Regulatory Data Assessment

Technical and Commercial Proposal

Report inventory, source-to-report lineage, BCBS 239 gap assessment and target architecture of the regulatory reporting chain of «CUSTOMER»

Proposal No: KOMTAS-«CUSTOMER ABBREVIATION»-REG-A-«YEAR»-«SEQUENCE»

Proposal Date: «dd Month yyyy»

Validity: «proposal date + 1 month»

VARIABLE GLOSSARY — in this template only the fields inside « » change per customer. All other text is fixed.

Identity: «CUSTOMER» short customer name used in the text · «CUSTOMER NAME» full legal name (cover) · «GROUP COMPANIES» group companies in scope; delete the line for a single company · «CUSTOMER ABBREVIATION» short code in the proposal number · «YEAR» year (proposal number; year of a reference project) · «SEQUENCE» proposal sequence number · «dd Month yyyy» proposal date · «proposal date + 1 month» end of validity · «price validity date» latest start date for which the fees stay valid

Context: «CUSTOMER CONTEXT» one paragraph: institution type (bank, participation bank, investment firm), report families concerned, current reporting tools and platform, reason for the request · «TRIGGER» reason for the work (e.g. BDDK or TCMB finding, audit remark, new regulation or format change, manual Excel-based reporting, period-end delays, core banking migration)

Scope: «PLATFORM» platform of the regulatory data layer agreed with the customer (e.g. Informatica on the existing DWH on Teradata, Oracle or SQL Server, or a cloud platform) · «BAND» sizing band S, M or L from the proposal input form

Report families: «REPORT FAMILY — TCMB / BDDK» block of the TCMB / BDDK legal reports family; keep it only if this family is in scope · «REPORT FAMILY — IFRS 9» block of the IFRS 9 (TFRS 9) family; keep it only if this family is in scope · «REPORT FAMILY — BCBS 239 / PERDAR» block of the BCBS 239 / PERDAR family; keep it only if this family is in scope · «REPORT FAMILY — CREDIT RISK» block of the credit risk reporting family; keep it only if this family is in scope · «REPORT FAMILY — EBA» block of the optional EBA module (banks with an EU parent or EU subsidiary); keep it only if this module is in scope

Commercial: «OPTIONAL» item kept or deleted by sales; if kept, delete the marker · «fee» fee excl. VAT · «amount» payment amount excl. VAT · «day rate» person-day rate (change requests) · «CITY» city where on-site meetings are free of charge

Values: «NUMBER» numeric value (count, threshold, tolerance, days, weeks, months, hours) · «%» percentage

Annex: «REFERENCE PROJECT» further reference project approved for this proposal (no names without permission); otherwise delete the row · «RESULT» measured result of a reference project, only if measured and approved for use; otherwise delete the line

Contacts: «full name» contact name · «title» contact title · «e-mail / phone» contact details

Markers: the report family blocks are resolved as described in the first fill note. «OPTIONAL» items are kept or deleted by sales. The orange DIGITALLENCY DOĞRULASIN tags mark draft statements to be verified before use. FILL NOTE boxes are internal and are deleted before sending.

Contents

FILL NOTE — this template is for service A (Regulatory Data Assessment) of the Regulatory Reporting Data Layer package. The regulatory reporting chain of «CUSTOMER» is assessed; nothing is built. Service B is proposed on the basis of the results.

Report families: every heading, paragraph, bullet, table row and annex page starting with «REPORT FAMILY — TCMB / BDDK», «REPORT FAMILY — IFRS 9», «REPORT FAMILY — BCBS 239 / PERDAR», «REPORT FAMILY — CREDIT RISK» and «REPORT FAMILY — EBA» is kept only for the report families in scope of this proposal; the others are deleted. In the parts kept, only the marker is deleted. The EBA module is offered only to banks with an EU parent or an EU subsidiary.

Statements followed by the orange tag DIGITALLENCY DOĞRULASIN are draft assumptions of the package (durations, effort, band thresholds, data requirements, report lists, regulation references, scope items, roles, tool statements, acceptance criteria, references). They are verified before the template is used; after verification only the tag is deleted. No proposal is sent with a tag in it.

Order of completion: report families → sizing values and band from the proposal input form (Table 3) → priority reports for lineage (Section 2.3) → timeline (Section 4.2) → effort and fees (Section 9) → Annex 1 → Annex 2 → remaining « » fields. No commercial figures other than the fees in Section 9 are written into this proposal.

