Regulatory Data Layer — Proposal Input Form

Information to be collected for a Data Layer (B) proposal that builds the common regulatory data layer and the data demand layer for the selected report families, and the proposal field (file 4b) each item fills. The fee is per report family; the common layer foundation is counted once. Sections follow the Proposal Set codes (P1–P6). Orange tags mark draft statements to be verified by Digitallency (report families, data, DQ rules, regulation names, effort, bands, team, references, acceptance). This form is for internal use; customer and partner names are not written into customer files.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the Assumptions and Out of Scope section.

The "WHERE IT FILLS IN THE PROPOSAL" column of each row names the section or variable field of the proposal template (file 4b). This form uses the Proposal Set codes P1–P6; the A·B·C mark in each code heading shows the tiers in which the code is asked.

If the answer to a question is "not known", that is also an answer — it is often the first finding and goes into the proposal as an assumption.

LIMIT OF TIER B: B builds the common regulatory data layer and the data demand layer for the selected report families. The prerequisite is A or an equivalent analysis («A REF»); without it no B proposal is written, A is proposed first and A's input form (3a) is used.

SCOPE: common layer model and build (transaction, contract / account, customer / counterparty, collateral, GL — harmonised, historised, reconciled to GL); data demand layer per family; DQ rule catalogue and validation engine; reconciliation; lineage documentation; parallel run against the current reports; handover. «DIGITALLENCY DOĞRULASIN»

PRICING: the fee is per report family; the common layer foundation is counted once; the parallel run is a separate line per family.

PLATFORM: the common layer can be built on the existing DWH (Teradata, Oracle, SQL Server) or on a cloud platform; tool examples are Informatica (PowerCenter / IDMC, Data Quality). The platform and tool choice is a scope item («PLATFORM»). «DIGITALLENCY DOĞRULASIN»

OUT OF SCOPE: data cleansing in source systems; report layout design; correspondence with the regulator; legal interpretation of regulations (the customer's regulatory unit decides); core system changes. «DIGITALLENCY DOĞRULASIN»

BOUNDARY — data-governance: this package builds the reporting data, its DQ rules and lineage; the enterprise governance framework (organisation, policies, glossary, roles, catalogue) is the work of the data-governance package. Governance gaps found in A are routed there.

BOUNDARY — DWH Assessment: the DWH Assessment evaluates the data platform as a whole; this package looks only at the regulatory reporting chain.

BOUNDARY — report production tools and regulator submission software: out of scope unless an integration line is added in B. «DIGITALLENCY DOĞRULASIN»

P1 · A·B·C · IDENTITY — Institution and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the institution and the short name used in the text; single institution or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER»	
○	Legal entities in scope — bank, foreign subsidiary, leasing, factoring, investment firm; is consolidated reporting in scope; for a single institution the row is deleted	Cover «GROUP COMPANIES», Scope	
○	Reason for the request and context — for the one-paragraph context	Purpose «CUSTOMER CONTEXT»	
●	**Is there an RFP, specification or requirements list; its number, response format and deadline**	Structure and response format of the proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», Commercial Terms «proposal date + 1 month»	
○	Procurement process, approved budget and expected invoice payment term; is a supplier assessment (outsourcing, information security) required	Effort and Fees, Commercial Terms «NUMBER» days payment term	
○	Are there competitors, and who (another partner, a regulatory reporting software product, the institution's own IT / DWH team)	Emphasis and section weights	

P2 · A·B·C · DECISION — Institution Type, Report Families, Tier, Sponsor and Trigger

