AI GOVERNANCE READINESS ASSESSMENT — INTERNAL QUESTION SET

Komtaş internal working file. Not sent to the customer. The deduplicated questions from the 3a and 3b input forms (62 questions) are here; the SERVICE column shows which service the question is asked in. The minimum set needed for the proposal is on the Proposal Set sheet.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	A. Organisation and Proposal Details	BLOCKER	A · B	**Organisation and legal entities in scope — single company or group**	4a/4b · Cover, 1 «legal entities in scope»		Not answered		S1
2	A. Organisation and Proposal Details	Assumption	A · B	Proposal addressee — name, title, unit	4a/4b · Cover, 9.2		Not answered		Sales knows
3	A. Organisation and Proposal Details	Assumption	A · B	**Proposal date and expected decision date**	4a/4b · Cover, 9.1 validity		Not answered		Sales knows
4	A. Organisation and Proposal Details	BLOCKER	A · B	Is there an RFP or specification; if so, its number and response format	4a/4b · structure of the whole proposal, 2.4 source column		Not answered	Blocker in B; assumption in A	S1
5	A. Organisation and Proposal Details	Assumption	A · B	**Procurement process and approval steps**	4a/4b · 9.1		Not answered		S1
6	B. Decision	BLOCKER	A · B	Which decision will this assessment support — closing an audit finding, answering an EU customer questionnaire, KVKK preparation, informing the board, a new high-risk use, prioritising governance investment	4a/4b · 1 «DECISION», 2.1		Not answered	The output is not a maturity grade but a decision on which AI systems are under control and which gap is closed first	S2
7	B. Decision	BLOCKER	A	**Is the expected output the gate per system and a statement-based indicative result, or a level per dimension, a shadow AI search, a governance matrix and a closing plan**	Service selection — 4a or 4b; 4a · 2.2, 3.1		Not answered	Only in 3a; if the answer points to B, 3b is used	S2
8	B. Decision	BLOCKER	A · B	Does the customer expect a compliance statement, a conformity certificate or a legal opinion — if so, this service does not fit	Service selection; 4a/4b · 2.5, 3.1		Not answered	The assessment is not legal advice and produces no compliance statement; evidence is written in three states: evidence provided, partial evidence, no evidence produced. Risk classes are indicative until the organisation's legal / compliance unit confirms them	S2
9	B. Decision	Assumption	A · B	**Does the request actually come from a need to audit AI-generated code, or from data quality, catalogue or statistical model validation needs**	Service selection; 4a/4b · 2.5		Not answered	In the Service Selection Check table of 3a/3b. Code audit is the subject of a software audit, data quality and catalogue of data governance work, model validation of the organisation's model risk management	S2
10	B. Decision	Assumption	A · B	Is there a triggering document — audit report, customer questionnaire, board request; can it be shared	4a/4b · 1, 3.2 (P1 focus)		Not answered		In P0
11	B. Decision	Assumption	B	**How will success be measured — which outcome counts as "done"**	4b · 1		Not answered		In P0
12	C. Sponsor and Senior Management Access	BLOCKER	A · B	Who is the sponsor — can risk, compliance, the CDO, the CIO or an executive with decision authority be named	4a/4b · 7.3, 5.3		Not answered	The sponsor is the person who opens access to the business owners, technical owners and the legal, compliance and risk units; without a named sponsor the interviews do not get scheduled	S3
13	C. Sponsor and Senior Management Access	BLOCKER	A · B	**How will access to the senior management calendar and the AI committee be arranged — easy, medium, hard**	4a/4b · 6, 7.2; 4b · 2.4 «CALENDAR ACCESS» (driver 9)		Not answered	Blocker and band driver in B; assumption in A (in 3a asked as whether access to business owners and technical owners goes through the sponsor or is arranged one by one). Hard access cannot be offset by adding people	S3
14	C. Sponsor and Senior Management Access	Assumption	A · B	Is there an AI committee or governance board; who chairs it, how often does it meet, are decisions recorded	4a · 2.3 (gate item 4), 3.1; 4b · 2.3 (D3, D4)		Not answered	If there is no committee, this is a finding and does not stop the proposal; setting one up is follow-on work	S3
15	C. Sponsor and Senior Management Access	Assumption	A · B	**To whom will the result be presented — risk / compliance, senior management, the board, internal audit**	4a/4b · 1, 4 (P4 read-out)		Not answered		In P0
16	D. AI Systems and Inventory	BLOCKER	A · B	Is at least one AI system in use or planned for production — including AI features in vendor products	Service selection; 4a/4b · 2.2, 2.5		Not answered	If not, the right service is AI Readiness Assessment (separate service) and the work stops in P0. The two are not proposed at the same time	S2

