DATA MESH READINESS ASSESSMENT — INTERNAL QUESTION SET

Komtaş internal working file. Not sent to the customer. The deduplicated questions from the 3a and 3b input forms (61 questions) are here; the SERVICE column shows which service the question is asked in. The minimum set needed for the proposal is on the Proposal Set sheet.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	A. Organisation and Proposal Details	BLOCKER	A · B	**Organisation and legal entities in scope — single company or group**	4a/4b · Cover, 1 «legal entities in scope»		Not answered		S1
2	A. Organisation and Proposal Details	Assumption	A · B	Proposal addressee — name, title, unit	4a/4b · Cover, 9.2		Not answered		Sales knows
3	A. Organisation and Proposal Details	Assumption	A · B	**Proposal date and expected decision date**	4a/4b · Cover, 9.1 validity		Not answered		Sales knows
4	A. Organisation and Proposal Details	BLOCKER	A · B	Is there an RFP or specification; if so, its number and response format	4a/4b · structure of the whole proposal, 2.4 source column		Not answered	Blocker in B; assumption in A	S1
5	A. Organisation and Proposal Details	Assumption	A · B	**Procurement process and approval steps**	4a/4b · 9.1		Not answered		S1
6	B. Decision	BLOCKER	A · B	Which decision will this assessment support — whether to start with data mesh, which domain to start with and when, organisational change, platform investment, reducing the load on the central team	4a/4b · 1 «DECISION», 2.1		Not answered		S2
7	B. Decision	BLOCKER	A	**Is the expected output the prerequisite gate per domain and a statement-based indicative result, or a level per dimension, readiness matrix, pilot recommendation and transition plan**	Service selection — 4a or 4b; 4a · 2.2, 3.1		Not answered	Only in 3a; if the answer points to B, 3b is used	S2
8	B. Decision	BLOCKER	A · B	Has the data mesh decision been taken, or is it an option to be assessed	4a/4b · 1, 5.1		Not answered	Blocker in B; assumption in A. Data mesh is an organisational decision, not a technology decision; without an answer the work reads as "explaining mesh"	S2
9	B. Decision	Assumption	A · B	**What is the most frequent complaint today — queue at the central team, data hard to find, unclear ownership**	4a/4b · 1, 3.2 (P1 focus)		Not answered		In P0
10	B. Decision	Assumption	A · B	Has a mesh or domain initiative been tried before; what was the outcome	4a/4b · 5.1; 4b · recurring pattern check		Not answered		In P0
11	B. Decision	Assumption	B	**How will success be measured — which outcome counts as "done"**	4b · 1		Not answered		In P0
12	C. Sponsor and Senior Management Access	BLOCKER	A · B	Who is the sponsor — can a CDO or data organisation lead be named	4a/4b · 7.3, 5.3		Not answered	Data mesh is an organisational decision; the sponsor is the person who opens access to the domain heads	S3
13	C. Sponsor and Senior Management Access	BLOCKER	A · B	**How will access to the domain heads and the senior management calendar be arranged — easy, medium, hard**	4a/4b · 6, 7.2; 4b · 2.4 «CALENDAR ACCESS» (driver 9)		Not answered	Blocker and band driver in B; assumption in A. Hard access cannot be offset by adding people	S3
14	C. Sponsor and Senior Management Access	Assumption	A · B	Who will make the decision, and by what date	4a/4b · 6, 9.1 validity		Not answered		S2
15	C. Sponsor and Senior Management Access	Assumption	A · B	**Who will the result be presented to — the data team or senior management**	4a/4b · 1, 4 (P4 read-out)		Not answered		In P0
16	D. Domain Scope	BLOCKER	A · B	Names and number of the domains in scope	4a/4b · 2.4 «DOMAINS», «N» (driver 1); 4a · 2.3		Not answered	Dominant band driver; narrowing the scope by domain is the most effective schedule lever	S4
17	D. Domain Scope	BLOCKER	A · B	**Are the domain boundaries written down; is it defined which data belongs to which domain**	4a · 2.3 (gate item 1); 4b · 2.3 (D1); 5.1		Not answered	Komtaş does not draw the boundary; the assessment measures whether it is written and consistent. The item 1 document question in 3a F is also covered here	S4
18	D. Domain Scope	Assumption	B	Are overlapping data areas between domains known	4b · 2.3 (D1), 3.2 (P1 focus)		Not answered		In P0
19	D. Domain Scope	Assumption	A · B	**Does the domain definition follow the business organisation or system boundaries**	4a · 3.2 (P1 focus); 4b · 2.3 (D1)		Not answered		In P0
20	D. Domain Scope	Assumption	A · B	Are any domains, units or legal entities to be excluded from scope	4a/4b · 2.5		Not answered		In P0
21	E. Scale and Interview Plan	BLOCKER	A · B	**Estimated number of people to interview and their split by domain — head, data owner, consumer**	4a/4b · 2.4 «N» (driver 2), 6, 7.2		Not answered	Main schedule driver. In each domain at least one head, one data owner and one consumer are interviewed; the load on the customer side grows with the number of domains	S5
22	E. Scale and Interview Plan	Assumption	A · B	Current size and workload of the central data team	4a/4b · 2.4 «N» (driver 4); 4b · 2.3 (D9)		Not answered	Workload is asked only in B	S5