> B is not offered on a reporting chain that has not been analysed. If the answer to the first row of this section is "no", the proposal is not written and Tier A is proposed first.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Has A (Regulatory Data Assessment) been carried out, or is there an equivalent analysis (report inventory, lineage of priority reports, target architecture)**	Whether the proposal is written, «A REF»	
○	A reference — report / proposal number and date; the B scope recommended in A	«A REF», Scope	
●	**Institution type — bank, participation bank or investment firm** «DIGITALLENCY DOĞRULASIN»	Purpose «CUSTOMER CONTEXT», ANNEX-1 — Report Family Pages (selected family blocks)	
●	**Report families in scope — from the Report Family Catalogue below; priority order of the families**	ANNEX-1 — Report Family Pages (selected family blocks), Driver 5	
●	**Trigger — BDDK / TCMB findings or audit remarks, a new regulation or format change, manual Excel-based reporting, period-end delays, IFRS 9 model data issues, a core banking migration** «DIGITALLENCY DOĞRULASIN»	Purpose «CUSTOMER CONTEXT» · «TRIGGER»	
○	Sponsor and decision maker — CFO, CRO, head of the regulatory reporting unit, IT; who makes the proposal decision, and by what date	Team, Customer Responsibilities, Commercial Terms	
○	Which tiers are wanted — B only, or B + C (Run) together	Next Step, Service Selection Check	
○	Is there an EU parent or an EU subsidiary — the EBA family is offered only in this case «DIGITALLENCY DOĞRULASIN»	ANNEX-1 — Report Family Pages «REPORT FAMILY — EBA», Scope	
○	Target go-live date and the calendar it depends on (regulation effective date, BDDK action plan, year-end close, core banking migration)	Activities and Timeline	

Report Family Catalogue — Five Families

The unit sold is a report family: A measures the whole chain, B is priced per family (common layer foundation once), C is monthly. The family sets the block that stays in ANNEX-1 of the proposal. The EBA family is optional. Source systems, critical data elements, DQ rules and frequencies are drafts (table as a whole). «DIGITALLENCY DOĞRULASIN» VTM and PERDAR are written as they appear in the Digitallency deck; PERDAR is treated as the BDDK counterpart of the BCBS 239 principles. «DIGITALLENCY DOĞRULASIN»

#	REPORT FAMILY (PROPOSAL BLOCK)	TYPICAL SOURCE SYSTEMS	CRITICAL DATA ELEMENTS	TYPICAL DQ RULES	FREQUENCY
1	TCMB / BDDK legal reports («REPORT FAMILY — TCMB / BDDK»)	Core banking, loans, deposits, treasury, GL	Balance, product type, counterparty sector, maturity, currency, interest rate	Reconciliation of balances to GL; completeness of mandatory fields; code list validity; consistency across reports	By report: daily, weekly, monthly, quarterly
2	IFRS 9 (TFRS 9) («REPORT FAMILY — IFRS 9»)	Loans, collateral, rating, GL, cash flow schedules	Stage, days past due, PD / LGD / EAD inputs, collateral value, effective interest rate, cash flows	Consistency of stage with days past due; recency of the collateral valuation date; reconciliation of exposure to GL	Monthly, quarterly
3	BCBS 239 / PERDAR («REPORT FAMILY — BCBS 239 / PERDAR»)	All sources feeding the risk reports	Critical data element inventory per risk report, its owner, its lineage	Accuracy, completeness and timeliness controls and their evidence; audit trail of manual adjustments	Frequency of the risk report; periodic self-assessment
4	Credit risk reporting («REPORT FAMILY — CREDIT RISK»)	Loans, limits, collateral, rating, customer / risk group	Exposure, rating, collateral, limit, risk group, sector	Consistency of exposure with limit utilisation; completeness of risk groups; reconciliation of concentration totals	Daily, monthly

#	REPORT FAMILY (PROPOSAL BLOCK)	TYPICAL SOURCE SYSTEMS	CRITICAL DATA ELEMENTS	TYPICAL DQ RULES	FREQUENCY
5	EBA reports (optional) («REPORT FAMILY — EBA»)	Consolidation data; entities in the common layer	Reporting data points requested by the EU parent or subsidiary	Consistency with local reports; control of consolidation eliminations	Monthly, quarterly

P3 · A·B·C · REPORTS — Report Count, Frequency, Current Tools and Manual Steps

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of reports in scope — per family**	Driver 1, Scope	
●	**Most frequent report — daily, weekly, monthly or quarterly; frequencies per family**	Driver 3, Scope, Effort and Fees	
○	How the reports are produced today — report production tool, regulator submission software, Excel, BI tool, DWH queries	Approach, Assumptions and Out of Scope	
○	Manual steps — Excel adjustments, manual reconciliations, manually entered data; how many days they take at period end	Purpose, Scope	
○	Report owners — finance, risk, regulatory reporting unit, treasury; who signs off the report	Customer Responsibilities, Team	
○	Recent BDDK / TCMB findings, internal or external audit remarks; submissions returned or corrected by the regulator	Purpose, Scope	
●	**Access to SMEs of the regulatory reporting unit (finance / risk) — «NUMBER» hours per week for interviews and rule definition; name of the contact**	Customer Responsibilities, Blocker Checklist	

Report inventory — the reports in B scope (from the output of A). One row is one report.

