DATA GOVERNANCE PROGRAM · SERVICE B

Technology Enablement — Proposal Input Form

Information to be collected to price the B1 / B2 / B3 modules or the Migration / Rollout variant on Informatica, and the field each item fills in the proposal (file 4b). Sections follow the Proposal Set codes (S1–S5, S9–S12, S15).

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the General Assumptions section.

The "WHERE IT GOES IN THE PROPOSAL" column of each row names the variable field and section of the proposal template. Scope limits are written into the proposal as «N»; sources, tables, reports, terms and rules beyond the limit are out of scope.

TWO INPUTS DIRECTLY SET THE BAND AND THE FEE: the source system inventory (type, version, tables, reports) and the DQ scope (system, records, terms, rules). Sources, tables, reports, terms and rules beyond the limits are out of scope (4b 15).

The platform block and the variant decide the proposal text: «PLATFORM BLOCK — IDMC» or «PLATFORM BLOCK — ON-PREM»; standard modules, «VARIANT BLOCK — MIGRATION» or «VARIANT BLOCK — ROLLOUT». The unused block and variant are deleted from the text.

THIS FORM IS FOR SERVICE B — module-based technology enablement on Informatica: B1 Business Glossary and Data Dictionary, B2 Data Catalogue, Lineage and Classification, B3 Data Quality. Each module has its own scope, plan, deliverables, fee and payment tables.

B assumes that a data governance framework exists (Service A or the customer's equivalent framework). If there is none, A is proposed first or together.

Licence prices are not written into this proposal; the separate licence proposal is referenced with «LICENCE PROPOSAL REF».

S1 · COMMON · DETAILS — Organisation and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER», 1. «CUSTOMER CONTEXT»	
○	Legal entities and group companies in scope — names; for a single company the row is deleted	Cover «GROUP COMPANIES»	
○	Sector, starting point and reason for the request — for the one-paragraph context	1. «CUSTOMER CONTEXT»	
●	**Is there an RFP, specification or requirements list; its number, response format and deadline**	Structure of the whole proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», 16.1 «proposal date + 1 month»	
○	Procurement process, approved budget and expected invoice payment term	12. Fees, 16.1 «N» days payment term, «price validity date»	
○	Location for on-site work (city)	14. General Assumptions and 16.1 «CITY»	
○	Are there competitors, and who	Emphasis and section weights	

S2 · COMMON · DECISION — Trigger, Tier and Existing Work

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**What triggers the work and which decision will it support — technology investment, rollout to other domains, KVKK or audit finding, AI initiatives**	1. «CUSTOMER CONTEXT»	
●	**Which tier(s) are wanted — A Strategy & Framework / B Technology Enablement / C Managed Service; together or in sequence**	Template choice (4a / 4b / 4c), Table 1 status column, Service Selection Check	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which data governance work exists today — policies, roles, glossary, catalogue, DQ — and on which platform**	14. General Assumptions framework assumption, 2.1, Rollout choice	
●	**Is there Service A or an equivalent framework (organisation, roles, glossary and DQ templates); if not, A is proposed together**	14. General Assumptions 4th item, whether the proposal is written	
○	Is there a target date — budget period, go-live, audit schedule	Table 1, module plans	
○	Are there AI or advanced analytics initiatives	2.3 «OPTIONAL» item	

S3 · COMMON · SPONSOR — Sponsor, Data Governance Office and Coordination

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Project sponsor — name, title**	11.2 Expected participation, 11.3 steering committee	
●	**Can a project coordinator be appointed — day-to-day contact**	14. General Assumptions, 11.2	
○	Is there a Data Governance Office or data governance committee; who leads it	8.1 Platform Workshop participants, 11.2	
○	Have data owners and data stewards been appointed; who approves definitions	5.1 responsibility for term definitions, 11.4 risk	
○	Are IT / data architecture and information security and compliance representatives known	11.2 Expected participation	

S4 · COMMON · SCOPE — Pilot / Priority Domain, Units and Companies

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Data domain in scope and the number of domains**	«DOMAIN», 5.1 «N» data domains, Driver 4	
○	Business units in scope — who will provide term definitions and DQ rules	5.1, 7.1, 11.2	
○	Number of group companies in scope	Cover «GROUP COMPANIES», 2.3	
○	Are any domains, systems or companies to be excluded	15. Out of Scope	

