DATA WAREHOUSE ASSESSMENT — INFORMATION COLLECTION FORM

Information required to determine the proposal scope and duration. Numerical answers may be given as approximate values.

#	SECTION	QUESTION	ANSWER	ADDITIONAL NOTES
1	Scope and Expectations	Should the assessment be conducted with the participation of technical teams only, or with a scope that also includes business units? In the latter case, approximately how many business units are expected?		
2	Scope and Expectations	How many external companies are to be interviewed within the scope of the assessment?		
3	Scope and Expectations	What are the main benefits expected from the engagement?		
4	Scope and Expectations	What do you plan to do with the outputs of this engagement?		
5	Scope and Expectations	Which legal entities and units are expected to be included in the scope of the assessment?		
6	Scope and Expectations	Is replacement of the current platform on the agenda?		
7	Current Environment	Which technologies do the data warehouse, ETL and BI layers run on?		
8	Current Environment	Approximately how many source systems feed the data warehouse?		
9	Current Environment	Approximately how many reports or dashboards and how many active users are there in the reporting environment?		
10	Working Mode	Should the assessment be conducted by granting Komtaş system access (read-only access or export), or through sessions led and documents shared by your team?		
11	Working Mode	Is there an RFP or specification; how does the procurement process work?		

FINANCIAL SECTOR ANNEX

Added to the question set for banks, participation banks, insurance and financial leasing institutions. Statutory reporting and audit obligations constrain the assessment scope and the target architecture options.

#	SECTION	QUESTION	ANSWER	ADDITIONAL NOTES
12	Regulatory Framework	Which statutory and regulatory uses are fed from the data warehouse? (BRSA and CBRT reporting sets, TFRS 9 and capital adequacy calculations, MASAK scenarios, independent audit and KAP disclosures)		
13	Regulatory Framework	Is the target architecture recommendation expected to evaluate cloud and offshore hosting options; what is the institution's current position on this?		
14	Regulatory Framework	Are there open findings from internal audit, BRSA audit or independent audit in the areas of data warehouse, data quality or reporting; is the report expected to reference these findings?		
15	Working Mode	Is vendor involvement required to access the data structures of the core banking and channel systems feeding the data warehouse?		
16	Working Mode	Is the engagement expected to be carried out at the institution's premises; is the use of institution-provided devices or VDI mandatory?		

INFORMATION NOTE

Purpose of the form	This form has been prepared to collect the information required to determine the scope, duration and team composition of the Data Warehouse Assessment engagement.
Nature of the answers	Numerical answers may be given as approximate values; exact figures are not required. Questions whose answers are not known may be left blank.
Regulatory framework questions	The questions in this section are asked to determine whether statutory reporting and audit obligations constrain the assessment scope and the target architecture options. Some answers may reside in units outside technology.
Questions left blank	Each unanswered topic is stated in the proposal as an assumption. If an assumption does not hold, scope and duration are re-evaluated.
Working mode question	If the assessment is conducted based on measurement, findings are supported by system records. If it is conducted based on documents and statements, the duration is shorter and findings are based on statements.
Not asked in this form	Assessment dimensions, maturity levels, engagement tier and the methodology to be applied are not asked in this form. These are recommended by Komtaş based on the answers provided and presented in the proposal.
Confidentiality	Shared information is used solely for proposal preparation and is not shared with third parties.