#	REPORT	FAMILY	FREQUENCY	CURRENT TOOL / MANUAL STEP	OWNER

2					
3					
4					
5					

P4 · A·B · SOURCES — Source Systems, Core Banking, Existing DWH and Access

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of source systems — core banking, loans, treasury, collateral, GL, rating and others**	Driver 2, Scope	
○	Core banking platform — product, version; is a core banking migration planned, and its timeline	Scope, Assumptions and Out of Scope	
○	Existing DWH / data platform (Teradata, Oracle, SQL Server, cloud) and whether regulatory reporting data passes through the DWH today	Approach, Scope «PLATFORM»	
○	ETL tool — Informatica PowerCenter / IDMC, ODI, other; licence status	Approach, Assumptions and Out of Scope	
●	**Access to the sources — read-only access or extracts; approval process and lead time; is on-site work required because of banking secrecy / KVKK**	Customer Responsibilities, Activities and Timeline, Blocker Checklist	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Is GL reconciliation possible — access to the GL at account / contract level; are GL and source system balances compared today**	Approach, Blocker Checklist	
○	Data owners — per source system; who provides the extracts or the access	Customer Responsibilities	
○	Have there been changes since A — new sources, a core banking migration, new products, a changed report format	Assumptions and Out of Scope	

Source systems — one row per system.

#	SOURCE SYSTEM	DATA (TRANSACTION / CONTRACT / CUSTOMER / COLLATERAL / GL)	PLATFORM	ACCESS (READ-ONLY / EXTRACT)	OWNER
1					
2					
3					
4					
5					

P5 · A·B·C · DQ — Existing Rules, Rule Count and Current Validation

> DQ and validation: a rule catalogue and a rule-based validation engine (pre-submission checks, thresholds, return / correction loop); the reference model is the credit-bureau work that validates the data sent by banks and returns a submission above a 5% error threshold to the bank (KKB). «DIGITALLENCY DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of existing DQ rules or rules to be built in B — from the output of A**	Driver 4, Scope	
○	How pre-submission validation is done today — who checks, with which tool (Informatica Data Quality, SQL, Excel, the report tool)	Approach, Scope	
○	Are there agreed error thresholds (e.g. the threshold at which a submission is returned); who runs the correction loop	Approach, Deliverables and Acceptance	
○	Known DQ issues — missing fields, GL differences, inconsistent customer / counterparty codes, collateral valuation dates	Assumptions and Out of Scope, Scope	
○	Is there an earlier BCBS 239 / PERDAR self-assessment or audit report; can it be shared	Approach, Assumptions and Out of Scope	

P6 · B · PLATFORM — Target Platform, Tools, Environments and Parallel Run

> ARCHITECTURE: source systems → staging → common regulatory data layer (transaction, contract / account, customer / counterparty, collateral, GL) → data demand layer per report family (report-ready datasets) → reporting tools / regulator formats. Cross-cutting: DQ rule catalogue and validation engine, reconciliation controls, source→report lineage, audit trail. «DIGITALLENCY DOĞRULASIN»
>
> ACCEPTANCE: parallel-run reconciliation within the agreed tolerance («NUMBER») for each report family for «NUMBER» periods; DQ rules active with documented thresholds; lineage documented for the reports in scope. «DIGITALLENCY DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Target platform («PLATFORM») — existing DWH (Teradata, Oracle, SQL Server) or a cloud platform; the institution's platform decision and environment owner**	Scope «PLATFORM», Approach	
●	**ETL and DQ tools and licences — Informatica PowerCenter / IDMC, Informatica Data Quality, other; who provides the licences**	Approach, Customer Responsibilities, Assumptions and Out of Scope	
○	Environments — development, test, production; who sets them up and when they are ready	Customer Responsibilities, Activities and Timeline	
○	Lineage and metadata — existing catalogue or metadata tool; where the lineage documentation lives	Deliverables and Acceptance, Approach	
○	Historical load — how many periods back are loaded into the common layer	Scope, Assumptions and Out of Scope	
○	Parallel run — how many periods per family («NUMBER»); tolerance («NUMBER»); who approves the differences	Deliverables and Acceptance, Activities and Timeline	
○	Is integration with the report production tool or regulator submission software wanted — if so, a separate line is added to B	Scope, Effort and Fees	

