Personal data protection in copies: data-privacy. Segments and activation: CDP. Golden record, match & merge, stewardship workflow and distribution: this package.

# MDM and CDP — Where the Line Is

KOMTAS

Both talk about a single customer view. They answer different questions, have different owners and use different data.

MDM ↔ CDP

| ASPECT | MDM / CUSTOMER 360 | CDP |
|---|---|---|
| **Purpose** | operational golden record | marketing and activation |
| **Identity** | deterministic and fuzzy rules on identifiers | profile stitching on events and devices |
| **Data** | identity, contact, relationships, consent attributes | behaviour, events, clickstream |
| **Output** | golden record and cross-reference, hierarchies | segments, audiences, journeys |
| **Written to** | operational systems, DWH, CRM | marketing channels |
| **Owner** | data governance / IT | marketing |
| **Not here** | clickstream, consent orchestration | survivorship, write-back to source |

**Together.**
The CDP consumes the MDM golden ID and attributes. MDM does not hold clickstream or orchestrate consent; consent attributes may be mastered.

**Internal note.**
cdp-assessment and cdp-deger-onerisi are empty. The Customer 360 DQ, match and merge rule documents and this boundary text are inputs to them.

# What Master Data Is

KOMTAS

The shared, non-transactional entities every system uses. When each system keeps its own copy, they drift apart.

01 · MASTER DATA

## FOUR KINDS OF MASTER DATA «DAMALINK DOĞRULASIN»

**Party**
customer, agency, employee, supplier

**Product**
product, part, service

**Account**
contract, agreement

**Location**
region, address

non-transactional | unique | current | consistent

## WHY IT GOES WRONG

- data scattered across systems, no owner, no traceability
- invalid and inconsistent values
- duplicates inside and across systems
- development cost of one-off fixes in every project
- KVKK and GDPR obligations on personal data

## BUSINESS USES «DAMALINK DOĞRULASIN»

- right offer, channel and time
- customer and group risk
- cross-sell and up-sell
- legal reporting on clean data
- better segmentation
- region, branch and staff relations
- history of master data
- portfolio reports backwards

**Lead domain.** Customer 360 is the lead domain. Product (PIM) and reference data are modules; further domains are added in C1 on the same foundation.

# Approach — Access, Analyze, Design, Apply

KOMTAS

Four steps from source access to a managed golden record. A covers steps 1–3; B and C cover step 4.

02 · APPROACH «DAMALINK DOĞRULASIN»

SOURCES: RDBMS | mainframe | big data | files

## 1 Access

- read-only access to customer tables
- agreed extract of up to «NUMBER» tables
- profiling tool set up

## 2 Analyze

- column profiling: fill, unique, frequency, pattern
- DQ dimensions and weights
- match rule draft and match scores

## 3 Design

- merge and survivorship rules
- conceptual data model
- architecture: inbound, outbound, batch / real time

## 4 Apply and manage

- cleansing, match & merge, golden record
- steward UI, approval flow, hierarchy
- schedules, monitoring, new sources

A ASSESSMENT: STEPS 1–3

B FOUNDATION AND C: STEP 4

**Reference stack:** PowerCenter + IDQ + Informatica MDM in the Allianz single customer view (four group systems). «DIGITALLENCY DOĞRULASIN»

**Turkish data first.** Name, surname, title, TCKN / VKN, phone, address and occupation rules are written for Turkish data from the start; generic rules miss most duplicates.

# B — Two Implementation Paths

chosen at the end of A

KOMTAS

The same rule documents, two ways to run them. The choice is made at the end of A and recorded in the proposal.

## B-Consolidation

IDQ / Cloud Data Quality · no hub

### WHAT IT INCLUDES «DAMALINK DOĞRULASIN»

- batch cleansing and standardisation
- match & merge in batch
- golden record table and cross-reference
- distribution to DWH and CRM
- lower licence cost
- Damalink: Centralized Customer System

ACTIVE CUSTOMER PACKS
**3 / 5 / 10 M**

DURATION S / M / L
**3 / 5 / 6+ months**

## B-Hub

Informatica MDM / MDM SaaS

### WHAT IT INCLUDES «DAMALINK DOĞRULASIN»

- hub model: landing, staging, base objects
- DQ in load; match & merge with trust
- steward UI and approval workflow
- hierarchy and relationships
- batch and real-time services
- Damalink: 360 Solution