1. Purpose

«CUSTOMER CONTEXT»

The aim of this proposal is to establish how the regulatory and risk reports of «CUSTOMER» are produced today, from which source systems and through which manual steps, how far the reporting chain meets the BCBS 239 principles, and which common data layer would serve the reports in scope. The reason for the work is «TRIGGER».

The report families in scope of the assessment are:

- **«REPORT FAMILY — TCMB / BDDK» TCMB / BDDK legal reports:** prudential and statistical reports.
- **«REPORT FAMILY — IFRS 9» IFRS 9 (TFRS 9):** staging, ECL inputs, collateral and cash flows.
- **«REPORT FAMILY — BCBS 239 / PERDAR» BCBS 239 / PERDAR:** risk data aggregation and risk reporting principles; lineage and evidence of controls.
- **«REPORT FAMILY — CREDIT RISK» Credit risk reporting:** exposure, rating, collateral, limits and concentration.
- **«REPORT FAMILY — EBA» EBA reports (optional module):** reports for an EU parent or an EU subsidiary.

The package is offered as three services. This proposal covers service A.

Service	Focus	Result	Pricing
A — Regulatory Data Assessment	Report inventory, source-to-report lineage of priority reports, BCBS 239 gap assessment, target architecture; 4 to 8 weeks «DIGITALLENCY DOĞRULASIN»	Gap table, target architecture, roadmap and estimate for B	Fixed fee
B — Regulatory Data Layer	Common regulatory data layer, data demand layer per report family, DQ rules and validation, reconciliation, lineage, parallel run, handover	Report-ready datasets reconciled with the current reports	Common layer foundation once + fee per report family
C — Run	Period-end support, regulation changes from a monthly capacity, DQ monitoring report, small improvements	Data layer kept in line with the regulatory calendar and with changes	Monthly fee

Table 1 — Service structure. This proposal covers service A.

At the end of the work, «CUSTOMER» has an inventory of its regulatory reports, the lineage of the priority reports from source to report, a gap table against the BCBS 239 principles, a list of data quality (DQ) issues, a target architecture for a common regulatory data layer, and a roadmap and estimate for service B.

2. Scope

2.1 Scope Topics

The assessment covers the topics below. «DIGITALLENCY DOĞRULASIN»

#	Topic	Content
1	Report inventory	Reports in scope with frequency, owner, tool, source systems and manual steps
2	Source-to-report lineage	Lineage of the priority reports from the source systems through staging, transformations and manual steps to the report
3	BCBS 239 gap assessment	Status of the reporting chain per principle: Met, Partly met, Not met or Not assessed
4	DQ issues	DQ issues and missing controls found in the lineage work, with their impact on the reports
5	Target architecture	Common regulatory data layer, data demand layer per report family, DQ and validation, reconciliation, lineage, on «PLATFORM» or the options for it
6	Roadmap and estimate for B	Order of the report families, scope, effort and duration of service B

Table 2 — Scope topics.

2.2 Scope Size

Sizing Input	Value	Source
Regulatory and risk reports in scope	«NUMBER»	Statement of «CUSTOMER»
Source systems feeding the reports	«NUMBER»	Statement of «CUSTOMER»
Most frequent reporting cycle	Monthly / quarterly / weekly / daily	Statement of «CUSTOMER»
Existing DQ rules on the reporting data	«NUMBER»	Statement of «CUSTOMER»
Report families in scope	«NUMBER»	Statement of «CUSTOMER»

Table 3 — Values on which sizing is based. Band: «BAND». The values are statements and are checked in P1.

> *FILL NOTE — take the values and the band from the proposal input form (regulatory-reporting-3a-assessment-girdi-formu). Draft band drivers:*
>
> *Reports in scope: S ≤10 · M 11–40 · L >40. Source systems: S ≤5 · M 6–15 · L >15. Most frequent cycle: S monthly / quarterly · M weekly · L daily. DQ rules: S ≤150 · M 151–500 · L >500. Band rule: the highest band reached by at least three drivers; the number of report families is not a driver for service A.* «DIGITALLENCY DOĞRULASIN»

2.3 Priority Reports for Lineage

The lineage from source to report is drawn for «NUMBER» priority reports, selected in P1 together with the regulatory reporting unit of «CUSTOMER» (for example reports with findings or audit remarks, reports with many manual steps, reports with period-end delays). The other reports are covered by the inventory. «DIGITALLENCY DOĞRULASIN»

