ETL MODERNIZATION ON GOOGLE CLOUD — INTERNAL QUESTION SET

Komtaş internal working file. Not sent to the customer. The deduplicated questions from the 3a and 3b input forms (64 questions) are here; the SERVICE column shows which service the question is asked in. The minimum set needed for the proposal is on the Proposal Set sheet.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	A. Organisation and Proposal Details	BLOCKER	A · B	**Organisation and legal entities in scope — single company or group**	4a/4b · Cover, 1		Not answered		S1
2	A. Organisation and Proposal Details	Assumption	A · B	Proposal recipient — name, title, unit	4a/4b · Cover, 9.2		Not answered		Sales knows
3	A. Organisation and Proposal Details	Assumption	A · B	Proposal date and expected decision date	4a/4b · Cover, 9.1 validity		Not answered		Sales knows
4	A. Organisation and Proposal Details	BLOCKER	A · B	**Is there an RFP or specification; if so, its number and response format**	4a/4b · structure of the whole proposal		Not answered	Blocker for B; assumption for A	S1
5	A. Organisation and Proposal Details	Assumption	A · B	Are there competitors, and who — another Google Cloud partner, the current vendor, a proposal for another target platform	4a/4b · 1 (emphasis), 8 (price position)		Not answered		S1
6	B. Decision and Target Date	BLOCKER	A · B	**Which decision will the work support; what is the trigger — Oracle or ODI licence renewal, end of hardware support, an existing Google Cloud commitment, vendor dependency, ODI skills gap**	4a/4b · 1, 2.1		Not answered		S2
7	B. Decision and Target Date	Assumption	A · B	Who will make the decision, and when	4a/4b · 6, 9.1 validity		Not answered		S2
8	B. Decision and Target Date	BLOCKER	A · B	**Target date for the migration and what drives it — ODI or Oracle licence expiry, end of hardware support, budget period**	4a · 2.1, 4 (deliverable 8 wave plan); 4b · 6		Not answered	Blocker for B (together with S11); assumption for A	S2
9	B. Decision and Target Date	Assumption	A · B	What is the most frequent complaint today — failed jobs, delays, failures noticed late, slow changes; for B, how success will be measured (ODI switched off, alert coverage, load duration, cost)	4a · 3.2 (P1 focus areas); 4b · 1, 2.1		Not answered		At start of work
10	B. Decision and Target Date	Assumption	A · B	Has an inventory, assessment or migration attempt been made before; what was the outcome	4a · 5.1; 4b · 2.4, 5.1		Not answered	If so, A's P1 may be shorter; for B it is assessed together with S10	Sales knows
11	C. Scope and Inventory	BLOCKER	A · B	**Which ETL tool and version — ODI 11g or 12c; for another tool (PowerCenter, SSIS, Talend) the adapter is not ready yet**	Service selection; 4a/4b · 2.3, 2.4		Not answered	For a tool other than ODI this package is not offered; see the service selection check in 3a/3b	S3
12	C. Scope and Inventory	Assumption	A · B	Is there a second ETL tool that must be migrated in the same scope (parallel second adapter)	4a · 2.4 (band driver); 4b · 2.3, 2.5		Not answered	If yes, this driver is Large for A; a separate scope is written for the second tool	S3
13	C. Scope and Inventory	BLOCKER	A	**Number of ODI repositories and environments in scope — work repositories; development, test, production**	4a · 2.4 (band driver), 2.5		Not answered		S9
14	C. Scope and Inventory	Assumption	A · B	Which layers are in scope — ODS, staging, DWH, data marts; is any layer or domain to be left out	4a/4b · 2.3, 2.5		Not answered	For B, confirmed together with the inventory (S10)	S9