RECORD PACKS
**10 / 30 / 50 M**

DURATION
**5+ months**

### WHEN TO CHOOSE WHICH «DAMALINK DOĞRULASIN»

| CRITERION | CONSOLIDATION | HUB |
|---|---|---|
| **Use of the golden record** | reporting, DWH, CRM loads | operational systems read and write it |
| **Steward work** | few manual decisions | steward queues and approvals |
| **Timing** | daily batch is enough | real-time search and updates |
| **Licence** | IDQ / Cloud Data Quality only | MDM licence or IPUs |

# Technology Options — On-premises or IDMC

KOMTAS

The Damalink material is built on on-premises Informatica MDM 10.x. IDMC equivalents are drafted and must be confirmed. The choice is a scope item «PLATFORM».

TWO OPTIONS «DAMALINK DOĞRULASIN»

| NEED | ON-PREMISES | IDMC |
|---|---|---|
| **Hub** | Informatica MDM Multidomain (IDD steward UI, SIF services) | MDM SaaS (Customer 360 / Business 360) |
| **Product** | Informatica Product 360 (PIM) | Product 360 SaaS |
| **Reference data** | Informatica RDM or in-house | Reference 360 |
| **DQ and matching** | Informatica Data Quality (IDQ) | Cloud Data Quality |
| **Integration** | PowerCenter | Cloud Data Integration |

**Choice per customer «PLATFORM».**
Existing Informatica licences, cloud plans and real-time needs decide the option. IDMC is licensed on IPUs; the optional B line covers licence and onboarding.

**Support status.** «DAMALINK DOĞRULASIN»
Support status of on-prem MDM 10.x and related products «FIELD»; checked with Informatica before each proposal.

# Modules — Customer 360, Product 360, Reference Data

KOMTAS

A domain is delivered as a module on the foundation. Customer 360 leads; the same list is used for C1 additional domains.

### «MODULE — CUSTOMER 360»

«DAMALINK DOĞRULASIN»

- individual and corporate customers
- within and across group companies
- household, group, customer–institution
- VARIANT vehicle: chassis no., plate, owner / insured
- for automotive, insurance, fleet

**B-Hub ~5+ months · Consolidation 3–6+**

### «MODULE — PRODUCT 360 / PIM»

«DAMALINK DOĞRULASIN»

- product–variant two-tier model
- daily batch delta from sources
- enrichment and channel publication
- no transactional data (e.g. stock)
- code dedup by the customer

**4 / 5 / 6 months**

### «MODULE — REFERENCE DATA»

«DAMALINK DOĞRULASIN»

- code lists in one place
- crosswalk: same meaning, other codes
- approval workflow and history
- product or in-house (table below)
- Reference 360 on IDMC

**S / M / L by code lists**

## REFERENCE DATA · PRODUCT OR IN-HOUSE «DAMALINK DOĞRULASIN»

| CRITERION | PRODUCT (RDM / REFERENCE 360) | IN-HOUSE | NOTE |
|---|---|---|---|
| **Model and steward UI** | ready model, UI, approval flow | built and kept by the team | UI is the main cost |
| **Crosswalk and hierarchy** | built in | own tables and screens | many systems → product |
| **History, merge / unmerge** | built in, with audit | to be developed | audit needs → product |
| **Cost and dependency** | licence; vendor roadmap | development and upkeep | compare over 3 years |
| **Fits when** | many systems and code lists | few lists, simple mappings | decided in A |

# Match & Merge — Rule Pattern and Survivorship

KOMTAS

Match rules combine an identifier with a fuzzy name score; negative rules block false merges; survivorship picks each field of the golden record.

## MATCH RULE PATTERN · CUSTOMER · EXAMPLE THRESHOLDS «DAMALINK DOĞRULASIN»

| FIELDS | SCORE | NOTE |
|---|---|---|
| **name + TCKN** | ≥ 70 | individual; identifier match |
| **title + VKN** | ≥ 70 | corporate customers |
| **name + VKN** | ≥ 80 | sole traders |
| **name + mobile phone** | ≥ 90 | ≥ 85 with the same birth date |
| **name + email** | ≥ 90 | free-mail domains excluded; risky |
| **first name + mobile / TCKN** | ≥ 80 | surname change, same birth date |
| **name + home phone** | «NUMBER» | similar phone; shared lines |

**Negative rules.** «DAMALINK DOĞRULASIN»
Two filled and different TCKNs, or two filled and different birth dates, block a match whatever the score.