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
17	D. AI Systems and Inventory	BLOCKER	A · B	**Names and number of the declared AI systems — in-house, vendor and embedded in products**	4a/4b · 2.4 «AI SYSTEMS», «N» (driver 1); 4a · 2.3; 4b · 3.3		Not answered	Dominant band driver; narrowing the scope by system is the most effective schedule lever. Each inventory record is one use: the same model used for two purposes is two records. Rows per system go into the 3a/3b worksheet. In A, with more than 20 systems the gate is applied first to high-risk and production systems and to a sample of the rest (assumption)	S4
18	D. AI Systems and Inventory	BLOCKER	A · B	Is an AI inventory kept; which fields does it have, where is it kept, who updates it	4a · 2.3 (gate item 1); 4b · 2.3 (D1), 5.2 — measurement evidence		Not answered	In B an inventory export, if shared, is measurement evidence. If there is no inventory, this is the first finding and does not stop the proposal; setting one up is follow-on work	S4
19	D. AI Systems and Inventory	Assumption	A · B	**Registered — can the inventory record and the business owner / technical owner assignment be shown**	4a · 2.3 (gate item 1); 4b · 2.3 (D1, D4), 3.3		Not answered	3a F item 1. Not in the proposal set: it is a gate item and the subject of the work; it is marked with evidence in P1. The role most often missing is the business owner	In P0
20	D. AI Systems and Inventory	Assumption	A · B	Are the systems classified by risk class — are purpose, affected decision and risk class with rationale written; who classified them	4a · 2.3 (gate item 2); 4b · 2.3 (D2), 3.3		Not answered	3a F item 2. Gate item; marked with evidence in P1. The risk class given by Komtaş is indicative; the organisation's legal / compliance unit confirms it	In P0
21	D. AI Systems and Inventory	Assumption	A · B	**Which systems are in production, and which feed decisions about customers or employees**	4a/4b · 3.2 (P1 focus), 5.1; 4b · 3.3		Not answered	Classification is done per use, not per model; high-risk and production systems are taken first at the gate	In P0
22	D. AI Systems and Inventory	Assumption	A · B	Are any systems, units or legal entities to be left out of scope	4a/4b · 2.5		Not answered		In P0
23	E. Scale and Interview Plan	BLOCKER	A · B	**Estimated number of people to interview and their distribution — business owner, technical owner, KVKK, legal, risk, information security, internal audit**	4a/4b · 2.4 «N» (driver 3), 6, 7.2		Not answered	Main schedule driver. For each system at least the business owner and the technical owner, and at organisation level the KVKK contact (DPO) and legal, are interviewed; the schedule is set by the time needed to reach the interviewees, not by access approval	S5
24	E. Scale and Interview Plan	Assumption	A · B	Number of business units using AI	4a/4b · 2.4 «N» (driver 2)		Not answered		S5
25	E. Scale and Interview Plan	Assumption	A	**Can interviews with business owners and technical owners be arranged**	4a · 7.2, 6		Not answered		In P0
26	E. Scale and Interview Plan	Assumption	A · B	Will the work be carried out remotely, on site or hybrid	4a/4b · 5.4 «remotely / on site / hybrid»		Not answered		In P0
27	E. Scale and Interview Plan	Assumption	A · B	**Is access to systems or data content needed**	4a/4b · 5.2		Not answered	Not asked in 3a or 3b; evidence is documents, records and interviews, and this is stated in the proposal. SaaS or network logs are used only in B and only if the organisation shares them	Stated in proposal
28	F. Dimension Scope and Prerequisite Gate	BLOCKER	B	Are all ten dimensions (D1–D10) in scope; is any dimension to be left out	4b · 2.3, «OUT-OF-SCOPE DIMENSION»		Not answered	The gate item fed by an excluded dimension stays statement-based only; this is written in the proposal as a constraint	S8
29	F. Dimension Scope and Prerequisite Gate	Assumption	B	**Is there a dimension that should be examined in particular depth**	4b · 3 (Methodology), 3.2 (P1 focus)		Not answered		In P0
30	F. Dimension Scope and Prerequisite Gate	BLOCKER	A	Can the five gate items (registered, classified, lawful data use, approved with a way back, monitored) be checked for each declared AI system through documents and interviews	4a · 2.3, 3, 5.2		Not answered	"No" does not stop the proposal; it is the first finding. An item that cannot be checked is reported as "Not assessed", never as met	S6