Band and Effort Calculation — Tier B

Completed after the answers are collected. In B the band sets the size of both the common layer foundation and the effort per family; the foundation is added once, the families and the parallel run item by item. The band is the highest band reached by at least three drivers. A driver reaches a band when its value falls in that band or a higher one; if three drivers do not reach M or L, the band is S. «DIGITALLENCY DOĞRULASIN»

CALIBRATION NOTE — DRAFT: the bands and efforts are not based on recorded effort; they are to be calibrated with Digitallency data. Komtaş effort is not written into the proposal before the delivery team confirms it. The effort, team size and duration of the Yapı Kredi, Vakıf Katılım and KKB work are unknown. «DIGITALLENCY DOĞRULASIN»

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Report count (P3)	≤ 10	11 – 40	> 40	
2	Source systems (P4)	≤ 5	6 – 15	> 15	
3	Reporting frequency — most frequent (P3)	monthly / quarterly	weekly	daily	
4	DQ rules (P5)	≤ 150	151 – 500	> 500	
5	Report families (P2)	1	2 – 3	> 3	
	RESULT — common layer foundation (once) + effort per report family «DIGITALLENCY DOĞRULASIN»	foundation ~60 + family ~40 pd	foundation ~90 + family ~70 pd	foundation ~140 + family ~110 pd	

Effort calculation — only the rows of the selected families are filled in; person-days = count × unit effort. The band from the driver table applies to every family; if a family's own report count or frequency puts it in another band, the band is written separately in that row. Rows are added for a fourth and fifth family.

#	ITEM	BAND	UNIT EFFORT	COUNT	PERSON-DAYS
1	Common layer foundation — common model, staging, DQ engine, reconciliation framework, lineage base (once)		S ~60 · M ~90 · L ~140 pd	1	
2	Report family 1 — family block · «REPORT FAMILY»		S ~40 · M ~70 · L ~110 pd		
3	Report family 2 — family block · «REPORT FAMILY»		S ~40 · M ~70 · L ~110 pd		
4	Report family 3 — family block · «REPORT FAMILY»		S ~40 · M ~70 · L ~110 pd		
	SUBTOTAL (rows 1–4)				
5	Parallel run — per report family, «NUMBER» periods «DIGITALLENCY DOĞRULASIN»	—	«NUMBER» pd		
6	Integration with report production tool / regulator submission software (optional, P6)	—	«NUMBER» pd		
	TOTAL — foundation + families + parallel run + integration				

FORMULA — Total effort = common layer foundation (once, value of the band) + Σ (selected family × family effort of the band) + Σ (family × parallel run effort) + optional integration. In the proposal the foundation, each family and the parallel run are separate lines.

ILLUSTRATION (invented counts, not customer data) — 2 families in band M: foundation 90 pd + 2 × 70 = 140 pd; parallel run 2 × «NUMBER» pd. Total = 230 pd + 2 × «NUMBER» pd.

DURATION — the calendar duration of B is «NUMBER» weeks; set with the delivery team. The parallel-run periods extend the calendar duration.

