DATA PRODUCT DELIVERY — INTERNAL QUESTION SET

Komtaş internal working file. Not sent to the customer. The deduplicated questions from the 3a and 3b input forms (70 questions) are here; the SERVICE column shows which service the question is asked in. The minimum set needed for the proposal is on the Proposal Set sheet.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	A. Organisation and Proposal Details	BLOCKER	A · B	**Organisation and legal entities in scope — single company or group**	4a/4b · Cover, 1		Not answered		S1
2	A. Organisation and Proposal Details	Assumption	A · B	Proposal recipient — name, title, unit	4a/4b · Cover, 9.2		Not answered		Sales knows
3	A. Organisation and Proposal Details	Assumption	A · B	Proposal date and expected decision date	4a/4b · Cover, 9.1 validity		Not answered		Sales knows
4	A. Organisation and Proposal Details	BLOCKER	A · B	**Is there an RFP or specification; if so, its number and response format**	4a/4b · structure of the whole proposal		Not answered	Blocker for B; assumption for A	S1
5	A. Organisation and Proposal Details	Assumption	A · B	Are there competitors, and who — another consultancy, the platform vendor's services team, the current implementation partner	4a/4b · 1 (emphasis), 8 (price position)		Not answered		S1
6	B. Decision and Trigger	BLOCKER	A · B	**Which decision will the work support; what is the trigger — a stalled data mesh initiative, AI / agent projects that need trusted inputs, self-service analytics, data sharing with group companies or partners, different numbers for the same KPI · for B: which trigger the pilot addresses**	4a/4b · 1 «DECISION», 2.1		Not answered		S2
7	B. Decision and Trigger	BLOCKER	A · B	**Which service is requested — A Phase 0, B pilot + rollout, or both**	Service selection; 4a/4b · 2.2		Not answered	See the service selection check in 3a/3b. B is not proposed without Phase 0 or an equivalent design (S8). If operating-model change is wanted, the entry point is Data Mesh Readiness; if there is no platform, Lakehouse / DWH Assessment or Data Modernization is proposed	S2
8	B. Decision and Trigger	Assumption	A · B	Who will make the decision, and when · for B: who decides on the rollout after the pilot	4a/4b · 7.3, 9.1 validity; 4b · 6		Not answered		S2
9	B. Decision and Trigger	Assumption	A · B	Is there a target date — go-live of an AI / agent project, regulatory reporting calendar, start of partner data sharing, budget period	4a/4b · 1, 6		Not answered	If a consumer sets the date, the pilot candidate is that consumer's product	S2
10	B. Decision and Trigger	Assumption	A · B	What do consumers complain about most today — long waits for data access, different numbers for the same KPI, tables without a known owner, schemas that change without notice, data of unknown freshness	4a · 2.1, 3.2 (P1 focus areas)		Not answered		At start of work
11	B. Decision and Trigger	Assumption	A · B	Has a data mesh, data catalogue or data governance project been carried out before; what was the outcome	4a · 3.2, 5.1; 4b · 2.4		Not answered	If a mesh initiative has stalled, its domain and owner definitions are used as input in P1	Sales knows
12	C. Datasets, Data Products and Consumers	BLOCKER	A · B	**Which datasets are used by more than one team or system today; who owns each one**	4a · 2.3, 3.2 (P1), 4 (D1); 4b · 2.3		Not answered	First question of the technical block; question 1 in the customer form. The starting point of the candidate data product list. A dataset without a known owner is at most Conditional at the gate	S3
13	C. Datasets, Data Products and Consumers	BLOCKER	A · B	**Names and number of the candidate data products; the consumers and use of each · for B: the Phase 0 candidate list and gate results**	4a · 2.3, 2.4 «PRODUCTS» (band driver); 4b · 2.3, wave plan		Not answered	≤ 3 · 4–10 · > 10. Candidate data product table in 3a (product · consumers / use · owner · source systems · output port · personal data · priority)	S3
14	C. Datasets, Data Products and Consumers	Assumption	A · B	Number of datasets defined or published as data products today — shared views, regular extracts, APIs	4a · 2.4 (band driver), 4 (D1, D2)		Not answered	≤ 10 · 11–50 · > 50; each is placed on the eight properties in P2	S3
15	C. Datasets, Data Products and Consumers	Assumption	A	Consumer groups / use cases — reporting and analytics, AI / agents, regulatory reporting, partner data sharing; how many	4a · 2.4 (band driver), 3.2 (P1 interviews)		Not answered	≤ 3 · 4–8 · > 8	S6
16	C. Datasets, Data Products and Consumers	Assumption	A	How is data provided to consumers today — direct table access, shared views, ad-hoc extracts, file transfers, APIs	4a · 3.2 (P1), 4 (D1)		Not answered		Settled in Phase 0
17	C. Datasets, Data Products and Consumers	Assumption	A	Are there known copies of the same dataset or different calculations of the same KPI; examples	4a · 3.2 (P1), 4 (D3)		Not answered		Settled in Phase 0
18	C. Datasets, Data Products and Consumers	Assumption	A · B	Do the candidate products hold personal data; is there a classification, masking and access policy under KVKK	4a · 2.3, 4; 4b · 2.3, 5.1		Not answered	Without a policy, the pilot product starts with draft classes and the most restrictive access	Assumption in proposal
19	D. Platform and Catalogue	BLOCKER	A · B	**Data platform(s) — Databricks, Snowflake, Google BigQuery, Microsoft Fabric, on-premise DWH · for B: the platform where the pilot product is published and access-controlled**	4a/4b · 2.4 «PLATFORM», 3.1; 4b · 5.2		Not answered	Blocker for B; assumption for A. Without a platform where products can be published and access-controlled, no candidate passes the gate; Lakehouse / DWH Assessment or Data Modernization is proposed	S4
20	D. Platform and Catalogue	Assumption	A · B	Catalogue / governance tools — Unity Catalog, Dataplex, Microsoft Purview, Informatica (Cloud Data Governance and Catalog, Data Marketplace), OpenMetadata, other, none	4a/4b · 2.4 «PLATFORM», 3.1; 4b · 5.2		Not answered	Selects the technology adapter; editions are confirmed in Phase 0. Tool selection does not go beyond the adapter choice	S4
21	D. Platform and Catalogue	Assumption	A · B	Where are the glossary and KPI definitions kept today; who maintains them	4a · 3.2 (P2), 4 (D2)		Not answered		Settled in Phase 0

