ENTERPRISE LAKEHOUSE ADVISORY SERVICES · SERVICE B

Lakehouse Modernization Assessment — Proposal Input Form

Information to be collected in the customer meeting and the proposal field each item fills. Once the form is completed and returned, the proposal text is produced.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.

If rows marked ○ remain missing, they are written into the proposal as assumptions and go to section 5.

If the answer to a question is “we don't know”, that is also an answer — it is often the first finding and goes into the proposal as an assumption.

TWO QUESTIONS DIRECTLY DETERMINE THE SCHEDULE: access approval time (Mode B) or delivery time of control query outputs (Mode A), and log retention period. Neither can be offset by adding people.

If the log retention period is under thirty days, evidence cannot be produced for some areas; this is written into the proposal as a constraint, not as an assumption.

THIS FORM IS FOR SERVICE B — current state plus target architecture and modernisation roadmap, across eight areas; current and target level per area, no score.

If the customer only wants a high-level picture of the current state, the right service is A and A's own input form is used.

If deep measurement on a single technical problem is required, the right service is C. The service choice is clarified in the first meeting.

If an A engagement has previously been carried out for this customer, the evidence inventory produced is reused and deducted from B's effort — this is stated in the proposal.

A. Organisation and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Organisation and legal entities in scope — single company or group**	Cover, 1. Executive Summary	
○	Proposal addressee — name, title, unit	Cover, 9.2	
○	Proposal date and expected decision date	Cover, 9.1 validity	
●	**Is there an RFP or specification; if so, its number and response format**	Structure of the whole proposal	
○	Are there competitors, and who	Emphasis and section weights	

B. Decision — What the Assessment Will Support

If this section cannot be answered, the engagement reads like a “report-writing job” and its price cannot be defended.

The value of the assessment lies not in the report itself but in the decision it supports.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which decision will this assessment support — investment, platform change, budget defence, audit request, restructuring**	1. Executive Summary, 2.1 Objective	
○	Who will make the decision, and by what date	6. Schedule, 9.1 validity	
○	Has an assessment been done before; what was the outcome	5. Assumptions, baseline comparison	
○	What is the most frequent complaint today	P1 focus areas	
○	How will success be measured — which outcome counts as “done”	1. Executive Summary	

C. Scope

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which platform is to be assessed — lakehouse, data warehouse, or both**	2.1 Objective, 2.4 Out of scope	
●	**Are all eight areas in scope; is any area to be excluded**	2.3 Assessment Areas, «OUT-OF-SCOPE AREA»	
○	Number of domains or business units in scope	2.3 Scope size	
○	Are any environments, regions or areas to be excluded from scope	2.4 Out of scope	
○	Are non-production environments in scope	2.3, 5. Assumptions	

D. Environment and Technology

> This section determines both the sizing and which evidence sources will be sought in P1.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Table format(s) in use — Iceberg, Delta, Hudi, raw parquet**	Driver 6, 2.3	
●	**Query engine(s)**	Driver 7, 2.3	
○	Object storage and cloud provider	2.3 Scope size	
○	Processing layer — Spark, dbt or other	2.3, Data Integration Modernization area (L3)	
○	Orchestration tool	Platform Operations & Observability area (L9)	
○	Catalogue product; is there information on the share of registered tables	Governance & Security Modernization area (L5)	
○	Is there a streaming pipeline, and with which technology	Driver 5, Data Integration Modernization area (L2)	

E. Scale and Volume

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Total number of tables**	Driver 1, 2.3	
●	**Total data volume — state whether raw or compressed**	Driver 2, 2.3	
○	Daily data volume growth	Driver 3	
○	Number of source systems	Driver 4	
○	Number of environments — dev, test, prod, DR	Driver 8	
○	Daily query volume and number of active users	Driver 9, Query & Analytics Enablement area (L7)	

F. Access and Evidence Sources

> Without the answers in this section, no schedule can be given. An area whose evidence source cannot be accessed cannot be measured; in Mode A, an area for which no control query is run is reported as statement-based with low confidence.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which access model — Mode A (guided: Komtaş is not given system access; the customer team runs the agreed control queries and shares the output) or Mode B (read-only access); the final decision is made in P0**	«MOD A» / «MOD B» paragraphs, 5.2, 6. Schedule	
●	**Mode B: how does the access approval process work, and how long is it expected to take · Mode A: who will run the control queries, and how soon can outputs be shared**	Driver 10, 6. Schedule	
●	**How long are query logs, job history and metadata retained**	Driver 11, 5. Assumptions	
○	Can access to billing and cost data be provided (in Mode A: can it be exported and shared)	Platform Scalability & Cost area (L8), 5.2	
○	Can configuration and access policy files be shared	P1 evidence collection	
○	Can one load and one report be selected for end-to-end tracing	P1, observation evidence	
○	Is access to data content required, or is metadata sufficient	5. Assumptions, security	

G. Target Levels and Expectations

> The target level is the organisation's decision. If not set, it is set jointly in P0; this is written into the proposal as an assumption.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Can a target level (1–5) be set for each of the eight areas; who will set it — the answer per area is entered in the table below	2.3 Assessment Areas, P0 deliverable	
○	Is there a mandatory standard, regulation or audit expectation	Governance & Security Modernization area (L6), 5. Assumptions	
○	What are the known open issues — performance, cost, trust	P1 focus areas	
○	Who will the report be presented to — technical team or management	Report language and executive summary	

Target level per area. If unknown, leave blank; it is set jointly in P0 and written into the proposal as an assumption.