2.4 Boundaries to Other Services

- **Data Governance:** this package builds the reporting data, its DQ rules and its lineage. The enterprise governance framework (organisation, policies, business glossary, roles, data catalogue) is the subject of the Data Governance service; governance gaps found in the work are passed to it.
- **DWH Assessment:** evaluates the data platform as a whole. This package looks only at the regulatory reporting chain, from the source systems to the reports.
- **Report production tools and regulator submission software:** the tools that produce the report layouts and submit them to the regulator are not part of this package. An integration with such a tool is in scope only if an integration line is added in service B. «DIGITALLENCY DOĞRULASIN»

3. Approach

3.1 Reference Architecture

The assessment compares the current reporting chain with a reference architecture: source systems → staging → common regulatory data layer → data demand layer per report family → reporting tools and regulator formats. DQ rules and validation, reconciliation controls, lineage from source to report and an audit trail run across all layers. «DIGITALLENCY DOĞRULASIN»

The common regulatory data layer holds transactions, contracts and accounts, customers and counterparties, collateral and the GL in one harmonised, historised model reconciled to the GL. The data demand layer holds the report-ready datasets of each report family.

3.2 Report Inventory

In P1 every report in scope is recorded with the fields below: «DIGITALLENCY DOĞRULASIN»

- Report, report family and regulator (TCMB, BDDK, group or internal).
- Frequency, submission deadline and the time used today to produce the report.
- Owner in the regulatory reporting unit, finance or risk.
- Tool used to produce the report and the format of the submission.
- Source systems and manual steps (e.g. Excel files, manual adjustments, e-mails between units).
- Open findings or audit remarks on the report.

3.3 Lineage

For each priority report the lineage is drawn at the level of the critical data elements: source table and field, transformations, manual steps, the controls applied and the point where the figure enters the report. Gaps in the lineage (steps that cannot be traced) are recorded as findings.

3.4 BCBS 239 Gap Assessment

The gap assessment follows the principle groups of BCBS 239. Each principle receives one status: Met, Partly met, Not met or Not assessed, with the evidence on which it rests. «DIGITALLENCY DOĞRULASIN»

Principle Group	Principles	What the Assessment Measures	Evidence Expected
Governance and infrastructure	P1 – P2	Ownership of risk data, approval of the reporting chain, data architecture and IT infrastructure of the reporting data	Policies, owner list, architecture documents
Risk data aggregation	P3 – P6	Accuracy and integrity, completeness, timeliness and adaptability of the risk data	Reconciliations to the GL, DQ rule results, run times against deadlines, record of manual adjustments
Risk reporting	P7 – P11	Only the data that feeds the reports; the report layouts are not assessed	Lineage of the priority reports
Supervisory review	P12 – P14	Not assessed; mentioned only where findings of the supervisor exist	—

Table 4 — BCBS 239 principle groups in the assessment.

3.5 Target Architecture and Roadmap

In P4 the target architecture is drawn on «PLATFORM» or, if the platform is not yet chosen, for the options available to «CUSTOMER» (for example Informatica PowerCenter or IDMC with Informatica Data Quality on the existing DWH on Teradata, Oracle or SQL Server, or a cloud platform). The roadmap orders the report families by findings, deadlines and dependencies. «DIGITALLENCY DOĞRULASIN»

4. Activities and Timeline

4.1 Phases

The work is carried out in five phases. Each phase has a written exit criterion. «DIGITALLENCY DOĞRULASIN»

Phase	Activities	Exit Criterion
P0 Kick-off and access	Kick-off, report families, contacts, access to documents, tools and read-only access to the data	Scope, contacts and access agreed in writing
P1 Report inventory	Interviews with report owners, collection of report lists, tools and manual steps; selection of the priority reports	Report inventory accepted; priority reports agreed
P2 Source-to-report lineage	Lineage of the priority reports at the level of the critical data elements; DQ issues recorded	Lineage map and DQ issues list reviewed with the report owners
P3 BCBS 239 gap assessment	Status per principle with evidence (Table 4)	Gap table reviewed with the regulatory reporting unit
P4 Target architecture, roadmap and estimate	Target architecture, B scope, roadmap, estimate, results presentation	Results presented; deliverables handed over

Table 5 — Phases and exit criteria.