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
31	G. Shadow AI Search	BLOCKER	B	**Can a shadow AI search be made; which sources can be used — unit survey, procurement / expense / licence records, SaaS or network logs**	4b · 2.3 (D1), 3.2 (P1), 5.2		Not answered	The search is limited and evidence-based; it uses only the sources the organisation allows. Without permission the inventory stays limited to the declared systems, and this is written in the report as a constraint. A does not search for shadow AI	S9
32	G. Shadow AI Search	Assumption	B	Is there a rule or ban on general AI tools that employees can use	4b · 2.3 (D3)		Not answered		In P0
33	G. Shadow AI Search	Assumption	B	**In whose name and through which channel can the unit survey be sent**	4b · 6, 7.2		Not answered		In P0
34	H. Third-Party AI	BLOCKER	A · B	Number of third-party / vendor AI components — external model or API, AI feature embedded in a product, AI bought as a service	4a/4b · 2.4 «N» (driver 4); 4b · 2.3 (D9)		Not answered	Blocker in B; in A taken as a statement with S6, not verified	S10
35	H. Third-Party AI	Assumption	B	**Can vendor contracts and data processing annexes be shared**	4b · 2.3 (D9), 5.2; gate item 3		Not answered	If not, D9 and the contract part of gate item 3 stay statement-based. The provider's obligations do not remove the user's obligations	S10
36	H. Third-Party AI	Assumption	B	Is an AI-specific assessment or questionnaire used in procurement	4b · 2.3 (D9)		Not answered		In P0
37	I. Regulation and Legal / Compliance Participation	BLOCKER	B	**Degree of regulation — low, medium, high**	4b · 2.4 «REGULATION LEVEL» (driver 7), 2.3 (D10)		Not answered	Asked in 3b as one question together with the regulators. Regulatory dates are reconfirmed at proposal time	S11
38	I. Regulation and Legal / Compliance Participation	Assumption	A · B	Applicable regulators — KVKK, BDDK, SPK, Ministry of Health, TCMB, BTK, RTUK	4a/4b · 2.4 «N» (driver 5); 4b · 3.3 (regulatory scope)		Not answered	In A taken as a statement with S6, not verified	S11
39	I. Regulation and Legal / Compliance Participation	BLOCKER	A · B	**Will legal, compliance and the KVKK contact (DPO) take part; who will confirm the risk classes**	4b · 2.3 (D2, D6), 7.2; 4a · 7.2		Not answered	Blocker in B; assumption in A (in 3a asked as whether the DPO, legal, risk and information security can be interviewed). If they do not take part, D2, D6 and the confirmation of risk classes stay statement-based	S11
40	I. Regulation and Legal / Compliance Participation	Assumption	B	Are there customers or users in the EU, or systems whose output is used in the EU	4b · 3.3 (regulatory scope map), 5.1		Not answered	In A taken as a statement with the regulator question. Regulatory scope is written in three states: evidence provided, partial evidence, no evidence produced	S11
41	I. Regulation and Legal / Compliance Participation	Assumption	A · B	**Lawful data use — for systems that process personal data, is there a legal basis record, a DPIA where needed and a vendor contract review; can they be shared**	4a · 2.3 (gate item 3); 4b · 2.3 (D6), 3.3		Not answered	3a F item 3. Not in the proposal set: it is a gate item and the subject of the work; it is marked with evidence in P1. A system that processes personal data without a written legal basis cannot be Governed	In P0
42	J. Records and Documentation	BLOCKER	B	Documentation maturity — are the AI policy, role definitions, model / system cards and user notices written, partial or absent	4b · 2.4 «DOCUMENTATION STATUS» (driver 8), 2.3 (D3, D5), 5.2		Not answered	Without documents, evidence is produced from interviews in P1 and the number of interviews grows	S12
43	J. Records and Documentation	BLOCKER	A	**Can the AI inventory or system list, the AI policy, approval records and role definitions be shared**	4a · 3.2 (P1 evidence collection), 5.2		Not answered	Only in 3a. Without documents the related gate item stays statement-based and is marked as such in the result; in B the level is taken with the documentation maturity question	S7
44	J. Records and Documentation	Assumption	B	Can approval records be shared; is there a request that was rejected or sent back	4b · 2.3 (D3), 5.2 — measurement evidence; gate item 4		Not answered	The only evidence that a gate works is a rejected request. If not shared, D3 relies on statements and observation	S12
45	J. Records and Documentation	Assumption	B	**Can incident logs and monitoring dashboards be shared; has a rollback or switch-off ever been used**	4b · 2.3 (D8), 5.2 — measurement evidence; gate item 5		Not answered	If not shared, D8 relies on statements and observation	S12

