REGULATORY REPORTING DATA LAYER

Blueprint v1 — internal reference, draft for Digitallency

A Regulatory Data Assessment · B Regulatory Data Layer · C Run · five report families, BCBS 239 backbone, platform-agnostic delivery

1 **Positioning and commercial logic**
Package summary, commercial logic and partnership, evidence and status, target customers, scope boundary.
p. 2 – 6

2 **BCBS 239, architecture and report families**
BCBS 239 backbone, architecture, common and demand layer, DQ and validation, five report families.
p. 7 – 15

3 **Delivery**
Assessment, Data Layer and Run, team, sizing and effort, acceptance criteria.
p. 16 – 21

4 **Follow-on and status**
Follow-on map, risks and open points, verification summary.
p. 22 – 24

Package Summary — What, for Whom, When

KOMTAS

A common data layer for regulatory and risk reporting in banks, participation banks and investment firms. Source: Digitallency 2025 deck (partner company).

01 · SUMMARY

FIVE REPORT FAMILIES

TCMB / BDDK legal reports
prudential and statistical reporting

IFRS 9 (TFRS 9)
staging, ECL inputs, collateral, cash flows

BCBS 239 / PERDAR
risk data aggregation, lineage and controls evidence

Credit risk reporting
exposure, rating, collateral, limits, concentration

EBA reports — optional
banks with an EU parent or an EU subsidiary

THREE TIERS · UNIT = REPORT FAMILY

«DIGITALLENCY DOĞRULASIN»

A — Regulatory Data Assessment

report inventory, lineage, BCBS 239 gap table, target architecture

4–8 weeks, fixed fee

B — Regulatory Data Layer

common layer, demand layer per family, DQ, reconciliation, parallel run

per report family, foundation once

C — Run

regulatory calendar, regulation changes, DQ monitoring

monthly, min. 12 months

BASIS — KNOWN FACTS

- Digitallency 2025 deck: three regulatory reporting references
- Yapı Kredi: common data layer for IFRS 9, VTM, PERDAR, EBA and credit risk reporting
- Vakıf Katılım: legal reporting data moved from the BOA core banking platform to the EDW
- KKB: rule-based validation of bank submissions; above a 5% error threshold returned; Informatica
- Most Digitallency references date from 2012–2020
- Partnership model between Komtaş and Digitallency not yet settled

Status: draft v1. Built from the Digitallency 2025 deck. Durations, efforts, bands, report lists, regulation references, roles and tool claims carry the orange tag for Digitallency to verify (p. 24).

Commercial Logic — Value from Run and Regulation Change

internal only

KOMTAS

Internal only. Partnership terms and revenue share never appear in the customer deck or in the proposal templates.

PARTNERSHIP WITH DIGITALLENCY · OPEN «DIGITALLENCY DOĞRULASIN»

ITEM	STATUS
Delivery capacity	«FIELD»
Revenue share	«FIELD»
Proposal lead	«FIELD»
Use of references	«FIELD»
Day rates	«FIELD»

Not settled.
Who delivers, who signs and how revenue is shared is open. Until it is agreed, proposals name Komtaş only and delivery capacity is confirmed per proposal.

WHERE THE VALUE IS

A Assessment
fixed fee; sizes B and opens the chain

↓

B Data Layer
per report family; foundation once

↓

Additional report families
same foundation, lower effort

↓

C Run
monthly; calendar and regulation changes

The regulatory calendar does not end and every regulation change is new work. C carries the recurring value.

PRICING RULES

1. A is a fixed fee by band
2. B: common layer foundation counted once, plus a fee per report family and the parallel run
3. C is a monthly fee for a fixed hour capacity with a minimum term
4. Each A proposal names the B scope, the report families and the C step

Door to other work. A regulatory data layer exposes governance gaps and platform limits. It opens data-governance, DWH Assessment, Data Platform Operations (aday-37) and Industry Data Models (aday-36).

Evidence and Status

What the package rests on today. Internal only: references are named here; customer-facing files use anonymous references.

01 · EVIDENCE

SOURCES

Digitallency 2025

Partner company deck

Three regulatory reporting references: Yapı Kredi, Vakıf Katılım, KKB. Partnership model with Komtaş not yet settled.

2012–2020

Most reference dates

Most Digitallency references date from this period. The year of each reference is unknown: «YEAR».

REFERENCES «DIGITALLENCY DOĞRULASIN»

Yapı Kredi — Legal Reporting common data layer: IFRS 9, VTM, PERDAR, EBA, credit risk	partner ref.
Vakıf Katılım — Legal Reporting legal reporting data from BOA core banking to the EDW	partner ref.
KKB — Basel II Validation rule-based validation; >5% errors returned; Informatica	partner ref.
Reference years «YEAR» per reference	to confirm
Use in Komtaş proposals permission; partner or Komtaş reference	to confirm
Komtaş own reference «REFERENCE PROJECT»	no reference

Delivery capacity: Digitallency «FIELD»; Komtaş team «FIELD».

GAPS AND OPPORTUNITY

Old references

Most references are from 2012–2020. Platforms and regulations have changed since; recent work must be shown or stated.

Partner references, not Komtaş

Whether and how the three references may be presented in Komtaş proposals is open.