15	C. Scope and Inventory	BLOCKER	A · B	**Has it been confirmed that BI report and dashboard migration is out of scope; which BI tools are connected to the DWH**	4a/4b · 2.5; 4b · 2.3		Not answered	If BI migration is requested, it is written as a separate scope	S9
16	C. Scope and Inventory	BLOCKER	B	**Has the ETL Migration Assessment (A) been carried out, or is there an equivalent inventory produced with the repository queries**	Proposal go/no-go; 4b · 2.4, 5.1		Not answered	If not, 4b is not written; A is proposed first	S10
17	C. Scope and Inventory	BLOCKER	B	**Package counts by effort group — single source, 2–4 sources, 5+ sources or several targets, target unclear, mapping not visible; 1:1 ingestion candidates**	4b · 2.4, 8 («OPTION 1» table)		Not answered	Entered into the file 9 effort model	S10
18	C. Scope and Inventory	Assumption	B	Have the blind-spot packages (mapping not visible, target unclear) been resolved with the deeper discovery queries	4b · 2.4, 5.1, 7.4		Not answered	If not resolved, they are counted at 5.5 hours and written as a risk in 7.4	S10
19	C. Scope and Inventory	Assumption	B	Number of packages in the inventory with file loads, journalizing or non-SQL logic (Java, Groovy, OS commands)	4b · 2.3, 3.1		Not answered		Measured in assessmen
20	D. Environment and Technology	BLOCKER	A · B	**Can CDC be enabled on the source databases (for Datastream) — per source; DBA approval and lead time · for B: the per-source CDC check result from the assessment**	4a · 2.3, 2.4; 4b · 2.4, 3.1, 5.3		Not answered	First question of the technical block. If CDC is not possible, the 1:1 ingestion group does not apply; batch extraction is assumed	S6
21	D. Environment and Technology	BLOCKER	A · B	**Source system technologies — SQL Server, MySQL, PostgreSQL, Oracle, SaaS application, files, APIs**	4a/4b · 2.4		Not answered	If a SaaS source allows read access only, batch extraction is assumed	S6
22	D. Environment and Technology	Assumption	A · B	Which technology the current DWH runs on — Oracle Database version, Exadata or other	4a/4b · 2.4; 4b · 3.1 (SQL translation)		Not answered		Assumption in proposa
23	D. Environment and Technology	BLOCKER	A · B	**Existing Google Cloud footprint — projects, BigQuery use, commitment, Google account team**	4a · 2.1, 2.4; 4b · 2.4, 5.3		Not answered		S8
24	D. Environment and Technology	BLOCKER	A · B	**Target DWH decision — has BigQuery been agreed, or is another target being considered**	Service selection; 4a · 2.3; 4b · 2.3, 3.1		Not answered	If the target is not BigQuery, this package does not apply; Data Modernization is considered	S8
25	D. Environment and Technology	BLOCKER	A · B	**Is there data that must stay in Türkiye under BDDK or similar regulation**	Service selection; 4a/4b · 2.5, 5.1		Not answered	If so, that data is out of scope; the Google Cloud region in Türkiye is not open yet	S8
26	D. Environment and Technology	Assumption	A · B	Are there streaming flows or loops running at intervals under 5 minutes	4a · 2.3; 4b · 2.4, 3.1 (Dataflow scope)		Not answered	If so, the Dataflow scope is priced separately	Assumption in proposa
27	D. Environment and Technology	Assumption	A · B	ODI agent type (standalone, JEE, colocated); how versioning and deployment are done today — scenarios, Git, manual; CI/CD tool	4a · 3.2; 4b · 3.1		Not answered		At start of work
28	D. Environment and Technology	Assumption	A · B	Monitoring and alerting — how failures are noticed (automatic alert, operator, user report)	4a · 3.2; 4b · 2.3		Not answered		At start of work
29	E. Target Architecture	BLOCKER	B	**GCP project and billing account — will the customer open them; existing organisation structure**	4b · 5.3, 7.2		Not answered	Google Cloud consumption costs are borne by the customer	S14

