REGULATORY REPORTING DATA LAYER · TIER C · INTERNAL

Regulatory Data Layer Run — Proposal Input Form

Information to be collected for the monthly operation of the regulatory data layer once built — regulatory calendar support, regulation changes, DQ monitoring — Run (C). Sections follow the Proposal Set codes (P1, P2, P3, P5, P7). Once the form is completed and returned, the proposal text (file 4c) is produced. Orange tags mark draft statements to be verified by Digitallency (report families, data, DQ rules, regulation names, effort, bands, team, references, acceptance). This form is for internal use; customer and partner names are not written into customer files.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the Assumptions and Out of Scope section.

The "WHERE IT FILLS IN THE PROPOSAL" column of each row names the section or variable field of the proposal template (file 4c). This form uses the Proposal Set codes P1, P2, P3, P5, P7; the A·B·C mark in each code heading shows the tiers in which the code is asked.

If the answer to a question is "not known", that is also an answer — it is often the first finding and goes into the proposal as an assumption.

LIMIT OF TIER C: C is the monthly operation of the regulatory data layer once built; it is priced by monthly capacity hours. A new report family is not built from C capacity; a new family is a separate B proposal.

ACTIVITIES: regulatory calendar support (period-end runs, review of DQ results); implementation of regulation changes from the monthly capacity (new report / field / rule); monthly DQ monitoring report; small improvements. «DIGITALLENCY DOĞRULASIN»

CAPACITY AND TERM: monthly S 40 h · M 80 h · L 160 h; minimum term 12 months (draft); unused hours are not carried over to the next month; work above capacity at the «hour rate». «DIGITALLENCY DOĞRULASIN»

OUT OF SCOPE: building a new report family; source system errors and data cleansing in source systems; report layout design; correspondence with the regulator; legal interpretation of regulations. «DIGITALLENCY DOĞRULASIN»

PLATFORM: the common layer can be built on the existing DWH (Teradata, Oracle, SQL Server) or on a cloud platform; tool examples are Informatica (PowerCenter / IDMC, Data Quality). The platform and tool choice is a scope item («PLATFORM»). «DIGITALLENCY DOĞRULASIN»

BOUNDARY — data-governance: this package builds the reporting data, its DQ rules and lineage; the enterprise governance framework (organisation, policies, glossary, roles, catalogue) is the work of the data-governance package. Governance gaps found in A are routed there.

P1 · A·B·C · IDENTITY — Institution and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the institution and the short name used in the text; single institution or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER»	
○	Legal entities in scope — bank, foreign subsidiary, leasing, factoring, investment firm; is consolidated reporting in scope; for a single institution the row is deleted	Cover «GROUP COMPANIES», Scope	
○	Reason for the request and context — for the one-paragraph context	Purpose «CUSTOMER CONTEXT»	
○	Is there an RFP, specification or requirements list; its number, response format and deadline	Structure and response format of the proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», Commercial Terms «proposal date + 1 month»	
○	Procurement process, approved budget and expected invoice payment term; is monthly invoicing accepted; is a supplier assessment (outsourcing, information security) required	Effort and Fees, Commercial Terms «NUMBER» days payment term	
○	Are there competitors, and who (another partner, a regulatory reporting software product, the institution's own IT / DWH team)	Emphasis and section weights	

P2 · A·B·C · DECISION — Institution Type, Report Families, Tier, Sponsor and Trigger

> For layers Komtaş did not build, an onboarding review is carried out before C starts; effort «NUMBER» pd, written as a separate item. «DIGITALLENCY DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Source of the operations need — the layer Komtaş built in B, the institution's own layer, or a layer taken over from another partner**	Scope «A REF», Purpose, Assumptions and Out of Scope	
●	**Institution type — bank, participation bank or investment firm** «DIGITALLENCY DOĞRULASIN»	Purpose «CUSTOMER CONTEXT», ANNEX-1 — Report Family Pages (selected family blocks)	
○	Report families to operate — from the Report Family Catalogue	ANNEX-1 — Report Family Pages (selected family blocks), Driver 5	
○	Sponsor and decision maker — CFO, CRO, head of the regulatory reporting unit, IT; who makes the proposal decision, and by what date	Team, Customer Responsibilities, Commercial Terms	
○	Which tiers are wanted — C only; is there interest in a new report family (B)	Next Step, Service Selection Check	
○	Requested start date — end of the B handover or end of the existing support contract	Activities and Timeline, Commercial Terms	
○	Who operates the layer today; is there an existing support contract	Customer Responsibilities, Assumptions and Out of Scope	