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
46	J. Records and Documentation	Assumption	A · B	Approved with a way back — can the production approval, the human oversight point and the rollback / switch-off plan be shown	4a · 2.3 (gate item 4); 4b · 3.3		Not answered	3a F item 4. Not in the proposal set: it is a gate item; marked with evidence in P1. A system running in production without approval cannot be Governed	In P0
47	J. Records and Documentation	Assumption	A · B	**Monitored — can the tracked metric and threshold, the incident path and the periodic review date be shown**	4a · 2.3 (gate item 5); 4b · 3.3		Not answered	3a F item 5. Not in the proposal set: it is a gate item; marked with evidence in P1. A system that is not monitored counts as not in production	In P0
48	J. Records and Documentation	Assumption	B	Are there records of pre-deployment tests, bias analysis and acceptance criteria	4b · 2.3 (D7)		Not answered	The check is whether acceptance criteria were written in advance; validating the statistical accuracy of a model is out of scope	In P0
49	J. Records and Documentation	Assumption	B	**Is a GRC tool used for the inventory or the approval flow**	4b · 4, 5.1		Not answered	Not asked in 3a or 3b. Not a band driver; if unanswered, 5.1 states as an assumption that the governance matrix is delivered as a document and a spreadsheet	Assumption in proposal
50	K. Organisation, Risk and Internal Audit	Assumption	A · B	Number of legal entities or locations	4a/4b · 2.4 «N» (driver 6)		Not answered	In A written into 2.4 from the S1 answer	S13
51	K. Organisation, Risk and Internal Audit	Assumption	B	**Will risk management and internal audit take part**	4b · 2.3 (D4, D10), 7.2		Not answered	If they do not, the gate-role mapping in D4 and D10 (audit readiness) fall back to statements	S13
52	K. Organisation, Risk and Internal Audit	Assumption	B	In banking, is there a model risk management (MRM) unit; how will the boundary be drawn	4b · 2.5, 2.3 (D7)		Not answered	Model validation is the subject of MRM; the assessment only checks at which gate and under whose control the AI systems are	In P0
53	K. Organisation, Risk and Internal Audit	Assumption	B	**Will information security take part in the interviews**	4b · 2.3 (D8), 7.2		Not answered	Security testing and code audit are out of scope; security is covered only from the role and gate perspective	In P0
54	L. Target Levels and Priority Systems	Assumption	B	Which system is expected to be addressed first; why	4b · 1 (decision sentence), 3.3, 4		Not answered	The expected system is an input; the priority is set in P2 by risk class and evidence and may differ	In P0
55	L. Target Levels and Priority Systems	Assumption	B	**Is there an external date — audit, customer questionnaire, regulatory date**	4b · 1 (decision sentence), 6		Not answered		In P0
56	L. Target Levels and Priority Systems	Assumption	B	Can a target level (1–5) be set for each of the ten dimensions; who will set it	4b · 2.3, 5.3; P0 deliverable		Not answered	The target level is at organisation level; the answer per dimension goes in the table in 3b L. Gates scale with the risk class	In P0
57	M. Previous Work	Assumption	B	**Has an AI governance assessment or an AI-related audit been carried out before — yes, partial, no; what was the result**	4b · 2.4 «PREVIOUS ASSESSMENT» (driver 10), 5.1		Not answered	Asked in 3a section B as an assumption. A's evidence inventory is reused in B and not charged twice	S14
58	M. Previous Work	Assumption	B	Is ISO/IEC 42001 certification intended; is mapping to ISO/IEC 42001 or NIST AI RMF headings expected	4b · 3 (Methodology), 2.5, 5.1		Not answered	The two questions in 3b B and M are merged here. Findings are mapped to these headings where useful; no certification or compliance statement is given, and preparation support is follow-on work	S14
59	N. Commercial Framework	Assumption	A · B	**Is there an approved budget**	4a/4b · 8.1 «fee»		Not answered		Sales knows
60	N. Commercial Framework	Assumption	A · B	Schedule constraint — audit date, questionnaire deadline, board presentation, regulatory date	4a/4b · 6		Not answered		Sales knows
61	N. Commercial Framework	Assumption	A · B	**Are there competitors; who — consultancies, law firms, audit firms**	4a/4b · emphasis and section balance		Not answered		Sales knows
62	N. Commercial Framework	Assumption	A · B	Will B, inventory set-up, gate design and pilot, or policy and role model work also be discussed after the assessment	4a/4b · 2.5, follow-on proposal		Not answered		Sales knows

MINIMUM QUESTION SET FOR THE PROPOSAL — 14 QUESTIONS

When these fourteen questions are answered, selected by the SERVICE column, the proposal can be written: seven questions for A, twelve for B. Thirty-two of the sixty-two questions in the list are combined here; the remaining thirty stay in P0, on the sales side, or in the proposal as an assumption or statement.