Door to banks

A regulatory data layer reaches the finance and risk units of banks and opens governance and platform work.

Customer naming. Customer files use anonymous references only: a private bank (legal reporting data layer), a participation bank, a credit bureau (validation of bank submissions); one tag per list. Digitallency is not named in customer files.

Target Customers and Triggers

KOMTAS

Who is approached and on what occasion. Profiles and triggers are drafted from the reference sectors.

TARGET CUSTOMER PROFILES «DIGITALLENCY DOĞRULASIN»

Deposit banks
legal, IFRS 9, BCBS 239 / PERDAR and credit risk reporting

Participation banks
the same families on participation banking products and systems

Investment firms
regulatory and risk reporting with a smaller report set

Banks with an EU parent or subsidiary
EBA reports in addition to local reporting

TRIGGERS «DIGITALLENCY DOĞRULASIN»

BDDK / TCMB findings

audit remarks or regulator findings on data quality or reporting controls.

New regulation or format

a new report, field or format change with a fixed deadline.

Manual Excel reporting

reports assembled by hand from several systems, without lineage.

Period-end delays

month-end and quarter-end reports late or re-submitted.

IFRS 9 data issues

staging, ECL input or collateral data gaps found by the model team.

Core banking migration

the reporting chain must be rebuilt on the new platform.

First call. Which reports, how many, how often, which systems feed them, how much is manual, any open findings, which platform. The answers feed the input form (file 3a).

Scope Boundary — What It Is Not

KOMTAS

What the package does not do, and the Komtaş packages it links to without absorbing them.

01 · BOUNDARY

OUT OF SCOPE «DIGITALLENCY DOĞRULASIN»

- Data cleansing in the source systems
- Report layout design
- Correspondence with the regulator
- Legal interpretation of regulations — the customer's regulatory unit decides
- Changes to core banking and other source systems
- Report production tools and regulator submission software, unless an integration line is added in B

BOUNDARY TO DATA-GOVERNANCE

This package builds the reporting data.

It builds the regulatory reporting data, its DQ rules and its lineage. The enterprise governance framework — organisation, policies, glossary, roles, data catalogue — is data-governance's work. Governance gaps found in A are routed to data-governance.

RELATED PACKAGES AND ASSETS

DWH Assessment evaluates the whole data platform; this package looks only at the regulatory reporting chain.

Data Platform Operations (aday-37) operates the platform; C Run operates the regulatory data.

Industry Data Models (aday-36) a banking data model can be the base of the common layer.

Boundary rule. Regulatory reporting data, DQ rules and lineage: this package. Governance organisation and policies: data-governance. Whole platform review: DWH Assessment. Report layouts and submission software: the customer's tools.

BCBS 239 Backbone — Principle by Principle

KOMTAS

For each principle: what A measures, what B builds and which evidence is expected. Principles 1–6 carry the package; 7–14 are noted below.

PRINCIPLE → A MEASURES / B BUILDS / EVIDENCE «DIGITALLENCY DOĞRULASIN»

PRINCIPLE	GROUP	A MEASURES	B BUILDS	EVIDENCE EXPECTED
P1 Governance	Governance & infrastructure	owners, policies and sign-off for risk data and reports	owner per critical data element; sign-off step in each run	owner list, approved policies, sign-off records
P2 Data architecture & IT	Governance & infrastructure	sources, data flows, manual steps, duplicate copies	common layer with one definition per data element	architecture document, data model, data dictionary
P3 Accuracy & integrity	Risk data aggregation	reconciliations to the GL, manual adjustments, error rates	DQ rules, GL reconciliation, controlled adjustments	DQ results and reconciliation reports per run
P4 Completeness	Risk data aggregation	coverage of entities, portfolios and products	completeness checks per source and entity	coverage report, exceptions with reasons
P5 Timeliness	Risk data aggregation	time from period end to report-ready data	scheduled runs with agreed cut-off times	run logs, timing against the regulatory calendar
P6 Adaptability	Risk data aggregation	effort to add a field, a report or an ad-hoc request	demand layer per family on a shared common layer	change log, turnaround of ad-hoc requests

A gap status per principle: Met · Partly met · Not met · Not assessed «DIGITALLENCY DOĞRULASIN»

P7–P11 Risk reporting — boundary. «DIGITALLENCY DOĞRULASIN»
Accuracy, comprehensiveness, clarity, frequency and distribution of reports. This package builds the data that feeds the reports, not the report layouts; report-level gaps are listed in A and left to the customer's reporting unit.