S5 · COMMON · PLATFORM — Platform and Licence

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Is Informatica installed or planned; IDMC (cloud) or on-premises (Axon / EDC / IDQ)**	«PLATFORM BLOCK — IDMC» / «PLATFORM BLOCK — ON-PREM», 4.1 / 4.2, 13.1 / 13.2	
●	**Licence status — existing, to be purchased or a separate licence proposal; number and date of the licence proposal**	«LICENCE PROPOSAL REF», 12. Fees	
○	Platform version; is migration from the installed on-premises stack to IDMC wanted	«VARIANT BLOCK — MIGRATION» 9.1 (S9)	
○	Will the licences be in place before development starts	14. General Assumptions last item	

S9 · B · MODULES — Modules and Variant

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which modules — B1 / B2 / B3; together or in sequence (table)**	Sections 5–7, Tables 1, 2, 28	
●	**Variant — standard modules / Migration (on-prem → IDMC) / Rollout (installed platform, new domains)**	«VARIANT BLOCK — MIGRATION» 9.1 / «VARIANT BLOCK — ROLLOUT» 9.2	
○	B1: number of basic data governance policies to apply and number of business glossary processes to create	5.1 «N» policies, «N» processes	
○	B1: will data owners prepare business terms with the template, or through Komtaş workshops; number of workshops	5.1 «OPTIONAL» «N» workshops	
○	B1: custom fields, mandatory flags and dropdown values; approval workflow expectation	5.1, 4.1 approval mechanism (IDMC), 5.3 B1.1 SMX document	

Module selection — the "IN SCOPE" column is completed. Durations are the module guide of the Aras commercial proposal; if a variant is chosen, the module rows stay empty.

#	MODULE / BLOCK	IN SCOPE	DURATION GUIDE	DEPENDENCY	IN THE PROPOSAL
B1	Business Glossary and Data Dictionary		~4 weeks	Glossary templates from A or equivalent	Section 5, Tables 4–7
B2	Data Catalogue, Lineage and Classification		~7 weeks	After B1	Section 6, Tables 8–11
B3	Data Quality		~8 weeks	Parallel to B1 and B2	Section 7, Tables 12–15
V1	Migration variant (on-prem → IDMC)		62 wd · 95–107 pd	Replaces the modules	9.1, Tables 17–19
V2	Rollout variant (new domains)		12 weeks per wave (4 domains)	Replaces the modules	9.2, Tables 20–23
W	Platform and end-user workshops	Yes	«N» days	–	8.1, Table 1
E	«OPTIONAL» Technology training		«N» hours / «N» days	–	8.2, Table 16
D	«OPTIONAL» Post-go-live support		«N» months	Go-live	8.3, Table 28

S10 · B · SOURCES — Source Systems, Tables and Reports

> Metadata work is done to the extent stated in the Informatica Supported Systems document. Impact analysis requires standard development in the data integration and reporting tools; dynamic table names, script execution and complex SQL break lineage (4b 6.1).

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Source systems — type, version, count; databases, ETL and reporting tools (table)**	«SOURCE SYSTEMS» 6.1, 5.1, Driver 1	
●	**Total number of tables and reports in the metadata scope**	6.1 «N» tables / «N» reports, 5.1 «N» tables (without B2), Drivers 2–3	
○	Are there unsupported or custom sources; can the customer provide the data model and metadata inputs	6.1 custom source items	
○	Is there non-standard development in ETL and reporting tools — dynamic SQL, scripts, table name changes	6.1 impact analysis, 11.4 risk	
○	Expected metadata scan frequency — weekly / monthly	6.1	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Migration: number of business terms to migrate and source inventory per technology (instances, resources)	9.1 «N» business terms, «SOURCE INVENTORY», Table 17	
○	Migration: third-party applications to integrate with IDMC and number of API integrations; metric feed to an external reporting tool	9.1 «N» API integrations, «OPTIONAL» item, Table 19	
○	Rollout: domains to roll out, domains per wave; upper limit of business terms and DQ rules per domain	«DOMAINS» 9.2, «N» domains, «N» terms, «N» rules, Table 21 «N» weeks	

Source system table — the first three rows are examples. Table and report counts are statements; they are confirmed in the B2 analysis phase.