**Tuning.** «DAMALINK DOĞRULASIN»
Thresholds are examples to tune on the customer's data. Draft: up to 5 match / merge tuning iterations; basic cleansing before matching.

## FROM SOURCES TO GOLDEN RECORD

1. **Land and stage** source rows into landing and staging
2. **Cleanse and standardise** rules and reference dictionaries
3. **Match** rules and scores form clusters
4. **Merge** survivorship per field
5. **Golden record** with cross-reference to every source

## Survivorship per field «DAMALINK DOĞRULASIN»

**Most frequent non-blank** value seen most across sources

**Most recent** latest update wins on a tie

**Source trust** trusted source or channel first; DQ score lowers trust

**Steward decision** unclear clusters go to the steward queue

# Accelerators 1–4 — Rules and Matching

KOMTAS

Reusable rule sets for Turkish customer data that produce the A rule documents and shorten B.

02 · ACCELERATORS

## 1 Turkish customer DQ rule catalogue

«DAMALINK DOĞRULASIN»

Rules per field with DQ dimension, cleanse option and quality code.

**COVERS**

- name, surname, title
- TCKN / VKN checksum, verification
- phones, email
- address, city, district
- occupation, education

From the Damalink rule documents. A · B

## 2 Match rule set

«DAMALINK DOĞRULASIN»

Deterministic and fuzzy combinations with scores for Turkish customer data.

**INCLUDES**

- identifier + fuzzy name
- negative rules
- free-mail exclusion
- surname change handling
- thresholds to tune

From the Damalink match rules. A · B

## 3 Survivorship template

«DAMALINK DOĞRULASIN»

Per-field rules that build the golden record from several sources.

**RULES**

- most frequent non-blank
- most recent update
- source and channel trust
- worked example rows

From the Damalink merge rules. A · B

## 4 Source-to-target matrix

«DAMALINK DOĞRULASIN»

Landing → staging → base object mapping with rules per column, and data model document templates.

**SET**

- landing and staging
- base objects
- cleansing per column
- DQ score into trust

From the Damalink SMX. B · C1

**Used in A and B.** The rule catalogue and the match and survivorship sets produce the A documents; the matrix and model templates start the B build.

# Accelerators 5–8 — Dictionaries, Reports, Decisions

KOMTAS

Reference dictionaries, the analysis report set, the reference data decision table and the presales question set.

02 · ACCELERATORS

## 5 Reference dictionaries

«DAMALINK DOĞRULASIN»

Turkish reference lists used in cleansing, standardisation and matching.

**LISTS**

- city and district
- country
- occupation, education
- noise words
- prefixes

From the Damalink sample set. A · B

## 6 Analysis report set

«DAMALINK DOĞRULASIN»

Ready reports for the A read-out on customer data.

**REPORTS**

- customer counts
- active / passive
- match frequency
- unique customers
- clusters

From the Damalink assessment. A

## 7 RDM decision table

«DAMALINK DOĞRULASIN»

Neutral comparison of a reference data product and an in-house build.

**CRITERIA**

- model and steward UI
- crosswalk, hierarchy
- history, merge / unmerge
- cost and dependency

From the Damalink 2020 study. A · B

## 8 Presales question set

«DAMALINK DOĞRULASIN»

Requirement questions for the first calls and the input forms.

**TOPICS**

- architecture, domains
- volumes, daily changes
- real-time needs
- steward UI, approvals
- consumers

From the Damalink list. A

**Rewritten, not copied.** All eight are adapted to Komtaş structure and language. Use of the Damalink originals in proposals is agreed before they are named.