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
22	D. Platform and Catalogue	Assumption	A · B	Where do data quality checks and freshness / volume monitoring run today — pipeline tests, a DQ tool, platform features, none	4a · 3.2 (P2); 4b · 3.3 (PL2)		Not answered		Settled in Phase 0
23	D. Platform and Catalogue	Assumption	A · B	How is lineage seen today — automatic lineage in the catalogue tool, manual documentation, none	4a · 3.2 (P2); 4b · 3.3 (PL2)		Not answered		Settled in Phase 0
24	D. Platform and Catalogue	Assumption	A · B	Are data contracts used (ODCS or an in-house template); how are schema changes announced to consumers	4a · 3.2 (P3), 4 (D4); 4b · 3.2		Not answered		Settled in Phase 0
25	D. Platform and Catalogue	Assumption	A	How does data access request work today — request channel, approver, average time	4a · 3.2 (P1), 4 (D6 KPI baseline)		Not answered		Settled in Phase 0
26	D. Platform and Catalogue	Assumption	A	Can platform cost be seen by product, team or workload	4a · 3.2 (P2)		Not answered		Settled in Phase 0
27	E. Ownership and Operating Model	BLOCKER	A · B	**Who will own the data products — a central data team, domain teams, mixed**	4a · 3.1, 4 (D5 operating model sketch); 4b · 7.2		Not answered	A central model is valid too; no mesh transformation is required	S5
28	E. Ownership and Operating Model	Assumption	A · B	Is there a data mesh initiative running or planned; are domains defined	Service selection; 4a/4b · 2.1, 2.5		Not answered	Operating model and organisation design are out of scope (Data Mesh Readiness); this service delivers products into the mesh initiative	S5
29	E. Ownership and Operating Model	Assumption	A · B	Is there a platform team — shared infrastructure, self-service tools, access management	4a · 4 (D5 operating model sketch); 4b · 7.2		Not answered		S5
30	E. Ownership and Operating Model	Assumption	A	Are data owner and data steward roles defined today; is there a data office or governance council	4a · 4 (D5 operating model sketch)		Not answered		Settled in Phase 0
31	E. Ownership and Operating Model	Assumption	A	Are the people who could accept the owner role for the candidate products known (gate item 1)	4a · 7.2, 4 (D3)		Not answered		Settled in Phase 0
32	E. Ownership and Operating Model	Assumption	A	Can a build budget / capacity be set aside for the pilot and the waves (gate item 5)	4a · 4 (D3, D7)		Not answered		Settled in Phase 0
33	F. Scope and Scale	BLOCKER	A	**Names and number of the source systems in scope**	4a · 2.3, 2.4 (band driver)		Not answered	≤ 5 · 6–15 · > 15	S6
34	F. Scope and Scale	Assumption	A	Number of legal entities / countries in scope	4a · 2.4 (band driver)		Not answered	1 · 2–3 · > 3	S6
35	F. Scope and Scale	Assumption	A	Is any domain, system or company to be left out of scope	4a · 2.5		Not answered		S6
36	F. Scope and Scale	Assumption	A · B	Is there a regulatory reporting, data sharing or outsourcing obligation under BDDK or sector regulation; is there an open audit finding	4a/4b · 2.1, 5.1		Not answered		Assumption in proposal
37	F. Scope and Scale	Assumption	A	Is any platform or source system due to change in the near term — migration, new platform, system replacement	4a · 2.1, 3.2 (P3 roadmap)		Not answered	An upcoming migration affects the pilot candidate and the order of the waves	Assumption in proposal
38	G. Stakeholders and Access	BLOCKER	A	**Are data owners, consumers and the platform team available for interviews**	4a · 3.2 (P1), 5.3, 7.2		Not answered	If a consumer cannot be interviewed, the candidate's consumer criterion is assessed on an assumption at the gate; risk in 7.4	S7