#	BLOCK	SERVICE	QUESTION	WHY IT IS NEEDED	IF NO ANSWER	ANSWER	STATUS	QUESTIONS COVERED
S1	COMMON · DETAILS	A · B	**Which legal entities are in scope; is there an RFP or specification; how does the procurement process work?**	The cover, 1. Executive Summary and the 9.1 conditions are written from this. If there is an RFP, the proposal is structured accordingly. In A the number of legal entities or locations is written into 2.4 from here (driver 6).	**Proposal cannot be written**		Not answered	1, 4, 5, 50
S2	COMMON · DECISION	A · B	**Which decision or trigger starts the work (internal audit finding, supplier AI questionnaire from an EU customer, KVKK guides, board question on the AI systems in use, a new high-risk use); who will make the decision, and when? Is any AI system in use or planned for production; is a compliance statement or legal opinion expected; is the expected result the gate and an indicative governance status for the declared systems (A), or levels in ten dimensions, a shadow AI search, risk class and regulatory scope, a governance matrix and a closing plan (B)?**	Service selection depends on this answer. 1. Executive Summary «DECISION» and 2.1 Objective are written from it. If no AI system is in production or planned for production, the right service is AI Readiness Assessment (separate service); the two are not proposed at the same time. If a compliance statement, conformity certificate or legal opinion is expected, this service does not fit. If the request is an audit of AI-generated code or data quality, the right service is a software audit or data governance work.	**Service cannot be selected**		Not answered	6, 7, 8, 9, 16
S3	COMMON · SPONSOR	A · B	**Can the sponsor of the work (risk, compliance, CDO, CIO or a manager with decision-making authority) be named; is there an AI committee or governance board; is access to the senior management calendar and the AI committee easy, medium or hard?**	Without a sponsor the findings do not turn into a closing decision. The existence of a committee is the first indicator for gate item 4 (approval). Calendar access determines 6. Project Plan and 7.2 Expected participation; in B it is the 2.4 «CALENDAR ACCESS» row (driver 9).	Schedule cannot be given		Not answered	12, 13, 14
S4	COMMON · AI SYSTEMS	A · B	**Which AI systems are declared, and how many (in-house, vendor, embedded in products); is an AI inventory kept, where, and who updates it?**	The number of systems is the dominant band driver (driver 1); the 2.4 «AI SYSTEMS» and «N» rows are written from this. Each inventory record is one use. The existence of an inventory is the starting point for gate item 1 and D1; if there is none, this is the first finding and does not stop the proposal. If no AI system is in use or planned, the work stops in P0.	**Proposal cannot be written**		Not answered	17, 18
S5	COMMON · SCALE	A · B	**How many people will be interviewed, and how are they split (business owners, technical owners, data protection / KVKK contact, legal, risk, information security, internal audit); how many business units use AI?**	The two drivers that set schedule and effort in both services (2.4, drivers 2 and 3). Most evidence comes from interviews; the main schedule constraint is the time needed to reach the interviewees, and it cannot be shortened by adding people.	Band cannot be selected		Not answered	23, 24
S6	A · GATE	A	**Can the five gate items (registered, classified, lawful data use, approved with a way back, monitored) be checked for each declared AI system from documents and interviews? As a statement, how many third-party / vendor AI components are there, which regulators apply, and is there EU exposure?**	The 4a 2.3 prerequisite gate and drivers 4 and 5 in 2.4 are written from this. A's result is, per declared system, the gate, an indicative Governed / Partly governed / Not governed result and a provisional risk class, marked as statement-based. If a shadow AI search, dimension levels, a regulatory scope map or a closing plan are required, the right service is B.	Scope section cannot be written		Not answered	30, 34, 38, 40