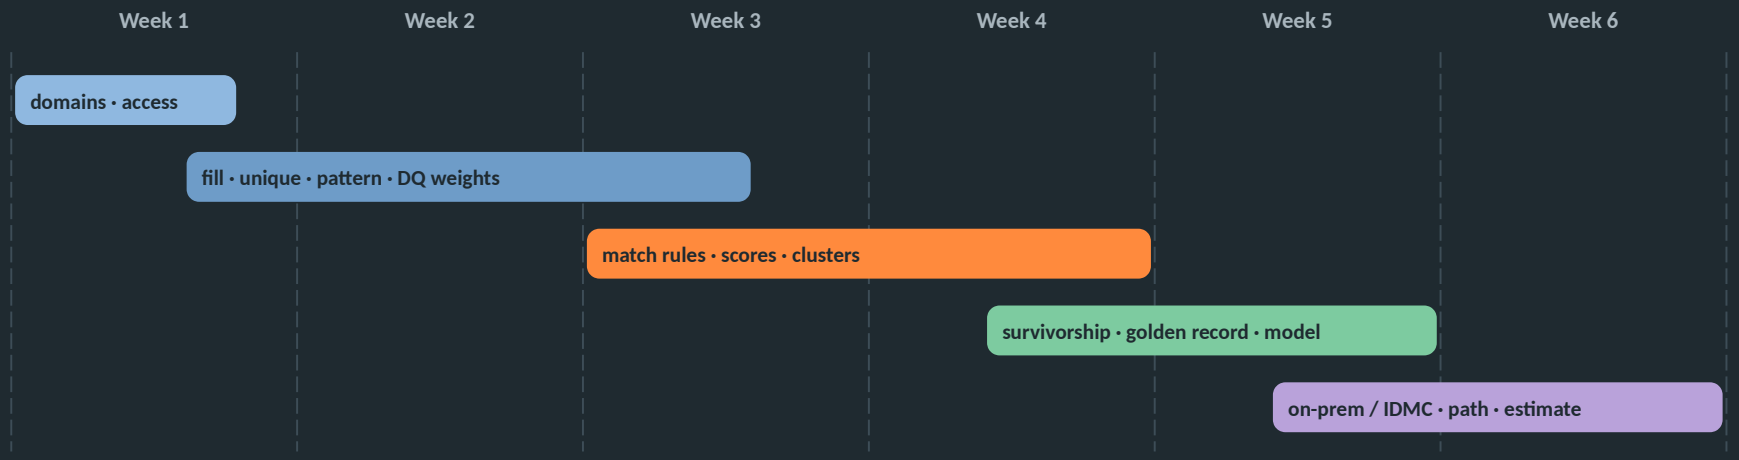

# A — MDM Assessment: Flow and Timeline

KOMTAS

Initiate, profile, analyse duplicates, draft merge rules and model, design the architecture and the B path in phases P0–P4. Fixed fee by band.

03 · TIER A

PLAN · BAND M, 6 WEEKS

Band S 4 weeks / ~25 pd, band M 6 weeks / ~40 pd, band L 8 weeks / ~60 pd. Damalink reference: 1.5 months. «DAMALINK DOĞRULASIN»

DECISION FOR B

**Path, roadmap and B estimate**

The read-out names the path (Consolidation or Hub), the platform, the band and the B effort. The customer decides; the rule documents can also be used on their own.

DELIVERABLES (p. 17) «DAMALINK DOĞRULASIN»

- Requirement document
- DQ analysis report
- Match rule document
- Merge rule document
- Conceptual model
- Architecture, roadmap

**Fixed fee.** A is priced by band. Access to production customer data or a copy is a precondition; without it, A is blocked.

# A — Deliverables and Analysis Method

KOMTAS

What A hands over, and how the analysis runs: profile, weigh DQ, draft match rules, read clusters, define the golden record.

03 · TIER A

## DELIVERABLES «DAMALINK DOĞRULASIN»

**Requirement document**
problems, domains, sources, question sheet

**DQ analysis report**
profile per column, counts per DQ problem

**Match rule document**
rules, scores, negative rules

**Merge rule document**
survivorship per field, example

**Duplicate-rate findings**
within and across systems

**Conceptual data model**
entities, relationships, hierarchy

**High-level architecture**
deployment, inbound, outbound, timing

**B roadmap and estimate**
path, platform, band, effort

## ANALYSIS METHOD «DAMALINK DOĞRULASIN»

1. **Profile columns**
   fill, unique, frequency, pattern
2. **Weigh DQ**
   dimensions and weights per field
3. **Draft match rules**
   rules run; match scores read
4. **Read clusters**
   match frequency, unique customers
5. **Define golden record**
   survivorship and model

## RULES OF THUMB

**Scope assumption «DAMALINK DOĞRULASIN»**
Draft: up to 5 source tables or files and up to 3 M active customers. Larger scope moves A to band L.

