AI & AGENTIC READINESS — INTERNAL QUESTION SET

Komtaş internal working file. Not sent to the customer. The deduplicated questions from the 3a and 3b input forms (92 questions) are here; the SECTION column shows the proposal sections (A–F, G–I) and the eight dimensions (D1–D8), and the SERVICE column shows which service the question is asked in. The minimum set needed for the proposal is on the Proposal Set sheet; the optional sector questions are on the Banking Annex and Insurance Annex sheets.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	A. Organisation and Proposal Details	BLOCKER	A · B	**Organisation and legal entities in scope — single company or group**	4a/4b · Cover, 1 «legal entities in scope»		Not answered		S1
2	A. Organisation and Proposal Details	Assumption	A · B	Proposal addressee — name, title, unit	4a/4b · Cover, 9.2		Not answered		Sales knows
3	A. Organisation and Proposal Details	Assumption	A · B	**Proposal date and expected decision date**	4a/4b · Cover, 9.1 validity		Not answered		Sales knows
4	A. Organisation and Proposal Details	BLOCKER	A · B	Is there an RFP or specification; if so, its number and response format	4a/4b · structure of the whole proposal, 2.4 source column		Not answered	Blocker in B; assumption in A	S1
5	A. Organisation and Proposal Details	Assumption	A · B	**Procurement process and approval steps**	4a/4b · 9.1		Not answered		S1
6	B. Decision	BLOCKER	A · B	Which decision will this assessment support — which use case to start and when, AI investment, budget justification, roadmap, current-state review before platform selection	4a/4b · 1 «DECISION», 2.1		Not answered	The output is not a maturity grade but a ready-to-start decision per use case	S2
7	B. Decision	BLOCKER	A	**Is the expected output the six-item prerequisite gate per use case and a statement-based indicative result, or an L1–L4 level in eight dimensions, a readiness matrix with earliest start and a closing plan**	Service selection — 4a or 4b; 4a · 2.2, 3.1		Not answered	Only in 3a; if the answer points to B, 3b is used	S2
8	B. Decision	Assumption	A · B	Has the AI investment decision been taken, or is it an option to be assessed	4a/4b · 1, 5.1		Not answered		S2
9	B. Decision	Assumption	A · B	**Are there PoCs or pilots that could not be taken into production so far; why did they stop**	4a/4b · 1, 3.2 (P1 focus); 4b · 2.3 (D1, D7), recurring pattern check		Not answered		In P0
10	B. Decision	Assumption	A · B	Has an AI initiative been tried before; what was the outcome	4a/4b · 5.1, 3.2 (P1 focus)		Not answered		In P0
11	B. Decision	Assumption	B	**How will the success of this work be measured — which outcome counts as "done"**	4b · 1		Not answered		In P0
12	C. Sponsor and Senior Management Access	BLOCKER	A · B	Who is the sponsor — can a CDO, CTO or a manager with decision-making authority be named	4a/4b · 7.3, 5.3		Not answered	The sponsor is the person who opens access to the use case owners and business units; without a named sponsor the interviews do not get scheduled	S3
13	C. Sponsor and Senior Management Access	BLOCKER	A · B	**How will access to the use case owners and the senior management calendar be arranged — easy, medium, hard**	4a/4b · 6, 7.2; 4b · 2.4 «CALENDAR ACCESS» (driver 9)		Not answered	Blocker and band driver in B; assumption in A (in 3a asked as whether access to owners is arranged through the sponsor or one by one). Hard access cannot be offset by adding people	S3
14	C. Sponsor and Senior Management Access	Assumption	A · B	Who will make the decision, and by what date	4a/4b · 6, 9.1 validity		Not answered		S2
15	C. Sponsor and Senior Management Access	Assumption	A · B	**Who will the result be presented to — the technical team or senior management**	4a/4b · 1, 4 (P4 read-out)		Not answered		In P0
16	D. Candidate Use Cases	BLOCKER	A · B	Names and number of the candidate use cases	4a/4b · 2.4 «USE CASES», «N» (driver 1); 4a · 2.3		Not answered	Dominant band driver; narrowing the scope by use case is the most effective schedule lever. The assessment does not generate use case ideas; it assesses existing candidates	S4
17	D. Candidate Use Cases	BLOCKER	A · B	**Does each candidate have an owner (name, unit) and a measurable expected outcome**	4a · 2.3 (gate items 1 and 3); 4b · 2.3 (D1); 5.1		Not answered	A missing owner is always Blocking and the candidate gets Not ready; if no candidate has a named owner, the work stops in P0. The item 1 document question in 3a F is also covered here	S4
18	D. Candidate Use Cases	Assumption	B	Is it known which data and which documents each candidate needs	4b · 2.3 (D1, D3), 3.3 (gate item 2)		Not answered		In P0
19	D. Candidate Use Cases	Assumption	A · B	**Which candidate has priority; who set the priority and by what method**	4a/4b · 3.2 (P1 focus); 4b · 2.3 (D1)		Not answered		In P0
20	D. Candidate Use Cases	Assumption	A · B	Are any use cases, units or legal entities to be excluded from scope	4a/4b · 2.5		Not answered		In P0
21	D. Candidate Use Cases	Assumption	A	**If no candidate has an owner, has a use case definition workshop been discussed**	4a · 2.5, follow-on proposal		Not answered	The workshop is separate work; the assessment is not turned into it	Sales knows