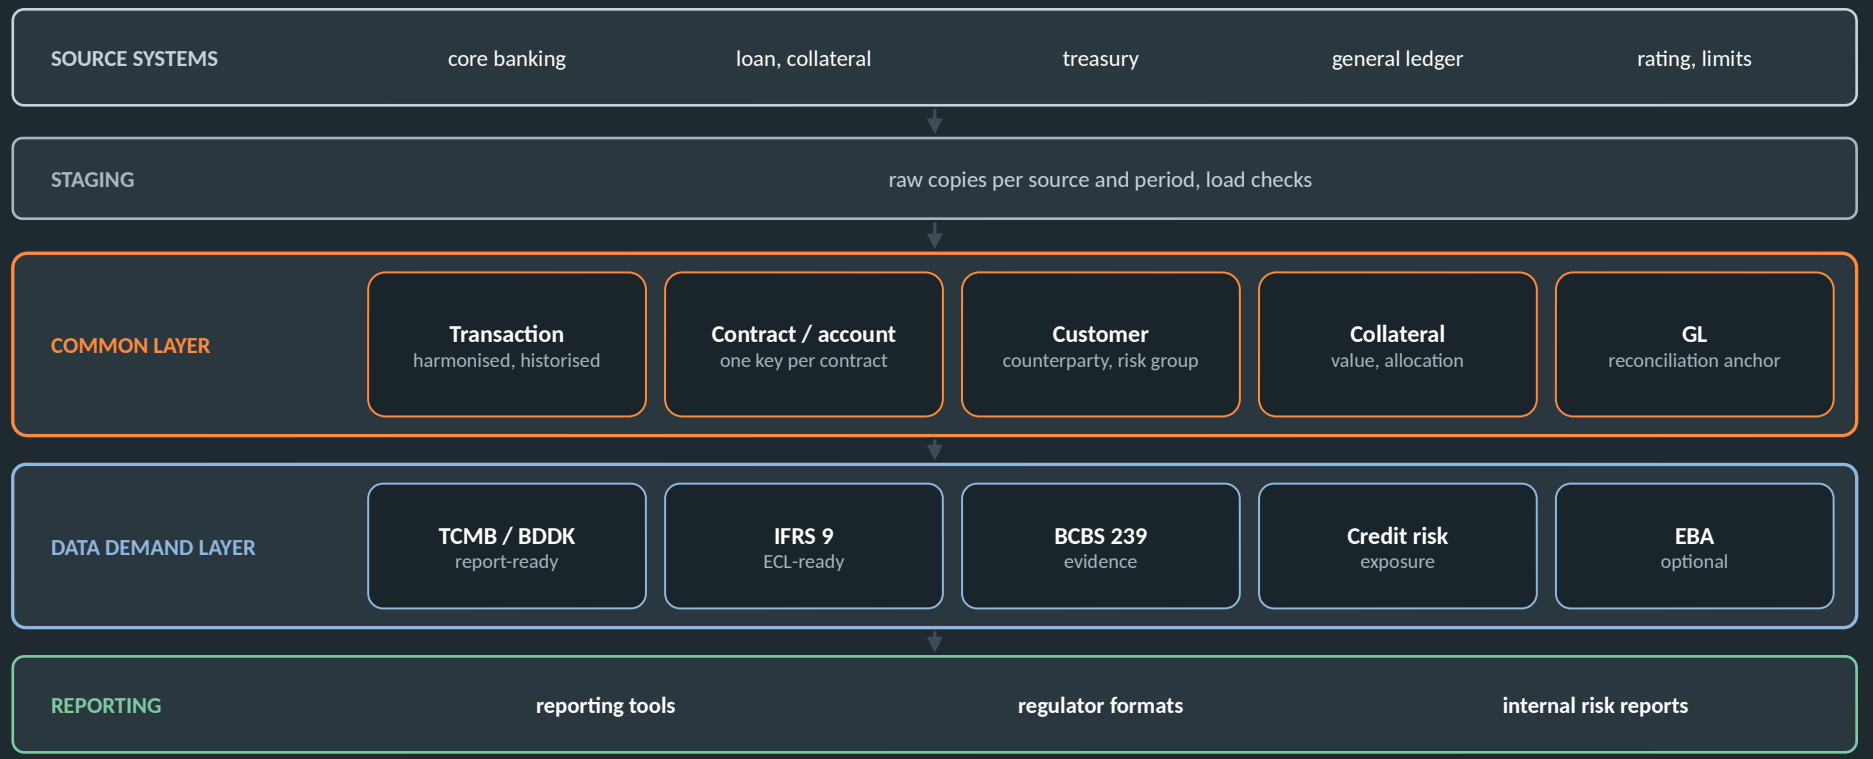

P12–P14 Supervisory review.
Review, remedial action and home / host cooperation are supervisor tasks. Mentioned only; the evidence pack from B supports the bank's answers.

Architecture — Platform-Agnostic

KOMTAS

Source systems feed a common regulatory data layer; report-ready datasets per family feed reporting tools and regulator formats.

02 · ARCHITECTURE «DIGITALLENCY DOĞRULASIN»

Tools: Informatica (PowerCenter / IDMC, Data Quality), the existing DWH (Teradata, Oracle, SQL Server) or a cloud platform; the choice is a scope item «PLATFORM». «DIGITALLENCY DOĞRULASIN»

DQ and validation

Rule catalogue and validation engine: pre-submission checks, thresholds, return and correction loop (p. 10).

Reconciliation, lineage

Reconciliation controls to the GL and between layers; lineage source → report; audit trail per run.

One layer, many reports. Each data element is defined, loaded and reconciled once in the common layer. Report families take their data from the demand layer, not from the sources.

Common Layer and Data Demand Layer

KOMTAS

The common layer holds harmonised, historised data reconciled to the GL. The demand layer turns it into report-ready datasets per family.

