Regulatory Data Layer Run

Technical and Commercial Proposal

Period-end support, regulation changes, DQ monitoring and small improvements for the regulatory data layer of «CUSTOMER» from a monthly capacity

Proposal No: KOMTAS-«CUSTOMER ABBREVIATION»-REG-C-«YEAR»-«SEQUENCE»

Proposal Date: «dd Month yyyy»

Validity: «proposal date + 1 month»

VARIABLE GLOSSARY — in this template only the fields inside « » change per customer. All other text is fixed.

Identity: «CUSTOMER» short customer name used in the text · «CUSTOMER NAME» full legal name (cover) · «GROUP COMPANIES» group companies in scope; delete the line for a single company · «CUSTOMER ABBREVIATION» short code in the proposal number · «YEAR» year (proposal number; year of a reference project) · «SEQUENCE» proposal sequence number · «dd Month yyyy» proposal date · «proposal date + 1 month» end of validity · «price validity date» latest start date for which the fees stay valid

Context: «CUSTOMER CONTEXT» one paragraph: institution type (bank, participation bank, investment firm), report families concerned, current reporting tools and platform, reason for the request

Scope: «PLATFORM» platform of the regulatory data layer agreed with the customer (e.g. Informatica on the existing DWH on Teradata, Oracle or SQL Server, or a cloud platform) · «BAND» sizing band S, M or L from the proposal input form · «SUPPORT HOURS» support hours (e.g. weekdays 09:00–18:00 Türkiye time, extended on the agreed period-end days)

Report families: «REPORT FAMILY — TCMB / BDDK» block of the TCMB / BDDK legal reports family; keep it only if this family is in scope · «REPORT FAMILY — IFRS 9» block of the IFRS 9 (TFRS 9) family; keep it only if this family is in scope · «REPORT FAMILY — BCBS 239 / PERDAR» block of the BCBS 239 / PERDAR family; keep it only if this family is in scope · «REPORT FAMILY — CREDIT RISK» block of the credit risk reporting family; keep it only if this family is in scope · «REPORT FAMILY — EBA» block of the optional EBA module (banks with an EU parent or EU subsidiary); keep it only if this module is in scope

Commercial: «fee» fee excl. VAT · «monthly fee» monthly fee excl. VAT · «day rate» person-day rate (change requests) · «hour rate» hourly rate for work above the monthly capacity · «CITY» city where on-site meetings are free of charge

Values: «NUMBER» numeric value (count, threshold, tolerance, days, weeks, months, hours)

Annex: «REFERENCE PROJECT» further reference project approved for this proposal (no names without permission); otherwise delete the row · «RESULT» measured result of a reference project, only if measured and approved for use; otherwise delete the line

Contacts: «full name» contact name · «title» contact title · «e-mail / phone» contact details

Markers: the report family blocks are resolved as described in the first fill note. The orange DIGITALLENCY DOĞRULASIN tags mark draft statements to be verified before use. FILL NOTE boxes are internal and are deleted before sending.

Contents

FILL NOTE — this template is for service C (Run) of the Regulatory Reporting Data Layer package. It applies to a regulatory data layer that is in operation: built under service B or existing at «CUSTOMER». A data layer not built by Komtaş is taken over through the onboarding in Section 4.1.

Report families: every heading, paragraph, bullet, table row and annex page starting with «REPORT FAMILY — TCMB / BDDK», «REPORT FAMILY — IFRS 9», «REPORT FAMILY — BCBS 239 / PERDAR», «REPORT FAMILY — CREDIT RISK» and «REPORT FAMILY — EBA» is kept only for the report families in scope of this proposal; the others are deleted. In the parts kept, only the marker is deleted. The EBA module is offered only to banks with an EU parent or an EU subsidiary.

Statements followed by the orange tag DIGITALLENCY DOĞRULASIN are draft assumptions of the package (durations, effort, band thresholds, data requirements, report lists, regulation references, scope items, roles, tool statements, acceptance criteria, references). They are verified before the template is used; after verification only the tag is deleted. No proposal is sent with a tag in it.

Order of completion: report families → «PLATFORM» → Table 3 → capacity package (Table 8) → service levels (Table 4) → fees (Section 9) → Annex 1 → Annex 2 → remaining « » fields. No commercial figures other than the fees in Section 9 are written into this proposal.