**Active and passive «DAMALINK DOĞRULASIN»**
How active, deleted or deceased customers are flagged is agreed first; counts are reported both ways.

**Report set «DAMALINK DOĞRULASIN»**
customer counts, active / passive, match frequency, unique customers, cluster report.

**Business owner for match rules.** Match rules decide which records become one customer. A business owner signs them off in A; without one, B does not start.

# B — Domain Foundation and Paths

foundation once + path × band

KOMTAS

One domain per B. The foundation is built once; the domain runs on the Consolidation or the Hub path.

**Prerequisite:** an MDM Assessment or an equivalent analysis «A REF».

## FOUNDATION (TOP) · COMMON DOMAIN WORK (BOTTOM) «DAMALINK DOĞRULASIN»

### Tool set-up
on-prem or IDMC; environments

### Matrix and model
source-to-target matrix; data model

### Rules and dictionaries
DQ catalogue, match, merge, reference lists

### Steward process
queues and approvals, agreed with DG

### Parallel validation
golden records checked against sources

### Handover
operation document; knowledge transfer

## EFFORT FORMULA «DAMALINK DOĞRULASIN»

B EFFORT (pd)

**foundation (once) + domain on the path by band + optional lines**

FOUNDATION, ONCE

**S ~25 pd · M ~40 pd · L ~60 pd**

DOMAIN: CONSOLIDATION · HUB

**S ~60 / ~110 · M ~100 / ~160 · L ~140 / ~220**

**Durations.** «DAMALINK DOĞRULASIN»
Consolidation 3 / 5 / 6+ months; Hub 5+ months; Product 360 / PIM 4 / 5 / 6 months (Damalink references).

## PACKS · DAMALINK REFERENCE «DAMALINK DOĞRULASIN»

| PACK | CONSOLIDATION | HUB | BAND |
|---|---|---|---|
| **Starter** | 3 M active · 3 mo. | 10 M records | S |
| **Advanced** | 5 M active · 5 mo. | 30 M records | M |
| **Enterprise** | 10 M active · 6+ mo. | 50 M records | L |

Optional lines: IDMC licence + onboarding «OPTIONAL»; migration of history «OPTIONAL». Starter Hub = one domain on one system; up to 5 tables or files per system.

# C — Additional Domains and Run

KOMTAS

C1 adds a domain on the established foundation; C2 keeps match quality and steward work under control every month. Recurring revenue.

03 · TIER C

## C1 ADDITIONAL DOMAIN «DAMALINK DOĞRULASIN»

**Reuses the foundation**
tool, matrix, steward process

**New domain module**
from the module list (p. 12)

**Customer–product holdings**
who holds which product

**Household and group**
family and group companies

**Customer–institution**
employer, agency, branch

**Effort**
≈ 60–70% of the B domain effort

## C2 MONTHLY CAPACITY «DAMALINK DOĞRULASIN»

**S** — **40 h**
one domain, few sources

**M** — **80 h**
regular new sources, tuning

**L** — **160 h**
several domains, large queues

## C2 ACTIVITIES «DAMALINK DOĞRULASIN»

- **Match / merge tuning** rules and thresholds adjusted
- **Steward support** queue monitoring, hard cases
- **Quality monitoring** duplicate rate, steward backlog
- **DQ monitoring** rule results per source
- **New sources** onboarded to the hub or batch
- **Monthly report** capacity, findings, open items

**Term.** Draft minimum term 12 months. Unused hours are not carried over; work above the capacity is charged at the hour rate. «DAMALINK DOĞRULASIN»

# Team and Roles

KOMTAS

An engagement lead runs A and B with an MDM architect, MDM / IDQ developers, a data quality analyst and a business analyst.

