DATA WAREHOUSE ASSESSMENT

Proposal Input Form

Information to be collected in the customer meeting and the proposal field each item fills. Once the form is filled in and sent back, the proposal text is produced.

Rows marked ● are BLOCKER — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ are missing, they are written into the proposal as assumptions and go to Section 5.

If the answer to a question is “we don’t know”, that is also an answer — it is often the first finding and goes into the proposal as an assumption.

A. Customer and Proposal Details

TO ASK	WHERE IT GOES IN THE PROPOSAL	ANSWER
● **Organization and legal entities in scope (single company or group)**	Cover, 1. Executive Summary	
○ Proposal addressee — name, title, unit	Cover, 9.2	
○ Proposal date and expected decision date	Cover, 9.1 validity	
● **Is there an RFP / specification; if so, its number and format**	Structure of the entire proposal	
○ Are there competitors, and who	Emphasis and section weighting	

B. Decision — What the Assessment Will Support

The answer to this section sets the frame of the entire proposal. If no answer is obtained, the proposal reads like a “report-writing job” and its price cannot be defended.

TO ASK	WHERE IT GOES IN THE PROPOSAL	ANSWER
● **Which decision will this assessment support — investment, platform change, budget justification, audit request, restructuring**	1. Executive Summary, 2.1 Program Objective	
● **Who will make the decision, and when**	1. Executive Summary, 7.2 sponsor	
○ Has this topic come up before; why did it not progress	2.1, sales argument	
● **Has the platform change decision already been made**	Proposal name changes: assessment or readiness	
○ Has a similar assessment been done before; is its output available	2.x assumptions, baseline comparison	

C. Scope Drivers — 11 Sizing Metrics

Drivers on Blueprint p.10. Each answer falls into an S / M / L band; the highest band reached by at least three drivers is the project band.

Once the band is set, duration, phase table and effort follow automatically — no need to ask separately.

TO ASK	WHERE IT GOES IN THE PROPOSAL	ANSWER
● **Number of source systems feeding the data warehouse**	5. General Assumptions, 6. Timeline	
● **Number of critical datasets in scope (who calls them critical)**	2.x Scope, 6. Timeline	
○ Number of subject areas	2.x Scope	

● **How many separate warehouse / lake / lakehouse platforms exist**	2.x Scope, 7.1 team composition	
○ Number of reports and dashboards in the BI environment	2.x Scope	
○ Number of environments to review (prod only?)	5. General Assumptions	
○ Number of legal entities / regions in scope	1, 2.1	
● **How long it takes to grant log, billing and catalog access**	5. General Assumptions, 7.4 risk	
○ Regulatory exposure (sector, multi-country)	2.x Out of scope, 9.1	
● **How many days of query and usage history are retained**	2.x Assumptions, 6. Timeline	
○ Is there a baseline from a previous assessment	2.x Assumptions	

D. Access and Evidence

Evidence sources on Blueprint p.19. Each one means a separate approval; all are requested as a single list in the first week.

Every source for which access cannot be granted is written into the proposal as an assumption and risk; statements replace the missing evidence, and this is reflected in the report as confidence level.

TO ASK	WHERE IT GOES IN THE PROPOSAL	ANSWER
● **Can query log / system view access be granted**	2.x Assumptions, 5, 7.4	
● **Orchestrator / scheduler run history**	2.x Assumptions	
○ Platform billing records and workload tags	2.x Scope (cost dimension)	
○ Catalog and lineage export	2.x Scope (governance dimension)	
● **Data model, DDL, job definitions**	2.x Assumptions	
○ Access authorization configuration	2.x Scope (security dimension)	
○ BI inventory and usage logs	2.x Scope (consumption dimension)	
○ Existing reconciliation outputs	2.x Scope (quality dimension)	
● **How many steps the access approval process has, and who approves**	5, 6, 7.4	

E. Stakeholders and Interview Plan

TO ASK	WHERE IT GOES IN THE PROPOSAL	ANSWER
● **Who is the project sponsor**	7.2, 5	
● **Will a project coordinator be assigned**	7.2, 5	
● **Platform / data engineering team — how many people, who**	7.2, 5, 6	
○ Are data owners defined; by name or by role	7.2, 2.x finding	
● **Number and names of business units to be interviewed**	2.x Scope, 5 (number of interviews)	
○ Will there be senior management interviews, how many	2.x Scope, 5	
○ Information security / compliance contact	7.2	
○ Remote or on-site work; location	5. General Assumptions	

F. Target Level and Scope Preferences

Maturity ladder on Blueprint p.5. The target level is set by the customer, not by us. If it is not set, the gap cannot be calculated and every finding appears equally urgent.

TO ASK	WHERE IT GOES IN THE PROPOSAL	ANSWER
● **Are all 11 dimensions in scope; are any excluded**	2.x Scope, 2.x Out of scope	
● **Can a target maturity level be set per dimension**	2.x Scope, 1. Executive Summary	
● **Is a target state recommendation requested, or only the current state**	Module setup (M1 / M1+M2)	
● **Is a benchmark expected — how do they define the expectation**	2.x Scope / Out of scope	
○ Are a roadmap and effort estimate expected	2.x Deliverables, Module-2	

○ Delivery language and format	4. Deliverables, 5	

G. Commercial Framework

TO ASK	WHERE IT GOES IN THE PROPOSAL	ANSWER
● **Is there a budget range or an approved budget**	8. Project Fees	
● **Is modular purchasing expected (can only M1 be purchased)**	8. Alternative-1 / Alternative-2	
● **Procurement process — direct, tender or framework agreement**	8, 9.1	
○ Payment terms and invoicing conditions	8 Payment table, 9.1	
○ Is post-delivery support expected, for how many months	1, 6, 8	
○ Contract / NDA status	9.1	

H. To Be Sent to Me After the Meeting

> After filling in this form, just send the following as well; I will place the rest into the proposal template.

- This form, filled in
- Your meeting notes — raw is fine, do not try to clean them up
- RFP / specification document, if any
- Architecture, inventory or organization chart shared by the customer
- Pricing decision: which band, modular or bundled
- Team decision: which consultants will be assigned (for table 7.1)

> A PROPOSAL CAN BE PRODUCED WITH MISSING ANSWERS. Every row without an answer is written into the proposal as an assumption and goes to Section 5; if a row marked ● is missing, it must be asked first, because that row changes the structure of the proposal.