1. Purpose

«CUSTOMER CONTEXT»

The aim of this proposal is to keep the regulatory data layer of «CUSTOMER» on «PLATFORM» in line with the regulatory calendar and with regulatory changes. The regulatory calendar is permanent and every regulation change is new work: new reports, new fields and new rules. Service C provides a monthly capacity for this work, support at period end and a monthly view of data quality.

The report families covered by the service are:

- «REPORT FAMILY — TCMB / BDDK» TCMB / BDDK legal reports.
- «REPORT FAMILY — IFRS 9» IFRS 9 (TFRS 9).
- «REPORT FAMILY — BCBS 239 / PERDAR» BCBS 239 / PERDAR.
- «REPORT FAMILY — CREDIT RISK» Credit risk reporting.
- «REPORT FAMILY — EBA» EBA reports (optional module).

2. Scope

2.1 Service Structure

Service	Focus	Result	Pricing
A — Regulatory Data Assessment	Report inventory, source-to-report lineage of priority reports, BCBS 239 gap assessment, target architecture; 4 to 8 weeks «DIGITALLENCY DOĞRULASIN»	Gap table, target architecture, roadmap and estimate for B	Fixed fee
B — Regulatory Data Layer	Common regulatory data layer, data demand layer per report family, DQ rules and validation, reconciliation, lineage, parallel run, handover	Report-ready datasets reconciled with the current reports	Common layer foundation once + fee per report family
C — Run	Period-end support, regulation changes from a monthly capacity, DQ monitoring report, small improvements	Data layer kept in line with the regulatory calendar and with changes	Monthly fee

Table 1 — Service structure. This proposal covers service C.

2.2 Services Included

The monthly service covers the items below. All items are delivered from the monthly capacity of hours in Table 8. «DIGITALLENCY DOĞRULASIN»

#	Service	Content
1	Regulatory calendar support	Support for the period-end runs of the data layer; follow-up of the loads and of the validation results before the submission deadlines
2	DQ result review	Review of the rule results with the regulatory reporting unit; analysis of breaches of thresholds; follow-up of returned records with the data owners
3	Regulation change implementation	New reports, new fields and new rules in the data layer and the data demand layer, within the monthly capacity
4	DQ monitoring report	Monthly report on rule results, trends, open returns and reconciliation results per report family
5	Small improvements	Performance of the loads, additional checks, updates of the lineage documentation
6	Incident support	Analysis and correction of failed loads and of data layer errors, within the service levels in Table 4

Table 2 — Services included in the monthly service.

2.3 Sizing Basis

Sizing Input	Value
Report families covered	«NUMBER»
Reports covered	«NUMBER»
Most frequent reporting cycle	Monthly / quarterly / weekly / daily
Active DQ rules	«NUMBER»
Regulation changes expected per year	«NUMBER»
Platform of the data layer	«PLATFORM»
Sizing band	«BAND»

Table 3 — Values on which sizing is based. Source: the proposal input form.

The band (S / M / L) is the highest band reached by at least three of the five drivers: reports (S ≤10 · M 11–40 · L >40), source systems (S ≤5 · M 6–15 · L >15), most frequent cycle (S monthly or quarterly · M weekly · L daily), DQ rules (S ≤150 · M 151–500 · L >500) and report families (S 1 · M 2–3 · L >3). The band sets the capacity package. «DIGITALLENCY DOĞRULASIN»

2.4 Boundaries to Other Services

- **Data Governance:** this package builds the reporting data, its DQ rules and its lineage. The enterprise governance framework (organisation, policies, business glossary, roles, data catalogue) is the subject of the Data Governance service; governance gaps found in the work are passed to it.
- **DWH Assessment:** evaluates the data platform as a whole. This package looks only at the regulatory reporting chain, from the source systems to the reports.
- **Report production tools and regulator submission software:** the tools that produce the report layouts and submit them to the regulator are not part of this package. An integration with such a tool is in scope only if an integration line is added in service B. «DIGITALLENCY DOĞRULASIN»
- **Service B and change requests:** a new report family, or a regulation change larger than the monthly capacity, is offered as a separate proposal (Section 9.4).