## ROLES «DAMALINK DOĞRULASIN»

| ROLE | RESPONSIBILITY | A | B | C |
|---|---|---|---|---|
| **Engagement lead** | plan, customer owners, read-out, steering | lead | lead | part |
| **MDM architect** | model, architecture, path and platform choice | ● | ● | part |
| **MDM / IDQ developer** | cleansing, match & merge, services, distribution | part | ● | ● |
| **Data quality analyst** | profiling, DQ rules, match analysis | ● | ● | ● |
| **Business analyst** | requirements, question sheet, steward process | ● | part | — |

● takes part  lead accountable for delivery  part part time  — not staffed

## CUSTOMER-SIDE CONTACTS «DAMALINK DOĞRULASIN»

**Business data owners**
match rules, sign-off

**Data stewards**
queues, approvals

**IT integration**
sources, consumers

**DBAs**
access, extracts

**DG office**
roles, policies

**Partner roles.** «DAMALINK DOĞRULASIN»
MDM specialists from Damalink or Komtaş: «FIELD». The framework names an MDM specialist role for each offering.

**Staffing facts to collect.**
MDM developers «NUMBER» · IDQ developers «NUMBER» · MDM SaaS experience «FIELD»

# Sizing — Drivers, S / M / L Bands and Effort

draft — to calibrate with Damalink

KOMTAS

Drivers come from the input forms (files 3a–3c). Durations in weeks or months, effort in person-days (pd), C2 in hours per month.

## SIZING DRIVERS «DAMALINK DOĞRULASIN»

| DRIVER | S | M | L |
|---|---|---|---|
| Domains (B = 1; C counts) | 1 | 2 | ≥3 |
| Source systems | ≤3 | 4–8 | >8 |
| Records (Damalink packs) | ≤10 M | ≤30 M | ≤50 M |
| Match rules | ≤20 | 21–60 | >60 |
| Consuming systems | ≤3 | 4–8 | >8 |

**Band rule.** «DAMALINK DOĞRULASIN»
The band is the highest band reached by at least three drivers. Above 50 M records the work is a programme, not a band.

**Damalink packs and bands.** «DAMALINK DOĞRULASIN»
Starter / Advanced / Enterprise map to S / M / L. Hub record packs 10 / 30 / 50 M; Consolidation active customer packs 3 / 5 / 10 M map to S / M / L for that path. Assessment 1.5 months.

## DURATION / EFFORT «DAMALINK DOĞRULASIN»

| ITEM | S | M | L |
|---|---|---|---|
| A duration | 4 weeks | 6 weeks | 8 weeks |
| A effort | ~25 pd | ~40 pd | ~60 pd |
| B foundation, once | ~25 pd | ~40 pd | ~60 pd |
| B-Consolidation | ~60 pd | ~100 pd | ~140 pd |
| B-Hub domain | ~110 pd | ~160 pd | ~220 pd |
| Product 360 / PIM | ~80 pd | ~110 pd | ~140 pd |
| Reference Data | ~30 pd | ~50 pd | ~80 pd |
| C1 domain | 60–70% of B | 60–70% of B | 60–70% of B |
| C2 capacity | 40 h / month | 80 h / month | 160 h / month |

**Modules** Each module and optional line takes its own band. Fees «...». «DAMALINK DOĞRULASIN»

**Calibration.**
Draft, calibrated to the Damalink durations. To be updated with Damalink's effort from delivered projects.

# Acceptance Criteria

KOMTAS

Each tier is accepted on agreed checks. Sample sizes and precision targets are agreed per customer; none is promised in advance.

## ACCEPTANCE STEPS

1. **Checks agreed**
   per tier, at start, with the business owners
2. **Run on a sample**
   agreed clusters «NUMBER»
3. **Results reviewed**
   false merges fixed or explained
4. **Sign-off**
   business owners and DG office

## CRITERIA «DAMALINK DOĞRULASIN»

| TIER / ITEM | CRITERION | EVIDENCE | THRESHOLD |
|---|---|---|---|
| **A** | rule documents and architecture accepted | read-out, documents | accepted at read-out |
| **B golden records** | produced for the agreed sources | load and match report | all agreed sources |
| **B match quality** | sample review of clusters | review sheet | precision ≥ «NUMBER»% |
| **B stewardship** | steward workflow running | queue and approval log | agreed flows |
| **B distribution** | golden records delivered to consumers | interface test report | agreed consumers |
| **C1** | same criteria per domain | as B | as B |
| **C2 Run** | monthly report and agreed activities | monthly report | per month |

**Sample per customer.**
Cluster sample size and the precision target are agreed with the business owners in A.

**Outside acceptance.**
Errors in source data, source system changes and business decisions on ownership are not acceptance criteria.