4.2 Timeline

FILL NOTE — the duration follows the band in Section 9. Draft distribution of the weeks for band M (6 weeks): P0 0.5 · P1 1.5 · P2 1.5 · P3 1.5 · P4 1 weeks. «DIGITALLENCY DOĞRULASIN»

Phase	Work Step	Weeks
P0	Kick-off and access	«NUMBER»
P1	Report inventory	«NUMBER»
P2	Source-to-report lineage	«NUMBER»
P3	BCBS 239 gap assessment	«NUMBER»
P4	Target architecture, roadmap and estimate	«NUMBER»
	Total	«NUMBER»

Table 6 — Distribution of the weeks. Band: «BAND».

The timeline applies provided the assumptions in Section 7 hold. Delays in access or in the availability of report owners move the timeline by the same amount.

5. Deliverables and Acceptance

5.1 Deliverables

Documents are delivered in Turkish, in editable format (Microsoft Word / Excel / PowerPoint) together with a PDF copy.

#	Deliverable	Phase	Content
D1	Report inventory	P1	Reports in scope with the fields in Section 3.2
D2	Lineage map	P2	Source-to-report lineage of the priority reports at the level of the critical data elements
D3	BCBS 239 gap table	P3	Status and evidence per principle; main gaps
D4	DQ issues list	P2 – P3	DQ issues and missing controls with their impact on the reports
D5	Target architecture	P4	Common regulatory data layer, data demand layer, DQ and validation, reconciliation, lineage, platform
D6	Roadmap and estimate for service B	P4	Order of the report families, scope, effort, duration and assumptions
D7	Results presentation	P4	Summary of D1 – D6 for management

Table 7 — Deliverables.

5.2 Acceptance

Deliverable	Acceptance Criterion
Report inventory	Every report named by «CUSTOMER» in P1 recorded with the fields in Section 3.2 «DIGITALLENCY DOĞRULASIN»
Lineage map	Lineage drawn for every priority report agreed in P1; untraceable steps listed as findings
BCBS 239 gap table	A status and its evidence given for every principle in Table 4 that is assessed
Target architecture, roadmap and estimate	Architecture, scope, effort and duration of service B given with the assumptions they rest on

Table 8 — Acceptance criteria.

Each deliverable is reviewed by «CUSTOMER» within «NUMBER» working days of delivery. If no written objection is received in that period, the deliverable is deemed accepted.

6. Customer Responsibilities

«CUSTOMER» is responsible for the items below. A delay in any of them moves the timeline by the same amount.

- Appoint a project coordinator in the regulatory reporting unit who is available throughout the work.
- Make the report owners, data owners and IT available for interviews and lineage sessions.
- Provide the report lists, report production documents and existing DQ controls within «NUMBER» working days from the start of P0.
- Provide read-only access to the staging and reporting databases and to the reporting tools where needed.
- Share the open findings and audit remarks on the reports in scope.

The participation expected from «CUSTOMER» is: «DIGITALLENCY DOĞRULASIN»

Role	Expected Contribution	Participation
Project sponsor	Approval of scope, results presentation	P0, P4
Regulatory reporting unit (finance / risk)	Report inventory, priority reports, interpretation of the regulations, review of the gap table	P0 – P4
Data owners	Meaning of the fields, source systems, known DQ issues	P1 – P3
IT	Access, data flows, technical documents, platform	P0 – P2, P4

Table 9 — Expected participation of «CUSTOMER». Total expected effort is «NUMBER» person-days.

7. Assumptions and Out of Scope

7.1 Assumptions

The duration, effort and fee in this proposal are based on the assumptions below. If they do not hold, the impact is assessed through a change request.

- The work starts within «NUMBER» working days of contract signature.
- The values in Table 3 have been stated by «CUSTOMER». If the inventory in P1 indicates a different band, duration and effort are reassessed at the end of P1. «DIGITALLENCY DOĞRULASIN»
- Access to the data is read-only. No change is made to the source systems, the DWH or the reporting tools.
- The work is carried out mainly remotely; the kick-off, the lineage sessions where needed and the results presentation are held on site in «CITY». «DIGITALLENCY DOĞRULASIN»
- The working language and the language of the deliverables is Turkish.

7.2 Out of Scope

The topics below are outside the scope of this proposal. If requested, they are assessed and proposed separately. «DIGITALLENCY DOĞRULASIN»

- Build of the common regulatory data layer and the data demand layer; this is the subject of service B.
- Cleansing of data in the source systems.