COMMON REGULATORY DATA LAYER · SUBJECT AREAS «DIGITALLENCY DOĞRULASIN»

- **Transaction** postings, payments, accruals per contract and day
- **Contract / account** loans, deposits, securities, derivatives, limits
- **Customer / counterparty** customer type, sector, country, risk group
- **Collateral** type, value, valuation date, allocation
- **General ledger** balances per account; reconciliation anchor

harmonised | historised | reconciled to GL

DATA DEMAND LAYER · ONE PER REPORT FAMILY «DIGITALLENCY DOĞRULASIN»

TCMB / BDDK
balances and transactions mapped to report lines per period

IFRS 9
staging attributes, exposure, collateral and cash flows per contract

BCBS 239 / PERDAR
critical data elements with lineage and control results

Credit risk
exposure, rating, collateral and limits per customer and risk group

EBA (optional)
local data mapped to EBA templates

A new report family adds a demand layer, not a new common layer.

Why two layers. The common layer is built once and reconciled to the GL once. Each further family then costs less, and one figure is the same in every report. This is the basis of the B fee model.

Data Quality and Validation

KOMTAS

Rules run before submission. A submission above the threshold goes back for correction, as in the credit-bureau reference.

02 · DATA QUALITY

RULE TYPES «DIGITALLENCY DOĞRULASIN»

Completeness
mandatory fields filled; all entities and portfolios loaded

Validity
codes in valid lists; formats and ranges

Consistency
same value across sources and layers

Reconciliation
report totals equal GL and source totals

Referential integrity
contract, customer and collateral keys match

Plausibility
period-to-period change within limits

Timeliness
data loaded before the agreed cut-off

VALIDATION FLOW «DIGITALLENCY DOĞRULASIN»

1. **Load and run rules**
   all catalogue rules in each run
2. **Evaluate thresholds**
   error rate per rule and per submission
3. **Pass: release**
   report-ready data released to the demand layer
4. **Fail: return**
   errors sent back to the data owner for correction
5. **Re-run and record**
   corrected data re-validated; results kept

THRESHOLDS AND EVIDENCE

Threshold per rule «DIGITALLENCY DOĞRULASIN»

Error tolerance per rule and per submission «NUMBER»; set in B with the regulatory unit; blocking and warning rules separated.

Reference: KKB «DIGITALLENCY DOĞRULASIN»

Basel II validation of data sent by banks; a submission above a 5% error threshold is returned to the bank; built with Informatica.

Results kept

Rule results, exceptions and corrections stored per run; they feed the monthly DQ report in C and the BCBS 239 evidence.

Rule catalogue. Each rule has an id, owner, type, threshold and action. The catalogue starts from the customer's existing checks (input form P5) and grows with every report family.

Family 1 — TCMB / BDDK Legal Reports

references: Yapı Kredi · Vakıf Katılım

KOMTAS

Prudential and statistical reports to the regulators, produced each period from one reconciled dataset.

REPORTS AND CONTENT «DIGITALLENCY DOĞRULASIN»

- **Prudential reports to BDDK**
  capital adequacy, liquidity, FX net position and other periodic tables
- **Statistical reports to TCMB**
  monetary and financial statistics, balance sheet and interest rate data
- **Financial statements and annexes**
  solo and consolidated balance sheet, income statement, notes
- **VTM reports**
  as named in the reference deck; scope to be confirmed
- **Period-end submission sets**
  monthly, quarterly and annual sets in the regulator formats

TYPICAL SOURCE SYSTEMS «DIGITALLENCY DOĞRULASIN»

- **Core banking** accounts, deposits, loans
- **Treasury** securities, derivatives, FX
- **General ledger** balances, chart of accounts
- **Collateral** collateral and guarantees
- **Customer master** customer type, sector, group
- **Reference data** FX rates, codes, product mapping

OUTPUT · DATA DEMAND LAYER

Legal reporting dataset per period

balances and transactions mapped to report lines, reconciled to the GL, versioned per period.

CDE, DQ RULES, FREQUENCY «DIGITALLENCY DOĞRULASIN»

critical data elements

Balances, product and customer codes

account balance, currency, product mapping, customer type, sector code

typical DQ rules

GL reconciliation, code validity

report totals equal GL totals; codes in valid lists; mandatory fields filled

frequency

Daily, monthly, quarterly

most frequent per report «NUMBER»; set per report in A

References. Vakıf Katılım — legal reporting data moved from the BOA core banking platform to the EDW. Yapı Kredi — common data layer also feeding VTM reports. «DIGITALLENCY DOĞRULASIN»
VTM: abbreviation as used in the Digitallency deck; exact current regulatory name to be confirmed. «DIGITALLENCY DOĞRULASIN»

Family 2 — IFRS 9 (TFRS 9)

reference: Yapı Kredi

KOMTAS

Contract-level data for staging and the ECL calculation. The ECL models belong to the customer; this family prepares their inputs.