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
22	E. Scale and Interview Plan	BLOCKER	A · B	Estimated number of people to interview and their split by business unit — use case owner, data team, legal / compliance	4a/4b · 2.4 «N» (driver 3), 6, 7.2		Not answered	Main schedule driver. For each candidate at least the owner and the responsible data person are interviewed; the schedule is set by the time needed to reach the interviewees, not by access approval	S5
23	E. Scale and Interview Plan	Assumption	A · B	**Number of business units in scope**	4a/4b · 2.4 «N» (driver 2)		Not answered		S5
24	E. Scale and Interview Plan	Assumption	A · B	Number of legal entities or locations	4a/4b · 2.4 «N» (driver 6)		Not answered	In A written into 2.4 from the S1 answer	S13
25	E. Scale and Interview Plan	Assumption	B	**Will business unit representatives take part in the interviews**	4b · 2.3 (D2, D8), 7.2		Not answered	If they do not, D2 and D8 fall back to statements	S13
26	E. Scale and Interview Plan	Assumption	A	Can interviews with the use case owners and business unit representatives be arranged	4a · 7.2, 6		Not answered		In P0
27	E. Scale and Interview Plan	Assumption	A · B	**Can the data team, platform / IT, model risk and legal / compliance be interviewed; will they take part**	4a/4b · 7.2		Not answered		In P0
28	E. Scale and Interview Plan	Assumption	A · B	Will the engagement be run remotely, on site or hybrid	4a/4b · 5.4 «remotely / on site / hybrid»		Not answered		In P0
29	E. Scale and Interview Plan	Assumption	A · B	**Is access to systems or data content needed**	4a/4b · 5.2		Not answered	Not asked in 3a or 3b; evidence is documents, records and interviews, and this is stated in the proposal	Stated in proposal
30	F. Dimension Scope and Prerequisite Gate	BLOCKER	B	Are all eight dimensions (D1–D8) in scope; is any dimension to be excluded	4b · 2.3, «OUT-OF-SCOPE DIMENSION»		Not answered	The gate item fed by an excluded dimension stays statement-based only; this is written in the proposal as a constraint	S8
31	F. Dimension Scope and Prerequisite Gate	Assumption	B	**Is any dimension to be covered in more depth**	4b · 3 (Methodology), 3.2 (P1 focus)		Not answered		In P0
32	F. Dimension Scope and Prerequisite Gate	BLOCKER	A	Can the six gate items be checked for each candidate use case through documents and interviews	4a · 2.3, 3, 5.2		Not answered	"No" does not stop the proposal; it is the first finding. An item that cannot be checked is reported as "Not assessed", never as met. Each gap is classified Blocking or Manageable. Not met is always Blocking. Partly met / Not assessed is Blocking or Manageable on the evidence; a missing owner or missing legal basis is always Blocking. Any Blocking gap → Not ready. Only Manageable gaps → Conditional. No gap and no item left Not assessed → Ready to start	S6
33	F. Dimension Scope and Prerequisite Gate	BLOCKER	A	**Can the use case documents, AI policies, AI inventory and role definitions be shared**	4a · 3.2 (P1 evidence collection), 5.2		Not answered	Only in 3a. Without documents the related gate item stays statement-based and is marked as such in the result; in B the level is taken with the documentation maturity question	S7
34	D1 · Strategic & Business	BLOCKER	A · B	Does each candidate use case have an owner with a written assignment who can decide scope and acceptance	4a · 2.3 (gate item 3); 4b · 2.3 (D1, D8)		Not answered	Blocker in 3b; the item 3 document question in 3a. Not in the proposal set: it is a gate item and the subject of the work; candidates and owner names are taken with S4, and the assignment is verified in P1 against the written appointment	In P0
35	D1 · Strategic & Business	Assumption	B	**Is the problem bounded and specifically defined for each candidate; have a baseline and a success metric been set**	4b · 2.3 (D1), 3.3		Not answered	"Improve the process with AI" is not a problem statement; without a baseline the value of the pilot cannot be shown	In P0
36	D1 · Strategic & Business	Assumption	B	Can the expected value (revenue, risk, cost) be quantified approximately	4b · 2.3 (D1)		Not answered		In P0
37	D1 · Strategic & Business	Assumption	B	**Has it been assessed whether a conventional analytical, rules or workflow solution would be sufficient instead of AI / GenAI**	4b · 2.3 (D1), 4 (routing)		Not answered	If a conventional solution is sufficient, this is a finding; the use case may leave the AI scope	In P0

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
38	D1 · Strategic & Business	Assumption	B	Are expectations realistic — does the business understand the hallucination risk, the need for human review and iterative improvement	4b · 2.3 (D1, D8)		Not answered		In P0
39	D2 · Decision Process & Functional	BLOCKER	A · B	**For each candidate, are the system's role in the decision chain (Inform / Draft / Challenge / Recommend / Route-Execute), the outputs that require human review and who makes the decision defined**	4a · 2.3 (gate item 6); 4b · 2.3 (D2), 3.3		Not answered	Gate item 6. Not in the proposal set: it is the subject of the work and is marked with evidence in P1–P2. If undefined it is usually a Blocking gap; a Route-Execute role in a decision that affects a customer outcome needs separate justification	In P0
40	D2 · Decision Process & Functional	Assumption	B	Are decision rights written down — who relies on which output, for what purpose	4b · 2.3 (D2)		Not answered		In P0
41	D2 · Decision Process & Functional	Assumption	B	**Are human review checkpoints designed into the workflow; is override logging in place**	4b · 2.3 (D2, D6)		Not answered	Assumed review is not designed review	In P0
42	D2 · Decision Process & Functional	Assumption	B	Are exception, override and referral flows designed	4b · 2.3 (D2)		Not answered	Exception environments are the most valuable targets and need the most careful decision-rights design	In P0
43	D3 · Data & Knowledge	BLOCKER	A · B	**Can the data the candidate use cases need be accessed today — has access been granted or is a request needed; what is the typical access time**	4a · 2.3 (gate item 2); 4b · 2.3 (D3), 1 (earliest start)		Not answered	Blocker in B (S9). In A it is gate item 2; whether an access request record or sample data can be shown is asked with S6. A "we have that data" statement does not raise a level	S9
44	D3 · Data & Knowledge	Assumption	A · B	Number of data sources in scope	4a/4b · 2.4 «N» (driver 5)		Not answered	In A taken as a statement with S6, not verified	S9
45	D3 · Data & Knowledge	Assumption	B	**Is data quality measured; can the measurement result be shared**	4b · 2.3 (D3), 5.2 — measurement evidence		Not answered	The existence of quality measurement is assessed; in-depth quality measurement is out of scope	In P0
46	D3 · Data & Knowledge	Assumption	B	Have text sources (notes, reports, transcripts, complaints) been audited on a sample for completeness and specificity	4b · 2.3 (D3)		Not answered	Formulaic, sparse or inconsistent text is among the most common Blocking gaps	In P0
47	D3 · Data & Knowledge	Assumption	B	**Are policy and reference documents current and versioned; are superseded versions removed from the retrieval scope**	4b · 2.3 (D3, D6)		Not answered		In P0
48	D3 · Data & Knowledge	Assumption	B	When sources conflict, is it defined which one prevails (source authority hierarchy) and how the conflict is shown	4b · 2.3 (D3)		Not answered		In P0
49	D3 · Data & Knowledge	Assumption	B	**Has the need for multimodal evidence such as images, scanned forms, tables or audio recordings been identified**	4b · 2.3 (D3, D5)		Not answered		In P0
50	D3 · Data & Knowledge	Assumption	B	Is expert knowledge documented and findable; is there glossary, master data, ontology or semantic layer work	4b · 2.3 (D3), 4 (handovers to lower layers)		Not answered	If context is weak, the routing is to ontology / knowledge graph work (Context 360)	In P0
51	D4 · Analytical Grounding	Assumption	B	**Is there a central data platform — lakehouse, data warehouse or other; are model outputs fed from it**	4b · 2.3 (D4), 2.5		Not answered	The platform is covered only for its ability to feed the candidates; its own maturity is the subject of Lakehouse / DWH Assessment	In P0
52	D4 · Analytical Grounding	Assumption	B	Are model scores, risk signals and diagnostic outputs accessible as structured inputs at the time of use, with sufficient freshness and coverage	4b · 2.3 (D4)		Not answered	Without an analytical foundation the LLM layer produces fluent but unsupported text	In P0
53	D4 · Analytical Grounding	Assumption	B	**Do model outputs include contribution factors, reason codes or feature attribution**	4b · 2.3 (D4)		Not answered		In P0
54	D4 · Analytical Grounding	Assumption	B	Where evidence is thin (sparse data, low-frequency outcomes, policy exceptions), is it designed that this is stated explicitly and confidence is communicated	4b · 2.3 (D4)		Not answered		In P0
55	D4 · Analytical Grounding	Assumption	B	**Is the boundary between model outputs, which have their own governance, and the LLM interpretation of them clear in the architecture**	4b · 2.3 (D4, D5)		Not answered		In P0
56	D5 · Architecture, Technology & Integration	BLOCKER	A · B	Is the path to production defined — where does the model or agent run, who approves, who operates	4a · 2.3 (gate item 4); 4b · 2.3 (D5, D7)		Not answered	Blocker in B (S10). In A it is gate item 4; whether the path can be described in a document or interview is asked with S6. Without a path the pilot succeeds but never reaches production	S10