#	SYSTEM	TYPE	VERSION	TABLES	REPORTS	IN B2	IN B3	TAGGING
–	Example: DWH	Oracle database	19c	800	–	Yes	Yes	Yes
–	Example: ETL	SSIS	2016	–	–	Yes	No	No
–	Example: Reporting	Power BI	Cloud	–	300	Yes	No	No
1								
2								
3								
4								
5								
6								
7								
8								
	TOTAL							

S11 · B · DQ — Data Quality and Tagging

> A data quality rule is one rule written for one business term in one system. Rules are built on completeness, accuracy, conformity, uniqueness and timeliness; cleansing, matching and de-duplication are out of scope (4b 7.1).

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Source system(s) for the DQ work and total number of records (active and inactive)**	7.1 «N» source systems («SYSTEM»), «N» records	
●	**DQ scope — number of data domains, business terms and DQ rules**	7.1 «N» domains, «N» terms, «N» rules; Migration 9.1 «N» rules; Driver 5	
○	DQ business terms — person / customer fields (name, TCKN, VKN, e-mail, phone, address) or domain-specific terms	7.1 term list and FILL NOTE	
○	Can an intermediate schema (Oracle, SQL Server, PostgreSQL) be provided for DQ results	7.1, 9.1 Data Quality	
●	**Tagging (B2) — system to tag, number of tables, number of sample records and number of business terms**	6.2 «N» systems («SYSTEM»), «N» records, «N» tables, «N» business terms	
○	Are reference libraries (occupation, city, district) needed for tagging and DQ rules; is each below 10,000 rows	6.2, 7.1	
○	Can rule definitions and tagging rules be provided by the customer by the end of the design phase	6.2, 7.1, 11.4 risk	

S12 · B · INFRASTRUCTURE — Infrastructure, Identity and Access

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Identity provider — Azure AD / Microsoft Entra ID with SAML, LDAP or other**	«IDENTITY PROVIDER» 4.1 / 4.2, Table 4, 9.1 Infrastructure	
●	**IDMC: who provides the Secure Agent server; are development, test and production separate**	4.1, 13.1, «PLATFORM BLOCK — IDMC» ANNEX-5	
○	On-premises: are servers, operating system and database ready for Axon, EDC and IDQ	4.2, 13.2	
○	Can the customer provide source access, firewall rules and JDBC drivers; access approval lead time	6.1, 13.1, 14. assumptions	
○	Can an Informatica Connector be installed on source servers if needed	6.1, 9.1 Metadata	

S15 · B · TRAINING — Workshops, Training and Post-Go-Live Support

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Participants of the platform workshop and the end-user workshop — DG office, business units	8.1, Table 1 «N» days	
○	Is technology training wanted; model — digital content (LMS) / classroom training (online or on-site)	8.2 «OPTIONAL», Table 16 «N» hours / «N» days / «fee»	
○	Number and roles of training participants (at most 15 per class; employees of the licence holder only)	8.2, Table 16	
○	Is post-go-live support wanted; for how many months and at most how many days per week	8.3 «N» months, «N» days, Tables 1, 28	
○	Interest in Service C (Managed Service) after the support period	8.3 last paragraph, Table 28	

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	«CUSTOMER ABBREVIATION» · «YEAR» · «SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month»	Cover, 16.1	Send date + 1 month (S1)	
3	«price validity date»	16.1	Sales decision	
4	«fee» · «amount» · «%»	Tables 6, 7, 10, 11, 14, 15, 16, 18, 19, 22, 23, 28	Band and module; payment 20 / 40 / 40% per module	
5	«day rate»	Table 28	Role-based day rate list	
6	«N» weeks · working days · delivery week · effort	Tables 1, 2, module plans and deliverables, Tables 17, 21, 24, 26	Band worksheet, delivery confirmation	
7	«N» working days to start · «N» working days review · «N» days payment term	14. General Assumptions, 16.1, 9.1 Migration	Standard value; per the S1 answer	
8	«REFERENCES»	ANNEX-1 References	Only references approved for this proposal	
9	«full name» · «title» · «e-mail / phone»	16.2 contacts	Komtaş commercial and technical contact	

Band and Effort Calculation — Service B

Completed after the answers are collected. The band is the highest band reached by at least three drivers; a single large driver does not carry the band.

Bands are calibrated on proposal plans; to be updated with actual effort. Komtaş effort is not written into the proposal before delivery confirms it.

