Multi-domain & Run — Proposal Input Form

Information to be collected for two line types: C1 additional domain (a new domain on the established foundation and cross-domain relationships; one-time per domain) and C2 Run (match / merge tuning, steward support, monitoring, new source onboarding; monthly). Sections follow the Proposal Set codes (P1, P2, P4, P6, P8, P9). Once the form is completed and returned, the proposal text (file 4c) is produced. Orange tags mark draft statements to be verified: the DAMALINK tag for the approach, phases, deliverables, durations, packs, bands, roles, tools and IDMC equivalents, rule patterns and thresholds, the RDM decision table, accelerators, question content and efforts taken from the framework; the DIGITALLENCY tag only for the Allianz and Hepsiburada references. This form is for internal use; customer and partner names are not written into customer files.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the Assumptions and Out of Scope section.

The "WHERE IT FILLS IN THE PROPOSAL" column of each row names the section or variable field of the proposal template (file 4c). This form uses the Proposal Set codes P1, P2, P4, P6, P8, P9; the A·B·C mark in each code heading shows the tiers in which the code is asked.

If the answer to a question is "not known", that is also an answer — it is often the first finding and goes into the proposal as an assumption.

LIMIT OF TIER C: C is two separate line types in the same proposal — C1 additional domain (one-time fee per domain) and C2 Run (monthly capacity hours). A path change (from Consolidation to Hub) or a new foundation is not carried out from C2 capacity; it is a separate B proposal.

C1 ADDITIONAL DOMAIN: a new domain on the established hub / consolidation; the foundation is not set up again. Cross-domain relationships — customer–product holdings, household / group, customer–institution. The effort is about 60–70% of the B effort of the same domain. «DAMALINK DOĞRULASIN»

MODULE BLOCKS: each C1 line is one domain block — «MODULE — CUSTOMER 360» · «MODULE — PRODUCT 360 / PIM» · «MODULE — REFERENCE DATA»; lines not requested are deleted.

C2 ACTIVITIES: match / merge tuning; steward support and queue monitoring; DQ and match-quality monitoring (duplicate rate, steward backlog); new source onboarding; monthly report. «DAMALINK DOĞRULASIN»

C2 CAPACITY AND TERM: monthly S 40 h · M 80 h · L 160 h; minimum term 12 months (draft); unused hours are not carried over to the next month; work above capacity at the «hour rate». «DAMALINK DOĞRULASIN»

OUT OF SCOPE: a path change or a new foundation; CDP, campaigns and activation; changes to source systems; enterprise DQ outside master data; licence procurement. «DAMALINK DOĞRULASIN»

TECHNOLOGY RULE: the technology choice is a scope item («PLATFORM») — on-prem Informatica (MDM Multidomain, IDD, SIF, IDQ, Product 360, RDM, PowerCenter) or IDMC (MDM SaaS — Customer 360 / Business 360, Product 360 SaaS, Reference 360, Cloud Data Quality, Cloud Data Integration). The Damalink content is based on on-prem MDM 10.x versions; the IDMC equivalents are drafts. Support status of on-prem 10.x «FIELD». «DAMALINK DOĞRULASIN»

BOUNDARY — data-governance: the steward organisation, data ownership and policies belong to the data-governance framework; this package configures the steward workflow in the tool. The enterprise DQ programme is also within data-governance; this package applies DQ to the master data in scope.

BOUNDARY — data-privacy: masking of personal data in non-production MDM copies is the subject of the data-privacy package.

P1 · A·B·C · IDENTITY — Customer and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the customer and the short name used in the text; single company or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER»	
○	Companies in scope — group companies, subsidiaries; is customer deduplication also to run across companies; for a single company the row is deleted	Cover «GROUP COMPANIES», Scope	
○	Reason for the request and context — for the one-paragraph context	Purpose «CUSTOMER CONTEXT»	
○	Is there an RFP, specification or requirements list; its number, response format and deadline	Structure and response format of the proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», Commercial Terms «proposal date + 1 month»	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Procurement process, approved budget and expected invoice payment term; is monthly invoicing accepted; is a supplier assessment (information security) required	Effort and Fees, Commercial Terms «NUMBER» days payment term	
○	Are there competitors, and who (another Informatica partner, another MDM / PIM product, the CRM vendor's own solution, the customer's own team)	Emphasis and section weights	