39	G. Stakeholders and Access	Assumption	A	Number of interviewees (approximate)	4a · 2.4 (band driver), 7.2		Not answered	≤ 10 · 10–25 · > 25	S7
40	G. Stakeholders and Access	Assumption	A · B	Who is the project sponsor; is there a sponsor who can choose the pilot product and assign an owner	4a/4b · 7.3		Not answered		At start of work
41	G. Stakeholders and Access	Assumption	A	Can the dataset list, data dictionary and platform / catalogue documentation be shared in the first days after P0 starts	4a · 5.1, 5.3, 7.2		Not answered		At start of work
42	G. Stakeholders and Access	Assumption	A	Is access to business data needed — Phase 0 runs at the level of metadata and documents; access to source data is only confirmed for the gate; usage and access-time counts are run by the customer team or taken from platform logs and existing reports	4a · 5.2		Not answered		Stated in proposal
43	G. Stakeholders and Access	Assumption	A	Can access to the source data be confirmed — read-only access or sample data in Phase 0 (gate item 3)	4a · 5.2, 4 (D3)		Not answered	If access cannot be provided, the candidate is Not ready and is routed to data integration work	Settled in Phase 0
44	G. Stakeholders and Access	Assumption	A · B	Will the work be remote, on site or mixed; is VDI or VPN mandatory	4a/4b · 5.4 «remote / on site / mixed»		Not answered		At start of work
45	H. Pilot Scope and Team	BLOCKER	B	**Has Phase 0 (A) been done, or is there an equivalent design — dataset inventory, candidate list and gate results, product spec and data contract draft**	Proposal go/no-go; 4b · 2.2, 2.4		Not answered	If not, 4b is not written; A is proposed first	S8
46	H. Pilot Scope and Team	BLOCKER	B	**Are the pilot data product and the pilot consumer named; number of pilot products**	4b · 2.3, 2.4 «PILOT PRODUCT» / «PILOT CONSUMER» (pilot band driver)		Not answered	1 · 2 · 3. A candidate that is not Ready at the gate is not taken into the pilot	S8
47	H. Pilot Scope and Team	BLOCKER	B	**Source systems of the pilot product, and how many**	4b · 2.4 (pilot band driver)		Not answered	≤ 3 · 4–6 · > 6	S9
48	H. Pilot Scope and Team	BLOCKER	B	**Number of quality rules and SLOs for the pilot (approximate) — quality checks, freshness and availability targets**	4b · 2.4 (pilot band driver)		Not answered	≤ 20 · 20–50 · > 50	S9
49	H. Pilot Scope and Team	BLOCKER	B	**Output ports of the pilot product — SQL view / table, API, file export, event stream; how many**	4b · 2.4 (pilot band driver), 3.1		Not answered	1 · 2 · 3+; the port is chosen per consumer	S9
50	H. Pilot Scope and Team	BLOCKER	B	**Who will build the pilot product — the customer's data engineers, Komtaş, mixed; how much time the customer team can give during the pilot**	4b · 5.3, 7.1, 7.2		Not answered	In a mixed model, knowledge transfer is planned in PL2; if the customer team is not available, the pilot schedule does not hold	S10
51	H. Pilot Scope and Team	Assumption	B	Platform access and environments — development / test / production, workspace or project, service accounts; has access to the source data been confirmed	4b · 5.2, 5.3, 3.3 (PL2)		Not answered	Environments and access must be ready before PL2 starts	S10
52	H. Pilot Scope and Team	Assumption	B	Pipeline and code standards — CI/CD, version control, orchestration tool	4b · 3.3 (PL2), 5.2		Not answered		At start of work