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
30	E. Target Architecture	Assumption	B	Network and security — connectivity to sources (VPN, Interconnect), VPC Service Controls, private IP; identity management	4b · 2.3, 5.3, 6		Not answered	Connectivity must be ready before phase 2 starts	S14
31	E. Target Architecture	Assumption	B	Number of target environments — dev, test, prod	4b · 2.4, 3.2 (phase 2)		Not answered		S14
32	E. Target Architecture	Assumption	B	Target GCP region and approval for cross-border transfer of personal data (KVKK)	4b · 5.1, 5.3		Not answered		S14
33	E. Target Architecture	Assumption	B	Engine decision — is the BigQuery + Dataform + Cloud Composer proposal accepted; is there work that needs Dataflow (A output)	4b · 2.3, 3.1		Not answered	If the engine changes, the unit hours change	S8
34	F. Scale	BLOCKER	A · B	**Approximate number of packages or jobs; how many run actively**	4a · 2.4 (band driver); 4b · 2.4		Not answered	If the package count is Large, the band is at least Medium	S4
35	F. Scale	BLOCKER	A · B	**Number of source systems**	4a · 2.4 (band driver); 4b · 2.4		Not answered		S4
36	F. Scale	Assumption	A · B	Number of source tables	4a/4b · 2.4		Not answered		Measured in assessmen
37	F. Scale	Assumption	A	Number of load plans and run frequency (daily, hourly, intraday)	4a · 2.4 (band driver)		Not answered		Assumption in proposa
38	F. Scale	Assumption	A	Share of procedures or packages without a visible mapping (estimate)	4a · 2.4 (band driver), 7.4		Not answered	Above 35% is a Large driver	Assumption in proposa
39	F. Scale	Assumption	A · B	Daily data volume and the largest tables	4a · 2.4; 4b · 2.4, 5.1		Not answered		Measured in assessmen
40	F. Scale	Assumption	A · B	Longest job duration and the overnight load window	4a · 2.4; 4b · 5.1, 7.4		Not answered		Measured in assessmen
41	G. Access and Evidence	BLOCKER	A	**Access model — Mode A (the customer team or the vendor runs the read-only script and shares the outputs; Komtaş gets no system access) or Mode B (Komtaş gets read-only access to the ODI work repository and the target DB dictionary views)**	4a · «MOD A» / «MOD B» paragraphs, 5.2, 6		Not answered	The final decision is made in P0	S5
42	G. Access and Evidence	BLOCKER	A	**In Mode A, who runs the script (DBA, vendor) and how quickly the outputs are shared · in Mode B, the access approval process and lead time**	4a · 3.2 (P0), 6		Not answered	Approval or output lead time cannot be made up by adding people	S5
43	G. Access and Evidence	BLOCKER	A · B	**Is the vendor or knowledge holder who built the platform available for interviews and questions; does its contract run for the duration of the work**	4a · 5.3, 7.2; 4b · 5.3, 7.4		Not answered	If not available, the blind-spot share grows; risk in 7.4	S7
44	G. Access and Evidence	Assumption	A	How many days of ODI Operator logs (session history) are retained	4a · 5.2 (runtime measurement window)		Not answered	Under 30 days narrows the runtime measurement; written as a constraint in 5.2	Assumption in proposa
45	G. Access and Evidence	Assumption	A	Can the discovery form (file 7) be filled in by the customer or the vendor; can architecture documents, flow diagrams or an existing inventory be shared; can a walkthrough be shown on screen	4a · 3.2 (P1), 5.3		Not answered		At start of work