Report Family Catalogue — Five Families

The unit sold is a report family: A measures the whole chain, B is priced per family (common layer foundation once), C is monthly. The family sets the block that stays in ANNEX-1 of the proposal. The EBA family is optional. Source systems, critical data elements, DQ rules and frequencies are drafts (table as a whole). «DIGITALLENCY DOĞRULASIN» VTM and PERDAR are written as they appear in the Digitallency deck; PERDAR is treated as the BDDK counterpart of the BCBS 239 principles. «DIGITALLENCY DOĞRULASIN»

#	REPORT FAMILY (PROPOSAL BLOCK)	TYPICAL SOURCE SYSTEMS	CRITICAL DATA ELEMENTS	TYPICAL DQ RULES	FREQUENCY
1	TCMB / BDDK legal reports («REPORT FAMILY — TCMB / BDDK»)	Core banking, loans, deposits, treasury, GL	Balance, product type, counterparty sector, maturity, currency, interest rate	Reconciliation of balances to GL; completeness of mandatory fields; code list validity; consistency across reports	By report: daily, weekly, monthly, quarterly
2	IFRS 9 (TFRS 9) («REPORT FAMILY — IFRS 9»)	Loans, collateral, rating, GL, cash flow schedules	Stage, days past due, PD / LGD / EAD inputs, collateral value, effective interest rate, cash flows	Consistency of stage with days past due; recency of the collateral valuation date; reconciliation of exposure to GL	Monthly, quarterly
3	BCBS 239 / PERDAR («REPORT FAMILY — BCBS 239 / PERDAR»)	All sources feeding the risk reports	Critical data element inventory per risk report, its owner, its lineage	Accuracy, completeness and timeliness controls and their evidence; audit trail of manual adjustments	Frequency of the risk report; periodic self-assessment
4	Credit risk reporting («REPORT FAMILY — CREDIT RISK»)	Loans, limits, collateral, rating, customer / risk group	Exposure, rating, collateral, limit, risk group, sector	Consistency of exposure with limit utilisation; completeness of risk groups; reconciliation of concentration totals	Daily, monthly
5	EBA reports (optional) («REPORT FAMILY — EBA»)	Consolidation data; entities in the common layer	Reporting data points requested by the EU parent or subsidiary	Consistency with local reports; control of consolidation eliminations	Monthly, quarterly

P3 · A·B·C · REPORTS — Report Count, Frequency, Current Tools and Manual Steps

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of reports to operate — per family**	Driver 1, Scope	
●	**Most frequent report — daily, weekly, monthly or quarterly; frequencies per family**	Driver 3, Scope, Effort and Fees	
○	How the reports are produced today — report production tool, regulator submission software, Excel, BI tool, DWH queries	Approach, Assumptions and Out of Scope	
○	Manual steps — Excel adjustments, manual reconciliations, manually entered data; how many days they take at period end	Purpose, Scope	
○	Report owners — finance, risk, regulatory reporting unit, treasury; who signs off the report	Customer Responsibilities, Team	
○	Recent BDDK / TCMB findings, internal or external audit remarks; submissions returned or corrected by the regulator	Purpose, Scope	
●	**Access to SMEs of the regulatory reporting unit (finance / risk) — contact for the review of DQ results and the interpretation of regulation changes**	Customer Responsibilities, Blocker Checklist	
○	Which reports are fed from the layer Komtaş built; which still from the old sources	Scope, Assumptions and Out of Scope	

P5 · A·B·C · DQ — Existing Rules, Rule Count and Current Validation

> DQ and validation: a rule catalogue and a rule-based validation engine (pre-submission checks, thresholds, return / correction loop); the reference model is the credit-bureau work that validates the data sent by banks and returns a submission above a 5% error threshold to the bank (KKB). «DIGITALLENCY DOĞRULASIN»

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of active DQ rules; are their thresholds documented**	Driver 4, Scope	
○	How pre-submission validation is done today — who checks, with which tool (Informatica Data Quality, SQL, Excel, the report tool)	Approach, Scope	
○	Are there agreed error thresholds (e.g. the threshold at which a submission is returned); who runs the correction loop	Approach, Deliverables and Acceptance	
○	Known DQ issues — missing fields, GL differences, inconsistent customer / counterparty codes, collateral valuation dates	Assumptions and Out of Scope, Scope	
○	Recipients and content of the monthly DQ monitoring report — rule results, threshold breaches, reconciliation differences	Deliverables and Acceptance, Scope	