S7	A · EVIDENCE	A	**Can the AI inventory or system list, the AI policy, approval records and role definitions be shared?**	A's evidence is documents and interviews; no system access is given and no measurement is committed. Without documents the gate items are marked on statements only and the number of "Not assessed" items grows; the schedule shifts to the number of interviews.	Schedule cannot be given		Not answered	43
S8	B · SCOPE	B	**Are all ten dimensions (D1–D10) in scope; is any dimension to be excluded?**	The 4b 2.3 Assessment Dimensions and the «OUT-OF-SCOPE DIMENSION» markers are filled in from this. The gate item fed by an excluded dimension stays statement-based only. Dimensions are not weighted; no single score is produced.	Scope section cannot be written		Not answered	28
S9	B · SHADOW AI	B	**Can a shadow AI search be made; which sources can be used (unit survey, procurement / expense / licence records, SaaS or network logs)?**	D1 and 3.2 P1 evidence collection are written from this. The search is limited and evidence-based; the allowed sources are written in 5.2. Without permission the inventory stays limited to the systems the organisation declares, this is stated in the report as a constraint and D1 stays statement-based. More search sources lengthen P1 and may push the L band up.	Scope section cannot be written		Not answered	31
S10	B · THIRD PARTY	B	**How many third-party / vendor AI components are there (external model or API, AI feature embedded in a product, AI bought as a service); can vendor contracts and data processing annexes be shared?**	Driver 4 in 2.4 and D9. If contracts are shared, D9 and the contract part of gate item 3 are placed with document evidence; otherwise they rely on statements. The provider's obligations do not remove the user's obligations.	Band cannot be selected		Not answered	34, 35
S11	B · REGULATION	B	**Is the degree of regulation low, medium or high; which regulators apply (KVKK, BDDK, SPK, Ministry of Health, TCMB, BTK, RTUK); is any system's output used in the EU? Will legal, compliance and the KVKK contact (DPO) take part; who will confirm the risk classes?**	The 2.4 «REGULATION LEVEL» row (driver 7), driver 5 in 2.4 and the 3.3 regulatory scope map. If legal and compliance do not take part, D2, D6 and the confirmation of risk classes stay statement-based. The assessment produces no legal opinion and no compliance statement; regulatory dates are reconfirmed at proposal time.	**Band cannot be selected**		Not answered	37, 38, 39, 40
S12	B · RECORDS	B	**Can approval, incident and monitoring records be shared; is there a rejected request? Are the AI policy, role definitions, model / system cards and user notices written, partial or absent?**	D3, D5 and D8 and the 2.4 «DOCUMENTATION STATUS» row (driver 8). If records are shared, D3 and D8 are placed with measurement evidence; the only evidence that a gate works is a rejected request. Without documents, evidence is produced from interviews in P1 and the number of interviews grows.	Band cannot be selected		Not answered	42, 44, 45
S13	B · ORGANISATION	B	**How many legal entities or locations are in scope; will the risk management and internal audit units take part?**	Driver 6 in 2.4 and 7.2 Expected participation. Without risk and internal audit, the gate-role mapping in D4 and D10 (audit readiness) fall back to statements.	**Schedule cannot be given**		Not answered	50, 51
S14	B · PREVIOUS	B	**Has an AI governance assessment or an AI-related audit been carried out before (yes, partial, no); is ISO/IEC 42001 certification intended, is mapping to ISO/IEC 42001 or NIST AI RMF headings expected?**	The 2.4 «PREVIOUS ASSESSMENT» row (driver 10). If A was done, its evidence inventory is reused in B and not charged twice. Audit findings set the P1 focus. Findings are mapped to ISO/IEC 42001 and NIST AI RMF headings where useful; no certification or compliance statement is given, and preparation support is follow-on work.	**Band cannot be selected**		Not answered	57, 58