46	G. Access and Evidence	Assumption	A	Is access to data content needed — the assessment runs on metadata, logs and the dictionary	4a · 5.2		Not answered		Stated in proposal
47	H. Team and Schedule	BLOCKER	B	**Is the target cutover date fixed, or the number of data engineers available**	4b · 6, 7.1, 8		Not answered	Duration = 60 working days + effort ÷ number of DEs	S11
48	H. Team and Schedule	Assumption	B	Customer team — who from the platform, DWH and DBA teams, and how much time	4b · 7.2		Not answered		S11
49	H. Team and Schedule	Assumption	B	Wave criterion — by layer or by domain; priority domain; change freeze periods (year end, campaigns, audits)	4b · 3.2 (phase 3), 6		Not answered		At start of work
50	H. Team and Schedule	Assumption	B	Who will operate the platform after cutover — customer team, vendor, separate support contract	4b · 4 (runbooks and handover), 2.5		Not answered	Handover is in scope; operational support is a separate scope	Stated in proposal
51	I. Acceptance and Quality	BLOCKER	B	**Reconciliation tolerance (%) and the period (days) over which it must hold**	4b · 3.2, 4 (wave acceptance)		Not answered		S12
52	I. Acceptance and Quality	Assumption	B	Parallel-run duration per wave (typically 2–4 weeks)	4b · 3.2, 6		Not answered		S12
53	I. Acceptance and Quality	Assumption	B	List of critical reports and the business owners who sign them off	4b · 3.2, 7.2		Not answered		S12
54	I. Acceptance and Quality	Assumption	B	Existing data quality checks and known data differences	4b · 5.1, 7.4		Not answered	A known difference counts as an explained difference in reconciliation	At start of work
55	J. Organisation and Commercial Framework	BLOCKER	A · B	**Can a platform owner be named; can the DWH and DBA teams make time**	4a/4b · 7.2, 5.3		Not answered		S7
56	J. Organisation and Commercial Framework	Assumption	A · B	Who is the project sponsor	4a/4b · 7.3		Not answered		At start of work
57	J. Organisation and Commercial Framework	Assumption	A · B	Is there an approved budget	4a/4b · 8		Not answered		Sales knows
58	J. Organisation and Commercial Framework	Assumption	A · B	Procurement process and approval steps	4a/4b · 9.1		Not answered		S1
59	J. Organisation and Commercial Framework	Assumption	A	Is the assessment fee expected to be credited against B	4a · 8 (optional credit clause)		Not answered	The period («N» months) is set by sales	Sales knows
60	J. Organisation and Commercial Framework	BLOCKER	B	**Pricing model — unit price per package (option 1) or capped T&M (option 2)**	4b · 8 «OPTION 1» / «OPTION 2»		Not answered	Turnkey fixed price is not offered	S13
61	J. Organisation and Commercial Framework	BLOCKER	B	**Day rate and reserve rate (default 20%)**	4b · 8		Not answered		S13
62	J. Organisation and Commercial Framework	Assumption	B	Payment expectation — per accepted wave or monthly; phases 1 and 2 at phase exit	4b · 8.2		Not answered		S13
63	J. Organisation and Commercial Framework	Assumption	B	Will an application be made for Google Cloud RAMP or partner funding	4b · 3.1, 8.3		Not answered	Eligibility depends on Google's review; not promised	Sales knows
64	J. Organisation and Commercial Framework	Assumption	A · B	Will the work be remote, on site or mixed; is VDI or VPN mandatory	4a/4b · 5.4		Not answered		At start of work