P2 · A·B·C · DECISION — Trigger, Business Problems, Domain, Path and Sponsor

> For environments Komtaş did not set up, an onboarding review is carried out before C2 starts; effort «NUMBER» pd, written as a separate item. «DAMALINK DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Source of the need — the environment Komtaş set up in B, the customer's own set-up, or a set-up taken over from another partner; the established path**	Scope «A REF», Purpose, Assumptions and Out of Scope	
●	**Which lines are wanted — C1 additional domain (how many domains), C2 Run or both**	Scope, Effort and Fees, Service Selection Check	
●	**Trigger — duplicate customers across systems or group companies, KVKK data subject requests needing a single customer view, group risk and legal reporting, CRM or core system renewal, mergers and acquisitions, omnichannel and digital programmes, CDP projects needing a golden ID, scattered product catalogues in retail / e-commerce** «DAMALINK DOĞRULASIN»	Purpose «CUSTOMER CONTEXT» · «TRIGGER»	
●	**Business owner of the match rules — who decides that two records are "the same customer" (unit, person); who accepts the risk of a false merge**	Customer Responsibilities, Deliverables and Acceptance, Blocker Checklist	
○	Sponsor and decision maker — CDO / data governance, CIO, business unit (marketing, risk, operations); who makes the proposal decision, and by what date	Team, Customer Responsibilities, Commercial Terms	
○	Requested start date — end of the B handover or end of the existing support contract	Activities and Timeline, Commercial Terms	

P4 · A·B·C · DATA — Domains, Record Counts, Change Volume and Existing Rules

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Total and active / passive record counts of the new domain (for each domain in P9)**	Driver 3, Scope	
○	Number of master tables and columns — per system; schemas (customer, contact, demographic, channel, reference)	Scope, Assumptions and Out of Scope	
○	Daily new and changed records; how changes are captured (timestamp, CDC, full load)	Approach, Assumptions and Out of Scope	
○	Records and golden records in the established environment; growth over the last 12 months	Driver 3, C2 Run line	

Volume table — the sources of the new domains and the current volume of the established domain. One row is one domain in one source system.

#	SOURCE SYSTEM	DOMAIN	TOTAL RECORDS	ACTIVE / PASSIVE	DAILY NEW / CHANGED
1					
2					
3					
4					
5					

P6 · B·C · INTEGRATION — Consumers, Batch / Real Time, Performance and Distribution

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	New consuming systems and new sources — for the C1 domains and C2 onboarding	Driver 5, Scope	
○	Real-time need — queries per day, expected response time, concurrent users / calls	«PATH — HUB», Assumptions and Out of Scope	
○	Distribution method — ESB, API / services, files, database tables; writing the cross-reference back to consumers	Approach, Assumptions and Out of Scope	
○	Third-party integrations — identity verification service, address verification, commercial information sources	Scope, Assumptions and Out of Scope	

Consuming systems — one row is one consumer; for real-time consumers the response time and calls per day are written.

#	CONSUMING SYSTEM	DATA / DOMAIN	BATCH / REAL TIME	VOLUME / CALLS PER DAY	RESPONSE TIME
1					
2					
3					
4					
5					

P8 · C · OPERATIONS — Tuning, Steward Support, Monitoring, Capacity and Term

> The price of C2 is the monthly capacity in hours. Capacity is set by the band from the domain, source system, record, match rule and consumer drivers.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Expected monthly workload — records in the steward queue, new source onboarding, match / merge tuning requests**	C2 Run line, Effort and Fees	
○	Number of match rules in operation; expected rule changes per month	Driver 4, Scope	
○	Metrics to monitor — duplicate rate, steward backlog, DQ score, load errors; thresholds	Deliverables and Acceptance	
○	Monthly report expectations and recipients	Deliverables and Acceptance	
○	Monthly capacity — S / M / L (from the band estimate)	Effort and Fees	
○	Term — minimum 12 months is a draft	Commercial Terms	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Expected support hours and response time; ticketing tool	Commercial Terms «SUPPORT HOURS», Customer Responsibilities	
○	The customer's own team and the split of responsibilities (RACI); stewards, owner of tool and server operation	Customer Responsibilities	

P9 · C · DOMAIN EXTENSION — Additional Domains, Reuse and Relationships

> The price of C1 is one-time per domain; the foundation is not counted again. For Product 360 / PIM the product licence, and for Reference Data the decision table in form 3b, is a prerequisite.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Domains to add and priority — «MODULE — CUSTOMER 360» · «MODULE — PRODUCT 360 / PIM» · «MODULE — REFERENCE DATA»; another domain (supplier, employee, location) «FIELD»**	C1 line, Scope, Driver 1	
○	Established environment — path (Consolidation / Hub), product and version, established domain; can the foundation be reused	«A REF», «PLATFORM», Assumptions and Out of Scope	
○	Cross-domain relationships — customer–product holdings, household / group, customer–institution	C1 line, Scope	
○	Source systems and consumers for the new domain (counts in P4 and P6)	Driver 2, Driver 5	
○	Match / DQ rule need of the new domain — estimated number of rules	Driver 4, ANNEX-1 — Accelerators	
○	Is there a product licence for Product 360 / PIM or Reference Data; if not, who decides	C1 line, Assumptions and Out of Scope	
●	**Business owner and stewards of the new domain — who approves the rules, who monitors the queue**	Customer Responsibilities, Blocker Checklist	

C1 domain lines — one row is one domain block; lines not requested are deleted.