NOTE

This package has no Mode A / Mode B access model: evidence is documents, records and interviews; Komtaş is given no access to systems or data content. In A the gate is applied only to the systems the organisation declares, on documents and interviews (S6, S7); no shadow AI search is made. In B, an AI inventory export, approval, incident and monitoring records, vendor contracts and, for the shadow AI search, a unit survey, procurement / licence records and SaaS or network logs are used as evidence if the organisation shares them (S9, S10, S12). All six band drivers of A and all ten of B are in the minimum set; in A the counts of third-party AI components and regulators are taken as statements with S6 and the legal entity count with S1. Business owner, risk class, legal basis, approval and monitoring are gate items, not proposal questions; they are marked with evidence in P1–P2. S1–S5 are common to both services. Not proposed at the same time as AI Readiness; if no AI system is in production or planned, the S2 answer routes to AI Readiness.

30 QUESTIONS OUTSIDE THE PROPOSAL SET

They were not deleted; when they are asked has been clarified. Some are never asked — they are written in the proposal as an assumption or statement.

WHEN	COUNT	RATIONALE
In P0	22	Triggering document, success criterion, who the result is presented to, production status of the systems and whether they feed decisions about customers or employees, out-of-scope systems and units, arranging business owner interviews (A), work location, dimension to be covered in depth, rule on general AI tools, channel for the unit survey, AI questionnaire in procurement, MRM boundary, participation of information security, the system to address first, external date, target level per dimension, test and acceptance criteria records, and the document questions for the five gate items (registered, classified, lawful data use, approved with a way back, monitored). Gate items are the subject of the work; they are marked with evidence in P1–P2, not at proposal stage. Asked when the document list is opened and the interview plan is made.
Sales knows	6	Proposal recipient, proposal date, budget, schedule constraint, competitor situation, B, inventory set-up, control gates and a pilot, policy and role model or ISO/IEC 42001 preparation after the assessment. The commercial framework is the responsibility of sales; it is taken from the CRM or the sales representative.
Assumption in proposal	1	GRC tool (B). Not a band driver; if unanswered, 5.1 states as an assumption that the governance matrix is delivered as a document and a spreadsheet, verified in P0. All band drivers (six in A, ten in B) are in the minimum set.
Stated in proposal	1	Access to systems and data content. This is to be stated, not asked: evidence is documents, records and interviews; 4a/4b 5.2 states that the assessment is carried out on these and needs no system access. In B, SaaS or network logs are used for the shadow AI search only if the organisation shares them.
Total	30	32 of the 62 questions were merged into the 14 questions of the Proposal Set; the remaining 30 were distributed across the four buckets above.

PROPOSAL READINESS STATUS

This sheet is calculated automatically. The decision on whether a proposal can be written is made separately for each service, based on the relevant questions on the Proposal Set sheet (SERVICE column).

MEASURE	A · AI GOVERNANCE CHECK	B · AI GOVERNANCE READINESS ASSESSMENT	DESCRIPTION
Number of proposal set questions	7	12	Common questions (S1–S5) and service-specific questions (A: S6–S7, B: S8–S14)
Answered	0	0	STATUS column on the Proposal Set sheet
Partially answered	0	0	Written as an assumption in the proposal
Missing	7	12	Unanswered proposal question
Completion	0%	0%	Answered / total
CAN THE PROPOSAL BE WRITTEN	**NO — 7 questions missing**	**NO — 12 questions missing**	YES if missing is zero
Service questions (Questions)	39	58	Questions carrying the relevant letter in the SERVICE column of the full list
Service questions — deferred to P0	11	21	Asked in the first week of the work
Questions in the whole form	62		Reference: full list of 62 questions (3a, 3b deduplicated)
Deferred to P0 (all)	22		Asked in the first week of the work

Rule: a service's proposal is not written until that service's proposal set is complete. If it must be written, each missing item is written into section 5 of the proposal as an assumption and it is stated that the scope will be reassessed if that assumption does not hold.

STATUS BY SECTION

SECTION	QUESTION	BLOCKER	ANSWERED	MISSING BLOCKER
A. Organisation and Proposal Details	5	2	0	2
B. Decision	6	3	0	3
C. Sponsor and Senior Management Access	4	2	0	2
D. AI Systems and Inventory	7	3	0	3
E. Scale and Interview Plan	5	1	0	1
F. Dimension Scope and Prerequisite Gate	3	2	0	2
G. Shadow AI Search	3	1	0	1
H. Third-Party AI	3	1	0	1
I. Regulation and Legal / Compliance Participation	5	2	0	2
J. Records and Documentation	8	2	0	2
K. Organisation, Risk and Internal Audit	4	0	0	0
L. Target Levels and Priority Systems	3	0	0	0
M. Previous Work	2	0	0	0
N. Commercial Framework	4	0	0	0
Total	**62**	**19**	**0**	**19**

TO BE SENT TO THE SAT OFFICE AFTER THE MEETING

Once these items arrive, the proposal text can be produced.