	AREA	WHERE IT FILLS IN THE PROPOSAL	TARGET LEVEL (1–5) AND WHO SETS IT
○	1. Current & Future-State Architecture	P0 deliverable, 5.3 Assumptions	
○	2. Data Integration Modernization	P0 deliverable, 5.3 Assumptions	
○	3. Query & Analytics Enablement	P0 deliverable, 5.3 Assumptions	
○	4. ML & Feature Engineering Enablement	P0 deliverable, 5.3 Assumptions	
○	5. Governance & Security Modernization	P0 deliverable, 5.3 Assumptions	
○	6. Platform Operations & Observability	P0 deliverable, 5.3 Assumptions	
○	7. Platform Scalability & Cost	P0 deliverable, 5.3 Assumptions	
○	8. Technology Evolution	P0 deliverable, 5.3 Assumptions	

H. Organisation and Roles

> If no platform owner is assigned, P1 takes longer and most of the evidence falls back to statements; the report is no longer

> measured.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Can a platform owner with access to configuration and environment information be assigned**	7.2 Expected participation, 5. Assumptions	
○	Who is the project sponsor	7.3 Governance	
○	Will the data engineering team join the interviews	7.2, 6. Schedule	
○	Will the security and infrastructure side be involved in the process	7.2, access approvals	
○	Can the consumer side — BI, analytics, ML — be interviewed	7.2, ML & Feature Engineering Enablement and Query & Analytics Enablement areas (L10, L11)	

I. Commercial Framework

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Is there an approved budget	8. Fees	
○	Schedule constraint — audit date, budget period, contract renewal	6. Project Plan	
○	Procurement process and approval steps	9.1 General Terms	
○	Will the engagement be run remotely, on site or hybrid	5. Assumptions	

Band Estimate — Worksheet

Completed after the answers are collected. The band is the highest band that at least three drivers fall into; a single large driver does not carry the band.

The durations below apply to Service B. For A, 1 / 1.5 / 2 weeks apply; for C, 2 weeks (1–2 areas), 3 weeks (3–4 areas) or 4 weeks (5–7 areas) apply depending on the number of selected areas, and each has its own input form.

#	DRIVER	SMALL	MEDIUM	LARGE	RESULTING BAND
1	Number of tables	≤ 300	300 – 1500	> 1500	
2	Total data volume	≤ 50 TB	50 – 500 TB	> 500 TB	
3	Daily volume growth	≤ 200 GB	200 GB – 2 TB	> 2 TB	
4	Number of source systems	≤ 5	5 – 15	> 15	
5	Number of streaming pipelines	0 – 2	3 – 10	> 10	
6	Number of table formats	1	2	> 2	
7	Number of query engines	1	2	> 2	
8	Number of environments	≤ 2	3	> 3	
9	Daily query volume	≤ 5k	5 – 50k	> 50k	
10	Access approval time (Mode B)	≤ 2 weeks	2 – 6 weeks	> 6 weeks	
11	Log and metadata retention	≥ 90 days	30 – 90 days	< 30 days	
	RESULT — selected band and duration	3 weeks · 22 pd	3.5 weeks · 28 pd	4 weeks · 34 pd	

CUSTOMER EFFORT — small 5 days · medium 6 days · large 8 days. This expectation is stated explicitly in section 7.2 of the proposal.

PHASE BREAKDOWN (medium band indication) — P0 Scope 2 days · P1 Current state 1–1.5 weeks · P2 Placement and gap 3 days · P3 Target state and roadmap 1 week · P4 Validation and publication 2 days.

Blocker Checklist

These rows must be answered before proposal writing starts.

SECTION	BLOCKER QUESTION	ANSWERED?
A	Organisation and legal entities in scope — single company or group	
A	Is there an RFP or specification; if so, its number and response format	
B	Which decision will this assessment support — investment, platform change, budget defence, audit request, restructuring	
C	Which platform is to be assessed — lakehouse, data warehouse, or both	
C	Are all eight areas in scope; is any area to be excluded	
D	Table format(s) in use — Iceberg, Delta, Hudi, raw parquet	
D	Query engine(s)	
E	Total number of tables	
E	Total data volume — state whether raw or compressed	
F	Which access model — Mode A (guided) or Mode B (read-only)	
F	Mode B: access approval process and expected duration · Mode A: who will run the control queries, and how soon can outputs be shared	
F	How long are query logs, job history and metadata retained	

SECTION	BLOCKER QUESTION	ANSWERED?
H	Can a platform owner with access to configuration and environment information be assigned	

IF ANY BLOCKER IS MISSING — the proposal is not written. If it must be written, each missing item is written into section 5 of the proposal

as an assumption, and it is stated that the scope will be reassessed if that assumption does not hold.

A blocker filled in by silent guessing comes back as a scope dispute in the middle of the project.