#	DOMAIN (PROPOSAL BLOCK)	NEW SOURCES	RECORDS	RELATIONSHIPS	BAND
1	«MODULE — CUSTOMER 360»				
2	«MODULE — PRODUCT 360 / PIM»				
3	«MODULE — REFERENCE DATA»				
4					

Band Estimate — Tier C

Completed after the answers are collected. In C the band gives the effort of C1 per domain and the monthly capacity of C2. The band is the highest band reached by at least three drivers. A driver reaches a band when its value falls in that band or a higher one; if three drivers do not reach M or L, the band is S. Record counts above 50 million are outside the bands and are handled as a programme. «DAMALINK DOĞRULASIN»

CALIBRATION NOTE — DRAFT: the bands and efforts are not based on recorded Komtaş effort; they are calibrated to Damalink durations and packs (B domain efforts → C1 ≈ 60–70%; no Damalink equivalent for C2). Komtaş effort is not written into the proposal before the delivery team confirms it. The person-days and team size behind these durations are unknown. «DAMALINK DOĞRULASIN»

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Domains — established + new (P9)	1	2	≥ 3	
2	Source systems (P4)	≤ 3	4 – 8	> 8	
3	Records (P4)	≤ 10 million	≤ 30 million	≤ 50 million	
4	Match rules (P8)	≤ 20	21 – 60	> 60	
5	Consuming systems / integrations (P6)	≤ 3	4 – 8	> 8	
	RESULT — C1 effort (per domain) and C2 monthly capacity «DAMALINK DOĞRULASIN»	C1 ≈ B domain S × 0.6–0.7 · C2 40 h / month	C1 ≈ B domain M × 0.6–0.7 · C2 80 h / month	C1 ≈ B domain L × 0.6–0.7 · C2 160 h / month	

DAMALINK MAPPING: Starter ↔ S, Advanced ↔ M, Enterprise ↔ L. C1 is calculated as ~60–70% of the B domain effort on the established foundation (in Damalink the Starter pack is one domain on one system); the C2 capacity is banded by the work of Damalink's Manage step. «DAMALINK DOĞRULASIN»

C calculation — the C1 lines are one-time per domain, C2 Run is a monthly fee; the unit efforts are rounded to ~65% of the B domain efforts. Only the requested lines are filled in.

#	LINE	BAND	UNIT	COUNT / MONTHS	VALUE
1	C1 · «MODULE — CUSTOMER 360» — on the established path (one-time)		Consolidation ~40 / 65 / 90 · Hub ~70 / 105 / 145 pd	1	
2	C1 · «MODULE — PRODUCT 360 / PIM» (one-time)		S ~50 · M ~70 · L ~90 pd	1	
3	C1 · «MODULE — REFERENCE DATA» (one-time)		S ~20 · M ~30 · L ~50 pd	1	
4	C2 Run — tuning, steward support, monitoring, new source onboarding, monthly report (monthly)		S 40 · M 80 · L 160 h / month	«NUMBER» months	
	Onboarding review — environments Komtaş did not set up (P2)	—	«NUMBER» pd		

TEAM — C1: MDM architect + MDM / IDQ developer + data quality analyst; C2: Run lead + MDM / IDQ developer. Customer side: business data owners, data stewards, IT integration, DBAs, DG office. «DAMALINK DOĞRULASIN»

CONDITIONS — unused hours are not carried over to the next month; work above capacity is invoiced at the «hour rate» with the customer's approval; a new domain is not carried out from the capacity, a C1 line is written; a path change is a separate B proposal; the monthly report shows how the capacity was used.