P7 · C · OPERATIONS — Calendar, Expected Changes, Capacity and Term

> The price of C is the monthly capacity in hours. Capacity is set by the band from the report count, source system, frequency, DQ rule and report family drivers.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Regulatory calendar — period-end dates, submission deadlines, peak periods**	Scope, Activities and Timeline	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Number of source systems feeding the layer	Driver 2, Scope	
○	Regulation changes expected in the next 12 months — new report, new field, format change; known dates	Scope, Effort and Fees	
○	Monthly capacity — S / M / L (from the band estimate); expected small improvements	Effort and Fees	
○	Term — minimum 12 months is a draft	Commercial Terms	
○	Expected support hours and response time at period end; ticketing tool	Customer Responsibilities, Commercial Terms	
○	The institution's own team and the split of responsibilities (RACI); owner of source system and load failures	Customer Responsibilities	

Band Estimate — Tier C

Completed after the answers are collected. In C the band gives the monthly capacity. The band is the highest band reached by at least three drivers. A driver reaches a band when its value falls in that band or a higher one; if three drivers do not reach M or L, the band is S. «DIGITALLENCY DOĞRULASIN»

CALIBRATION NOTE — DRAFT: the bands and efforts are not based on recorded effort; they are to be calibrated with Digitallency data. Komtaş effort is not written into the proposal before the delivery team confirms it. The effort, team size and duration of the Yapı Kredi, Vakıf Katılım and KKB work are unknown. «DIGITALLENCY DOĞRULASIN»

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Report count (P3)	≤ 10	11 – 40	> 40	
2	Source systems (P7)	≤ 5	6 – 15	> 15	
3	Reporting frequency — most frequent (P3)	monthly / quarterly	weekly	daily	
4	DQ rules (P5)	≤ 150	151 – 500	> 500	
5	Report families (P2)	1	2 – 3	> 3	
	RESULT — monthly capacity «DIGITALLENCY DOĞRULASIN»	40 h / month	80 h / month	160 h / month	

TEAM — Run lead + data engineer. Customer side: regulatory reporting unit (finance / risk), data owners, IT. «DIGITALLENCY DOĞRULASIN»

CONDITIONS — unused hours are not carried over to the next month; work above capacity is invoiced at the «hour rate» with the customer's approval; if a major regulation change exceeds the capacity, a separate proposal is written; the monthly report shows how the capacity was used.

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the effort calculation, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	KOMTAS-«CUSTOMER ABBREVIATION»-REG-C-«YEAR»-«SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month» · «price validity date»	Cover, Commercial Terms	Send date + 1 month (P1); sales sets the price validity date	
3	«CUSTOMER CONTEXT»	Purpose	P1 and P2 answers	

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
4	«REPORT FAMILY — TCMB / BDDK» / «REPORT FAMILY — IFRS 9» / «REPORT FAMILY — BCBS 239 / PERDAR» / «REPORT FAMILY — CREDIT RISK» / «REPORT FAMILY — EBA»	ANNEX-1 — Report Family Pages, Scope	P2 — the blocks of the operated families stay, the others are deleted	
5	«PLATFORM»	Scope, Approach	P2 — platform of the operated layer	
6	«A REF»	Scope	P2 — source of the layer; deleted if Komtaş did not build it	
7	«BAND» · «NUMBER» h / month · «NUMBER» months	Effort and Fees, Commercial Terms	Band estimate, P7	
8	«monthly fee» · «hour rate» · «amount» · «day rate» · onboarding «fee»	Effort and Fees	Monthly capacity × hour rate; work above capacity at the hour rate; change requests at the day rate; onboarding review as a separate item (P2)	
9	Next step items	Next Step	Follow-on Interest table; no margin figures	
10	ANNEX-2 references table (anonymous)	ANNEX-2 — About Komtaş	The anonymous wording in the “IN THE PROPOSAL” column of the References table below; no customer name and no Digitallency name are written.	
11	«full name» · «title» · «e-mail / phone» · «CITY»	Commercial Terms	Komtaş commercial and technical contact; city for free on-site meetings	

References — Source of ANNEX-2

Source: the Digitallency 2025 deck. In customer files (2, 4a / 4b / 4c) only the anonymous wording in the last column is written; Digitallency is not named. No result figures are written; where unknown, «RESULT» stays. The reference list in a customer file carries one verification tag (table as a whole). **«DIGITALLENCY DOĞRULASIN»**