- Design of report layouts.
- Correspondence with the regulator.
- Legal interpretation of the regulations; the regulatory reporting unit of «CUSTOMER» decides.
- Changes to core systems.
- Assessment of the enterprise data governance framework (Data Governance service).

8. Team

8.1 Komtaş Team

Role	Responsibility	Participation
Engagement Lead / Regulatory Reporting Business Analyst	Plan, interviews, report inventory, BCBS 239 gap assessment, results	P0 – P4 «DIGITALLENCY DOĞRULASIN»
Data Architect	Lineage method, target architecture, roadmap and estimate for B	P2 – P4
Data Engineer	Analysis of data flows and ETL jobs, profiling of critical data elements	P2, part time

Table 10 — Komtaş team and roles.

- If a change in the team is needed, the replacement has at least equivalent qualifications and is notified to «CUSTOMER» in advance.

8.2 Governance

- Weekly progress meeting on access, open items and timeline.
- Review and written approval at the end of each phase.
- Any issue that affects the timeline or the scope is reported in writing in the week it is found.

8.3 Risks

Risk	Impact	Mitigation
Report owners or regulatory SMEs not available	Timeline, quality of the inventory	Session plan agreed in P0
No access to source data or ETL code	Lineage incomplete	Access plan in P0; untraceable steps recorded as findings
Regulatory change during the work	Scope of the target architecture	Known changes recorded in the roadmap
Stated scale differs from the inventory	Band, duration	Band confirmed at the end of P1

Table 11 — Risks.

Any request that affects the scope, the timeline or the fee is handled through a written change request. It is not carried out before its impact and fee are approved.

9. Effort and Fees

> *FILL NOTE — take the band, the duration and the effort from the proposal input form (regulatory-reporting-3a-assessment-girdi-formu). Fees are entered by sales. Draft values:*
>
> *Duration and Komtaş effort: S 4 weeks / ~30 pd · M 6 weeks / ~50 pd · L 8 weeks / ~75 pd.* «DIGITALLENCY DOĞRULASIN»
>
> *The values are not based on recorded effort. Delete this box before sending.*

Service A is offered at a fixed fee. The fee is based on the sizing values in Table 3 and the assumptions in Section 7.

Item	Effort (pd)	Fee (excl. VAT)
P0 — Kick-off and access	«NUMBER»	«fee»
P1 — Report inventory	«NUMBER»	«fee»
P2 — Source-to-report lineage	«NUMBER»	«fee»
P3 — BCBS 239 gap assessment	«NUMBER»	«fee»
P4 — Target architecture, roadmap and estimate	«NUMBER»	«fee»
Total	«NUMBER»	«fee»
Change requests	Per person-day	«day rate»

Table 12 — Fees. Band: «BAND». All fees exclude VAT.

Payment Item	Rate	Amount (excl. VAT)
Contract signature	«%»	«amount»
Acceptance of the deliverables (P4)	«%»	«amount»

Table 13 — Payment schedule. All fees exclude VAT.

The fee does not include:

- Build of the regulatory data layer (service B) and its operation (service C).
- Licence costs of tools and platforms.
- Travel and accommodation outside «CITY».
- Additional work approved through change requests.

10. Next Step

The results of the assessment are the basis of the next steps. The usual follow-on work is:

Need	Follow-On Work
Building the common regulatory data layer	Service B Regulatory Data Layer, based on the roadmap and estimate (D6)
Operating the data layer through the regulatory calendar	Service C Run: period-end support, regulation changes, DQ monitoring
Governance gaps found in the assessment	Data Governance
Assessment of the data platform as a whole	DWH Assessment

Table 14 — Follow-on work.

After the results presentation, service B is proposed on the basis of the target architecture and the roadmap of this assessment. The report families can be built one after the other on the same common regulatory data layer.

11. Commercial Terms

11.1 General Terms

- All fees in this proposal are stated in Turkish lira and exclude VAT. Statutory taxes, duties and charges are not included in the fees.
- The proposal is valid until «proposal date + 1 month».
- The fees are valid on condition that the work starts by «price validity date». If the start moves beyond that date for any reason, the fees and pricing terms are reassessed by mutual agreement in the light of the economic and financial conditions at the time of the work.
- This work is offered at a fixed fee, based on the sizing values in Table 3 and the assumptions in Section 7.
- «OPTIONAL» If the contract for service B is signed within «NUMBER» months of the acceptance of this work, the fee of this work is deducted from the fee of service B.