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
57	D5 · Architecture, Technology & Integration	Assumption	B	**Is an AI / ML platform or LLM provider in use today; in which environment**	4b · 2.3 (D5, D6)		Not answered	Product or platform selection is out of scope; the platform is covered only for its ability to serve and operate models and agents	S10
58	D5 · Architecture, Technology & Integration	Assumption	B	Is the model strategy known — hosted, private / on-prem, SLM, fine-tuning; is there a decision on third-party model approval and data residency	4b · 2.3 (D5, D6)		Not answered		In P0
59	D5 · Architecture, Technology & Integration	Assumption	B	**Is the architecture proportionate to the use case — is agentic orchestration proposed where a deterministic workflow would be sufficient**	4b · 2.3 (D5)		Not answered	"Complexity must be earned": knowledge graph, fine-tuning, multi-agent and persistent memory only when the use case requires them	In P0
60	D5 · Architecture, Technology & Integration	Assumption	B	Have the RAG design and retrieval quality (precision, recall) been tested, or is there a test plan	4b · 2.3 (D5, D7)		Not answered		In P0
61	D5 · Architecture, Technology & Integration	Assumption	B	**Are prompts kept as versioned, change-managed configuration**	4b · 2.3 (D5, D6)		Not answered		In P0
62	D5 · Architecture, Technology & Integration	Assumption	B	Are source system APIs available and can outputs be written back to the system of record; are dev / test / prod environments separated	4b · 2.3 (D5)		Not answered	APIs, identifier consistency and write-back are usually assumptions until verified	In P0
63	D5 · Architecture, Technology & Integration	Assumption	B	**Has a compute, GPU or API budget been allocated; can usage cost be tracked**	4b · 2.3 (D5), 5.1		Not answered		Assumption in proposal
64	D6 · Security, Governance & Control	BLOCKER	B	Degree of regulation — low, medium, high; which regulation, which authority	4b · 2.4 «REGULATION LEVEL» (driver 7), 2.3 (D6)		Not answered	The assessment does not produce a compliance statement; only authorised bodies can issue one	S12
65	D6 · Security, Governance & Control	BLOCKER	B	**Documentation maturity — are use case documents, AI policy, role definitions and architecture written, partial or absent**	4b · 2.4 «DOCUMENTATION STATUS» (driver 8), 5.2		Not answered	Without documents, evidence is produced from interviews in P1 and the number of interviews grows	S11
66	D6 · Security, Governance & Control	BLOCKER	A · B	Do the candidate use cases process personal data; if so, has the legal basis been determined	4a · 2.3 (gate item 5); 4b · 2.3 (D6), 3.3		Not answered	Blocker in 3b; the item 5 document question in 3a. Not in the proposal set: it is a gate item and the subject of the work; a missing legal basis is always Blocking; the candidate gets Not ready even if the other gate items are met. Legal participation is asked with S12	In P0
67	D6 · Security, Governance & Control	Assumption	B	**Is an AI inventory kept; are an approval mechanism and risk classification (risk tiering) defined**	4b · 2.3 (D6), 5.2 — measurement evidence		Not answered	D6 looks at the governance prerequisites of the use case; an organisation-wide in-depth assessment of AI governance is the subject of AI Governance Readiness Assessment (separate service)	S11
68	D6 · Security, Governance & Control	Assumption	B	Will the legal and compliance unit take part (KVKK, sector regulations)	4b · 2.3 (D6), 7.2		Not answered	If they do not, D6 and gate item 5 stay statement-based	S12
69	D6 · Security, Governance & Control	Assumption	B	**Has model risk management (MRM) been extended to cover generative systems**	4b · 2.3 (D6, D7)		Not answered		In P0
70	D6 · Security, Governance & Control	Assumption	B	Are guardrail layers (retrieval scope, system prompt hardening, input sanitisation, citation, output scope) designed; is prompt injection tested	4b · 2.3 (D6)		Not answered		In P0
71	D6 · Security, Governance & Control	Assumption	B	**Are there change control and audit logging for prompts, retrieval, knowledge base and model versions**	4b · 2.3 (D6)		Not answered		In P0
72	D6 · Security, Governance & Control	Assumption	B	Has third-party model provider risk (data access, contract, version change notification) been assessed	4b · 2.3 (D6)		Not answered		In P0
73	D7 · Operating Model, Validation & Lifecycle	Assumption	A · B	**How many AI systems run in production — model, agent, LLM-based application**	4a/4b · 2.4 «N» (driver 4); 4b · 2.3 (D7)		Not answered	In A taken as a statement with S6, not verified	S10
74	D7 · Operating Model, Validation & Lifecycle	Assumption	B	Are ownership roles assigned — product, technical, content, validation, business and governance owner	4b · 2.3 (D7)		Not answered	If the system is left without an owner when the PoC team moves on, there is no operating model	In P0
75	D7 · Operating Model, Validation & Lifecycle	Assumption	B	**Does an evaluation corpus exist, is it planned or is it missing — representative cases, expert-annotated expected outputs, maintenance plan**	4b · 2.3 (D7), 3.3		Not answered	Assessed, not built. It is a prerequisite before a pilot; if missing it is reported as a Blocking gap for the pilot	In P0
76	D7 · Operating Model, Validation & Lifecycle	Assumption	B	Is a validation approach for generative outputs defined — retrieval, grounding, completeness, consistency, business harm modes, usefulness	4b · 2.3 (D7, D6)		Not answered		In P0