MINIMUM QUESTION SET FOR THE PROPOSAL — 14 QUESTIONS

When these fourteen questions are answered, selected by the SERVICE column, the proposal can be written: nine questions for A, twelve for B. Thirty-nine of the sixty-four questions in the list are combined here; the remaining twenty-five stay for the start of the work, on the sales side, in the assessment measurement, or in the proposal as an assumption or st

#	BLOCK	SERVICE	QUESTION	WHY IT IS NEEDED	IF NO ANSWER	ANSWER	STATUS	QUESTIONS COVERED
S1	COMMON · DETAILS	A · B	**Which legal entities are in scope; is there an RFP or specification; are there competitors; how does the procurement process work?**	The cover, 1. Executive Summary and the 9.1 conditions are written from this. If there is an RFP, the proposal is structured accordingly; the competitor situation affects the price position.	**Proposal cannot be written**		Not answered	1, 4, 5, 58
S2	COMMON · DECISION	A · B	**Which decision will the work support — licence renewal, end of hardware support, a Google Cloud commitment, vendor dependency? Who decides, and when; what is the target date for the migration?**	1. Executive Summary and 2.1 Programme Objective are written from this. The target date feeds the wave plan in A (deliverable 8) and the schedule and team size in B; the decision date sets the proposal validity.	Objective and summary cannot be written		Not answered	6, 7, 8
S3	COMMON · TOOL	A · B	**Which ETL tool and version is used — ODI 11g or 12c? Is there a second tool that must be migrated in the same scope?**	Today the package is offered with the ODI adapter only. The adapter for PowerCenter, SSIS or Talend is not ready; in that case another service is considered using the service selection check in 3a/3b. A mandatory second tool is a band driver for A.	**Service cannot be selected**		Not answered	11, 12
S4	COMMON · SCALE	A · B	**Approximately how many packages or jobs are there, how many are active; how many source systems feed them?**	The two leading band drivers for A (2.4): package count Small ≤ 300 · Medium 300–800 · Large > 800; source systems ≤ 5 · 5–15 · > 15. For B the scale is read from the inventory (S10); this answer is a first check.	Band cannot be selected		Not answered	34, 35
S5	A · ACCESS	A	**How will the repository queries be run: Mode A (the customer team or the vendor runs the read-only script and shares the outputs) or Mode B (Komtaş gets read-only access to the ODI work repository)? In Mode A, who runs the script and how soon do the outputs arrive; in Mode B, how many approval steps and how long?**	Determines which of the «MOD A» / «MOD B» paragraphs is kept in 4a, the 5.2 assumptions and the P0–P1 schedule. Approval time (Mode B) or output delivery time (Mode A) cannot be made up by adding people.	Schedule cannot be given		Not answered	41, 42
S6	A · CDC	A · B	**Can CDC be enabled on the source databases (for Datastream); which technologies are the source databases (SQL Server, MySQL, PostgreSQL, Oracle, SaaS, files)?**	First question of the technical block. If CDC is possible, 1:1 copy packages become Datastream configuration (0.85 hours per package); if not, they stay in the single-source group as batch extraction (3 hours). Sets the scope of the per-source CDC check in A (deliverable 4) and the effort and target architecture in B.	Effort model cannot be built		Not answered	20, 21
S7	A · VENDOR	A · B	**Is the vendor or knowledge holder who built the platform available for interviews and questions; can a platform owner be named?**	If the vendor is not available, the blind-spot share (mapping not visible, target unclear) grows and P1 takes longer. 7.2 Expected participation and the 5.3 assumptions are written from this; for B it is a risk in 7.4.	Schedule cannot be given		Not answered	43, 55
S8	A · TARGET	A · B	**What is the organisation's existing Google Cloud footprint (projects, BigQuery, commitment); has BigQuery been agreed as the target DWH; is there data that must stay in Türkiye under BDDK or similar regulation?**	The target of the package is BigQuery. If the target has not been agreed, the target architecture and engine decision (deliverable 5) stays in scope for A; if another target has been chosen, this package does not apply. Data that must stay in Türkiye is out of scope until the Google Cloud region in Türkiye opens.	**Service cannot be selected**		Not answered	23, 24, 25, 33
S9	A · BOUNDARY	A	**Which ODI repositories and environments (development, test, production) and which layers are in scope; has it been confirmed that BI report migration is out of scope?**	4a 2.3 Scope Topics, 2.4 and 2.5 Out of Scope are filled in from this. The number of repositories and environments is a band driver (1 · 2 · ≥ 3).	Scope section cannot be written		Not answered	13, 14, 15
S10	B · INVENTORY	B	**Is there an ETL Migration Assessment (A) or an equivalent inventory produced with the repository queries; what are the package counts by effort group and the blind-spot status?**	B is not offered on an unmeasured estate. The package count per group sets 2.4, the «OPTION 1» table and the phase 3 duration; it is entered into the file 9 effort model.	**Proposal cannot be written — A is proposed first**		Not answered	16, 17, 18
S11	B · TEAM	B	**Is the target cutover date fixed, or the number of data engineers available? Who on the customer side makes time, and how much?**	Duration = 60 working days (phases 1, 2, 4) + effort ÷ number of DEs. One cannot be calculated until the other is fixed; 6. Project Plan and 7.1 Team are written from this.	Schedule cannot be given		Not answered	47, 48
S12	B · ACCEPTANCE	B	**What are the reconciliation tolerance (%) and period (days), the parallel-run duration per wave, the critical reports and the business owners who sign them off?**	Wave acceptance is written in 4b 3.2 and 4 as a number: tolerance «%», period «N» days, business owner sign-off. The parallel-run duration lengthens the schedule.	Acceptance criterion cannot be written		Not answered	51, 52, 53
S13	B · PRICE	B	**Which pricing model — unit price per package or capped T&M; what are the day rate and reserve rate (default 20%); is payment per wave or monthly?**	One of the two options is kept in 4b 8 and the other is deleted. Turnkey fixed price is not offered. The unit price is revised once after the pilot.	Fees section cannot be written		Not answered	60, 61, 62
S14	B · ENVIRONMENT	B	**Who owns the GCP project and billing account; what are the network connectivity (VPN, Interconnect) and VPC Service Controls requirements; are dev, test and prod separate in the target; what is the status of the target region and KVKK approval?**	Phase 2 (platform and pilot) does not start until these inputs are ready. The 5.3 customer responsibilities and the 2.4 environment count are written from this.	Schedule cannot be given		Not answered	29, 30, 31, 32

