DATA GOVERNANCE PROGRAM · SERVICE C

Managed Service — Proposal Input Form

Information to be collected to price the demand-based data governance and data quality managed service on the MSU model (capacity, period, hypercare, support levels). Sections follow the Proposal Set codes (S1–S5, S13–S14); once the form is completed and returned, the proposal text (file 4c) is produced.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to the General Assumptions section.

The "WHERE IT GOES IN THE PROPOSAL" column of each row names the variable field and section of the proposal template. Scope limits are written into the proposal as «N»; sources, tables, reports, terms and rules beyond the limit are out of scope.

SERVICE C IS DEMAND-BASED: «N» months, «N» MSU per month; unused MSU rolls over to later months within the service period, and extra MSU can be bought. The MSU values of the catalogue items (4c Table 3) are agreed values and are not changed per customer. Completing all items within one month is not committed; work is planned by priority, dependency and MSU consumption.

Incidents in live use do not consume MSU capacity; they are handled under the P1 / P2 / P3 service levels (first response P1 1 hour · P2 4 hours · P3 next business day; 7×24 for P1).

THIS FORM IS FOR SERVICE C — after go-live of Service B or for an installed data governance and data quality platform. Hypercare («N» months of post-go-live support) can be sold as the entry option of C.

If the platform is not live, C is not proposed; B or the post-go-live support within B is proposed first. A new module, a new platform or a migration is proposed as Service B, not with MSU.

S1 · COMMON · DETAILS — Organisation and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries**	Cover «CUSTOMER NAME», text «CUSTOMER», 1. «CUSTOMER CONTEXT»	
○	Legal entities and group companies in scope — names; for a single company the row is deleted	Cover «GROUP COMPANIES»	
○	Sector, starting point and reason for the request — for the one-paragraph context	1. «CUSTOMER CONTEXT»	
●	**Is there an RFP, specification or requirements list; its number, response format and deadline**	Structure of the whole proposal	
○	Proposal addressee — name, title, unit; proposal date and expected decision date	Cover «dd Month yyyy», 12.1 «proposal date + 1 month»	
○	Procurement process, approved budget and expected invoice payment term	9. Fees, 12.1 «N» days payment term, «price validity date»	
○	Location for on-site work (city)	10. General Assumptions and 12.1 «CITY»	
○	Are there competitors, and who	Emphasis and section weights	

S2 · COMMON · DECISION — Trigger, Tier and Existing Work

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**What triggers the work and which decision will it support — technology investment, rollout to other domains, KVKK or audit finding, AI initiatives**	1. «CUSTOMER CONTEXT»	
●	**Which tier(s) are wanted — A Strategy & Framework / B Technology Enablement / C Managed Service; together or in sequence**	Template choice (4a / 4b / 4c), Table 1 status column, Service Selection Check	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which data governance work exists today — policies, roles, glossary, catalogue, DQ — and on which platform**	4.1 Service Scope, 7. Service Plan (handover from Service B)	
●	**Is the platform live; when was or will it go live through Service B or another project**	4.4 hypercare, 7. Service Plan, whether the proposal is written	
○	Is there a target date — budget period, go-live, audit schedule	Table 1, 7. Service Plan	
○	Are there AI or advanced analytics initiatives	ANNEX-1 AI Governance Framework emphasis	

S3 · COMMON · SPONSOR — Sponsor, Data Governance Office and Coordination

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Service owner — name, title**	8.2 Expected participation, 8.3 steering committee	
●	**Can a coordinator who submits and prioritises requests be appointed**	10. General Assumptions, 8.2	
○	Is there a Data Governance Office or data governance committee; who leads it	8.3 Monthly steering meeting	
○	Have data owners and data stewards been appointed; who approves definitions	Catalogue “Data steward onboarding”, 8.2	
○	Are IT / data architecture and information security and compliance representatives known	8.2 Expected participation	

S4 · COMMON · SCOPE — Pilot / Priority Domain, Units and Companies

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Platform and domains the service will cover — which modules are live (glossary, catalogue and lineage, DQ)**	4.1 Service Scope, 1. «CUSTOMER CONTEXT»	
○	Size of the existing content — number of business terms, DQ rules and catalogued sources	Monthly mix estimate, 7. Service start	
○	Business units and group companies that will raise requests	Cover «GROUP COMPANIES», 8.2	
○	Are new domains or sources expected (may be Service B rather than MSU)	11. Out of Scope, Service Selection Check	