REPORTS AND CONTENT «DIGITALLENCY DOĞRULASIN»

- **Staging (stage 1 / 2 / 3)**
  significant increase in credit risk and default flags per contract
- **ECL inputs**
  PD, LGD and EAD inputs and segment data for the ECL calculation
- **Collateral**
  collateral values, haircuts and allocation to exposures
- **Cash flows**
  contractual and expected cash flows, repayment schedules
- **ECL results and disclosures**
  provision amounts and movement tables for financial reporting

TYPICAL SOURCE SYSTEMS «DIGITALLENCY DOĞRULASIN»

- **Loan system** contracts, schedules, arrears
- **Core banking** accounts, balances
- **Collateral system** values, valuation dates
- **Rating system** ratings at origination and today
- **General ledger** provisions, balances
- **Restructuring data** restructuring and forbearance flags

OUTPUT · DATA DEMAND LAYER

ECL-ready dataset per contract and period

staging attributes, exposure, collateral and cash flows for the customer's ECL engine.

CDE, DQ RULES, FREQUENCY «DIGITALLENCY DOĞRULASIN»

critical data elements

Days past due, stage, EAD, collateral value

contract id, default and restructuring flags, rating at origination and reporting date

typical DQ rules

Stage consistency, historisation

stage changes explained; days past due vs default flag; origination rating kept

frequency

Monthly, quarterly

plus year-end; runs per period «NUMBER»

References. Yapı Kredi — IFRS 9 reporting data from the common legal reporting data layer; year «YEAR». «DIGITALLENCY DOĞRULASIN»

Family 3 — BCBS 239 / PERDAR

reference: Yapı Kredi

KOMTAS

Risk data aggregation and reporting principles: the data, lineage and control evidence the bank needs for its self-assessment.

REPORTS AND CONTENT «DIGITALLENCY DOĞRULASIN»

- **Risk data aggregation**
  accuracy, completeness, timeliness and adaptability of risk data (P3–P6)
- **Lineage evidence**
  source-to-report lineage for critical data elements
- **Controls evidence**
  DQ rule results, reconciliations and sign-offs per run
- **Governance evidence**
  data owners, policies and architecture documents (P1–P2)
- **Self-assessment support**
  status per principle: Met / Partly met / Not met

TYPICAL SOURCE SYSTEMS «DIGITALLENCY DOĞRULASIN»

- **Risk systems** credit, market, liquidity
- **Common data layer** harmonised risk data
- **General ledger** reconciliation anchor
- **DQ engine** rule results per run
- **Metadata / lineage tool** technical lineage
- **Policy records** owners, approvals

OUTPUT · DATA DEMAND LAYER

Evidence pack per principle

lineage maps, DQ results, reconciliation reports and owner lists, kept per period.

CDE, DQ RULES, FREQUENCY «DIGITALLENCY DOĞRULASIN»

critical data elements

Critical data elements list

per risk report: element, definition, owner, source, controls

typical DQ rules

Completeness, accuracy, timeliness

all entities and portfolios covered; values reconciled; run within the agreed time

frequency

Each reporting run

evidence produced each run; principle review «NUMBER» per year

References. Yapı Kredi — PERDAR reporting from the common data layer; year «YEAR». «DIGITALLENCY DOĞRULASIN»
PERDAR is treated here as the BDDK counterpart of the BCBS 239 principles; exact regulatory name and scope to be confirmed. «DIGITALLENCY DOĞRULASIN»

Family 4 — Credit Risk Reporting

references: Yapı Kredi · KKB

KOMTAS

Exposure, rating, collateral, limits and concentration on one customer and risk-group key, for internal and regulatory risk reports.

REPORTS AND CONTENT «DIGITALLENCY DOĞRULASIN»

- **Exposure**
  on- and off-balance-sheet exposure per customer, product and segment
- **Rating**
  internal and external ratings and their history
- **Collateral**
  collateral types, values and allocation to exposures
- **Limits**
  limit, utilisation and breaches per customer and group
- **Concentration**
  large exposures, risk groups, sector and country concentration

TYPICAL SOURCE SYSTEMS «DIGITALLENCY DOĞRULASIN»

- **Loan system** contracts, utilisation
- **Core banking** accounts, non-cash loans
- **Collateral system** values, allocation
- **Rating system** internal and external ratings
- **Limit system** limits, approvals
- **Customer master** risk groups, sector, country

OUTPUT · DATA DEMAND LAYER

Credit risk dataset per customer and group

exposure, rating, collateral and limits on one key; feeds internal risk reports and regulator tables.

CDE, DQ RULES, FREQUENCY «DIGITALLENCY DOĞRULASIN»

critical data elements

Customer and group id, exposure, rating

plus collateral value, limit, product type, sector, country

typical DQ rules

Risk group integrity, collateral cover

one risk group per customer; collateral not allocated above its value

frequency

Daily, monthly

daily for limits; monthly for regulator tables

References. Yapı Kredi — credit risk reporting from the common data layer. KKB — Basel II validation: rule-based checks on bank submissions; above a 5% error threshold returned to the bank; Informatica. «DIGITALLENCY DOĞRULASIN»

Family 5 — EBA Reports

optional module

KOMTAS

Optional module for banks with an EU parent or an EU subsidiary: local data mapped to EBA reporting templates.