3. Approach

3.1 Monthly Cycle

The service follows the reporting calendar of «CUSTOMER». Each month has the same steps:

- **Planning:** at the start of the month, the period-end dates, the changes in progress and the use of the capacity are agreed with the regulatory reporting unit.
- **Period-end support:** loads and validation results are followed until the datasets are released for the reports.
- **Changes and improvements:** requests are carried out in the order agreed, outside the period-end days where possible.
- **Reporting:** at the end of the month, the DQ monitoring report and the use of the capacity are presented.

3.2 Regulation Changes

Each regulation change is recorded as a request with its source (regulation, circular, format change), effective date and the reports concerned. The regulatory reporting unit of «CUSTOMER» provides the interpretation; Komtaş estimates the hours, implements the change in the data layer, the data demand layer and the DQ rules, updates the lineage and supports the test with the regulatory reporting unit. «DIGITALLENCY DOĞRULASIN»

A change whose estimate exceeds the remaining capacity of the month is either spread over the following months or offered separately, as agreed with «CUSTOMER» before the work starts.

3.3 DQ Monitoring

The DQ monitoring report gives, per report family: the results of the rules and the breaches of thresholds, the records returned to the data owners and their status, the reconciliation results to the GL and between reports, and the trend over the last months. Recurring issues are passed to their owners with a proposed action.

3.4 Service Levels

Requests and incidents are handled during «SUPPORT HOURS» with the service levels below: «DIGITALLENCY DOĞRULASIN»

Priority	Definition	Response Time
P1 — Critical	A period-end run fails or a dataset cannot be released before a submission deadline	«NUMBER» hours
P2 — High	A load or a rule fails outside the period-end days; a report is at risk	«NUMBER» hours
P3 — Normal	Change requests, questions and improvements	«NUMBER» working days

Table 4 — Service levels.

4. Activities and Timeline

4.1 Onboarding

The service starts with an onboarding of «NUMBER» weeks: review of the data layer, the DQ rule catalogue, the lineage documentation and the period-end run book, access to the environments and agreement of the request process. If the data layer was not built by Komtaş, the findings of the review are reported with the actions needed before the service levels apply. «DIGITALLENCY DOĞRULASIN»

4.2 Monthly Activities and Timeline

Timing	Activity	Output
Start of month	Monthly planning with the regulatory reporting unit	Agreed list of requests and period-end dates
Period-end days	Support for the runs, review of the validation results	Datasets released for the reports
During the month	Regulation changes, small improvements, incident support	Changes delivered and tested
End of month	DQ monitoring report, use of the capacity	Monthly report

Table 5 — Monthly cycle.

The service runs for a minimum term of 12 months from the end of the onboarding and is renewed for periods of «NUMBER» months unless terminated with «NUMBER» months' notice. «DIGITALLENCY DOĞRULASIN»

5. Deliverables and Acceptance

5.1 Deliverables

#	Deliverable	Frequency	Content
D1	Onboarding report	Once	Findings of the review of the data layer and actions needed
D2	DQ monitoring report	Monthly	Content in Section 3.3
D3	Capacity report	Monthly	Hours used per request, open requests, plan for the next month
D4	Change records	Per change	Source of the change, objects changed, tests, updated lineage

Table 6 — Deliverables.

5.2 Acceptance

The monthly reports are reviewed by «CUSTOMER» within «NUMBER» working days. A change is accepted after it has been tested with the regulatory reporting unit; if no written objection is received within «NUMBER» working days of delivery, it is deemed accepted.

6. Customer Responsibilities

«CUSTOMER» is responsible for the items below.

- Appoint a service owner in the regulatory reporting unit as the single point for requests and priorities.
- Share the reporting calendar and the known regulation changes at least «NUMBER» working days before the month concerned.
- Provide the interpretation of each regulation change in writing.
- Provide access to the environments of the data layer and keep the licences of «PLATFORM» and of the tools valid.
- Correct data errors in the source systems returned by the validation engine.
- Test the changes with the regulatory reporting unit before they are used for a submission.

7. Assumptions and Out of Scope

7.1 Assumptions

- Unused hours are not carried over to the following month. «DIGITALLENCY DOĞRULASIN»
- Work above the monthly capacity is carried out only after written approval and is invoiced at «hour rate» per hour.
- The data layer, its documentation and the period-end run book are up to date at the start of the service, or are brought up to date in the onboarding.
- The service is delivered remotely with access to the environments of «CUSTOMER»; meetings can be held on site in «CITY».
- The working language and the language of the deliverables is Turkish.