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
23	E. Scale and Interview Plan	Assumption	A	**Can interviews with domain heads and data owners be arranged**	4a · 7.2, 6		Not answered		In P0
24	E. Scale and Interview Plan	Assumption	A	Can the central data team and the platform side be interviewed	4a · 7.2		Not answered		In P0
25	E. Scale and Interview Plan	Assumption	B	**Will consumer representatives take part in the interviews**	4b · 2.3 (D8), 7.2		Not answered		In P0
26	E. Scale and Interview Plan	Assumption	A · B	Will the engagement be run remotely, on site or hybrid	4a/4b · 5.4 «remotely / on site / hybrid»		Not answered		In P0
27	E. Scale and Interview Plan	Assumption	A · B	**Is access to systems or data content needed**	4a/4b · 5.2		Not answered	Not asked in 3a or 3b; readiness evidence is organisational and this is stated in the proposal	Stated in proposal
28	F. Dimension Scope and Prerequisite Gate	BLOCKER	B	Are all ten dimensions (D1–D10) in scope; is any dimension to be excluded	4b · 2.3, «OUT-OF-SCOPE DIMENSION»		Not answered	The gate item fed by an excluded dimension stays statement-based only; this is written in the proposal as a constraint	S8
29	F. Dimension Scope and Prerequisite Gate	Assumption	B	**Is any dimension to be covered in more depth**	4b · 3 (Methodology), 3.2 (P1 focus)		Not answered		In P0
30	F. Dimension Scope and Prerequisite Gate	BLOCKER	A	Can the five gate items be checked for each domain in scope through documents and interviews	4a · 2.3, 3, 5.2		Not answered	"No" does not stop the proposal; it is the first finding. An item that cannot be checked is reported as "Not assessed", never as met	S6
31	G. Data Products and Catalogue	BLOCKER	A · B	**Is anything called a "data product" today; how many**	4a/4b · 2.4 «N» (driver 3); 4b · 2.3 (D2)		Not answered	Blocker in B (S9). In A taken as a statement with S6, not verified	S9
32	G. Data Products and Catalogue	Assumption	B	Is there a catalogue product; can the number of registered products and the access-request time be shared	4b · 2.3 (D7), 5.2 — measurement evidence		Not answered	If the counts are shared, D7 is placed with measurement evidence; otherwise it relies on statements and observation	S9
33	G. Data Products and Catalogue	Assumption	B	**Do the products have a written data contract, SLA and versioning rule**	4b · 2.3 (D2, D8)		Not answered		In P0
34	G. Data Products and Catalogue	Assumption	B	Are the consumers of each product known	4b · 2.3 (D8)		Not answered		In P0
35	G. Data Products and Catalogue	Assumption	B	**Can products be selected for review as a sample**	4b · 3.2 (P1), 4		Not answered	Data product assessment is not a separate service but dimension D2; products are assessed on a sample	In P0
36	H. Platform and Self-Serve Publishing Path	BLOCKER	A · B	Can a domain publish a data product without raising a ticket with the central team	4a · 2.3 (gate item 4); 4b · 2.3 (D3)		Not answered	Blocker in B (S10). In A it is gate item 4; whether the publishing path can be described in a document or interview is asked with S6	S10
37	H. Platform and Self-Serve Publishing Path	Assumption	A · B	**Which data platforms are in scope — warehouse, lakehouse, other; how many**	4a/4b · 2.4 «N» (driver 5), 2.5		Not answered	In A taken as a statement with S6. The platform is covered only for its ability to let domains publish; its own maturity is the subject of Lakehouse / DWH Assessment	S10
38	H. Platform and Self-Serve Publishing Path	Assumption	B	How much of environment provisioning, templates and automation is ready	4b · 2.3 (D3)		Not answered		In P0
39	H. Platform and Self-Serve Publishing Path	Assumption	B	**Can a product be traced end to end from idea to publication**	4b · 3.2 (P1, observation evidence)		Not answered		In P0
40	H. Platform and Self-Serve Publishing Path	Assumption	B	To what extent are lineage and metadata collected	4b · 2.3 (D7)		Not answered		In P0
41	I. Governance, Standards and Documentation	BLOCKER	A · B	**Governance maturity — are cross-domain common standards (schema, keys, naming, quality) written, partial or absent**	4a · 2.3 (gate item 5); 4b · 2.4 «GOVERNANCE STATUS» (driver 7), 2.3 (D4, D5)		Not answered	Blocker and band driver in B (S11). In A it is gate item 5; the standards document and domain sign-off are checked against documents in P1	S11
42	I. Governance, Standards and Documentation	BLOCKER	B	Documentation maturity — are the organisation chart, domain definition, role assignments and standards written, partial or absent	4b · 2.4 «DOCUMENTATION STATUS» (driver 8), 5.2		Not answered	Without documents, evidence is produced from interviews in P1 and the number of interviews grows	S11
43	I. Governance, Standards and Documentation	BLOCKER	A	**Can the organisation chart, role assignments, domain definitions and standards documents be shared**	4a · 3.2 (P1 evidence collection), 5.2		Not answered	Only in 3a. Without documents the related gate item stays statement-based and is marked as such in the result; in B the level is taken with the documentation maturity question	S7