- The start date of the work is agreed with «CUSTOMER». All activities are carried out mainly online; on-site meetings take place within «CITY».
- The legal interpretation of the regulations remains with the regulatory reporting unit of «CUSTOMER»; Komtaş implements the interpretation agreed in writing.
- Payment follows the payment schedule in Section 9. Invoices are payable within «NUMBER» days of the invoice date.
- Scope changes are managed through a written change request; no change is implemented before its impact analysis is approved.
- The parties keep confidential all information they access within the scope of the work. A separate non-disclosure agreement is signed where needed.
- The rights of use of the deliverables, including data models, data flows, DQ rules and documentation, belong to «CUSTOMER»; Komtaş retains its intellectual property rights in its methodology, templates and general know-how.
- This proposal forms an integral annex to the contract to be signed by the parties. In the event of a conflict between the contract and the proposal, the contract prevails.

11.2 Proposal Contact Details

Questions on this proposal and its scope can be addressed to the contacts below.

Area of Responsibility	Full Name	Title	Contact
Commercial	«full name»	«title»	«e-mail / phone»
Technical	«full name»	«title»	«e-mail / phone»

11.3 Proposal Annexes

This proposal is submitted with the following annexes:

- ANNEX-1 — Report Family Pages
- ANNEX-2 — About Komtaş

ANNEX-1 — Report Family Pages

> *FILL NOTE — keep only the pages of the report families in scope and delete the family marker in their headings.*

The regulatory data layer serves five report families. All families use the same common regulatory data layer; each family has its own data demand layer with report-ready datasets. The page of each family in scope is given below: typical reports, source systems, critical data elements, typical DQ rules and frequency. The actual list is set in the report inventory of «CUSTOMER».

«REPORT FAMILY — TCMB / BDDK» TCMB / BDDK Legal Reports

Item	Description
Typical reports	Prudential reports to BDDK (e.g. capital adequacy, liquidity, large exposures, financial statements) and statistical reports to TCMB (e.g. balance sheet, interest rate, foreign exchange position); the reports referred to as VTM «DIGITALLENCY DOĞRULASIN»
Typical source systems	Core banking, loans, deposits, treasury, payments, general ledger (GL), customer master
Critical data elements	Balance, currency, maturity, interest rate, product type, counterparty type and sector, GL account
Typical DQ rules	Reconciliation of balances to the GL; mandatory fields filled; codes valid against the regulator code lists; consistency of the same figure across reports
Frequency	Daily, weekly, monthly or quarterly, as set by the regulator for each report

Table 15 — TCMB / BDDK legal reports family.

«REPORT FAMILY — IFRS 9» IFRS 9 (TFRS 9)

Item	Description
Typical reports	Staging (stage 1, 2, 3), inputs of the expected credit loss (ECL) calculation, collateral, contractual and expected cash flows, provisioning and disclosure datasets «DIGITALLENCY DOĞRULASIN»
Typical source systems	Loans, collateral, rating, core banking, GL, ECL or provisioning tool
Critical data elements	Exposure at reporting date, days past due, restructuring flag, rating at origination and at reporting date, PD, LGD, EAD inputs, collateral value and valuation date, cash flow schedule
Typical DQ rules	Fields of the staging criteria complete; days past due consistent with the payment history; collateral valuation not older than the agreed limit; ECL results reconciled to the provisions in the GL
Frequency	Monthly and quarterly

Table 16 — IFRS 9 (TFRS 9) family.

«REPORT FAMILY — BCBS 239 / PERDAR» BCBS 239 / PERDAR

Item	Description
Typical reports	Evidence for the risk data aggregation and risk reporting principles: lineage from source to report, DQ controls and their results, reconciliations, data ownership, timeliness of the risk data; PERDAR is treated as the BDDK counterpart of these principles «DIGITALLENCY DOĞRULASIN»
Typical source systems	All sources of risk data in scope, the common regulatory data layer, the risk and finance reports
Critical data elements	The critical data elements of the risk reports in scope, each with an owner, a definition and a source
Typical DQ rules	Completeness and accuracy checks per critical data element; reconciliation of risk data to the GL; timeliness of each run against the agreed deadline; record of every manual adjustment
Frequency	Every reporting period; evidence kept for supervisory review

Table 17 — BCBS 239 / PERDAR family.