NOTE

S5 and S14 are not an access list. Items such as the discovery form (file 7), the script outputs (file 8) and architecture documents are requested once at the start of the work; S5 and S14 are asked at proposal stage because they change the schedule. S1–S4 are common to both services; if A and B are proposed to the same customer together, they are asked once. S6–S8 sit in the A block but are also asked for B; if A has been done, the answers are taken from A's output.

25 QUESTIONS OUTSIDE THE PROPOSAL SET

They were not deleted; when they are asked has been clarified. Some are never asked — they are written in the proposal as an assumption or statement.

WHEN	COUNT	RATIONALE
At start of work	8	Complaints and success criterion, ODI agent type and versioning / CI/CD, monitoring and alerting, sharing of the discovery form and documents and the walkthrough, wave criterion and change freeze periods, data quality checks and known differences, project sponsor, work location. Asked in P0 for A (kick-off and access plan) and in phase 1 for B (analysis and design).
Sales knows	6	Proposal recipient, proposal date, previous inventory or migration attempt, budget, crediting the assessment fee against B, Google Cloud RAMP application. The commercial framework is the responsibility of sales; it is taken from the CRM or the sales representative.
Measured in assessment	4	Number of source tables, daily data volume and largest tables, longest job duration, number of packages with file loads / journalizing / non-SQL logic. Read from the repository queries (file 8) and the target DB dictionary; not asked for the proposal. If the customer knows them, they are written into 2.4 as a statement.
Assumption in proposal	5	Current DWH technology, streaming flows, number of load plans, procedure share, ODI log retention. If the band drivers among them (number of load plans, procedure share) are unanswered, they are written into 2.4 as an assumption and verified in P0; log retention under 30 days is written as a constraint in 5.2.
Stated in proposal	2	Access to data content and operation after cutover. These are to be stated, not asked: 4a 5.2 states that the assessment runs on metadata, logs and the dictionary; 4b 2.5 states that runbooks and handover are in scope and operational support is a separate scope.
Total	25	39 of the 64 questions were merged into the 14 questions of the Proposal Set; the remaining 25 were distributed across the five buckets above.