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
44	I. Governance, Standards and Documentation	Assumption	B	Who sets the standards and how is compliance monitored	4b · 2.3 (D4)		Not answered		In P0
45	I. Governance, Standards and Documentation	Assumption	B	**Is there master data or common definition work**	4b · 2.3 (D5)		Not answered	If common definitions are weak, the routing is to ontology / semantic layer work	In P0
46	I. Governance, Standards and Documentation	Assumption	B	Are there regulated data areas	4b · 2.3 (D4), 5.1		Not answered		Assumption in proposal
47	J. Organisation, Capacity and Incentives	BLOCKER	A · B	**Is there a named person in the domains who takes on data product ownership**	4a · 2.3 (gate item 2); 4b · 2.3 (D1)		Not answered	Blocker in 3b; the item 2 document question in 3a. Not in the proposal set: it is a gate item and the subject of the work; answers tend to be optimistic and are verified in P1 against the assignment letter	In P0
48	J. Organisation, Capacity and Incentives	BLOCKER	A · B	Is there dedicated data engineering capacity within the domain — how many people	4a · 2.3 (gate item 3); 4b · 2.3 (D6)		Not answered	Blocker in 3b; the item 3 statement question in 3a. Not in the proposal set: it is the most frequently skipped gate item; verified in P1 against the organisation record and workload	In P0
49	J. Organisation, Capacity and Incentives	Assumption	A · B	**Number of legal entities or locations**	4a/4b · 2.4 «N» (driver 6)		Not answered	In A written into 2.4 from the S1 answer	S12
50	J. Organisation, Capacity and Incentives	Assumption	B	Will HR or the organisation side take part; has role definition or headcount work been done	4b · 2.3 (D10), 7.2		Not answered	If they do not, D10 falls back to statements	S12
51	J. Organisation, Capacity and Incentives	Assumption	B	**Has the new role of the central team been discussed**	4b · 2.3 (D9)		Not answered		In P0
52	K. Pilot Domain and Target Levels	Assumption	B	Which domain or domains are considered as pilot candidates; why	4b · 4 (P3 pilot recommendation), 5.3		Not answered	The pilot is not the most willing domain but the one that meets the most prerequisites; the candidate is tested on evidence in P3 and the recommendation may differ	S13
53	K. Pilot Domain and Target Levels	Assumption	B	**Target start date for the pilot**	4b · 1 (decision sentence), 6		Not answered		S13
54	K. Pilot Domain and Target Levels	Assumption	B	Can a target level (1–5) be set for each of the ten dimensions; who will set it	4b · 2.3, 5.3; P0 deliverable		Not answered	The answer per dimension goes in the table in 3b K. For a first pilot, level three is enough in most dimensions	In P0
55	K. Pilot Domain and Target Levels	Assumption	B	**Will the target level differ by domain**	4b · 5.3; P0 deliverable		Not answered		In P0
56	L. Previous Work and Funding	Assumption	B	Has a data mesh, data organisation or data product assessment been done before — yes, partial, no	4b · 2.4 «PREVIOUS ASSESSMENT» (driver 10), 5.1		Not answered	A's evidence inventory is reused in B and not charged twice	S14
57	L. Previous Work and Funding	Assumption	B	**Is data work funded centrally or by the domains; is an incentive model for the domains known**	4b · 2.3 (D10)		Not answered		S14
58	M. Commercial Framework	Assumption	A · B	Is there an approved budget	4a/4b · 8.1 «fee»		Not answered		Sales knows
59	M. Commercial Framework	Assumption	A · B	**Schedule constraint — budget period, organisational change timetable, management presentation**	4a/4b · 6		Not answered		Sales knows
60	M. Commercial Framework	Assumption	A · B	Are there competitors, and who	4a/4b · emphasis and section weights		Not answered		Sales knows
61	M. Commercial Framework	Assumption	A · B	**Will B or pilot domain work also be discussed after the assessment**	4a/4b · 2.5, follow-on proposal		Not answered		Sales knows