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
77	D7 · Operating Model, Validation & Lifecycle	Assumption	B	**Is there a defined process for model development, testing, deployment and monitoring (performance, drift, cost) (MLOps)**	4b · 2.3 (D7)		Not answered		In P0
78	D7 · Operating Model, Validation & Lifecycle	Assumption	B	Is the feedback loop governed — are override reasons logged and are changes made only after approval and testing	4b · 2.3 (D7)		Not answered	Feedback changing the system directly and feedback never being used are both risks	In P0
79	D8 · People, Adoption & Change	Assumption	B	**Is there an AI or data science team; how many people; how much external dependency**	4b · 2.3 (D8)		Not answered		In P0
80	D8 · People, Adoption & Change	Assumption	B	Are subject matter experts (SMEs) involved as design partners — quality criteria, evaluation corpus annotation, testing	4b · 2.3 (D8, D7)		Not answered		In P0
81	D8 · People, Adoption & Change	Assumption	B	**Have trust calibration training with failure examples and workflow design against automation bias been considered for users**	4b · 2.3 (D8, D2)		Not answered	A user who accepts outputs without scrutiny provides no governance protection	In P0
82	D8 · People, Adoption & Change	Assumption	B	Is there a change management or training structure; is leadership aligned across the relevant functions (business, risk, IT, legal)	4b · 2.3 (D8)		Not answered		In P0
83	G. Target Levels and Start Dates	Assumption	B	**Which use case is expected to start first; why**	4b · 3.3 (P2 readiness matrix), 4, 5.3		Not answered	The expected use case is an input; the earliest start is set with evidence in P2 and may differ	In P0
84	G. Target Levels and Start Dates	Assumption	B	Target start date for this use case	4b · 1 (decision sentence), 6		Not answered		In P0
85	G. Target Levels and Start Dates	Assumption	B	**Can a target level (L1–L4) be set for each of the eight dimensions; who will set it**	4b · 2.3, 5.3; P0 deliverable		Not answered	The answer per dimension goes in the table in 3b. For a first pilot, L2 Pilot Ready is the target in most dimensions; for the move to production, L3 Production Ready. Closing plan steps are tied to the phase gates: Approve development → Launch controlled pilot → Transition to production → Scale to adjacent use cases	In P0
86	G. Target Levels and Start Dates	Assumption	B	Will the target level differ by use case	4b · 5.3; P0 deliverable		Not answered		In P0
87	H. Previous Work	Assumption	B	**Has an AI, data or readiness assessment been done before — yes, partial, no**	4b · 2.4 «PREVIOUS ASSESSMENT» (driver 10), 5.1		Not answered	A's evidence inventory is reused in B and not charged twice	S14
88	H. Previous Work	Assumption	B	How many pilots have been started so far, how many reached production; are records kept	4b · 2.3 (D7), 5.2 — measurement evidence		Not answered	This is the measure of the PoC graveyard pattern; if records are shared, they are used as measurement evidence	S14
89	I. Commercial Framework	Assumption	A · B	**Is there an approved budget**	4a/4b · 8.1 «fee»		Not answered		Sales knows
90	I. Commercial Framework	Assumption	A · B	Schedule constraint — budget period, management presentation, regulatory deadline	4a/4b · 6		Not answered		Sales knows
91	I. Commercial Framework	Assumption	A · B	**Are there competitors, and who**	4a/4b · emphasis and section weights		Not answered		Sales knows
92	I. Commercial Framework	Assumption	A · B	Will B, a Grounded Intelligence pilot or data foundation work also be discussed after the assessment	4a/4b · 2.5, follow-on proposal		Not answered	For a use case that passes the gate, the default next step is a Grounded Intelligence pilot	Sales knows

MINIMUM QUESTION SET FOR THE PROPOSAL — 14 QUESTIONS

When these fourteen questions are answered, selected by the SERVICE column, the proposal can be written: seven questions for A, twelve for B. Twenty-nine of the ninety-two questions in the list are combined here; the remaining sixty-three stay in P0, on the sales side, or in the proposal as an assumption or statement.

