ENTERPRISE LAKEHOUSE ADVISORY SERVICES · SERVICE C

Technology-Specific Deep Dive — Proposal Input Form

Information to be collected for an in-depth technical review of a single technology, based on full measurement in the selected areas.

Rows marked ● are BLOCKERS — the proposal cannot be written without them and they cannot be filled with assumptions.
If rows marked ○ remain missing, they are written into the proposal as assumptions and go to section 5.

C differs from A and B in two ways. First: the scope is not fixed; the areas for full measurement are selected together with the customer.
Second: full measurement is committed directly only for technologies where Komtaş has delivery experience. Where there is no experience, the area is run with a named
external specialist or left out of scope; with an external specialist, the specialist's name is given in the proposal and the report states which finding was produced by whom.

A. Organisation and Proposal Details

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Organisation and legal entities in scope**	Cover, 1. Executive Summary	
○	Proposal addressee — name, title, unit	Cover, 9.2	
○	Proposal date and expected decision date	Cover, 9.1 validity	
○	Is there an RFP or specification	Proposal structure	
○	Has a previous A or B engagement been carried out	5. Assumptions, evidence reuse	

B. Technical Problem Definition

C is not a general assessment; it is built around a named technical problem or decision.
If the problem cannot be defined, the right service is A or B, not C.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which technical problem or decision is being reviewed**	1. Executive Summary, 2.1 Objective	
●	**How does the problem show itself today — which measurement, which complaint**	P1 focus, acceptance criterion	
●	**Which question is expected to be answered at the end of the engagement**	2.1 Objective, acceptance criterion	
○	Has this problem been worked on before; what was tried	5. Assumptions	
○	Is there a date for the decision	6. Schedule, 9.1 validity	

C. Technology and Expertise Check

This section determines whether a proposal can be made. Full measurement on a technology where Komtaş has no delivery experience is not committed without a named external specialist.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Which platform will be worked on — product and version**	2.3, expertise check	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Does Komtaş have delivery experience on this platform — internal assessment**	Proposal feasibility decision	
●	**If there is no experience, will a named external specialist be engaged — full name and area; if not, the area is out of scope**	5. Assumptions, 7.1 Team, 8. Fee	
○	Deployment model — SaaS, managed service, self-hosted	2.3	
○	Do the version and licence level restrict measurement access	5. Assumptions	

D. Selection of Review Areas

The scope of C is determined here. At least one area is selected from the seven-area menu; each selected area is named in the proposal as «SELECTED AREAS», and areas not selected are out of scope. The duration depends on the number of selected areas: 1–2 areas 2 weeks, 3–4 areas 3 weeks, 5–7 areas 4 weeks. For each selected area, the metric, measurement window and source are defined in writing in P0; the result is delivered as a measurement report.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	**1. Storage & Data Architecture — file layout, partition, compaction, snapshot and retention**	2.3 Scope, L1	
○	2. Query & Processing Performance — query profiles, p95, skew, cache, job durations	L7	
○	3. Data Integration & Pipeline Engineering — job design, idempotency, late data, reprocessing	L2, L3	
○	4. Data Governance & Security Configuration — policies, RBAC / ABAC, encryption, audit trail	L5, L6	
○	5. Platform Operations & Observability — metrics, alerts, runbooks, incident response	L9	
○	6. Infrastructure & Resource Optimization — cluster size, autoscaling, idle compute, storage tiers	L8	
○	7. Platform Configuration & Reliability — configuration review, HA / DR, version upgrade path	L9, L1	

E. Measurement Access

All of C is based on measurement. No proposal can be made without the answers in this section; an area that cannot be accessed is left out of scope.

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Can read access to platform metrics and system tables be provided**	Driver, 5. Assumptions	
●	**How long are query logs, job history and metadata retained**	Measurement window — CONSTRAINT	
●	**How does the access approval process work, and how long is it expected to take**	6. Schedule	
○	Can access to billing and cost data be provided	L8 area	
○	Can configuration files and environment definitions be shared	P1	
○	Is running queries in the production environment permitted	5. Assumptions	

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Can a test or copy environment be used	5. Assumptions	

F. Scale and Organisation

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
●	**Number of objects in the selected areas — tables, pipelines, jobs or queries**	Driver, 2.3	
○	Number of environments	Driver	
●	**Can the platform owner and the relevant technical team be made available**	7.2, 5. Assumptions	
○	Can a technical review be held to validate the findings	P3	
○	Will the engagement be run remotely or on site	5. Assumptions	

G. Commercial Framework

	TO ASK	WHERE IT FILLS IN THE PROPOSAL	ANSWER
○	Is there an approved budget	8. Fees	
○	Can the external specialist cost be included in the budget	8. Fees	
○	Is there a schedule constraint	6. Project Plan	
○	Procurement process and approval steps	9.1 General Terms	

Area Selection and Band — Worksheet

The duration of C and the Komtaş effort are determined by the number of selected areas (band table below). External specialist effort is not included in these values; it is priced on a separate line in the proposal.

REVIEW AREA	SELECTED?	MEASUREMENT ACCESS?	KOMTAŞ EXPERIENCE?	EXTERNAL SPECIALIST (FULL NAME)
Storage & Data Architecture				
Query & Processing Performance				
Data Integration & Pipeline Engineering				
Data Governance & Security Configuration				
Platform Operations & Observability				
Infrastructure & Resource Optimization				
Platform Configuration & Reliability				

BAND	NUMBER OF SELECTED AREAS	DURATION	KOMTAŞ PERSON-DAYS	CUSTOMER EFFORT
Small	1 – 2 areas	2 weeks	12 pd	3 days
Medium	3 – 4 areas	3 weeks	18 pd	4 days
Large	5 – 7 areas	4 weeks	26 pd	6 days

AN AREA ENTERS THE PROPOSAL ONLY IF IT IS SELECTED, MEASUREMENT ACCESS EXISTS, AND THERE IS KOMTAŞ EXPERIENCE OR A NAMED EXTERNAL SPECIALIST.

An area that is selected but has no measurement access cannot be measured and is left out of scope; an area without Komtaş experience is planned with a named external specialist or left out of scope.

If the log retention period is under thirty days, the measurement window in the affected areas narrows; this is a constraint, not an assumption.

Blocker Checklist

SECTION	BLOCKER QUESTION	ANSWERED?
A	Organisation and legal entities in scope	
B	Which technical problem or decision is being reviewed	
B	How does the problem show itself today — which measurement, which complaint	
B	Which question is expected to be answered at the end of the engagement	
C	Which platform will be worked on — product and version	
C	Does Komtaş have delivery experience on this platform — internal assessment	
C	If there is no experience, will a named external specialist be engaged — full name and area; if not, the area is out of scope	
D	Has at least one area been selected from the 7-area menu — «SELECTED AREAS»	
E	Can read access to platform metrics and system tables be provided	
E	How long are query logs, job history and metadata retained	
E	How does the access approval process work, and how long is it expected to take	
F	Number of objects in the selected areas — tables, pipelines, jobs or queries	
F	Can the platform owner and the relevant technical team be made available	

IF ANY BLOCKER IS MISSING — the proposal is not written. In C this rule is stricter than in the other two services: a commitment made without verifying measurement access and expertise (Komtaş delivery experience

or a named external specialist) comes back as a scope reduction mid-project and turns into a fee dispute.

The second row of section C is an internal check; it is not asked of the customer and is answered on the Komtaş side.