MINIMUM QUESTION SET FOR THE PROPOSAL — 14 QUESTIONS

When these fourteen questions are answered, selected by the SERVICE column, the proposal can be written: seven questions for A, twelve for B. Twenty-eight of the sixty-one questions in the list are combined here; the remaining thirty-three stay in P0, on the sales side, or in the proposal as an assumption or statement.

#	BLOCK	SERVICE	QUESTION	WHY IT IS NEEDED	IF NO ANSWER	ANSWER	STATUS	QUESTIONS COVERED
S1	COMMON · DETAILS	A · B	**Which legal entities are in scope; is there an RFP or specification; how does the procurement process work?**	The cover, 1. Executive Summary and the 9.1 conditions are written from this. If there is an RFP, the proposal is structured accordingly. In A the number of legal entities is written into 2.4 from here (driver 6).	**Proposal cannot be written**		Not answered	1, 4, 5, 49
S2	COMMON · DECISION	A · B	**Which decision will the engagement support (reducing the central team's load, organisational change, platform investment, budget justification); has a data mesh decision been taken or is it an option to be evaluated; who will make the decision, and when? Is the expected result the prerequisite gate per domain with an indicative ready-to-start result (A), or current and target level in ten dimensions with a readiness matrix, pilot and transition plan (B)?**	Service selection depends on this answer. 1. Executive Summary and 2.1 Objective are written from it; the decision date determines the schedule and proposal validity. Without an answer the work reads as "explaining mesh" and the fee cannot be justified.	**Service cannot be selected**		Not answered	6, 7, 8, 14
S3	COMMON · SPONSOR	A · B	**Can the sponsor of the work (CDO or equivalent) be named; is access to the calendars of senior management and domain managers easy, medium or hard?**	Data mesh is an organisational decision; without a sponsor the findings do not turn into a decision. Calendar access determines 6. Project Plan and 7.2 Expected participation; in B it is the 2.4 «CALENDAR ACCESS» row (driver 9).	Schedule cannot be given		Not answered	12, 13
S4	COMMON · DOMAIN	A · B	**Which domains are in scope, and how many; are the domain boundaries — which data belongs to which domain — written?**	The number of domains is the dominant band driver (driver 1); the 2.4 «DOMAINS» row is written from this. A written boundary is the first item of the prerequisite gate. Komtaş does not draw the boundary; it is the organisation's decision.	Band cannot be selected		Not answered	16, 17
S5	COMMON · SCALE	A · B	**How many people will be interviewed, and how are they split by domain (head, data owner, consumer); how many people are in the central data team?**	The two drivers that set schedule and effort in both services (2.4, drivers 2 and 4). In each domain at least one head, one data owner and one consumer are interviewed; the load on the customer side grows with the number of domains and is the highest customer load in the family.	Band cannot be selected		Not answered	21, 22
S6	A · GATE	A	**Can the five prerequisite items (domain boundary, named product owner, in-domain capacity, self-serve publishing path, commitment to common rules) be checked for each domain in scope from documents and interviews? As a statement, how many data products and data platforms are there?**	The 4a 2.3 prerequisite gate and drivers 3 and 5 in 2.4 are written from this. A's result is the gate and an indicative ready-to-start result per domain, marked as statement-based. If dimension levels, a readiness matrix or a pilot are required, the right service is B.	Scope section cannot be written		Not answered	30, 31, 37