# Follow-on Map

KOMTAS

Each tier leads to a named next step. In the proposal templates this is the section 'Next step', without partner terms.

AFTER → NEXT STEP «DAMALINK DOĞRULASIN»

| AFTER | NEXT STEP | TYPE |
|---|---|---|
| **A read-out** | B Domain Foundation on the chosen path | service project |
| **B live** | C2 Run: tuning, stewardship, monitoring | recurring service |
| **B live, more domains needed** | C1 additional domain | one-time per domain |
| **Golden ID available** | CDP (cdp-assessment, cdp-deger-onerisi) | package |
| **No steward organisation** | data-governance | package |
| **DQ issues outside master data** | DQ work in data-governance | package |
| **Personal data in MDM copies** | data-privacy | package |
| **Insurance group** | insurance sector programme | programme |

**In the proposal templates.**
Section 'Next step': further domains, C2 Run, CDP, data-governance, DQ, data-privacy. No partner terms, no prices.

**Recurring value.**
C2 keeps match quality and steward queues under control; Informatica licences renew alongside it.

# Risks and Open Points

KOMTAS

Known risks of the package as drafted, how they are handled, and the questions still open.

## RISKS «DAMALINK DOĞRULASIN»

| RISK | EFFECT | HANDLING |
|---|---|---|
| **Business disagrees on match rules** | false merges; trust in the data lost | business owner signs rules off in A; negative rules |
| **Poor source data quality** | low match rates; long tuning | DQ analysis in A; cleansing before matching |
| **No steward capacity** | queues grow; golden records age | steward process with DG; capacity in input form |
| **Real-time performance** | slow services for channels | volumes and response times in sizing; test in B |
| **On-prem version support** | product out of support | IDMC option; status checked per proposal |
| **Partner content age and IP** | 2018–2021 material; terms open | Damalink confirms current use and terms |

## OPEN POINTS BY OWNER

### Damalink

- Framework current; IDMC versions?
- Effort of delivered projects
- Packs and durations still valid?
- Use of rule documents; capacity

### Digitallency

- Allianz reference: usable, year?
- Hepsiburada PIM: scope, result?
- Role in delivery

### Sales and management

- Partnership models
- Day rates, domain fees, Run fee
- Licence route; IPU sizing
- YeşimTech follow-up

# Verification Summary

KOMTAS

Draft for review by Damalink and Digitallency. Every drafted statement carries an orange tag naming its owner and has one question in the sidecar file.

04 · VERIFICATION

## TAGS IN THIS FILE

**60**

tags, same sequence in EN and TR

DAMALINK 56 DIGITALLENCY 4

sidecar: mdm-customer-360-1-blueprint-tr.json

## TAGS BY SECTION

| | | |
|---|---|---|
| Positioning, commercial | 2 – 8 | 11 |
| Approach, accelerators | 9 – 15 | 23 |
| Delivery | 16 – 22 | 24 |
| Follow-on, status | 23 – 25 | 2 |

## PACKAGE FILES

| | | TAGS |
|---|---|---|
| 1 | Blueprint (this file) | 60 |
| 2 | Customer deck | «...» |
| 3a–c | Input forms | «...» |
| 4a–c | Proposal templates | «...» |

**Package total: «...» tags; same in EN and TR.**
One sidecar file per document; one question per tag; owner per tag.

## HOW THE REVIEW WORKS

1. Each owner answers its questions in the sidecar
2. Confirmed: tag removed; changed: EN and TR updated
3. Placeholders filled: «FIELD», «NUMBER», «PLATFORM»
4. Efforts, packs, thresholds and IDMC names recalibrated

**Known facts carry no tag:** the structure and dates of the Damalink framework material, the Allianz and Hepsiburada references as named in the Digitallency deck, the YeşimTech demand signal; partnership models open.