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
53	H. Pilot Scope and Team	Assumption	B	Contact in the source system teams for questions about the source data	4b · 7.2		Not answered		At start of work
54	H. Pilot Scope and Team	Assumption	B	Has the owner of the pilot product accepted the role; can a steward be assigned	4b · 7.2		Not answered		At start of work
55	H. Pilot Scope and Team	Assumption	B	Data quality remediation in source systems — out of scope; issues are reported to the source owner	4b · 2.5, 7.4		Not answered		Stated in proposal
56	I. Acceptance and Publication	BLOCKER	B	**Consumer acceptance criteria — the pilot product meets the eight properties of the minimum standard, SLOs are measured, the pilot consumer is using the product**	4b · 3.4, 4		Not answered	There are no default targets; targets are set against the baseline measured in Phase 0	S11
57	I. Acceptance and Publication	Assumption	B	KPI baseline — time from access request to data for consumers, number of consumers per product and usage, quality SLO attainment	4b · 3.4 «%», 4		Not answered		S11
58	I. Acceptance and Publication	Assumption	B	Who will sign off the pilot — pilot consumer, product owner, sponsor	4b · 7.3		Not answered		S11
59	I. Acceptance and Publication	BLOCKER	B	**Catalogue publication and access request path — in which catalogue the product will be published; who approves access requests**	4b · 3.2, 3.3 (PL3), 5.2		Not answered	The product does not count as published until the access request path is defined	S12
60	I. Acceptance and Publication	Assumption	B	Release date to the consumer inside the pilot window; change freeze periods	4b · 3.3 (PL3), 6		Not answered	Release happens in PL3 and the KPIs are measured after it	S12
61	I. Acceptance and Publication	Assumption	B	Is a security or KVKK approval needed for the release; how long does it take	4b · 5.2, 7.4		Not answered		Assumption in proposal
62	J. Rollout and Commercial Framework	Assumption	A · B	Procurement process and approval steps	4a/4b · 9.1		Not answered		S1
63	J. Rollout and Commercial Framework	Assumption	A · B	Is there an approved budget	4a/4b · 8.1		Not answered		Sales knows
64	J. Rollout and Commercial Framework	Assumption	A	Is the Phase 0 fee to be deducted from the fee for B; within how many months can the B contract be signed	4a · 9.1 «OPTIONAL» deduction clause		Not answered	The period («N» months) is set by sales	S1
65	J. Rollout and Commercial Framework	BLOCKER	B	**Rollout pricing model — «OPTION 1 — FIXED FEE PER WAVE» or «OPTION 2 — CAPPED T&M»**	4b · 8.3 / 8.4 option blocks		Not answered	No single fixed price is given for the whole product portfolio	S13
66	J. Rollout and Commercial Framework	Assumption	B	Day rate — per role or a single rate; payment plan — pilot at phase exit, waves per accepted wave or monthly	4b · 8.1, 8 payment schedule		Not answered		S13
67	J. Rollout and Commercial Framework	Assumption	B	Interest in a managed service for product operations after the rollout (monitoring, data contract changes, new consumers)	4b · 8 «OPTIONAL» paragraph		Not answered		S13
68	J. Rollout and Commercial Framework	BLOCKER	B	**Data products / domains to be covered after the pilot, and the number of waves**	4b · 2.4 «N» waves, wave table, 6		Not answered	The wave list comes from the Phase 0 roadmap (D7)	S14
69	J. Rollout and Commercial Framework	Assumption	B	Wave criterion — by domain or by product group; priority (products with the most consumers, candidates that passed the gate, use cases with a fixed date)	4b · 3.3, 6		Not answered		S14
70	J. Rollout and Commercial Framework	Assumption	B	Who will operate the products after the rollout — product owners and the customer team, managed service	4b · 2.5, 4 (handover)		Not answered	Handover is in scope; operational support is the optional managed service	Stated in proposal