S5 · COMMON · PLATFORM — Platform and Licence

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Is Informatica installed or planned; IDMC (cloud) or on-premises (Axon / EDC / IDQ)**	4.1, 8.1 Support Engineer scope	
●	**Licence status — existing, to be purchased or a separate licence proposal; number and date of the licence proposal**	«LICENCE PROPOSAL REF», 9. Fees	
○	Are the licence subscription and maintenance provided through Komtaş	4.3 right to new releases and updates, «LICENCE PROPOSAL REF»	
○	Are the licences valid for the whole service period	10. General Assumptions	

S13 · C · CAPACITY — Capacity, Period and Hypercare

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Monthly MSU capacity — 100 / 150 / 200+ (together with the monthly mix estimate)**	Table 1 «N» MSU, 3.1, Table 9 «N» MSU × «N»	
●	**Service period — standard 12 months**	Table 1 «N» months, Table 6, Table 9, 12.1 «N» months	
○	Is the hypercare entry option wanted; for how many months and at most how many days per week	4.4 «OPTIONAL» «N» months, «N» days; Tables 1, 5, 6, 9	
○	Service start date; within how many working days of contract signature	10. «N» working days, Table 6 service start «N» weeks	
○	Open topics to take over from Service B and the first backlog	Table 6 service start	

S14 · C · SUPPORT — Support, Priorities and Request Mix

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Expected monthly request mix — DQ and DG items and counts (table below)**	Table 3 catalogue, S13 package choice	
○	Support hours — are weekdays 08:00–17:00 and 7×24 for P1 sufficient	5. Service Levels; if different, 10. assumption	
○	Are the priority definitions and first response times accepted — P1 1 hour, P2 4 hours, P3 next business day	5. Table 4	
○	Request channel and planning meeting frequency	3.2 Table 2, 8.3	
○	Do third parties change the platform or the source systems	8.4 risk, 10. assumption	
○	Is on-site work expected	10. «CITY», 11. Out of Scope	

MSU catalogue and monthly mix estimate — "COUNT PER MONTH" is filled from the customer statement; MSU per month = MSU × count. Values are the same as 4c Table 3.

#	ACTIVITY	AREA	MSU	COUNT PER MONTH (EST.)	MSU PER MONTH
1	DQ rule business definition	Data Quality	10		
2	DQ rule technical design	Data Quality	10		
3	DQ rule template creation	Data Quality	10		
4	DQ rule, simple implementation	Data Quality	10		
5	DQ rule, medium-complexity implementation	Data Quality	20		
6	DQ rule, complex implementation	Data Quality	30		
7	AI / anomaly DQ rule	Data Quality	50		
8	Rule execution set-up	Data Quality	10		
9	Threshold definition	Data Quality	10		
10	Scorecard creation	Data Quality	20		
11	Dashboard set-up	Data Quality	50		
12	Issue pre-assessment	Data Quality	10		
13	Root cause analysis	Data Quality	20		
14	Data standardisation flow	Data Quality	50		

#	ACTIVITY	AREA	MSU	COUNT PER MONTH (EST.)	MSU PER MONTH
15	Glossary terms (10)	Data Governance	10		
16	Term relationship mapping	Data Governance	10		
17	Glossary approval workflow	Data Governance	50		
18	Glossary domain creation	Data Governance	20		
19	Adding a policy	Data Governance	50		
20	Defining a standard	Data Governance	20		
21	Data steward onboarding	Data Governance	10		
22	Governance meeting	Data Governance	10		
23	Issue management	Data Governance	50		
24	Metadata of another system	Data Governance	100		
25	Metadata enrichment	Data Governance	20		
26	Impact analysis extension	Data Governance	20		
	TOTAL — estimated MSU per month				

Monthly mix summary — the difference between the selected package and the estimate is read as roll-over or extra MSU.

#	ITEM	SOURCE	MSU PER MONTH	SHARE	NOTE
1	Data Quality items	Catalogue rows 1–14			
2	Data Governance items	Catalogue rows 15–26			
3	Selected package	100 / 150 / 200+ MSU			
4	Difference — rolled over or extra MSU	3 − (1 + 2)			

Fields Filled by the Proposal Team

These fields are not asked of the customer; SAT and sales fill them from the band, the payment pattern and approved lists.