S7	A · EVIDENCE	A	**Can the organisation chart, role assignments, domain definitions and standards be shared?**	A's evidence is documents and interviews; no system access is given. Without documents the gate items are marked on statements only and the number of "Not assessed" items grows; the schedule shifts to the number of interviews.	Schedule cannot be given		Not answered	43
S8	B · SCOPE	B	**Are all ten dimensions (D1–D10) in scope; is any dimension to be excluded?**	The 4b 2.3 Assessment Dimensions and the «OUT-OF-SCOPE DIMENSION» markers are filled in from this. Data product assessment is not a separate service; it is part of this work as dimension D2.	Scope section cannot be written		Not answered	28
S9	B · DATA PRODUCT	B	**How many products are called "data products" today; is there a catalogue, and can the number of registered products and access-request times be shared?**	Driver 3 in 2.4. If products exist, D2 and D8 are assessed on a sample. If catalogue counts are shared, D7 is placed with measurement evidence; otherwise it relies on statements and observation.	Band cannot be selected		Not answered	31, 32
S10	B · PLATFORM	B	**How many data platforms are in scope (warehouse, lakehouse, other); can a domain publish a data product without raising a ticket with the central team?**	Driver 5 in 2.4 and prerequisite 4 (self-serve publishing path). The platform is covered only for its ability to let domains publish; its own maturity is the subject of Lakehouse / DWH Assessment (2.5).	Band cannot be selected		Not answered	36, 37
S11	B · GOVERNANCE	B	**Are governance rules and common standards across domains written, partial or absent? Is the organisation, role and domain documentation written, partial or absent?**	The 2.4 «GOVERNANCE STATUS» and «DOCUMENTATION STATUS» rows (drivers 7 and 8). Without documents, evidence is produced from interviews in P1 and the number of interviews grows.	**Band cannot be selected**		Not answered	41, 42
S12	B · ORGANISATION	B	**How many legal entities or locations are in scope; will HR / the organisation side take part in the work?**	Driver 6 in 2.4 and 7.2 Expected participation. Without role definition and headcount information, D10 (organisation, incentives and funding) falls back to statements.	Schedule cannot be given		Not answered	49, 50
S13	B · PILOT	B	**Is there a domain considered as a pilot candidate; what is the target start date?**	The emphasis of the pilot recommendation and transition plan in 4. Deliverables and 6. Project Plan are written from this. The pilot recommendation is made in P3 on the domain that meets the most prerequisites; the customer's candidate is an input, not a decision.	**Pilot emphasis written as an assumption**		Not answered	52, 53
S14	B · PREVIOUS	B	**Has a data mesh, domain or data organisation assessment been done before; is the funding and incentive model for data work known?**	The 2.4 «PREVIOUS ASSESSMENT» row (driver 10). If A was done, its evidence inventory is reused in B and not charged twice. The funding and incentive model is an input to D10.	**Band cannot be selected**		Not answered	56, 57

This package has no Mode A / Mode B access model: readiness evidence is organisational (documents and interviews). In A no system access is given; the gate is run on documents and interviews (S6, S7). In B, where a catalogue or platform exists, product counts and access-request times are used as measurement evidence if the customer shares them (S9). All six band drivers of A and all ten of B are in the minimum set; in A the data product and platform counts are taken as statements with S6 and the legal entity count with S1 (QUESTIONS COVERED shows these as well). Product owner and in-domain capacity are gate items, not proposal questions; they are marked with evidence in P1–P2. S1–S5 are common to both services; if both services are proposed to the same customer, they are asked once.