MINIMUM QUESTION SET FOR THE PROPOSAL — 14 QUESTIONS

When these fourteen questions are answered, selected by the SERVICE column, the proposal can be written: seven questions for A, twelve for B. Forty of the seventy questions in the list are combined here; the remaining thirty stay for the start of the work, on the sales side, in Phase 0, or in the proposal as an assumption or statement.

#	BLOCK	SERVICE	QUESTION	WHY IT IS NEEDED	IF NO ANSWER	ANSWER	STATUS	QUESTIONS COVERED
S1	COMMON · DETAILS	A · B	**Which legal entities are in scope; is there an RFP or specification; are there competitors; how does the procurement process work? For A: is the Phase 0 fee expected to be deducted from B?**	The cover, 1. Executive Summary and the 9.1 conditions are written from this. If there is an RFP, the proposal is structured accordingly; the competitor situation affects the price position. If a deduction is expected, the «OPTIONAL» clause in 4a 9.1 is kept with «N» months; otherwise it is deleted.	**Proposal cannot be written**		Not answered	1, 4, 5, 62, 64
S2	COMMON · DECISION	A · B	**What triggers the work — a stalled data mesh initiative, AI / agent projects that need trusted inputs, self-service analytics, data sharing with group companies or partners, different numbers for the same KPI? Which service is requested: A Phase 0 or B pilot + rollout? Who decides, and when?**	1. Executive Summary, 2.1 Programme Objective and 2.2 Service Structure are written from this. If a consumer sets the date (AI project, regulatory report, partner), the pilot candidate is that consumer's product. If operating-model change is wanted, Data Mesh Readiness is proposed; if there is no platform, Lakehouse / DWH Assessment or Data Modernization. The decision date sets the proposal validity.	Objective and summary cannot be written		Not answered	6, 7, 8, 9
S3	COMMON · PRODUCTS	A · B	**Which datasets are used by more than one team or system today, and who owns them? Which are the candidate data products, how many, and who are their consumers? How many datasets are published as data products today?**	First question of the technical block. The «PRODUCTS» row in 2.4 is written from this. Two band drivers for A (2.4): candidate data products ≤ 3 · 4–10 · > 10; existing data products / published datasets ≤ 10 · 11–50 · > 50. For B, the Phase 0 candidate list and gate results are used.	**Band cannot be selected**		Not answered	12, 13, 14
S4	COMMON · PLATFORM	A · B	**Which data platform(s) are in use — Databricks, Snowflake, Google BigQuery, Microsoft Fabric, on-premise DWH? Which catalogue / governance tools are in place — Unity Catalog, Dataplex, Microsoft Purview, Informatica, OpenMetadata, none?**	The «PLATFORM» row in 2.4 and 3.1 are written from this answer; it selects the technology adapter. Editions are confirmed in Phase 0. If there is no platform where a product can be published and access-controlled, no candidate passes the gate and B is not proposed. Licence costs are out of scope in both services.	Adapter cannot be selected		Not answered	19, 20
S5	COMMON · OWNERSHIP	A · B	**Who will own the data products — a central data team, domain teams, mixed? Is there a platform team? Is there a data mesh initiative running or planned?**	For A it sets the scope of the operating model sketch (owner, steward and platform team roles; publication and access request flow); for B the roles in 7.2. A central model is valid too. If operating-model or organisation change is wanted, it is out of scope and Data Mesh Readiness is proposed separately.	Roles and responsibilities cannot be written		Not answered	27, 28, 29
S6	A · SCOPE	A	**How many source systems are in scope; how many consumer groups / use cases; how many legal entities / countries? Is any domain or company to be left out of scope?**	4a 2.3 Scope Topics, 2.4 and 2.5 are filled in from this. Three band drivers: source systems ≤ 5 · 6–15 · > 15; consumer groups / use cases ≤ 3 · 4–8 · > 8; legal entities / countries 1 · 2–3 · > 3. The band is the highest band reached by at least three of the six drivers.	Band cannot be selected		Not answered	15, 33, 34, 35
S7	A · STAKEHOLDERS	A	**Are data owners, consumers and the platform team available for interviews; approximately how many people will be interviewed?**	The number of interviewees is a band driver (≤ 10 · 10–25 · > 25). 7.2 Expected participation and the 5.3 assumptions are written from this. If a candidate's consumer cannot be interviewed, the consumer criterion at the gate is assessed on an assumption and written as a risk in 7.4.	Schedule cannot be given		Not answered	38, 39
S8	B · PILOT	B	**Has Phase 0 been done, or is there an equivalent design (dataset inventory, candidate list and gate results, product spec and data contract draft)? Are the pilot data product and the pilot consumer named?**	B is not proposed on an undesigned product. The pilot product and consumer fill the «PILOT PRODUCT» and «PILOT CONSUMER» fields in 4b 2.3 and 2.4. The number of pilot products is a pilot band driver (1 · 2 · 3). A candidate that is not Ready at the gate is not taken into the pilot.	**Proposal cannot be written — A is proposed first**		Not answered	45, 46
S9	B · SCOPE	B	**How many source systems does the pilot product have; how many quality rules and SLOs will be defined; which output ports are needed — SQL view / table, API, file export, event stream?**	The other three drivers of the pilot band (2.4; the fourth is the number of pilot products in S8): source systems ≤ 3 · 4–6 · > 6; quality rules / SLOs ≤ 20 · 20–50 · > 50; output ports 1 · 2 · 3+. The band sets the pilot fee (8.2) and the PL2 duration.	Pilot fee cannot be given		Not answered	47, 48, 49
S10	B · TEAM	B	**Who will build the pilot product — the customer's data engineers, Komtaş, mixed? Are the platform environments and access to the source data ready at the start of the pilot?**	7.1 Komtaş team, 7.2 expected participation and the 5.3 assumptions are written from this. In a mixed model, knowledge transfer is added to PL2. If environments and access are not ready before PL2, the schedule slips and this is written as a risk in 7.4.	Team and schedule cannot be given		Not answered	50, 51
S11	B · ACCEPTANCE	B	**What are the pilot consumer's acceptance criteria; what is the KPI baseline (time from access request to data, usage); who signs off the result?**	Pilot acceptance is written in 4b 3.4 and 4 in measurable terms: the eight properties of the minimum standard, SLO attainment, consumer usage, baseline, target «%» and the person who signs off. There are no default targets; no percentage improvement is promised in advance.	Acceptance criterion cannot be written		Not answered	56, 57, 58
S12	B · PUBLICATION	B	**In which catalogue will the product be published; how will the access request process work and who approves; what is the release date to the consumer inside the pilot window?**	In PL3 the product is published in the catalogue, the access request path is opened and the KPIs are measured after release. Without a release window the pilot schedule is shifted. 5.2, 5.3 and 6. Project Plan are written from this.	Schedule cannot be given		Not answered	59, 60