#	ITEM	SENT	NOTE
1	This completed form (with the answers from the customer form entered)	No	
2	Your meeting notes — raw is fine, do not try to tidy them	No	
3	RFP / specification file, if any	No	
4	AI inventory, AI policy, approval records, role definitions or vendor contracts shared by the organisation	No	
5	Service decision: A, B or both; names and number of the declared AI systems; if no AI system is in production or planned, routing to AI Readiness	No	
6	Pricing decision: which band (S / M / L); if A was done before, the evidence inventory reused in B	No	
7	Team decision: which consultants will be assigned (for table 7.1)	No	

HOW TO USE

TWO-FILE SET-UP

Sent to the customer	ai-governance-readiness-assessment-5-musteri-soru-seti-en.xlsx — twenty-one questions and an information note. The SERVICE column states which service each question is required for. Assessment dimensions, prerequisite items, target levels and methodology are not asked of the customer; Komtaş proposes them based on the answers.
This file (internal)	ai-governance-readiness-assessment-6-ic-soru-seti-en.xlsx — full list of 62 questions, the 14-question minimum set required for the proposal (by service: A 7, B 12) and those deferred to P0. Answers from the customer form are entered in this file and the proposal is written from here.
Minimum set logic	Thirty-two of the sixty-two questions have been merged into fourteen questions. S1–S5 are common to both services; S6–S7 belong only to A and S8–S14 only to B. Because the remaining thirty questions do not change the proposal, they have been left to the first week of the work (P0), to sales, or written in the proposal as an assumption or statement. Criterion: if doubling the number in the answer does not double the work, that question is not a proposal question.

SERVICE column	A · AI Governance Check, B · AI Governance Readiness Assessment. “A · B” marks a question asked in both services, “A” one asked only in the Governance Check and “B” one asked only in the Governance Readiness Assessment. Once the service to be proposed is known, only the questions carrying that letter are needed.
Fields to fill in	On the Questions sheet, only the ANSWER (G), STATUS (H) and NOTE (I) columns are filled in; on the Proposal Set sheet, ANSWER (G) and STATUS (H). Yellow cells show the fields to fill in. Pre-written short explanations in the NOTE column may be added to without deleting them.
Other sheets	Figures on the Summary, Section Breakdown and Remaining sheets are calculated automatically; do not change them by hand.
PRIORITY — BLOCKER	The proposal is not written until this question is answered; it cannot be filled with an assumption. The row stays red. For questions that are a blocker in one service and an assumption in another, the distinction is noted in the NOTE column.
PRIORITY — Assumption	If left unanswered, it is written into section 5 of the proposal as an assumption.
STATUS — Answered	A clear answer was received. The row turns green.
STATUS — Partial	An answer was received but it is incomplete or unclear. Written as an assumption in the proposal.
STATUS — Not answered	Not yet asked, or no answer received.

“We don’t know” as an answer	This is also an answer and is often the first finding. STATUS is marked “Partial” and it is written in the NOTE field.
Writing the proposal	When the “CAN THE PROPOSAL BE WRITTEN” row for a service on the Summary sheet is YES, filling in that service's proposal template begins: for A ai-governance-readiness-assessment-4a-governance-check-teklif-sablonu-en.docx, for B ai-governance-readiness-assessment-4b-governance-readiness-assessment-teklif-sablonu-en.docx.
WHERE IT FILLS IN THE PROPOSAL	Format is “4b · 2.4”: template (4a, 4b) and section number. “4a/4b · 7.2” refers to the same section in both templates. 2.3 is the prerequisite gate in 4a and Assessment Dimensions in 4b; 4b · 3.3 is the gate, the governance matrix and the regulatory scope. “driver N” is the row number of the band table in 3a and 3b (1–6 in A, 1–10 in B; the first six drivers are the same in both services).
Source	The questions were produced by deduplicating the files ai-governance-readiness-assessment-3a-governance-check-girdi-formu-en.docx and ai-governance-readiness-assessment-3b-governance-readiness-assessment-girdi-formu-en.docx; the SECTION column follows the sections of 3b (A–N), and questions found only in 3a are placed in the matching section (gate question in F, document access in J). Gate items apply per system: 1 (registered) and 2 (classified) are in D, 3 (lawful data use) in I, 4 (approved with a way back) and 5 (monitored) in J; the five item document questions in 3a F are placed in these rows. Dimension codes are D1–D10; the lifecycle gates (G1–G6) are not dimensions. The target level for B’s ten dimensions is collected in a single row; the per-dimension answer is written in the table in 3b. Dimensions are not weighted and no single score is produced. When a question’s text changes, both Excel files are updated.

EXAMPLE ROW

QUESTION	ANSWER / STATUS / NOTE
Names and number of the declared AI systems	“Call centre chatbot, credit pre-scoring and the vendor AI feature inside the CRM; no inventory” · Partial · “Credit pre-scoring is a high-risk candidate; taken first at the gate”