NOTE

33 QUESTIONS OUTSIDE THE PROPOSAL SET

They were not deleted; when they are asked has been clarified. Some are never asked — they are written in the proposal as an assumption or statement.

WHEN	COUNT	RATIONALE
In P0	25	Complaints and open issues, previous mesh initiative, success criterion, who the result is presented to, basis of the domain definition, overlaps between domains, out-of-scope domains and units, access for interviews (A), consumer representatives, work location, dimension to be covered in depth, product contract, SLA and versioning, product consumers, choice of sample products, environment provisioning and automation, end-to-end tracing, lineage and metadata, ownership of standards, master data, product owner, in-domain capacity, new role of the central team, target level per dimension and domain. Product owner and capacity are gate items and the subject of the work; they are marked with evidence in P1–P2, not at proposal stage. Asked when the document list is opened and the interview plan is made.
Sales knows	6	Proposal recipient, proposal date, budget, schedule constraint, competitor situation, B or pilot domain work after the assessment. The commercial framework is the responsibility of sales; it is taken from the CRM or the sales representative.
Assumption in proposal	1	Regulated data areas (B). Not a band driver; if unanswered, it is written into 5.1 as an assumption and verified in P0. All band drivers (six in A, ten in B) are in the minimum set.
Stated in proposal	1	Access to systems and data content. This is to be stated, not asked: readiness evidence is organisational; 4a/4b 5.2 states that the assessment is carried out on documents and interviews and needs no system access.
Total	33	28 of the 61 questions were merged into the 14 questions of the Proposal Set; the remaining 33 were distributed across the four buckets above.

PROPOSAL READINESS STATUS

This sheet is calculated automatically. The decision on whether a proposal can be written is made separately for each service, based on the relevant questions on the Proposal Set sheet (SERVICE column).

MEASURE	A · READINESS CHECK	B · READINESS ASSESSMENT	DESCRIPTION
Number of proposal set questions	7	12	Common questions (S1–S5) and service-specific questions (A: S6–S7, B: S8–S14)
Answered	0	0	STATUS column on the Proposal Set sheet
Partially answered	0	0	Written as an assumption in the proposal
Missing	7	12	Unanswered proposal question
Completion	0%	0%	Answered / total
CAN THE PROPOSAL BE WRITTEN	**NO — 7 questions missing**	**NO — 12 questions missing**	YES if missing is zero
Service questions (Questions)	37	56	Questions carrying the relevant letter in the SERVICE column of the full list
Service questions — deferred to P0	10	23	Asked in the first week of the work
Questions in the whole form	61		Reference: full list of 61 questions (3a, 3b deduplicated)
Deferred to P0 (all)	25		Asked in the first week of the work

Rule: a service's proposal is not written until that service's proposal set is complete. If it must be written, each missing item is written into section 5 of the proposal as an assumption and it is stated that the scope will be reassessed if that assumption does not hold.

STATUS BY SECTION

SECTION	QUESTION	BLOCKER	ANSWERED	MISSING BLOCKER
A. Organisation and Proposal Details	5	2	0	2
B. Decision	6	3	0	3

M. Commercial Framework	4	0	0	0
Total	**61**	**19**	**0**	**19**

TO BE SENT TO THE SAT OFFICE AFTER THE MEETING

Once these items arrive, the proposal text can be produced.