#	BLOCK	SERVICE	QUESTION	WHY IT IS NEEDED	IF NO ANSWER	ANSWER	STATUS	QUESTIONS COVERED
S1	COMMON · DETAILS	A · B	**Which legal entities are in scope; is there an RFP or specification; how does the procurement process work?**	The cover, 1. Executive Summary and the 9.1 conditions are written from this. If there is an RFP, the proposal is structured accordingly. In A the number of legal entities is written into 2.4 from here (driver 6).	**Proposal cannot be written**		Not answered	1, 4, 5, 24
S2	COMMON · DECISION	A · B	**Which decision will the engagement support (which use case to start and when, AI investment, budget justification, roadmap, preparation before platform selection); who will make the decision, and when? Is the expected result the six-item prerequisite gate per use case with an indicative ready-to-start result (A), or current and target level (L1–L4) in eight dimensions (D1–D8) with a readiness matrix showing the earliest start and a prerequisite closing plan that separates Blocking and Manageable gaps (B)?**	Service selection depends on this answer. 1. Executive Summary «DECISION» and 2.1 Objective are written from it; the decision date determines the schedule and proposal validity. Without an answer the work reads as an "AI opportunities presentation" and the fee cannot be justified.	**Service cannot be selected**		Not answered	6, 7, 8, 14
S3	COMMON · SPONSOR	A · B	**Can the sponsor of the work (CDO, CTO or a manager with decision-making authority) be named; is access to the use case owners and the senior management calendar easy, medium or hard?**	Without a sponsor the ready-to-start result does not turn into a decision. Calendar access determines 6. Project Plan and 7.2 Expected participation; in B it is the 2.4 «CALENDAR ACCESS» row (driver 9).	Schedule cannot be given		Not answered	12, 13
S4	COMMON · USE CASE	A · B	**Which candidate use cases are there, and how many; does each candidate have an owner (name, unit) and a measurable expected outcome?**	The number of candidates is the dominant band driver (driver 1); the 2.4 «USE CASES» and «N» rows are written from this. Definition and owner are gate items 1 and 3. If no candidate has a named owner, there is nothing to assess: the work stops in P0; a use case definition workshop is separate work and is discussed as a follow-on proposal.	**Proposal cannot be written**		Not answered	16, 17
S5	COMMON · SCALE	A · B	**How many people will be interviewed, and how are they split by business unit (use case owner, data team, legal / compliance); how many business units are in scope?**	The two drivers that set schedule and effort in both services (2.4, drivers 2 and 3). Most evidence comes from interviews; the main schedule constraint is the time needed to reach the interviewees, and it cannot be shortened by adding people.	Band cannot be selected		Not answered	22, 23
S6	A · GATE	A	**Can the six prerequisite items (defined use case, real data access, owner who can make decisions, path to production, legal basis, decision role and autonomy boundary) be checked for each candidate use case from documents and interviews? As a statement, how many AI systems are in production, and how many data sources do the candidates need?**	The 4a 2.3 prerequisite gate and drivers 4 and 5 in 2.4 are written from this. A's result is the gate and an indicative ready-to-start result per use case, marked as statement-based. Not met is always Blocking. Partly met / Not assessed is Blocking or Manageable on the evidence; a missing owner or missing legal basis is always Blocking. Any Blocking gap → Not ready. Only Manageable gaps → Conditional. No gap and no item left Not assessed → Ready to start. If dimension levels, the earliest start or a closing plan are required, the right service is B.	Scope section cannot be written		Not answered	32, 44, 73
S7	A · EVIDENCE	A	**Can the use case documents, AI policies, AI inventory and role definitions be shared?**	A's evidence is documents and interviews; no system access is given and no measurement is committed. Without documents the gate items are marked on statements only and the number of "Not assessed" items grows; the schedule shifts to the number of interviews.	Schedule cannot be given		Not answered	33
S8	B · SCOPE	B	**Are all eight dimensions (D1–D8) in scope; is any dimension to be excluded?**	The 4b 2.3 Assessment Dimensions and the «OUT-OF-SCOPE DIMENSION» markers are filled in from this. The gate item fed by an excluded dimension stays statement-based only. D6 looks at the governance prerequisites of the use case (inventory, approval, risk classification, guardrails, change control); an organisation-wide in-depth assessment of AI governance is a separate service.	Scope section cannot be written		Not answered	30
S9	B · DATA	B	**How many data sources are in scope; can the data the candidate use cases need be accessed today — has access been granted or is a request needed; what is the typical access time?**	Driver 5 in 2.4 and gate item 2 (real data access). If access request records are shared, D3 is placed with measurement evidence; otherwise it relies on statements and observation. Access time directly sets the earliest start date; a "we have that data" statement does not raise a level.	Band cannot be selected		Not answered	43, 44
S10	B · PLATFORM	B	**Is the path to production defined — where does the model or agent run, who approves, who operates; how many AI systems run in production; which AI / ML platform or LLM provider is used?**	Driver 4 in 2.4 and gate item 4 (path to production); D5 and D7 start from this answer. The platform is covered only for its ability to serve and operate models and agents; no product is selected; the maturity of the data platform itself is the subject of Lakehouse / DWH Assessment (2.5).	Band cannot be selected		Not answered	56, 57, 73
S11	B · GOVERNANCE	B	**Is an AI inventory kept; are an approval mechanism and risk classification defined? Are use case documents, AI policy, role definitions and architecture written, partial or absent?**	Dimension D6 and the 2.4 «DOCUMENTATION STATUS» row (driver 8). If inventory records are shared, D6 is placed with measurement evidence. Without documents, evidence is produced from interviews in P1 and the number of interviews grows.	**Band cannot be selected**		Not answered	65, 67
S12	B · REGULATION	B	**Is the degree of regulation low, medium or high; which regulation, which authority? Will the legal and compliance unit (KVKK, sector regulations) take part?**	The 2.4 «REGULATION LEVEL» row (driver 7) and gate item 5 (legal basis). If legal and compliance do not take part, D6 and gate item 5 stay statement-based; a candidate that processes personal data cannot then get Ready to start. The assessment does not produce a compliance statement.	Band cannot be selected		Not answered	64, 68
S13	B · ORGANISATION	B	**How many legal entities or locations are in scope; will business unit representatives take part in the interviews?**	Driver 6 in 2.4 and 7.2 Expected participation. Without business unit representatives, D2 (Decision Process & Functional Readiness) and D8 (People, Adoption & Change Readiness) fall back to statements.	**Schedule cannot be given**		Not answered	24, 25
S14	B · PREVIOUS	B	**Has an AI, data or readiness assessment been done before; how many pilots have been started so far, how many reached production, and are records kept?**	The 2.4 «PREVIOUS ASSESSMENT» row (driver 10). If A was done, its evidence inventory is reused in B and not charged twice. Pilot and production counts are the measure of the PoC graveyard pattern; if records are shared, D7 is placed with measurement evidence.	**Band cannot be selected**		Not answered	87, 88

NOTE

This package has no Mode A / Mode B access model: evidence is documents, records and interviews; Komtaş is given no access to systems or data content. In A the gate is run on documents and interviews (S6, S7). In B, AI inventory records, pilot and production counts, platform usage figures and access request records are measurement evidence if the customer shares them (S9, S10, S11, S14). All six band drivers of A and all ten of B are in the minimum set; in A the counts of AI systems in production and data sources are taken as statements with S6 and the legal entity count with S1. An owner with a written assignment (item 3), the legal basis (item 5) and the decision role and autonomy boundary (item 6) are gate items, not proposal questions; they are marked with evidence in P1–P2 and each gap is classified Blocking or Manageable. Real data access is asked with S9 in B and checked as a gate item with S6 in A. S1–S5 are common to both services; if both services are proposed to the same customer, they are asked once. The sector annexes (Banking Annex, Insurance Annex) are not part of the proposal set.

63 QUESTIONS OUTSIDE THE PROPOSAL SET

They were not deleted; when they are asked has been clarified. Some are never asked — they are written in the proposal as an assumption or statement.