«REPORT FAMILY — CREDIT RISK» Credit Risk Reporting

Item	Description
Typical reports	Exposure by customer, risk group, sector, product and rating; limits and their use; collateral coverage; concentration reports «DIGITALLENCY DOĞRULASIN»
Typical source systems	Loans, limits, rating, collateral, treasury, customer and risk group master data
Critical data elements	Exposure amount (cash and non-cash), limit, rating grade, collateral value, risk group, sector code, country
Typical DQ rules	Exposure not above the approved limit without a recorded exception; every customer assigned to one risk group; rating not past its validity date; collateral linked to an existing exposure
Frequency	Daily for limit monitoring; monthly for management and regulatory reports

Table 18 — Credit risk reporting family.

«REPORT FAMILY — EBA» EBA Reports (Optional Module)

Item	Description
Note	Optional module, offered only to banks with an EU parent or an EU subsidiary «DIGITALLENCY DOĞRULASIN»
Typical reports	Group reporting packages in the EBA formats (e.g. FINREP and COREP type templates) prepared for the EU parent or for the EU subsidiary
Typical source systems	The same sources as the TCMB / BDDK and credit risk families, plus the mapping to the group chart of accounts
Critical data elements	Group chart of accounts mapping, counterparty classification by the EU definitions, exposure class, capital items
Typical DQ rules	Mapping complete for every GL account in scope; consistency with the local reports of the same period; validation rules of the group format applied before submission
Frequency	Quarterly or as set by the group reporting calendar

Table 19 — EBA reports family (optional module).

ANNEX-2 — About Komtaş

> *FILL NOTE — the figures in Table 20 and in the bullets below come from the proposals of 2026. Check them against the current corporate profile before sending.*

Komtaş is an independent information technology company that has specialised in enterprise data management in Türkiye since 1989. More than 35 years of focus on a single field has given it an end-to-end view that follows data from the moment it is created to the moment a decision is taken.

Indicator	Value
Founded	1989 — more than 35 years of continuous data-focused activity
Specialist staff	250+ data engineers, architects, consultants and analysts
Offices	Istanbul, Ankara, Izmir, Dubai
Strategic partnerships	10+ global technology vendors
Focus area	Data governance, data architecture, analytics, artificial intelligence and AI agent based solutions
Positioning	"From Data to Agents" — integrated capability from data to AI agents

Table 20 — Komtaş corporate profile.

Service Capabilities

The service portfolio of Komtaş covers the whole life cycle of a data initiative:

- **Data Governance and Data Management:** data governance maturity assessment, framework and organisation design, policy and process design, data catalogue, business glossary, data quality management, master data management, data privacy and classification.
- **Data Architecture and Engineering:** data warehouse and data lake architectures, lakehouse design, data integration and streaming architectures, cloud and on-premises modernisation.
- **Analytics and Artificial Intelligence:** enterprise reporting, advanced analytics, machine learning models, generative AI applications and AI governance.
- **Managed Services and Support:** P1 / P2 / P3 support for production systems, capacity and performance management, continuous improvement services.
- **Training and Capability Building:** product training, role-based data governance training, train-the-trainer programmes.

Regulatory Reporting Experience

> *FILL NOTE — the references in Table 21 are anonymous. Do not add institution names, contact persons or result figures without written approval; «YEAR» is filled once the year of each project is confirmed, and «REFERENCE PROJECT» rows are deleted if there is no further approved reference.*

Regulatory reporting projects in the scope of this package are listed below. Reference calls can be arranged on request, subject to the approval of the institutions concerned. «DIGITALLENCY DOĞRULASIN»

Institution	Work	Report Families	Year
A private bank	Legal reporting data layer: one common data layer for IFRS 9, VTM, PERDAR, EBA and credit risk reporting	TCMB / BDDK, IFRS 9, BCBS 239 / PERDAR, credit risk, EBA	«YEAR»
A participation bank	Legal reporting data moved from the core banking platform to the enterprise data warehouse	TCMB / BDDK	«YEAR»
A credit bureau (validation of bank submissions)	Rule-based validation of the data sent by the banks; a submission above a 5% error threshold is returned to the bank; built with Informatica	Credit risk, DQ and validation	«YEAR»
«REFERENCE PROJECT»	«RESULT»		«YEAR»

Table 21 — Regulatory reporting references (anonymous).

Why Komtaş

- **Focus:** Komtaş has worked only in the data field for more than 35 years, with more than 250 specialists and 4 offices.
- **From assessment to operation:** assessment, build of the data layer and monthly operation are provided by the same organisation (Section 10).