PROPOSAL READINESS STATUS

This sheet is calculated automatically. The decision on whether a proposal can be written is made separately for each service, based on the relevant questions on the Proposal Set sheet (SERVICE column).

MEASURE	A · ASSESSMENT	B · MIGRATION	DESCRIPTION
Number of proposal set questions	9	12	Common questions (S1–S4) and service-specific questions
Answered	0	0	STATUS column on the Proposal Set sheet
Partially answered	0	0	Written as an assumption in the proposal
Missing	9	12	Unanswered proposal question
Completion	0%	0%	Answered / total
CAN THE PROPOSAL BE WRITTEN	**NO — 9 questions missing**	**NO — 12 questions missing**	YES if missing is zero
Service questions (Questions)	43	55	Questions carrying the relevant letter in the SERVICE column of the full list
Service questions — deferred to start of work	6	7	Asked in P0 for A, in phase 1 for B
Questions in the whole form	64		Reference: full list of 64 questions (3a, 3b deduplicated)
Deferred to start of work (all)	8		Asked in P0 for A, in phase 1 for B

Rule: a service's proposal is not written until that service's proposal set is complete. If it must be written, each missing item is written into section 5 of the proposal as an assumption and it is stated that the scope will be reassessed if that assumption does not hold.

STATUS BY SECTION

SECTION	QUESTION	BLOCKER	ANSWERED	MISSING BLOCKER
A. Organisation and Proposal Details	5	2	0	2
B. Decision and Target Date	5	2	0	2
C. Scope and Inventory	9	5	0	5
D. Environment and Technology	9	5	0	5
E. Target Architecture	5	1	0	1
F. Scale	7	2	0	2
G. Access and Evidence	6	3	0	3
H. Team and Schedule	4	1	0	1
I. Acceptance and Quality	4	1	0	1
J. Organisation and Commercial Framework	10	3	0	3
Total	**64**	**25**	**0**	**25**

TO BE SENT TO THE SAT OFFICE AFTER THE MEETING

Once these items arrive, the proposal text can be produced.

#	ITEM	SENT	NOTE
1	This completed form (with the answers from the customer form entered)	No	
2	Your meeting notes — raw is fine, do not try to tidy them	No	
3	RFP / specification file, if any	No	
4	Discovery form, if filled in (etl-migration-gcp-7-discovery-formu-tr.xlsx)	No	
5	Repository query outputs, if run (etl-migration-gcp-8-odi-repository-sorgulari-en.sql); for B, A's inventory or the filled-in effort model (file 9)	No	
6	Architecture document, flow diagram, inventory or organisation chart shared by the customer	No	
7	Service decision: A, B or both; if A, the access model (Mode A / Mode B); if B, the pricing option (option 1 unit price / option 2 capped T&M)	No	
8	Pricing decision: for A, the band (Small / Medium / Large); for B, the day rate, the reserve rate and, for option 2, the cap	No	
9	Team decision: which consultants will be assigned (for table 7.1); for B, the number of data engineers	No	

HOW TO USE

TWO-FILE SET-UP

Sent to the customer	etl-migration-gcp-5-musteri-soru-seti-en.xlsx — twenty-seven questions and an information note. The regulatory questions (BDDK, KVKK) are in the main list. The SERVICE column states which service each question is required for. Effort groups, unit hours, pattern mapping and methodology are not asked of the customer; Komtaş proposes them based on the answers and the measurement.
This file (internal)	etl-migration-gcp-6-ic-soru-seti-en.xlsx — full list of 64 questions, the 14-question minimum set required for the proposal (by service: A 9, B 12) and those deferred to the start of the work. Answers from the customer form are entered in this file and the proposal is written from here.
Minimum set logic	Thirty-nine of the sixty-four questions have been merged into fourteen questions. S1–S4 are common to both services; S5–S9 are the A block and S10–S14 the B block (S6–S8 are also asked for B). Because the remaining twenty-five questions do not change the proposal, they are left to the start of the work, the sales side, the assessment measurement, or the proposal as an assumption or statement. Criterion: if doubling the number in the answer does not double the work, the question is not a proposal question.