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
1	«CUSTOMER ABBREVIATION» · «YEAR» · «SEQUENCE»	Cover — proposal number	Proposal register sequence	
2	«dd Month yyyy» · «proposal date + 1 month»	Cover, 12.1	Send date + 1 month (S1)	
3	«price validity date»	12.1	Sales decision	
4	«fee» · «amount» · «MSU unit fee»	9. Table 9	Package (S13) × months; equal monthly instalments	
5	«N» MSU · «N» months	Tables 1, 3.1, 7, 9, 12.1	S13 answer and band	
6	«N» weeks · working days · delivery week · effort	7. Table 6 service start	Band worksheet, delivery confirmation	
7	«N» working days to start · «N» working days review · «N» days payment term	10. General Assumptions, 12.1	Standard value; per the S1 answer	
8	«REFERENCES»	ANNEX-1 References	Only references approved for this proposal	

#	FIELD	WHERE IN THE PROPOSAL	HOW IT IS SET	VALUE
9	«full name» · «title» · «e-mail / phone»	12.2 contacts	Komtaş commercial and technical contact	

Band Estimate — Service C

Completed after the answers are collected. The C band is chosen by the total of the monthly mix estimate; if the estimate lies between two packages, the upper package is proposed or the difference is written as extra MSU.

Bands are calibrated on proposal plans; to be updated with actual effort. Komtaş effort is not written into the proposal before delivery confirms it.

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Estimated MSU per month — mix total (S14)	≤ 100	101 – 150	> 150	
2	Service period (S13)	12 months	12 months	12 months	
	RESULT — selected package	100 MSU/month · 12 months	150 MSU/month · 12 months	200+ MSU/month · 12 months	

CALIBRATION — the package is M in all observed proposals: 150 MSU/month, 12 months. S 100 MSU/month and L 200+ MSU/month are proposed with the same catalogue and terms.

HYPERCARE — «N» months after go-live, technical and functional support of at most «N» days per week (source proposal: 3 months, at most 2 days per week).

TEAM — Service Manager (Project Manager) · DG Consultant · DQ Consultant · Support Engineer (4c Table 7).

PAYMENT — equal monthly instalments; extra MSU on order; hypercare in equal monthly instalments over its period (4c Section 9).

Service Selection Check

Before filling in the form, make sure that C is the right service. One request can match more than one row; tiers can be proposed together.

STATUS	RIGHT SERVICE
There is no data governance framework (organisation, roles, policies, glossary templates); a maturity assessment and a roadmap are wanted	A — Strategy & Framework
No technology has been selected yet; the product is to be selected on criteria derived from the needs	A + technology selection option
The framework exists (A or equivalent); business glossary, catalogue and lineage, data quality are to be set up on Informatica	B — modules B1 / B2 / B3
On-premises Axon / EDC / IDQ is installed; migration to IDMC is wanted	B — Migration variant
The platform is installed and piloted in one domain; rollout to new domains is wanted	B — Rollout variant
The platform is live; demand-based DQ / DG work and P1 / P2 / P3 support are wanted	C — Managed Service
The request is governance applied in operational systems when data is created — DQ checks at entry, SDLC gate	Operational Data Governance Enablement
The request is AI model and use-case risk, AI policies and an AI inventory	AI Governance Readiness
The request is the design and delivery of domain-based data products	Data Product Delivery
Only an Informatica licence is wanted; no consulting service	Licence proposal only — this package is not used

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
S1	Full legal name of the organisation and the short name used in the text; single company or group with subsidiaries	
S1	Is there an RFP, specification or requirements list; its number, response format and deadline	
S2	What triggers the work and which decision will it support — technology investment, rollout to other domains, KVKK or audit finding, AI initiatives	
S2	Which tier(s) are wanted — A Strategy & Framework / B Technology Enablement / C Managed Service; together or in sequence	
S2	Which data governance work exists today — policies, roles, glossary, catalogue, DQ — and on which platform	
S2	Is the platform live; when was or will it go live through Service B or another project	
S3	Service owner — name, title	
S3	Can a coordinator who submits and prioritises requests be appointed	
S4	Platform and domains the service will cover — which modules are live (glossary, catalogue and lineage, DQ)	
S5	Is Informatica installed or planned; IDMC (cloud) or on-premises (Axon / EDC / IDQ)	
S5	Licence status — existing, to be purchased or a separate licence proposal; number and date of the licence proposal	
S13	Monthly MSU capacity — 100 / 150 / 200+ (together with the monthly mix estimate)	
S13	Service period — standard 12 months	
S14	Expected monthly request mix — DQ and DG items and counts (table below)	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into the General Assumptions section of the proposal as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold.

The fourth row of S2 has a special place: if the platform is not live, C is not written; B or the post-go-live support within B is proposed first.