7.2 Out of Scope

The topics below are outside the scope of this proposal. If requested, they are assessed and proposed separately. «DIGITALLENCY DOĞRULASIN»

- New report families and regulation changes larger than the monthly capacity (separate proposal).
- Cleansing of data in the source systems.
- Design of report layouts and production of the reports.
- Correspondence with the regulator.
- Legal interpretation of the regulations; the regulatory reporting unit of «CUSTOMER» decides.
- Changes to core systems.
- Operation of the infrastructure and of the database platform.

8. Team

8.1 Komtaş Team

Role	Responsibility	Participation
Run Lead	Monthly planning, priorities, regulation changes, DQ monitoring report	From the monthly capacity «DIGITALLENCY DOĞRULASIN»
Data Engineer	Period-end support, changes to data flows and DQ rules, incident support	From the monthly capacity

Table 7 — Komtaş team and roles.

- Further specialists (data architect, DQ engineer) are assigned from the same capacity when a request needs them.

8.2 Governance

- Monthly service meeting on the DQ monitoring report, the capacity report and the plan for the next month.
- Quarterly review with the sponsor on the regulatory changes expected and the capacity needed.

9. Effort and Fees

> *FILL NOTE — take the band and the capacity package from the proposal input form (regulatory-reporting-3c-run-girdi-formu). Fees are entered by sales. Draft values:*
>
> *Monthly capacity: S 40 hours · M 80 hours · L 160 hours. Minimum term 12 months.* «DIGITALLENCY DOĞRULASIN»
>
> *Delete this box before sending.*

9.1 Capacity Packages

Package	Hours per Month	Monthly Fee (excl. VAT)
S — up to 10 reports, one report family	«NUMBER»	«monthly fee»
M — 11 to 40 reports, two or three report families	«NUMBER»	«monthly fee»
L — more than 40 reports or more than three report families	«NUMBER»	«monthly fee»

Table 8 — Capacity packages. Selected package: «BAND». Keep only the row of the selected package.

9.2 Fees

Item	Basis	Fee (excl. VAT)
Onboarding	Once	«fee»
Monthly service, package «BAND»	Per month	«monthly fee»
Work above the monthly capacity	Per hour	«hour rate»

Table 9 — Fees. All fees exclude VAT.

9.3 Payment Schedule

The onboarding fee is invoiced at the end of the onboarding. The monthly fee is invoiced at the end of each month together with the capacity report. Work above the capacity is invoiced in the month in which it is carried out.

9.4 Larger Changes

A new report family or a regulation change larger than the monthly capacity is offered as a separate proposal on the basis of person-days × day rate («day rate», excl. VAT), or as an additional report family under service B.

9.5 Not Included in the Fee

- Licence and infrastructure costs of «PLATFORM» and of the tools used.
- Work above the monthly capacity unless approved in writing.
- Travel and accommodation outside «CITY».

10. Next Step

The monthly service shows where the data layer and the data around it need further work. The usual follow-on work is:

Need	Follow-On Work
A further report family	Service B: additional report family on the same common layer
Recurring DQ issues with unclear ownership	Data Governance
Operation of the whole data platform	Data Platform Operations
Industry data model for the bank	Industry Data Models
Modernisation of the DWH	DWH Assessment and DWH modernisation

Table 10 — Follow-on work.

The first step is the signature of this proposal and the start of the onboarding on a date agreed with «CUSTOMER», preferably outside a period-end.

11. Commercial Terms

11.1 General Terms

- All fees in this proposal are stated in Turkish lira and exclude VAT. Statutory taxes, duties and charges are not included in the fees.
- The proposal is valid until «proposal date + 1 month».
- The fees are valid on condition that the work starts by «price validity date». If the start moves beyond that date for any reason, the fees and pricing terms are reassessed by mutual agreement in the light of the economic and financial conditions at the time of the work.
- The monthly fee covers the capacity of the selected package; unused hours are not carried over (Section 7.1).
- The minimum term and the renewal follow Section 4.2. The package can be changed at the end of each quarter with «NUMBER» days' notice.
- The monthly fee is reviewed once a year on the anniversary of the start of the service, by mutual agreement.
- The legal interpretation of the regulations remains with the regulatory reporting unit of «CUSTOMER»; Komtaş implements the interpretation agreed in writing.
- Payment follows the payment schedule in Section 9. Invoices are payable within «NUMBER» days of the invoice date.
- Scope changes are managed through a written change request; no change is implemented before its impact analysis is approved.
- The parties keep confidential all information they access within the scope of the work. A separate non-disclosure agreement is signed where needed.
- The rights of use of the deliverables, including data models, data flows, DQ rules and documentation, belong to «CUSTOMER»; Komtaş retains its intellectual property rights in its methodology, templates and general know-how.
- This proposal forms an integral annex to the contract to be signed by the parties. In the event of a conflict between the contract and the proposal, the contract prevails.