SERVICE column	A · ETL Migration Assessment, B · ETL Migration on Google Cloud. “A · B” marks a question asked in both services. Once the service to be proposed is known, only the questions carrying that letter are needed. B is not proposed without A's inventory or an equivalent inventory (S10).
Fields to fill in	On the Questions sheet, only the ANSWER (G), STATUS (H) and NOTE (I) columns are filled in; on the Proposal Set sheet, ANSWER (G) and STATUS (H). Yellow cells show the fields to fill in. Pre-written short explanations in the NOTE column may be added to without being deleted.
Other sheets	Figures on the Summary, Section Breakdown and Remaining 25 sheets are calculated automatically; do not change them by hand.
PRIORITY — BLOCKER	The proposal is not written until this question is answered; it cannot be filled with an assumption. The row stays red. For questions that are a blocker in one service and an assumption in the other, the distinction is given in the NOTE column.
PRIORITY — Assumption	If left unanswered, it is written into section 5 of the proposal as an assumption.
STATUS — Answered	A clear answer was received. The row turns green.
STATUS — Partial	An answer was received but it is incomplete or unclear. Written as an assumption in the proposal.

STATUS — Not answered	Not yet asked, or no answer received.
“We don’t know” as an answer	This is also an answer and is often the first finding. STATUS is marked “Partial” and it is written in the NOTE field.
Writing the proposal	When the “CAN THE PROPOSAL BE WRITTEN” row for a service on the Summary sheet is YES, filling in that service's proposal template begins: for A etl-migration-gcp-4a-assessment-teklif-sablonu-en.docx, for B etl-migration-gcp-4b-migration-teklif-sablonu-en.docx.
WHERE IT FILLS IN THE PROPOSAL	Format is “4b · 2.4”: template (4a, 4b) and section number. “4a/4b · 7.2” refers to the same section in both templates. «MOD A» / «MOD B» (4a) and «OPTION 1» / «OPTION 2» (4b) refer to alternative blocks in the template; the block not used is deleted.
Source	The questions were produced by deduplicating etl-migration-gcp-3a-assessment-girdi-formu-en.docx and etl-migration-gcp-3b-migration-girdi-formu-en.docx. SECTION mapping: A, B and J combine sections A, B and G of both forms; C covers 3a C (scope) and 3b C (inventory status); D covers 3a D, E 3b D, F 3a E, G 3a F, H 3b E, I 3b F. When a question's wording changes, both Excel files are updated.
Linked files	etl-migration-gcp-7-discovery-formu-tr.xlsx — 13-sheet discovery form, sent after kick-off. etl-migration-gcp-8-odi-repository-sorgulari-en.sql — read-only repository queries; run by the customer team or the vendor in Mode A, by Komtaş in Mode B. etl-migration-gcp-9-efor-modeli-tr.xlsx — effort group × unit hours × reserve, plan and Gantt; deliverable 7 of A, input to the B proposal.
Assessment effort	For A, duration Small 3 · Medium 3.5 · Large 4 weeks; Komtaş effort 25 · 30 · 35 person-days; customer effort 3 · 4 · 5 days. The Komtaş person-day figures are an initial SAT estimate, pending delivery confirmation. This note is not written into the customer-facing 4a text.

EXAMPLE ROW

QUESTION	ANSWER / STATUS / NOTE
Can CDC be enabled on the source databases (for Datastream)	“Possible on SQL Server; MySQL needs DBA approval; read access only on the SaaS source” · Partial · “MySQL approval to be confirmed in P0; SaaS source counted as batch extraction”