#	ITEM	SENT	NOTE
1	This completed form (with the answers from the customer form entered)	No	
2	Your meeting notes — raw is fine, do not try to tidy them	No	
3	RFP / specification file, if any	No	
4	Organisation chart, role assignments, domain definitions, standards or catalogue output shared by the customer	No	
5	Service decision: A, B or both; names and number of domains in scope, and the pilot candidate if any	No	
6	Pricing decision: which band (S / M / L); if A was done before, the evidence inventory reused in B	No	
7	Team decision: which consultants will be assigned (for table 7.1)	No	

HOW TO USE

TWO-FILE SET-UP

Sent to the customer	data-mesh-readiness-assessment-5-musteri-soru-seti-en.xlsx — twenty questions and an information note. The SERVICE column states which service each question is required for. Assessment dimensions, prerequisite items, target levels and methodology are not asked of the customer; Komtaş proposes them based on the answers.
This file (internal)	data-mesh-readiness-assessment-6-ic-soru-seti-en.xlsx — full list of 61 questions, the 14-question minimum set required for the proposal (by service: A 7, B 12) and those deferred to P0. Answers from the customer form are entered in this file and the proposal is written from here.
Minimum set logic	Twenty-eight of the sixty-one questions have been merged into fourteen questions. S1–S5 are common to both services; S6–S7 belong only to A and S8–S14 only to B. Because the remaining thirty-three questions do not change the proposal, they have been left to the first week of the work (P0), to sales, or written in the proposal as an assumption or statement. Criterion: if doubling the number in the answer does not double the work, that question is not a proposal question.

SERVICE column	A · Data Mesh Readiness Check, B · Data Mesh Readiness Assessment. “A · B” marks a question asked in both services, “A” one asked only in the Readiness Check and “B” one asked only in the Readiness Assessment. Once the service to be proposed is known, only the questions carrying that letter are needed.
Fields to fill in	On the Questions sheet, only the ANSWER (G), STATUS (H) and NOTE (I) columns are filled in; on the Proposal Set sheet, ANSWER (G) and STATUS (H). Yellow cells show the fields to fill in. Pre-written short explanations in the NOTE column may be added to without deleting them.
Other sheets	Figures on the Summary, Section Breakdown and Remaining sheets are calculated automatically; do not change them by hand.
PRIORITY — BLOCKER	The proposal is not written until this question is answered; it cannot be filled with an assumption. The row stays red. For questions that are a blocker in one service and an assumption in another, the distinction is noted in the NOTE column.
PRIORITY — Assumption	If left unanswered, it is written into section 5 of the proposal as an assumption.
STATUS — Answered	A clear answer was received. The row turns green.
STATUS — Partial	An answer was received but it is incomplete or unclear. Written as an assumption in the proposal.
STATUS — Not answered	Not yet asked, or no answer received.

“We don’t know” as an answer	This is also an answer and is often the first finding. STATUS is marked “Partial” and it is written in the NOTE field.
Writing the proposal	When the “CAN THE PROPOSAL BE WRITTEN” row for a service on the Summary sheet is YES, filling in that service's proposal template begins: for A data-mesh-readiness-assessment-4a-readiness-check-teklif-sablonu-en.docx, for B data-mesh-readiness-assessment-4b-readiness-assessment-teklif-sablonu-en.docx.
WHERE IT FILLS IN THE PROPOSAL	Format is “4b · 2.4”: template (4a, 4b) and section number. “4a/4b · 7.2” refers to the same section in both templates. 2.3 is the prerequisite gate in 4a and Assessment Dimensions in 4b; “driver N” is the row number of the band table in 3a and 3b (1–6 in A, 1–10 in B; the first six drivers are the same in both services).
Source	The questions were produced by deduplicating the files data-mesh-readiness-assessment-3a-readiness-check-girdi-formu-en.docx and data-mesh-readiness-assessment-3b-readiness-assessment-girdi-formu-en.docx; the SECTION column follows the sections of 3b (A–M), and questions found only in 3a are placed in the matching section (gate questions in F). The five item questions in 3a F are merged with the matching 3b questions. The target level for B’s ten dimensions is collected in a single row; the per-dimension answer is written in the table in 3b. Data Product Assessment is not sold separately; its content is in B’s dimension D2. When a question’s text changes, both Excel files are updated.

EXAMPLE ROW

QUESTION	ANSWER / STATUS / NOTE
Number and names of domains in scope	“Sales, Finance and Operations confirmed; HR under discussion” · Partial · “Scope of the HR domain to be settled in P0”