#	BLOCK	SERVICE	QUESTION	WHY IT IS NEEDED	IF NO ANSWER	ANSWER	STATUS	QUESTIONS COVERED
S13	B · PRICE	B	**Which pricing model for the rollout — fixed fee per wave or capped T&M; what are the day rate, the cap and the payment terms; is there interest in a managed service?**	One of 4b 8.3 and 8.4 is kept and the other is deleted. The pilot fee (8.2) is fixed in either case. No single fixed price is given for the whole product portfolio. If there is no interest in a managed service, the «OPTIONAL» paragraph is deleted.	Fees section cannot be written		Not answered	65, 66, 67
S14	B · ROLLOUT	B	**Which data products / domains will be covered after the pilot; how many waves; is the wave criterion domain or product group?**	The «N» waves in 4b 2.4 and the wave table are written from this. Wave size varies with the number of products, source systems, quality rules / SLOs and output ports; the list comes from the Phase 0 roadmap (D7). Time to publish a new product is a KPI from wave 2 onwards.	Wave plan cannot be written		Not answered	68, 69

NOTE

S3 is not an inventory request. The dataset list, data dictionary and platform / catalogue documentation are requested once at the start of the work (P0); S3 is asked at proposal stage because the number of candidate and existing products changes the band. S1–S5 are common to both services; if A and B are proposed to the same customer together, they are asked once. If A has been done, the S3–S5 answers for B are taken from A's output (D1, D3, D5). S6–S7 are asked for A only, S8–S14 for B only.

30 QUESTIONS OUTSIDE THE PROPOSAL SET

They were not deleted; when they are asked has been clarified. Some are never asked — they are written in the proposal as an assumption or statement.

WHEN	COUNT	RATIONALE
At start of work	7	Consumer complaints, project sponsor, sharing of the dataset list and documents, work location; for B, pipeline and code standards, the contact in the source system teams, the pilot product owner's acceptance of the role and the steward assignment. Asked in P0 for A (kick-off and inventory request) and in PL1 for B (design confirmation).
Sales knows	4	Proposal recipient, proposal date, previous data mesh, catalogue or governance projects, budget. The commercial framework is the responsibility of sales; it is taken from the CRM or the sales representative.
Settled in Phase 0	12	How data is provided to consumers today, copied datasets and different KPI calculations, glossary and KPI definitions, data quality and monitoring, lineage, use of data contracts, the access request process, cost visibility, owner and steward roles; from the gate items, owner candidates, access to source data and build capacity. Settled in Phase 0 through interviews and documents (D1, D2, D3, D5); not asked for the proposal. If the customer knows them, they are written into 2.4 as a statement.
Assumption in proposal	4	Personal data in the candidate products and the KVKK policy, BDDK or sector obligations, platforms or source systems due to change in the near term, security or KVKK approval for the release. If unanswered, they are written into 5.1 as an assumption: without a policy, the pilot product starts with draft classes and the most restrictive access; an upcoming migration may change the pilot candidate and the order of the waves; approval time is added to the pilot schedule.
Stated in proposal	3	Access to business data, data quality remediation in source systems, operation after the rollout. These are to be stated, not asked: 4a 5.2 states that Phase 0 runs at the level of metadata and documents; 4b 2.5 states that source system remediation is out of scope and issues are reported to the source owner; 4b 2.5 and 8 state that operational support is the optional managed service.
Total	30	40 of the 70 questions were merged into the 14 questions of the Proposal Set; the remaining 30 were distributed across the five buckets above.