WHEN	COUNT	RATIONALE
In P0	54	PoCs that did not reach production, previous AI initiative, success criterion of the work, who the result is presented to, data and document needs of the candidates, prioritisation, out-of-scope use cases and units, arranging interviews, work location, dimension to be covered in depth. Dimension detail: D1 problem statement, baseline, value and conventional alternative; D2 decision role, decision rights, review checkpoints, exception flows; D3 data quality, text sources, document versions, source authority hierarchy, multimodal evidence, expert knowledge; D4 data platform, access to scores and signals, reason codes, thin evidence, model–LLM boundary; D5 model strategy, proportionate architecture, retrieval testing, prompt management, APIs and write-back; D6 legal basis, MRM, guardrails, change control, third-party risk; D7 ownership roles, evaluation corpus, validation, MLOps, feedback loop; D8 AI team, SME involvement, trust calibration, change management. Also the use case to start first, its target date and the L1–L4 target levels. An owner with a written assignment, the legal basis and the decision role (gate items 3, 5, 6) are the subject of the work; they are marked with evidence in P1–P2, not at proposal stage. Asked when the document list is opened and the interview plan is made.
Sales knows	7	Proposal recipient, proposal date, budget, schedule constraint, competitor situation, a use case definition workshop if no candidate has an owner, B, a Grounded Intelligence pilot or data foundation work after the assessment. The commercial framework is the responsibility of sales; it is taken from the CRM or the sales representative.
Assumption in proposal	1	Compute, GPU or API budget (B). Not a band driver; if unanswered, it is written into 5.1 as an assumption and verified in P0. All band drivers (six in A, ten in B) are in the minimum set.
Stated in proposal	1	Access to systems and data content. This is to be stated, not asked: evidence is documents, records and interviews; 4a/4b 5.2 states that the assessment is carried out on these and needs no system access. Data access is verified against the access record shared by the customer.
Total	63	29 of the 92 questions were merged into the 14 questions of the Proposal Set; the remaining 63 were distributed across the four buckets above. The Banking Annex (14) and Insurance Annex (13) questions are not included in this count; they are optional and asked in P0.

BANKING ANNEX — INTERNAL VIEW (OPTIONAL)

Internal counterpart of the Banking Annex sheet in the customer file; the question numbers are the same. The questions are optional; they are not part of the proposal set, the Remaining count or the proposal readiness calculation, and are used in P0 for the interview plan and the document list. Customer-specific questions are added to this file, not to the customer file.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	D1 · Strategic & Business	Assumption	A · B	**Which of the following decision areas do the use cases to be assessed relate to: credit policy and rule refinement, corporate / SME credit assessment support, collections, customer retention and early detection of silent deterioration, portfolio signal interpretation, other?**	4b · 2.3 (D1); P1 interview plan		Not answered	The decision area sets the units to interview (credit allocation, collections, CRM, risk)	In P0
2	D2 · Decision Process & Functional	Assumption	A · B	In these areas, how are exception, override and referral decisions made; is the rationale for these decisions recorded in writing?	4b · 2.3 (D2)		Not answered	Exception, override and referral areas are the most valuable targets; if the rationale is not recorded, this is also a D3 gap	In P0
3	D2 · Decision Process & Functional	Assumption	B	**For credit decisions, have the role of the AI output (providing information, drafting the credit memo, checking and challenging, recommending) and who keeps the final decision authority been determined; have credit committee processes been reviewed from this angle?**	4a · 2.3 (gate item 6); 4b · 2.3 (D2)		Not answered	The banking form of gate item 6	In P0
4	D3 · Data & Knowledge	Assumption	B	Are credit memos, relationship manager meeting notes, collections call notes and complaint records kept electronically and in a searchable form?	4b · 2.3 (D3)		Not answered	Accessibility of text evidence; the sample audit is done in P1	In P0
5	D3 · Data & Knowledge	Assumption	B	**Are the credit policy, rule sets and procedures kept versioned; are past rule changes and their rationale recorded?**	4b · 2.3 (D3, D6)		Not answered		In P0
6	D4 · Analytical Grounding	Assumption	B	Are credit scores, PD / LGD models, early warning signals, collections segmentation and churn scores accessible at the time of use; do these outputs include the factors that drive the result (reason codes)?	4b · 2.3 (D4)		Not answered	Without reason codes the LLM layer interprets the score without its drivers	In P0
7	D4 · Analytical Grounding	Assumption	B	**Are event-driven signals produced that show behavioural change between model refresh cycles (payment trend, contact response rate, broken payment commitments, salary redirected to another institution, etc.)?**	4b · 2.3 (D4)		Not answered	Sets the timing gap in collections and retention use cases	In P0
8	D4 · Analytical Grounding	Assumption	B	Are approval, decline and override rates for credit rules tracked rule by rule?	4b · 2.3 (D4)		Not answered	The analytical foundation of the credit policy and rule refinement use case	In P0
9	D5 · Architecture, Technology & Integration	Assumption	B	**Can the credit assessment, collections and customer relationship (CRM) systems be accessed through APIs; are customer and transaction identifiers consistent across systems?**	4b · 2.3 (D5)		Not answered		In P0
10	D6 · Security, Governance & Control	Assumption	A · B	Under BDDK regulations, is there an internal assessment or approval process for outsourcing, cloud services and processing data abroad; has the use of external LLMs been assessed in this framework?	4a · 2.3 (gate items 4 and 5); 4b · 2.3 (D5, D6); 2.4 «REGULATION LEVEL»		Not answered	If external model use is not approved, the path to production and legal basis items are affected. No article numbers are cited; no compliance statement is produced	In P0
11	D6 · Security, Governance & Control	Assumption	B	**Do model risk management and the model validation unit cover AI-assisted decision processes and generative AI systems; is there an internal standard for the explainability of credit decisions?**	4b · 2.3 (D6, D7)		Not answered		In P0
12	D6 · Security, Governance & Control	Assumption	A · B	Is there an internal policy, information security assessment or legal opinion on processing customer data and information classed as bank secrets in AI systems?	4a · 2.3 (gate item 5); 4b · 2.3 (D6)		Not answered		In P0
13	D7 · Operating Model, Validation & Lifecycle	Assumption	B	**Are the later outcomes of credit and collections decisions (default, recovery, customer loss) recorded case by case; can these records be used to prepare an evaluation set (evaluation corpus) for testing AI outputs?**	4b · 2.3 (D7)		Not answered	The evaluation corpus is assessed, not built	In P0
14	D8 · People, Adoption & Change	Assumption	B	Can subject matter experts from the credit allocation, collections and relationship manager teams take part in design and testing?	4b · 2.3 (D8); 7.2		Not answered		In P0