TEAM — Engagement lead / regulatory reporting business analyst · data architect · data engineers (ETL) · DQ engineer. Customer side: regulatory reporting unit (finance / risk), data owners, IT. «DIGITALLENCY DOĞRULASIN»

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the effort calculation, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	KOMTAS-«CUSTOMER ABBREVIATION»-REG-B-«YEAR»-«SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month» · «price validity date»	Cover, Commercial Terms	Send date + 1 month (P1); sales sets the price validity date	
3	«CUSTOMER CONTEXT» · «TRIGGER»	Purpose	P1 and P2 answers	
4	«REPORT FAMILY — TCMB / BDDK» / «REPORT FAMILY — IFRS 9» / «REPORT FAMILY — BCBS 239 / PERDAR» / «REPORT FAMILY — CREDIT RISK» / «REPORT FAMILY — EBA»	ANNEX-1 — Report Family Pages, Scope	P2 — the blocks of the families in B scope stay, the others are deleted	
5	«PLATFORM»	Scope, Approach	P6 answer — target platform	
6	«A REF»	Scope, Assumptions and Out of Scope	P2 — number and date of the A report or the equivalent analysis	
7	«NUMBER» families · «NUMBER» reports · «NUMBER» source systems · «NUMBER» DQ rules	Scope	P2–P5 answers	

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
8	«BAND» · foundation «NUMBER» person-days · «NUMBER» person-days per family · «NUMBER» weeks	Activities and Timeline, Team, Effort and Fees	B Effort Calculation, delivery team confirmation	
9	Common layer foundation «fee» · «fee» per family · parallel run «fee»	Effort and Fees	Row 1, rows 2–4, row 5; each a separate line	
10	Parallel run «NUMBER» periods · tolerance «NUMBER»	Deliverables and Acceptance	P6 answers	
11	«day rate» · «%» · «amount»	Effort and Fees, Commercial Terms	Change requests at the day rate; sales sets the payment pattern	
12	Next step items	Next Step	Follow-on Interest table; no margin figures	
13	ANNEX-2 references table (anonymous)	ANNEX-2 — About Komtaş	The anonymous wording in the “IN THE PROPOSAL” column of the References table below; no customer name and no Digitallency name are written.	
14	«full name» · «title» · «e-mail / phone» · «CITY»	Commercial Terms	Komtaş commercial and technical contact; city for free on-site meetings	

References — Source of ANNEX-2

Source: the Digitallency 2025 deck. In customer files (2, 4a / 4b / 4c) only the anonymous wording in the last column is written; Digitallency is not named. No result figures are written; where unknown, «RESULT» stays. The reference list in a customer file carries one verification tag (table as a whole). **«DIGITALLENCY DOĞRULASIN»**

#	REFERENCE (INTERNAL)	WORK	REPORT FAMILY	YEAR	IN THE PROPOSAL (ANONYMOUS)
1	Yapı Kredi	Legal Reporting: common data layer for IFRS 9, VTM, PERDAR, EBA and credit risk reporting	IFRS 9; BCBS 239 / PERDAR; credit risk; EBA; TCMB / BDDK	«YEAR»	a private bank (legal reporting data layer)
2	Vakıf Katılım	Legal Reporting: regulatory reporting data moved from the BOA core banking platform to the EDW	TCMB / BDDK	«YEAR»	a participation bank
3	KKB	Basel II Validation: rule-based validation of data sent by banks; a submission above a 5% error threshold is returned to the bank; built with Informatica	DQ and validation (across families)	«YEAR»	a credit bureau (validation of bank submissions)

Service Selection Check

Before filling in the form, make sure that Tier B is the right service. One request can match more than one row.

STATUS	RIGHT SERVICE
The regulatory reporting chain is not known; the report inventory, lineage and BCBS 239 gaps are to be measured	A — Assessment
A or an equivalent analysis exists; the common layer and the selected report families are to be built	B — Data Layer
The layer is built; period-end support, regulation changes and DQ monitoring are wanted	C — Run
A new report family is to be added to the existing layer	B for the new family (foundation not counted again)
An enterprise governance framework — organisation, policies, glossary, roles, catalogue — is wanted	data-governance
The data platform as a whole is to be evaluated	DWH Assessment
A ready-made industry data model for banking is wanted	Industry Data Models (aday-36)
Operation of the whole data platform is wanted	Data Platform Operations (aday-37)
Report layout, a report production tool or regulator submission software is wanted	Out of scope; only the integration can be added to B as a separate line

STATUS	RIGHT SERVICE
Legal interpretation of regulations is wanted	Out of scope; the institution's regulatory unit decides

Follow-on Interest

Follow-on work the customer may be interested in; feeds the Next Step section of the proposal. No margin figures appear in the proposal.