PROPOSAL READINESS STATUS

This sheet is calculated automatically. The decision on whether a proposal can be written is made separately for each service, based on the relevant questions on the Proposal Set sheet (SERVICE column).

MEASURE	A · PHASE 0	B · PILOT + ROLLOUT	DESCRIPTION
Number of proposal set questions	7	12	Common questions (S1–S5) and service-specific questions
Answered	0	0	STATUS column on the Proposal Set sheet
Partially answered	0	0	Written as an assumption in the proposal
Missing	7	12	Unanswered proposal question
Completion	0%	0%	Answered / total
CAN THE PROPOSAL BE WRITTEN	**NO — 7 questions missing**	**NO — 12 questions missing**	YES if missing is zero
Service questions (Questions)	47	52	Questions carrying the relevant letter in the SERVICE column of the full list
Service questions — deferred to start of work	4	6	Asked in P0 for A, in PL1 for B
Questions in the whole form	70		Reference: full list of 70 questions (3a, 3b deduplicated)
Deferred to start of work (all)	7		Asked in P0 for A, in PL1 for B

Rule: a service's proposal is not written until that service's proposal set is complete. If it must be written, each missing item is written into section 5 of the proposal as an assumption and it is stated that the scope will be reassessed if that assumption does not hold.

STATUS BY SECTION

SECTION	QUESTION	BLOCKER	ANSWERED	MISSING BLOCKER
A. Organisation and Proposal Details	5	2	0	2
B. Decision and Trigger	6	2	0	2
C. Datasets, Data Products and Consumers	7	2	0	2
D. Platform and Catalogue	8	1	0	1
E. Ownership and Operating Model	6	1	0	1
F. Scope and Scale	5	1	0	1
G. Stakeholders and Access	7	1	0	1
H. Pilot Scope and Team	11	6	0	6
I. Acceptance and Publication	6	2	0	2
J. Rollout and Commercial Framework	9	2	0	2
Total	**70**	**20**	**0**	**20**

TO BE SENT TO THE SAT OFFICE AFTER THE MEETING

Once these items arrive, the proposal text can be produced.

#	ITEM	SENT	NOTE
1	This completed form (with the answers from the customer form entered)	No	
2	Your meeting notes — raw is fine, do not try to tidy them	No	
3	RFP / specification file, if any	No	
4	Input form, if filled in (data-product-delivery-3a-faz0-girdi-formu-en.docx or -3b-pilot-yayginlastirma-girdi-formu-en.docx)	No	
5	Dataset list, data dictionary, platform / catalogue documentation or licence list shared by the customer	No	
6	For B, the Phase 0 outputs: dataset inventory and placement on the standard, candidate list and gate results, product spec and data contract draft, pilot plan and KPI baseline	No	
7	Service decision: A, B or both; if B, the rollout pricing option (option 1 fixed fee per wave / option 2 capped T&M) and interest in a managed service	No	
8	Pricing decision: for A, the band (Small / Medium / Large); for B, the pilot band, the day rate and, for option 2, the cap	No	
9	Team decision: which consultants will be assigned (for table 7.1); the data engineer's platform expertise (Databricks, Snowflake, BigQuery, Fabric, other)	No	

HOW TO USE

TWO-FILE SET-UP

Sent to the customer	data-product-delivery-5-musteri-soru-seti-en.xlsx — twenty-two questions and an information note. The first question is which datasets are used by more than one team or system today, and who owns them. The regulatory questions (KVKK, BDDK) are in the main list. The SERVICE column states which service each question is required for. Placement on the minimum standard, the gate assessment, the content of the product spec and data contract, SLO values, the technology adapter and the methodology are not asked of the customer; Komtaş proposes them based on the answers and they are finalised in Phase 0.
This file (internal)	data-product-delivery-6-ic-soru-seti-en.xlsx — full list of 70 questions, the 14-question minimum set required for the proposal (by service: A 7, B 12) and those deferred to the start of the work. Answers from the customer form are entered in this file and the proposal is written from here.
Minimum set logic	Forty of the seventy questions have been merged into fourteen questions. S1–S5 are common to both services; S6–S7 are the A block and S8–S14 the B block. Because the remaining thirty questions do not change the proposal, they are left to the start of the work, the sales side, Phase 0, or the proposal as an assumption or statement. Criterion: if doubling the number in the answer does not double the work, the question is not a proposal question.