11.2 Proposal Contact Details

Questions on this proposal and its scope can be addressed to the contacts below.

Area of Responsibility	Full Name	Title	Contact
Commercial	«full name»	«title»	«e-mail / phone»
Technical	«full name»	«title»	«e-mail / phone»

11.3 Proposal Annexes

This proposal is submitted with the following annexes:

- ANNEX-1 — Report Family Pages
- ANNEX-2 — About Komtaş

ANNEX-1 — Report Family Pages

> *FILL NOTE — keep only the pages of the report families covered by the service and delete the family marker in their headings.*

The regulatory data layer serves five report families. All families use the same common regulatory data layer; each family has its own data demand layer with report-ready datasets. The page of each family in scope is given below: typical reports, source systems, critical data elements, typical DQ rules and frequency. The actual list is set in the report inventory of «CUSTOMER».

«REPORT FAMILY — TCMB / BDDK» TCMB / BDDK Legal Reports

Item	Description
Typical reports	Prudential reports to BDDK (e.g. capital adequacy, liquidity, large exposures, financial statements) and statistical reports to TCMB (e.g. balance sheet, interest rate, foreign exchange position); the reports referred to as VTM «DIGITALLENCY DOĞRULASIN»
Typical source systems	Core banking, loans, deposits, treasury, payments, general ledger (GL), customer master
Critical data elements	Balance, currency, maturity, interest rate, product type, counterparty type and sector, GL account
Typical DQ rules	Reconciliation of balances to the GL; mandatory fields filled; codes valid against the regulator code lists; consistency of the same figure across reports
Frequency	Daily, weekly, monthly or quarterly, as set by the regulator for each report

Table 11 — TCMB / BDDK legal reports family.

«REPORT FAMILY — IFRS 9» IFRS 9 (TFRS 9)

Item	Description
Typical reports	Staging (stage 1, 2, 3), inputs of the expected credit loss (ECL) calculation, collateral, contractual and expected cash flows, provisioning and disclosure datasets «DIGITALLENCY DOĞRULASIN»
Typical source systems	Loans, collateral, rating, core banking, GL, ECL or provisioning tool
Critical data elements	Exposure at reporting date, days past due, restructuring flag, rating at origination and at reporting date, PD, LGD, EAD inputs, collateral value and valuation date, cash flow schedule
Typical DQ rules	Fields of the staging criteria complete; days past due consistent with the payment history; collateral valuation not older than the agreed limit; ECL results reconciled to the provisions in the GL
Frequency	Monthly and quarterly

Table 12 — IFRS 9 (TFRS 9) family.

«REPORT FAMILY — BCBS 239 / PERDAR» BCBS 239 / PERDAR

Item	Description
Typical reports	Evidence for the risk data aggregation and risk reporting principles: lineage from source to report, DQ controls and their results, reconciliations, data ownership, timeliness of the risk data; PERDAR is treated as the BDDK counterpart of these principles «DIGITALLENCY DOĞRULASIN»
Typical source systems	All sources of risk data in scope, the common regulatory data layer, the risk and finance reports
Critical data elements	The critical data elements of the risk reports in scope, each with an owner, a definition and a source
Typical DQ rules	Completeness and accuracy checks per critical data element; reconciliation of risk data to the GL; timeliness of each run against the agreed deadline; record of every manual adjustment
Frequency	Every reporting period; evidence kept for supervisory review

Table 13 — BCBS 239 / PERDAR family.