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the effort calculation, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	KOMTAS-«CUSTOMER ABBREVIATION»-MDM-C-«YEAR»-«SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month» · «price validity date»	Cover, Commercial Terms	Send date + 1 month (P1); sales sets the price validity date	
3	«CUSTOMER CONTEXT» · «TRIGGER»	Purpose	P1 and P2 answers	
4	«PLATFORM»	Scope, Approach	Established environment (P9) — on-prem Informatica or IDMC	
5	ANNEX-1 accelerator list	ANNEX-1 — Accelerators	By C1 domain 1–5 and 7; for C2 2, 3 and 6	
6	«A REF»	Scope	P2 — source of the environment; deleted if Komtaş did not set it up	
7	C1 lines — «MODULE — CUSTOMER 360» · «MODULE — PRODUCT 360 / PIM» · «MODULE — REFERENCE DATA» · «BAND» · «NUMBER» pd	Scope, Effort and Fees	Band estimate, P9; a domain line not requested is deleted	
8	C2 Run line · «BAND» · «NUMBER» h / month · «NUMBER» months	Effort and Fees, Commercial Terms	Band estimate, P8; deleted if not requested	
9	«SUPPORT HOURS»	Commercial Terms	P8 — support hours and response time	
10	C1 «fee» per domain · «monthly fee» · «hour rate» · «day rate» · onboarding «fee»	Effort and Fees	C1 one-time per domain; C2 monthly capacity × hour rate; work above capacity at the hour rate; onboarding review as a separate item (P2)	
11	Next step items	Next Step	Follow-on Interest table; no margin figures	
12	ANNEX-2 references table (anonymous)	ANNEX-2 — About Komtaş	The anonymous wording in the “IN THE PROPOSAL” column of the References table below; no customer name and no Damalink or Digitallency name are written.	
13	«full name» · «title» · «e-mail / phone» · «CITY»	Commercial Terms	Komtaş commercial and technical contact; city for free on-site meetings	

References — Source of ANNEX-2

In customer files (2, 4a / 4b / 4c) only the anonymous wording in the last column is written; Damalink, Digitallency, Allianz, the system codes, Hepsiburada and YeşimTech are not named; where a result is unknown, «RESULT» stays. The Damalink content dates from 2018–2021; Damalink work is not written as a Komtaş reference. «DAMALINK DOĞRULASIN» The Allianz and Hepsiburada references are written anonymously in a customer file with one tag per reference list. «DIGITALLENCY DOĞRULASIN»

#	SOURCE (INTERNAL)	CONTENT	USE IN THE PROPOSAL	YEAR	IN THE PROPOSAL (ANONYMOUS)
1	Damalink — 03 Master Data Management Framework	MDM Assessment, Customer 360 Solution, Reference Data Management; question lists, BRD, DQ analysis report, DQ / match / merge rule documents, SMX, dictionaries, RDM comparison; on-prem MDM 10.x, IDQ, IDD, SIF	Source of method and accelerators; not a reference	2018–2021	Not written (the method is described as the Komtaş approach)
2	Allianz	Single Customer View: four systems (AZS, AZHE, AZYE, YKS) in one environment; duplicate cleaning within and across group companies; PowerCenter + IDQ + MDM; report access from one week to one day (Digitallency deck)	Reference; Customer 360	«YEAR»	an insurance group — single customer view across four group systems (duplicate customers cleaned within and across companies; report access from one week to one day)
3	Hepsiburada	PIM — no detail (Digitallency deck)	Reference; Product 360 / PIM	«YEAR»	an e-commerce company — PIM («RESULT»)
4	YeşimTech	RFP folder — licence questions for Informatica MDM SaaS (IDMC)	Demand signal; not a reference	—	Not written

Service Selection Check

Before filling in the form, make sure that Tier C is the right service. One request can match more than one row.

STATUS	RIGHT SERVICE
The quality and duplicate rate of the master data are not known; the match / merge rules, the architecture and the B path are to be established	A — MDM Assessment
A or an equivalent analysis exists; a batch golden record table without a hub and distribution to DWH / CRM are wanted	B — Domain Foundation · «PATH — CONSOLIDATION»
A or an equivalent analysis exists; steward UI, approval flow, hierarchy and real-time services are wanted	B — Domain Foundation · «PATH — HUB»
A product catalogue, product–variant model, enrichment and channel publication are wanted	B — «MODULE — PRODUCT 360 / PIM»
Central management of code lists and crosswalks across systems is wanted	B — «MODULE — REFERENCE DATA»
A new domain is to be added to an established hub / consolidation	C1 — additional domain (foundation not counted again)
Tuning, steward support, monitoring and new source onboarding on the established environment are wanted	C2 — Run
Segments, audiences, journeys or channel activation are wanted	CDP packages (cdp-assessment, cdp-deger-onerisi)
A steward organisation, data ownership, policies or an enterprise DQ programme are wanted	data-governance
Masking of personal data in non-production environments is wanted	data-privacy
Changes to source systems or licence procurement alone are wanted	Out of scope

Follow-on Interest

Follow-on work the customer may be interested in; feeds the Next Step section of the proposal. No margin figures appear in the proposal.