REPORTS AND CONTENT «DIGITALLENCY DOĞRULASIN»

- **Reporting to the EU parent**
  group reporting packages in EBA formats
- **Own funds and capital data**
  inputs for COREP-type templates
- **Financial data**
  inputs for FINREP-type templates
- **Large exposures, other templates**
  as required by the parent or the EU subsidiary
- **Mapping to local reports**
  one data layer feeding local and EBA reports

TYPICAL SOURCE SYSTEMS «DIGITALLENCY DOĞRULASIN»

- **Common data layer** harmonised local data
- **General ledger** group chart of accounts
- **Risk systems** exposure, own funds inputs
- **Collateral** values, allocation
- **Customer master** counterparty classification
- **Reference data** EBA codes, mappings

OUTPUT · DATA DEMAND LAYER

EBA-ready dataset per reporting date

local data mapped to EBA templates and the group chart of accounts; reconciled with local reports.

CDE, DQ RULES, FREQUENCY «DIGITALLENCY DOĞRULASIN»

critical data elements

Counterparty sector, exposure class, own funds

plus country, currency, group chart of accounts

typical DQ rules

Template validation, local-to-group check

EBA validation rules before submission; totals equal local reports

frequency

Quarterly, semi-annual

by template; set by the parent

References. Yapı Kredi — EBA reports from the common data layer; year «YEAR». «DIGITALLENCY DOĞRULASIN»
Optional module: offered only to banks with an EU parent or an EU subsidiary. «DIGITALLENCY DOĞRULASIN»

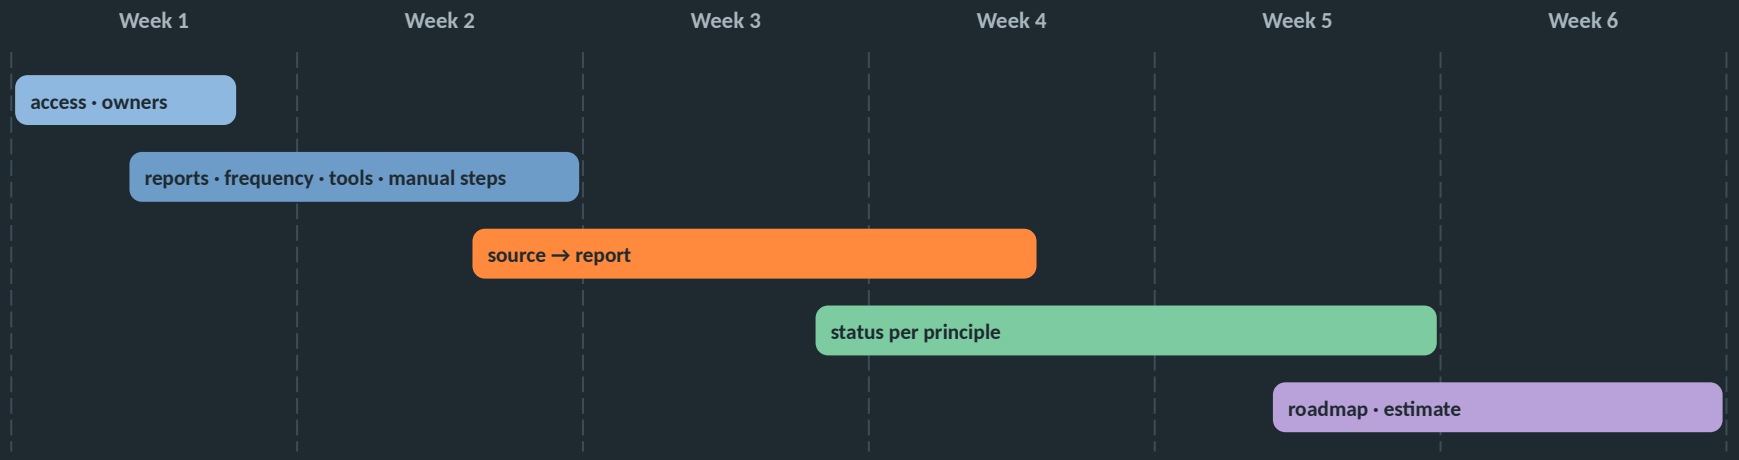

A — Regulatory Data Assessment: Flow and Timeline

KOMTAS

Report inventory, lineage, BCBS 239 gap assessment and target architecture in phases P0–P4. Fixed fee by band.

03 · TIER A

PLAN · BAND M, 6 WEEKS

Band S 4 weeks / ~30 pd, band M 6 weeks / ~50 pd, band L 8 weeks / ~75 pd. Report-family driver not counted for A. «DIGITALLENCY DOĞRULASIN»

DECISION FOR B

B scope and estimate

The read-out names the report families, the common-layer foundation, the band and the B effort. The customer decides on B per report family; the A results can also be used on their own.

DELIVERABLES «DIGITALLENCY DOĞRULASIN»

- Report inventory
- Lineage map
- BCBS 239 gap table
- DQ issues list
- Target architecture
- B roadmap and estimate

Fixed fee. A is priced by band. Governance gaps found in A are routed to data-governance; platform limits to DWH Assessment.

B — Regulatory Data Layer: Components and Effort

price per report family

KOMTAS

The common layer is built once; each report family adds a demand layer, its DQ rules and a parallel run. Priced per report family.

Prerequisite: a Regulatory Data Assessment or an equivalent analysis «A REF».