SERVICE column	A · Phase 0 — Discovery and Design, B · Pilot + rollout. “A · B” marks a question asked in both services. Once the service to be proposed is known, only the questions carrying that letter are needed. B is not proposed without Phase 0 or an equivalent design (S8).
Fields to fill in	On the Questions sheet, only the ANSWER (G), STATUS (H) and NOTE (I) columns are filled in; on the Proposal Set sheet, ANSWER (G) and STATUS (H). Yellow cells show the fields to fill in. Pre-written short explanations in the NOTE column may be added to without being deleted.
Other sheets	Figures on the Summary, Section Breakdown and Remaining 30 sheets are calculated automatically; do not change them by hand.
PRIORITY — BLOCKER	The proposal is not written until this question is answered; it cannot be filled with an assumption. The row stays red. For questions that are a blocker in one service and an assumption in the other, the distinction is given in the NOTE column.
PRIORITY — Assumption	If left unanswered, it is written into section 5 of the proposal as an assumption.
STATUS — Answered	A clear answer was received. The row turns green.

STATUS — Partial	An answer was received but it is incomplete or unclear. Written as an assumption in the proposal.
STATUS — Not answered	Not yet asked, or no answer received.
“We don’t know” as an answer	This is also an answer and is often the first finding. STATUS is marked “Partial” and it is written in the NOTE field.
Writing the proposal	When the “CAN THE PROPOSAL BE WRITTEN” row for a service on the Summary sheet is YES, filling in that service's proposal template begins: for A data-product-delivery-4a-faz0-teklif-sablonu-en.docx, for B data-product-delivery-4b-pilot-yayginlastirma-teklif-sablonu-en.docx.
WHERE IT FILLS IN THE PROPOSAL	Format is “4b · 2.4”: template (4a, 4b) and section number. “4a/4b · 7.2” refers to the same section in both templates. «OPTION 1» / «OPTION 2» (4b 8.3 / 8.4) refer to alternative blocks in the template; the block not used is deleted. «OPTIONAL» marks the deduction clause in 4a 9.1 and the managed service paragraph in 4b 8; it is deleted if not used. D1–D7 are the Phase 0 deliverables, P0–P4 the Phase 0 steps, PL1–PL4 the pilot steps.
Source	The questions were deduplicated from the question fields of data-product-delivery-3a-faz0-girdi-formu-en.docx and data-product-delivery-3b-pilot-yayginlastirma-girdi-formu-en.docx; the band drivers, the candidate gate and the minimum data product standard are taken from the blueprint. A few rows that are not questions in the forms were added from the blueprint: service selection, BDDK obligations, copied datasets and different KPI calculations, cost visibility, source system remediation being out of scope, wave criterion, operation after the rollout. When a question's wording changes, both Excel files are updated.
Linked files	data-product-delivery-1-blueprint-en.pptx — internal reference: minimum data product standard (eight properties), candidate gate, output ports, roles, technology adapters, effort. data-product-delivery-2-musteri-sunumu-en.pptx — customer deck; this question set continues its “next step” page. The 3a / 3b input forms contain the band table, the candidate data product table, the service selection check and the blocker list.
Effort and band	A (Phase 0): duration Small 3 · Medium 3.5 · Large 4 weeks; Komtaş effort 25 · 30 · 35 person-days; customer effort 4 · 5 · 6 days. The band is the highest band reached by at least three of the six drivers (S3, S6, S7). B pilot: 6 · 7 · 8 weeks; Komtaş effort 50 · 65 · 80 person-days (pilot band from S8–S9). The effort of a rollout wave is set in the Phase 0 roadmap and from the pilot result. The Komtaş person-day figures are an initial SAT estimate, not yet calibrated with data product projects, pending delivery confirmation. This note is not written into the customer-facing 4a / 4b text.

EXAMPLE ROW

QUESTION	ANSWER / STATUS / NOTE

Datasets used by more than one team, and their owners	“Customer 360 table (owned by the CRM analytics team; used by risk, marketing and the AI team); daily sales extract (no known owner, six copies)” · Partial · “Two candidates; the second has no owner, at most Conditional at the gate. Number of existing products to be confirmed in P1”