#	FOLLOW-ON WORK	RELATED TRIGGER	INTEREST (YES / NO / LATER)	NOTE
1	C1 — additional domains	Product, reference data, household / group relationships		
2	CDP (cdp-assessment, cdp-deger-onerisi)	Marketing and activation with the golden ID		
3	data-governance and DQ	Steward organisation, ownership, enterprise DQ		
4	data-privacy	Personal data in non-production MDM copies		
5	Insurance sector programme	Insurance groups with several companies		

COMMERCIAL FRAME — INTERNAL ONLY. This box and the names Damalink, Digitallency, Allianz, Hepsiburada and YeşimTech are not written into the customer deck or the proposal.

The package pulls Informatica licences (on-prem MDM or MDM SaaS / IPU). IDMC licence and onboarding is an optional line in B. Recurring value lies in C — C1 per domain and monthly C2. The package opens data-governance (stewardship), DQ, data-privacy, the CDP packages (cdp-assessment and cdp-deger-onerisi — currently empty; the Customer 360 DQ / match / merge rule documents are their inputs) and the insurance sector programme (insurance groups with several companies).

Demand signal: in the RFP folder YeşimTech asked licence questions for Informatica MDM SaaS (IDMC). This is a demand signal; it is not a reference and is not written as a reference in any file.

The partnership model with Damalink is open («FIELD»). Evidence: Damalink “03 Master Data Management Framework” (MDM Assessment, Customer 360 Solution, Reference Data Management; content 2018–2021, on-prem MDM 10.x, IDQ, IDD, SIF). Usage terms of the accelerators «FIELD». Damalink prices are not used. «DAMALINK DOĞRULASIN»

Digitallency deck: Allianz Single Customer View — four systems (AZS, AZHE, AZYE, YKS) brought into one environment; duplicate customers cleaned within and across group companies; PowerCenter + IDQ + Informatica MDM; access to reports reduced from one week to one day. Year and Komtaş’s role «FIELD». «DIGITALLENCY DOĞRULASIN» Hepsiburada PIM — no detail. Result «RESULT». «DIGITALLENCY DOĞRULASIN»

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
P1	Full legal name of the customer and the short name used in the text; single company or group with subsidiaries	
P2	Source of the need — the environment Komtaş set up in B, the customer’s own set-up, or a set-up taken over from another partner; the established path	
P2	Which lines are wanted — C1 additional domain (how many domains), C2 Run or both	
P2	Trigger — duplicate customers across systems or group companies, KVKK data subject requests needing a single customer view, group risk and legal reporting, CRM or core system renewal, mergers and acquisitions, omnichannel and digital programmes, CDP projects needing a golden ID, scattered product catalogues in retail / e-commerce	
P2	Business owner of the match rules — who decides that two records are “the same customer” (unit, person); who accepts the risk of a false merge	
P4	Total and active / passive record counts of the new domain (for each domain in P9)	
P8	Expected monthly workload — records in the steward queue, new source onboarding, match / merge tuning requests	
P9	Domains to add and priority — «MODULE — CUSTOMER 360» · «MODULE — PRODUCT 360 / PIM» · «MODULE — REFERENCE DATA»; another domain (supplier, employee, location) «FIELD»	
P9	Business owner and stewards of the new domain — who approves the rules, who monitors the queue	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the Assumptions and Out of Scope section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold. A missing business owner for the match rules cannot be covered by an assumption.

The first row of P8 and the domain row of P9 have a special place: without the workload the C2 capacity cannot be written, and without a domain the C1 line cannot be written.

Blocking conditions and their effect on the proposal

#	CONDITION	EFFECT ON THE PROPOSAL	ACTION	STATUS
1	Environment not set up by Komtaş	An onboarding review precedes C2	Clarify the source in P2	
2	No access to production customer data	Profiling and loading of the new domain cannot be carried out	Clarify access in P4	
3	No business owner for the match rules	The new domain rules and tuning decisions cannot be approved	Clarify the owner in P2	
4	No steward capacity	The steward queue builds up; the C2 capacity is calculated wrongly	Clarify in P9	
5	No licence / technology decision	The product for a Product 360 / PIM or Reference Data domain cannot be set	Clarify in P9	
6	Expected monthly workload not known	C2 capacity cannot be written	Clarify in P8