#	REFERENCE (INTERNAL)	WORK	REPORT FAMILY	YEAR	IN THE PROPOSAL (ANONYMOUS)
1	Yapı Kredi	Legal Reporting: common data layer for IFRS 9, VTM, PERDAR, EBA and credit risk reporting	IFRS 9; BCBS 239 / PERDAR; credit risk; EBA; TCMB / BDDK	«YEAR»	a private bank (legal reporting data layer)
2	Vakıf Katılım	Legal Reporting: regulatory reporting data moved from the BOA core banking platform to the EDW	TCMB / BDDK	«YEAR»	a participation bank
3	KKB	Basel II Validation: rule-based validation of data sent by banks; a submission above a 5% error threshold is returned to the bank; built with Informatica	DQ and validation (across families)	«YEAR»	a credit bureau (validation of bank submissions)

Service Selection Check

Before filling in the form, make sure that Tier C is the right service. One request can match more than one row.

STATUS	RIGHT SERVICE
The regulatory reporting chain is not known; the report inventory, lineage and BCBS 239 gaps are to be measured	A — Assessment
A or an equivalent analysis exists; the common layer and the selected report families are to be built	B — Data Layer
The layer is built; period-end support, regulation changes and DQ monitoring are wanted	C — Run
A new report family is to be added to the existing layer	B for the new family (foundation not counted again)
An enterprise governance framework — organisation, policies, glossary, roles, catalogue — is wanted	data-governance
The data platform as a whole is to be evaluated	DWH Assessment

STATUS	RIGHT SERVICE
A ready-made industry data model for banking is wanted	Industry Data Models (aday-36)
Operation of the whole data platform is wanted	Data Platform Operations (aday-37)
Report layout, a report production tool or regulator submission software is wanted	Out of scope; only the integration can be added to B as a separate line
Legal interpretation of regulations is wanted	Out of scope; the institution's regulatory unit decides

Follow-on Interest

Follow-on work the customer may be interested in; feeds the Next Step section of the proposal. No margin figures appear in the proposal.

#	FOLLOW-ON WORK	RELATED TRIGGER	INTEREST (YES / NO / LATER)	NOTE
1	Additional report families	New regulation, need for a new report		
2	data-governance	Governance gaps found in A		
3	Data Platform Operations (aday-37)	Operation of the data platform as a whole		
4	Industry Data Models (aday-36)	Extending the common layer with an industry data model		
5	DWH modernisation	Capacity or technology limits of the existing DWH; core banking migration		

COMMERCIAL FRAME — INTERNAL ONLY. This box, the customer names in it and the information on Digitallency are not written into the customer deck or the proposal.

Recurring value lies in C Run: the regulatory calendar is permanent and every regulation change is new work. The package opens data-governance, DWH Assessment, Data Platform Operations (aday-37) and Industry Data Models (aday-36).

The partnership model with Digitallency is open: delivery capacity / revenue share «FIELD». Digitallency is not named in the proposal or the customer deck.

Evidence: the Digitallency 2025 deck — Yapı Kredi (Legal Reporting), Vakıf Katılım (Legal Reporting), KKB (Basel II Validation). Most references date from 2012–2020; the year per reference is unknown («YEAR»). «DIGITALLENCY DOĞRULASIN»

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
P1	Full legal name of the institution and the short name used in the text; single institution or group with subsidiaries	
P2	Source of the operations need — the layer Komtaş built in B, the institution's own layer, or a layer taken over from another partner	
P2	Institution type — bank, participation bank or investment firm	
P3	Number of reports to operate — per family	
P3	Most frequent report — daily, weekly, monthly or quarterly; frequencies per family	
P3	Access to SMEs of the regulatory reporting unit (finance / risk) — contact for the review of DQ results and the interpretation of regulation changes	
P5	Number of active DQ rules; are their thresholds documented	
P7	Regulatory calendar — period-end dates, submission deadlines, peak periods	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the Assumptions and Out of Scope section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold.

The first row of P2 and the calendar row of P7 have a special place: without the source of the layer the scope cannot be written, and without the calendar the capacity cannot be written.

Blocking conditions and their effect on the proposal

#	CONDITION	EFFECT ON THE PROPOSAL	ACTION	STATUS
1	Layer not built by Komtaş	An onboarding review precedes C	Clarify the source in P2	
2	No access to regulatory reporting SMEs	DQ results and regulation changes cannot be interpreted	Clarify the contact and weekly hours in P3	
3	No access to the source systems	Load failures cannot be investigated	Clarify access with the customer	
4	No GL reconciliation possible	The monthly DQ report cannot show the reconciliation result	Clarify in P5	
5	Regulatory calendar not known	Capacity and period-end support cannot be written	Clarify in P7