COMPONENTS «DIGITALLENCY DOĞRULASIN»

Common layer
model and build: transaction, contract, customer, collateral, GL

Demand layer per family
report-ready datasets for each report family in scope

DQ rules and validation
rule catalogue, validation engine, thresholds, return loop

Reconciliation
controls to the GL and between layers

Lineage documentation
source → report for in-scope reports; audit trail

Parallel run and handover
results compared with current reports; runbook; handover to C

EFFORT FORMULA «DIGITALLENCY DOĞRULASIN»

B EFFORT (pd)

foundation (once) + Σ report families × band effort + parallel run

COMMON LAYER FOUNDATION, ONCE

S ~60 pd · M ~90 pd · L ~140 pd

PER REPORT FAMILY

S ~40 pd · M ~70 pd · L ~110 pd

Parallel run.
Effort «NUMBER» pd per family; depends on the number of periods «NUMBER» and the tolerance agreed for acceptance.

WORKED EXAMPLE · ILLUSTRATIVE

ITEM	COUNT	UNIT	PD
Common layer foundation (M)	once	~90 pd	90
IFRS 9 family (M)	1	~70 pd	70
Credit risk family (M)	1	~70 pd	70
Parallel run	2	«NUMBER» pd	«...»
B effort total	2 families		230 + «...»

Figures from the draft bands (p. 20); not a quote.

C — Run: Monthly Regulatory Operation

KOMTAS

A monthly hour capacity for period-end runs, DQ review and regulation changes. Recurring revenue.

03 · TIER C

MONTHLY CAPACITY «DIGITALLENCY DOĞRULASIN»

S — **40 h / month**
one report family, monthly reports

M — **80 h / month**
two to three families or weekly reports

L — **160 h / month**
more than three families or daily reports

ACTIVITIES «DIGITALLENCY DOĞRULASIN»

- **Period-end runs**
  loads and DQ runs on the regulatory calendar
- **DQ result review**
  failed rules reviewed with the data owners
- **Regulation changes**
  new report, field or rule from the monthly capacity
- **DQ monitoring report**
  monthly: rule results, trends, open issues
- **Small improvements**
  rules, mappings, performance
- **Job support**
  failed loads fixed, late data handled
- **Lineage upkeep**
  lineage and data dictionary kept current

REGULATORY CALENDAR «DIGITALLENCY DOĞRULASIN»

Draft load per period; set in B with the regulatory unit.

MONTH — **Month-end**
legal and credit risk reports; DQ review

QUARTER — **Quarter-end**
IFRS 9 and quarterly sets; heavier load

YEAR — **Year-end**
annual reports and audit support

CHANGE — **Regulation change**
new report or field; above capacity: change request

Term. Draft minimum term 12 months. Unused hours are not carried over; work above the capacity is charged at the hour rate. «DIGITALLENCY DOĞRULASIN»

Team and Roles

KOMTAS

An engagement lead with regulatory reporting knowledge leads A and B with a data architect, data engineers and a DQ engineer; C has a run lead and a data engineer.

ROLES «DIGITALLENCY DOĞRULASIN»

ROLE	RESPONSIBILITY	A	B	C
Engagement lead / regulatory BA	report inventory, requirements per family, BCBS 239 assessment, read-out	lead	lead	—
Data architect	target architecture, common and demand layer model, lineage	●	●	—
Data engineers (ETL)	loads, transformations, reconciliation controls	part	●	—
DQ engineer	rule catalogue, validation engine, thresholds, DQ report	part	●	—
Run lead	regulatory calendar, monthly report, capacity	—	—	lead
Data engineer (Run)	period-end runs, regulation changes, job support	—	—	●

● takes part lead accountable for delivery part part time — not staffed

CUSTOMER-SIDE CONTACTS «DIGITALLENCY DOĞRULASIN»

Regulatory reporting unit
finance or risk; owns the reports, decides on interpretation and tolerances

Data owners
source meaning, corrections in the return loop, sign-off

IT
source access, platform, scheduling and operations

Delivery capacity.
Regulatory reporting knowledge sits mainly with the partner. Split of roles between Komtaş and Digitallency: «FIELD».

Staffing facts to collect.
Regulatory BAs «NUMBER» · Informatica engineers «NUMBER» · DQ engineers «NUMBER»

Sizing — Drivers, S / M / L Bands and Effort

draft — to calibrate with Digitallency

KOMTAS

Drivers come from the input forms (files 3a–3c). Durations in weeks, effort in person-days (pd), C in hours per month.

SIZING DRIVERS «DIGITALLENCY DOĞRULASIN»

DRIVER	S	M	L
Reports in scope	≤10	11–40	>40
Source systems	≤5	6–15	>15
Most frequent reporting	monthly / quarterly	weekly	daily
DQ rules	≤150	151–500	>500
Report families (B and C only)	1	2–3	>3

Band rule. «DIGITALLENCY DOĞRULASIN»
The band is the highest band reached by at least three drivers. A driver at L also counts as reaching M and S. For A the report-family driver is not counted.

Example — A Assessment.
25 reports (M), 8 source systems (M), monthly (S), 300 DQ rules (M); report-family driver not counted → three drivers at M → band M: 6 weeks / ~50 pd.