INSURANCE ANNEX — INTERNAL VIEW (OPTIONAL)

Internal counterpart of the Insurance Annex sheet in the customer file; the question numbers are the same. The questions are optional; they are not part of the proposal set, the Remaining count or the proposal readiness calculation, and are used in P0 for the interview plan and the document list. Customer-specific questions are added to this file, not to the customer file.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	D1 · Strategic & Business	Assumption	A · B	**Which of the following decision areas do the use cases to be assessed relate to: underwriting, claims assessment, fraud detection, customer service, renewal and retention, other?**	4b · 2.3 (D1); P1 interview plan		Not answered	The decision area sets the units to interview (underwriting, claims, fraud, customer service)	In P0
2	D2 · Decision Process & Functional	Assumption	A · B	How are underwriting exceptions, claims payment approvals and referrals in case of suspected fraud decided; are authority limits defined?	4b · 2.3 (D2)		Not answered		In P0
3	D2 · Decision Process & Functional	Assumption	B	**Has it been determined in which decisions the AI output only provides information or drafts and in which it recommends; is human approval foreseen for outputs sent directly to customers?**	4a · 2.3 (gate item 6); 4b · 2.3 (D2)		Not answered	The insurance form of gate item 6	In P0
4	D3 · Data & Knowledge	Assumption	B	Are policy, quotation and claims files (loss adjuster reports, photographs, invoices, scanned documents) kept electronically and in a searchable form?	4b · 2.3 (D3, D5)		Not answered	The need for multimodal evidence (images, scanned documents) shows up here	In P0
5	D3 · Data & Knowledge	Assumption	B	**Are product terms, general and special conditions, underwriting guidelines and tariffs kept versioned; can the version valid at the policy date be determined?**	4b · 2.3 (D3, D6)		Not answered	A superseded version remaining in the retrieval scope is among the most common errors	In P0
6	D3 · Data & Knowledge	Assumption	B	Are call centre records, complaints and customer correspondence in scope; are audio recordings transcribed to text?	4b · 2.3 (D3)		Not answered		In P0
7	D4 · Analytical Grounding	Assumption	B	**Are risk scores, fraud scores, claims cost estimates and churn models accessible at the time of use; do these outputs include the factors that drive the result?**	4b · 2.3 (D4)		Not answered		In P0
8	D5 · Architecture, Technology & Integration	Assumption	B	Can the policy administration, claims management and customer relationship (CRM) systems be accessed through APIs; is the data coming from agency and broker channels consistent with these systems?	4b · 2.3 (D5)		Not answered		In P0
9	D6 · Security, Governance & Control	Assumption	A · B	**Will special category personal data such as health data be processed in the use cases; if so, has the legal basis under KVKK been determined?**	4a · 2.3 (gate item 5); 4b · 2.3 (D6)		Not answered	Without a legal basis the candidate gets Not ready (Blocking)	In P0
10	D6 · Security, Governance & Control	Assumption	A · B	Under SEDDK regulations, is there an internal assessment or approval process for outsourcing, cloud services and automated decision processes?	4a · 2.3 (gate items 4 and 5); 4b · 2.3 (D5, D6); 2.4 «REGULATION LEVEL»		Not answered	No article numbers are cited; no compliance statement is produced	In P0
11	D6 · Security, Governance & Control	Assumption	B	**For decisions that may have an adverse outcome for the customer, such as fraud findings or claim rejection, are explaining the rationale to the customer and an appeal process defined?**	4b · 2.3 (D6, D2)		Not answered		In P0
12	D7 · Operating Model, Validation & Lifecycle	Assumption	B	Are the outcomes of claims and fraud decisions (payment, rejection, appeal, confirmed fraud) recorded case by case; can these records be used to prepare an evaluation set (evaluation corpus) for testing AI outputs?	4b · 2.3 (D7)		Not answered	The evaluation corpus is assessed, not built	In P0
13	D8 · People, Adoption & Change	Assumption	B	**Can subject matter experts from the underwriting, loss adjusting, claims and customer service teams take part in design and testing?**	4b · 2.3 (D8); 7.2		Not answered		In P0

PROPOSAL READINESS STATUS

This sheet is calculated automatically. The decision on whether a proposal can be written is made separately for each service, based on the relevant questions on the Proposal Set sheet (SERVICE column).

MEASURE	A · READINESS CHECK	B · READINESS ASSESSMENT	DESCRIPTION
Number of proposal set questions	**7**	**12**	Common questions (S1–S5) and service-specific questions (A: S6–S7, B: S8–S14)
Answered	**0**	**0**	STATUS column on the Proposal Set sheet
Partially answered	**0**	**0**	Written as an assumption in the proposal
Missing	**7**	**12**	Unanswered proposal question
Completion	**0%**	**0%**	Answered / total
CAN THE PROPOSAL BE WRITTEN	**NO — 7 questions missing**	**NO — 12 questions missing**	YES if missing is zero
Service questions (Questions)	**39**	**87**	Questions carrying the relevant letter in the SERVICE column of the full list
Service questions — deferred to P0	**11**	**53**	Asked in the first week of the work
Questions in the whole form	**92**		Reference: full list of 92 questions (3a, 3b deduplicated)
Deferred to P0 (all)	**54**		Asked in the first week of the work
Banking Annex (optional)	**14 questions · 0 answered**		Sector annex; does not affect proposal readiness
Insurance Annex (optional)	**13 questions · 0 answered**		Sector annex; does not affect proposal readiness

Rule: a service's proposal is not written until that service's proposal set is complete. If it must be written, each missing item is written into section 5 of the proposal as an assumption and it is stated that the scope will be reassessed if that assumption does not hold.

STATUS BY SECTION

SECTION	QUESTION	BLOCKER	ANSWERED	MISSING BLOCKER
A. Organisation and Proposal Details	5	2	0	2
B. Decision	6	2	0	2
C. Sponsor and Senior Management Access	4	2	0	2
D. Candidate Use Cases	6	2	0	2
E. Scale and Interview Plan	8	1	0	1
F. Dimension Scope and Prerequisite Gate	4	3	0	3
D1 · Strategic & Business	5	1	0	1
D2 · Decision Process & Functional	4	1	0	1
D3 · Data & Knowledge	8	1	0	1
D4 · Analytical Grounding	5	0	0	0
D5 · Architecture, Technology & Integration	8	1	0	1
D6 · Security, Governance & Control	9	3	0	3
D7 · Operating Model, Validation & Lifecycle	6	0	0	0
D8 · People, Adoption & Change	4	0	0	0
G. Target Levels and Start Dates	4	0	0	0
H. Previous Work	2	0	0	0
I. Commercial Framework	4	0	0	0
Total	**92**	**19**	**0**	**19**

TO BE SENT TO THE SAT OFFICE AFTER THE MEETING

Once these items arrive, the proposal text can be produced.