#	FOLLOW-ON WORK	RELATED TRIGGER	INTEREST (YES / NO / LATER)	NOTE
1	C — Run	Period-end operation of the layer and regulation changes		
2	Additional report families	New regulation, need for a new report		
3	data-governance	Governance gaps found in A		
4	Data Platform Operations (aday-37)	Operation of the data platform as a whole		
5	Industry Data Models (aday-36)	Extending the common layer with an industry data model		
6	DWH modernisation	Capacity or technology limits of the existing DWH; core banking migration		

COMMERCIAL FRAME — INTERNAL ONLY. This box, the customer names in it and the information on Digitallency are not written into the customer deck or the proposal.

Recurring value lies in C Run: the regulatory calendar is permanent and every regulation change is new work. The package opens data-governance, DWH Assessment, Data Platform Operations (aday-37) and Industry Data Models (aday-36).

The partnership model with Digitallency is open: delivery capacity / revenue share «FIELD». Digitallency is not named in the proposal or the customer deck.

Evidence: the Digitallency 2025 deck — Yapı Kredi (Legal Reporting), Vakıf Katılım (Legal Reporting), KKB (Basel II Validation). Most references date from 2012–2020; the year per reference is unknown («YEAR»). «DIGITALLENCY DOĞRULASIN»

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
P1	Full legal name of the institution and the short name used in the text; single institution or group with subsidiaries	
P1	Is there an RFP, specification or requirements list; its number, response format and deadline	
P2	Has A (Regulatory Data Assessment) been carried out, or is there an equivalent analysis (report inventory, lineage of priority reports, target architecture)	
P2	Institution type — bank, participation bank or investment firm	
P2	Report families in scope — from the Report Family Catalogue below; priority order of the families	
P2	Trigger — BDDK / TCMB findings or audit remarks, a new regulation or format change, manual Excel-based reporting, period-end delays, IFRS 9 model data issues, a core banking migration	
P3	Number of reports in scope — per family	
P3	Most frequent report — daily, weekly, monthly or quarterly; frequencies per family	
P3	Access to SMEs of the regulatory reporting unit (finance / risk) — «NUMBER» hours per week for interviews and rule definition; name of the contact	
P4	Number of source systems — core banking, loans, treasury, collateral, GL, rating and others	

SECTION	BLOCKER QUESTION	ANSWERED?
P4	Access to the sources — read-only access or extracts; approval process and lead time; is on-site work required because of banking secrecy / KVKK	
P4	Is GL reconciliation possible — access to the GL at account / contract level; are GL and source system balances compared today	
P5	Number of existing DQ rules or rules to be built in B — from the output of A	
P6	Target platform («PLATFORM») — existing DWH (Teradata, Oracle, SQL Server) or a cloud platform; the institution's platform decision and environment owner	
P6	ETL and DQ tools and licences — Informatica PowerCenter / IDMC, Informatica Data Quality, other; who provides the licences	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the Assumptions and Out of Scope section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold.

The first row of P2 has a special place: without A or an equivalent analysis no B proposal is written; if the customer still wants B, A is proposed first.

Blocking conditions and their effect on the proposal

#	CONDITION	EFFECT ON THE PROPOSAL	ACTION	STATUS
1	No A or equivalent analysis	No B proposal is written	Propose A first; use form 3a	
2	No access to regulatory reporting SMEs	Rules and demand layer definitions cannot be approved; the timeline cannot be written	Clarify the contact and weekly hours in P3	
3	No access to the source systems (read-only or extracts)	The common layer cannot be built; P0 cannot be completed	Clarify the access method and approval lead time in P4	
4	No GL reconciliation possible	The acceptance criterion (reconciliation) cannot be met	Clarify GL access in P4	
5	No platform or tool decision	The common layer cannot be designed	Clarify in P6	
6	The outputs of the current reports cannot be provided for the parallel run	Acceptance cannot be written	Clarify in P6