DURATION / EFFORT «DIGITALLENCY DOĞRULASIN»

ITEM	S	M	L
A duration	4 weeks	6 weeks	8 weeks
A effort	~30 pd	~50 pd	~75 pd
B foundation, once	~60 pd	~90 pd	~140 pd
B per report family	~40 pd	~70 pd	~110 pd
C capacity	40 h / month	80 h / month	160 h / month

Parallel run «NUMBER» pd per report family, by number of periods and tolerance. Each integration with a report tool or submission software is a separate line item. «DIGITALLENCY DOĞRULASIN»

Calibration.
Draft. Bands and person-days are updated with Digitallency's effort from the reference projects (Yapı Kredi, Vakıf Katılım, KKB).

Acceptance Criteria

KOMTAS

B is accepted on parallel-run reconciliation, active DQ rules and documented lineage per report family. A is accepted on its deliverables.

ACCEPTANCE STEPS

1. **Tolerance and periods agreed**
   at B start, per report family, with the regulatory unit
2. **Parallel run**
   new data layer and current reports run side by side
3. **Reconciliation per family**
   differences explained or within tolerance
4. **DQ and lineage review**
   rules active with thresholds; lineage documented

CRITERIA «DIGITALLENCY DOĞRULASIN»

TIER / ITEM	CRITERION	EVIDENCE	THRESHOLD
A deliverables	inventory, lineage map, gap table, DQ issues, architecture, roadmap	read-out and documents	accepted at read-out
B parallel run	results reconcile with current reports for each report family	reconciliation report per period	within «NUMBER» for «NUMBER» periods
B DQ rules	rules active with documented thresholds	rule catalogue, run results	all in-scope rules
B lineage	lineage documented for in-scope reports	lineage map, data dictionary	all in-scope reports
B GL reconciliation	common layer reconciled to the GL	reconciliation report	within «NUMBER»
C Run	period-end runs and monthly DQ report delivered	monthly report	per month

Tolerance per customer.
Tolerances and the number of periods are agreed with the customer's regulatory unit on its own reports; no tolerance is promised in advance.

Outside acceptance.
Errors in source data, regulator decisions on submissions and report layouts are not acceptance criteria.

Follow-on Map

KOMTAS

Each tier leads to a named next step. In the proposal templates this is the section 'Next step', without partnership terms.

AFTER → NEXT STEP «DIGITALLENCY DOĞRULASIN»

AFTER	NEXT STEP	TYPE
A read-out	B Regulatory Data Layer for the priority report families	service project
B go-live	C Run: regulatory calendar and regulation changes	recurring service
First family running	additional report families on the same foundation	service project
Governance gaps in A	data-governance	package
Platform limits found	DWH Assessment, DWH modernisation	package / project
Platform operations needed	Data Platform Operations (aday-37)	candidate asset
No banking data model	Industry Data Models (aday-36)	candidate asset
New regulation	C capacity or a change request	recurring / project

In the proposal templates.
Section 'Next step': B, additional families, C Run, data-governance. No partnership terms, no prices.

Recurring value.
The regulatory calendar and regulation changes are permanent; C is the target of every A and B proposal.

Risks and Open Points

KOMTAS

Known risks of the package as drafted, how they are handled, and the questions still open.

RISKS «DIGITALLENCY DOĞRULASIN»

RISK	EFFECT	HANDLING
Source data quality	defects outside project control delay acceptance	return loop and DQ report; source cleansing out of scope
Regulation changes during the project	scope moves while B runs	changes logged; change request or C capacity
Dependency on regulatory SMEs	requirements and tolerances not decided	named regulatory unit contact before start; blocker in the input form
Old partner references	references from 2012–2020; use permission open	Digitallency confirms each reference and year before use
Partnership model open	capacity and revenue share undefined	settled before the first proposal

OPEN POINTS BY OWNER

Digitallency

- References: still valid, usable, year?
- VTM and PERDAR: current regulatory names
- Effort and duration of the references
- Tools and platforms used today

Sales and management

- Partnership model and revenue share
- Day rates, family fees, Run fee
- Proposal lead: Komtaş or partner
- Target customer list

Komtaş delivery

- Own regulatory reporting experience
- Informatica and DQ capacity
- Link to the data-governance package
- Banking data model (aday-36)

Verification Summary

KOMTAS

Draft for review by Digitallency. Every drafted statement carries an orange tag and has one question in the sidecar file.

PACKAGE FILES

TAGS

1	Blueprint (this file)	57
2	Customer deck	«...»
3a–c	Input forms	«...»
4a–c	Proposal templates	«...»

Package total: «...» tags; same in EN and TR.
One sidecar file per document; one question per tag.

HOW THE REVIEW WORKS

1. Digitallency answers each question in the sidecar
2. Confirmed: tag removed; changed: EN and TR updated
3. Placeholders filled: «YEAR», «NUMBER», «FIELD»
4. Efforts and bands recalibrated with real data

Known facts carry no tag: the three references and their content as stated in the Digitallency 2025 deck (Yapı Kredi, Vakıf Katılım, KKB, 5% threshold, Informatica); most references from 2012–2020; partnership model open.