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Source systems (S10)	≤ 4	5 – 6	> 6	
2	Tables (S10)	≤ 1,000	≤ 2,500	> 2,500	
3	Reports (S10)	≤ 500	≤ 500	> 500	
4	Domains (S4)	1	1	2+	
5	DQ rules (S11)	≤ 100	≤ 200	> 200	
	RESULT — B1+B2+B3, 1 domain	~42 wd · ~100 pd	52–61 wd · 120–165 pd	80+ wd · 170+ pd	

CALIBRATION — S ~42 wd (8 weeks), ~100 pd: Aras · M 52–61 wd (10–12 weeks), 120–165 pd: OYAK, Havelsan (DG 92 pd + DQ 74 pd) · L 80+ wd (16+ weeks), 170+ pd: Vakifbank scale.

MODULE GUIDE — B1 ~4 weeks · B2 ~7 weeks · B3 ~8 weeks; B1 and B2 in sequence, B3 can run in parallel. If one module is sold, effort is split by module share; delivery confirms.

VARIANTS — calibrated separately: Migration 62 wd / 95–107 pd (THY) · Rollout 12 weeks per wave of 4 domains (Kazanci; effort not written in the source proposal — delivery confirms).

TEAM — Project Manager (10–20%) · DG Team Leader · DG Consultant (business glossary and data steward) · DQ Team Leader · DQ Consultant · Support Engineer (Migration).

PAYMENT — per module 20% kick-off · 40% first deliverable · 40% second deliverable (4b Tables 7, 11, 15). Training is invoiced on order (digital) or after delivery (classroom).

Service Selection Check

Before filling in the form, make sure that B is the right service. One request can match more than one row; tiers can be proposed together.

STATUS	RIGHT SERVICE
There is no data governance framework (organisation, roles, policies, glossary templates); a maturity assessment and a roadmap are wanted	A — Strategy & Framework
No technology has been selected yet; the product is to be selected on criteria derived from the needs	A + technology selection option
The framework exists (A or equivalent); business glossary, catalogue and lineage, data quality are to be set up on Informatica	B — modules B1 / B2 / B3
On-premises Axon / EDC / IDQ is installed; migration to IDMC is wanted	B — Migration variant
The platform is installed and piloted in one domain; rollout to new domains is wanted	B — Rollout variant
The platform is live; demand-based DQ / DG work and P1 / P2 / P3 support are wanted	C — Managed Service
The request is governance applied in operational systems when data is created — DQ checks at entry, SDLC gate	Operational Data Governance Enablement
The request is AI model and use-case risk, AI policies and an AI inventory	AI Governance Readiness
The request is the design and delivery of domain-based data products	Data Product Delivery
Only an Informatica licence is wanted; no consulting service	Licence proposal only — this package is not used

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
S1	Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries	
S1	Is there an RFP, specification or requirements list; its number, response format and deadline	
S2	What triggers the work and which decision will it support — technology investment, rollout to other domains, KVKK or audit finding, AI initiatives	
S2	Which tier(s) are wanted — A Strategy & Framework / B Technology Enablement / C Managed Service; together or in sequence	
S2	Which data governance work exists today — policies, roles, glossary, catalogue, DQ — and on which platform	
S2	Is there Service A or an equivalent framework (organisation, roles, glossary and DQ templates); if not, A is proposed together	
S3	Project sponsor — name, title	
S3	Can a project coordinator be appointed — day-to-day contact	
S4	Data domain in scope and the number of domains	
S5	Is Informatica installed or planned; IDMC (cloud) or on-premises (Axon / EDC / IDQ)	
S5	Licence status — existing, to be purchased or a separate licence proposal; number and date of the licence proposal	
S9	Which modules — B1 / B2 / B3; together or in sequence (table)	
S9	Variant — standard modules / Migration (on-prem → IDMC) / Rollout (installed platform, new domains)	
S10	Source systems — type, version, count; databases, ETL and reporting tools (table)	
S10	Total number of tables and reports in the metadata scope	
S11	Source system(s) for the DQ work and total number of records (active and inactive)	
S11	DQ scope — number of data domains, business terms and DQ rules	
S11	Tagging (B2) — system to tag, number of tables, number of sample records and number of business terms	
S12	Identity provider — Azure AD / Microsoft Entra ID with SAML, LDAP or other	
S12	IDMC: who provides the Secure Agent server; are development, test and production separate	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the General Assumptions section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold.

The fourth row of S2 has a special place: without a framework B is not written alone; A is proposed together, or the assumption that the required definitions are agreed in the analysis phase of each module is written.