«REPORT FAMILY — CREDIT RISK» Credit Risk Reporting

Item	Description
Typical reports	Exposure by customer, risk group, sector, product and rating; limits and their use; collateral coverage; concentration reports «DIGITALLENCY DOĞRULASIN»
Typical source systems	Loans, limits, rating, collateral, treasury, customer and risk group master data
Critical data elements	Exposure amount (cash and non-cash), limit, rating grade, collateral value, risk group, sector code, country
Typical DQ rules	Exposure not above the approved limit without a recorded exception; every customer assigned to one risk group; rating not past its validity date; collateral linked to an existing exposure
Frequency	Daily for limit monitoring; monthly for management and regulatory reports

Table 14 — Credit risk reporting family.

«REPORT FAMILY — EBA» EBA Reports (Optional Module)

Item	Description
Note	Optional module, offered only to banks with an EU parent or an EU subsidiary «DIGITALLENCY DOĞRULASIN»
Typical reports	Group reporting packages in the EBA formats (e.g. FINREP and COREP type templates) prepared for the EU parent or for the EU subsidiary
Typical source systems	The same sources as the TCMB / BDDK and credit risk families, plus the mapping to the group chart of accounts
Critical data elements	Group chart of accounts mapping, counterparty classification by the EU definitions, exposure class, capital items
Typical DQ rules	Mapping complete for every GL account in scope; consistency with the local reports of the same period; validation rules of the group format applied before submission
Frequency	Quarterly or as set by the group reporting calendar

Table 15 — EBA reports family (optional module).

ANNEX-2 — About Komtaş

> *FILL NOTE — the figures in Table 16 and in the bullets below come from the proposals of 2026. Check them against the current corporate profile before sending.*

Komtaş is an independent information technology company that has specialised in enterprise data management in Türkiye since 1989. More than 35 years of focus on a single field has given it an end-to-end view that follows data from the moment it is created to the moment a decision is taken.

Indicator	Value
Founded	1989 — more than 35 years of continuous data-focused activity
Specialist staff	250+ data engineers, architects, consultants and analysts
Offices	Istanbul, Ankara, Izmir, Dubai
Strategic partnerships	10+ global technology vendors
Focus area	Data governance, data architecture, analytics, artificial intelligence and AI agent based solutions
Positioning	"From Data to Agents" — integrated capability from data to AI agents

Table 16 — Komtaş corporate profile.

Service Capabilities

The service portfolio of Komtaş covers the whole life cycle of a data initiative:

- **Data Governance and Data Management:** data governance maturity assessment, framework and organisation design, policy and process design, data catalogue, business glossary, data quality management, master data management, data privacy and classification.
- **Data Architecture and Engineering:** data warehouse and data lake architectures, lakehouse design, data integration and streaming architectures, cloud and on-premises modernisation.
- **Analytics and Artificial Intelligence:** enterprise reporting, advanced analytics, machine learning models, generative AI applications and AI governance.
- **Managed Services and Support:** P1 / P2 / P3 support for production systems, capacity and performance management, continuous improvement services.
- **Training and Capability Building:** product training, role-based data governance training, train-the-trainer programmes.

Regulatory Reporting Experience

FILL NOTE — the references in Table 17 are anonymous. Do not add institution names, contact persons or result figures without written approval; «YEAR» is filled once the year of each project is confirmed, and «REFERENCE PROJECT» rows are deleted if there is no further approved reference.

Regulatory reporting projects in the scope of this package are listed below. Reference calls can be arranged on request, subject to the approval of the institutions concerned. «DIGITALLENCY DOĞRULASIN»

Institution	Work	Report Families	Year
A private bank	Legal reporting data layer: one common data layer for IFRS 9, VTM, PERDAR, EBA and credit risk reporting	TCMB / BDDK, IFRS 9, BCBS 239 / PERDAR, credit risk, EBA	«YEAR»
A participation bank	Legal reporting data moved from the core banking platform to the enterprise data warehouse	TCMB / BDDK	«YEAR»
A credit bureau (validation of bank submissions)	Rule-based validation of the data sent by the banks; a submission above a 5% error threshold is returned to the bank; built with Informatica	Credit risk, DQ and validation	«YEAR»
«REFERENCE PROJECT»	«RESULT»		«YEAR»

Table 17 — Regulatory reporting references (anonymous).

Why Komtaş

- **Focus:** Komtaş has worked only in the data field for more than 35 years, with more than 250 specialists and 4 offices.
- **Continuity:** assessment, build of the data layer and monthly operation are provided by the same organisation (Section 10).