#	ITEM	SENT	NOTE
1	This completed form (with the answers from the customer form and any sector annex entered)	No	
2	Your meeting notes — raw is fine, do not try to tidy them	No	
3	RFP / specification file, if any	No	
4	Use case definitions, AI policy, AI inventory, role definitions or data access request records shared by the customer	No	
5	Service decision: A, B or both; names, number and owners of the candidate use cases; if no candidate has an owner, a use case definition workshop	No	
6	Pricing decision: which band (S / M / L); if A was done before, the evidence inventory reused in B	No	
7	Team decision: which consultants will be assigned (for table 7.1)	No	

HOW TO USE

TWO-FILE SET-UP

Sent to the customer	ai-readiness-assessment-5-musteri-soru-seti-en.xlsx — twenty-three questions, two optional sector annexes (Banking Annex 14, Insurance Annex 13 questions) and an information note. The SERVICE column states which service each question is required for, and the SECTION column which dimension it feeds. Prerequisite items, target levels and methodology are not asked of the customer; Komtaş proposes them based on the answers.
This file (internal)	ai-readiness-assessment-6-ic-soru-seti-en.xlsx — full list of 92 questions, the 14-question minimum set required for the proposal (by service: A 7, B 12), those deferred to P0 and the internal view of the sector annexes. Answers from the customer form are entered in this file and the proposal is written from here.
Minimum set logic	Twenty-nine of the ninety-two questions have been merged into fourteen questions. S1–S5 are common to both services; S6–S7 belong only to A and S8–S14 only to B. Because the remaining sixty-three questions do not change the proposal, they have been left to the first week of the work (P0), to sales, or written in the proposal as an assumption or statement. Criterion: if doubling the number in the answer does not double the work, that question is not a proposal question.

SERVICE column	A · AI & Agentic Readiness Check, B · AI & Agentic Readiness Assessment. “A · B” marks a question asked in both services, “A” one asked only in the Readiness Check and “B” one asked only in the Readiness Assessment. Once the service to be proposed is known, only the questions carrying that letter are needed.
Fields to fill in	On the Questions, Banking Annex and Insurance Annex sheets, only the ANSWER (G), STATUS (H) and NOTE (I) columns are filled in; on the Proposal Set sheet, ANSWER (G) and STATUS (H). Yellow cells show the fields to fill in. Pre-written short explanations in the NOTE column may be added to without deleting them.
Other sheets	Figures on the Summary, Section Breakdown and Remaining sheets are calculated automatically; do not change them by hand.
PRIORITY — BLOCKER	The proposal is not written until this question is answered; it cannot be filled with an assumption. The row stays red. For questions that are a blocker in one service and an assumption in another, the distinction is noted in the NOTE column.
PRIORITY — Assumption	If left unanswered, it is written into section 5 of the proposal as an assumption.
STATUS — Answered	A clear answer was received. The row turns green.
STATUS — Partial	An answer was received but it is incomplete or unclear. Written as an assumption in the proposal.
STATUS — Not answered	Not yet asked, or no answer received.

“We don’t know” as an answer	This is also an answer and is often the first finding. STATUS is marked “Partial” and it is written in the NOTE field.
Writing the proposal	When the “CAN THE PROPOSAL BE WRITTEN” row for a service on the Summary sheet is YES, filling in that service's proposal template begins: for A ai-readiness-assessment-4a-readiness-check-teklif-sablonu-en.docx, for B ai-readiness-assessment-4b-readiness-assessment-teklif-sablonu-en.docx.
WHERE IT FILLS IN THE PROPOSAL	Format is “4b · 2.4”: template (4a, 4b) and section number. “4a/4b · 7.2” refers to the same section in both templates. 2.3 is the prerequisite gate in 4a and Assessment Dimensions in 4b; D1–D8 in brackets is the dimension fed; “driver N” is the row number of the band table in 3a and 3b (1–6 in A, 1–10 in B; the first six drivers are the same in both services).
Source	The questions were produced by deduplicating the files ai-readiness-assessment-3a-readiness-check-girdi-formu-en.docx and ai-readiness-assessment-3b-readiness-assessment-girdi-formu-en.docx and completed against the eight dimensions of the Enterprise Readiness framework. The SECTION column shows the proposal sections (A–F: details, decision, sponsor, candidates, scale, scope and gate; G–I: target levels, previous work, commercial framework) and the dimension detail (D1–D8). Gate items and the dimensions they feed: 1 defined use case → D1 (question in D), 2 real data access → D3, 3 decision-making owner → D1 · D8 (questions in D and D1), 4 path to production → D5 · D7 (question in D5), 5 legal basis → D6, 6 decision role and autonomy boundary → D2; the item document questions in 3a F are merged with these questions. Each gap is classified Blocking or Manageable. Not met is always Blocking. Partly met / Not assessed is Blocking or Manageable on the evidence; a missing owner or missing legal basis is always Blocking. Any Blocking gap → Not ready. Only Manageable gaps → Conditional. No gap and no item left Not assessed → Ready to start. The target level (L1–L4) for B’s eight dimensions is collected in a single row; the per-dimension answer is written in the table in 3b. AI Governance Readiness Assessment is a separate service; D6 only looks at the governance prerequisites of the use case. When a question’s text changes, both Excel files are updated.
Sector annexes	The Banking Annex (14 questions) and the Insurance Annex (13 questions) are optional; they appear in the customer file with the same numbers and are sent only to organisations in that sector. They are not part of the proposal set or the proposal readiness calculation; the answers are used in P0 for the interview plan and the document list and are counted separately on the Summary sheet. Further sector annexes are added with the same column structure as customers come. Customer-specific questions are added to this file (the relevant annex sheet or the Questions sheet), not to the customer file.

EXAMPLE ROW

QUESTION	ANSWER / STATUS / NOTE
Names and number of the candidate use cases	“Invoice dispute classification and call summary confirmed; demand forecast has no owner yet” · Partial · “If no owner is assigned in P0, the candidate is Not ready”
