OPERATIONAL DATA GOVERNANCE ENABLEMENT — INTERNAL QUESTION SET

Komtaş internal working file. Not sent to the customer. The deduplicated questions from the 3a and 3b input forms (64 questions) are here; the SERVICE column shows which service the question is asked in. The minimum set needed for the proposal is on the Proposal Set sheet.

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
1	A. Organisation and Proposal Details	BLOCKER	A · B	**Organisation and legal entities in scope — single company or group**	4a/4b · Cover, 1		Not answered		S1
2	A. Organisation and Proposal Details	Assumption	A · B	Proposal recipient — name, title, unit	4a/4b · Cover, 9.2		Not answered		Sales knows
3	A. Organisation and Proposal Details	Assumption	A · B	Proposal date and expected decision date	4a/4b · Cover, 9.1 validity		Not answered		Sales knows
4	A. Organisation and Proposal Details	BLOCKER	A · B	**Is there an RFP or specification; if so, its number and response format**	4a/4b · structure of the whole proposal		Not answered	Blocker for B; assumption for A	S1
5	A. Organisation and Proposal Details	Assumption	A · B	Are there competitors, and who — another consultancy, the tool vendor's services team, the SAP implementation partner	4a/4b · 1 (emphasis), 8 (price position)		Not answered		S1
6	B. Decision and Trigger	BLOCKER	A · B	**Which decision will the work support; what is the trigger — data issues created at source, a KVKK or audit finding, a new ERP or application programme, AI initiatives · for B: which trigger the pilot addresses**	4a/4b · 1 «DECISION», 2.1		Not answered		S2
7	B. Decision and Trigger	BLOCKER	A · B	**Which service is requested — A Phase 0, B pilot + rollout, or both**	Service selection; 4a/4b · 2.2		Not answered	See the service selection check in 3a/3b; B is not proposed without Phase 0 or an equivalent design (S8)	S2
8	B. Decision and Trigger	Assumption	A · B	Who will make the decision, and when · for B: who decides on the rollout after the pilot	4a/4b · 7.3, 9.1 validity; 4b · 6		Not answered		S2
9	B. Decision and Trigger	Assumption	A · B	Is there a target date — programme go-live, audit calendar, budget period	4a/4b · 1, 6		Not answered	If the trigger is an ERP or application programme, the gate is tied to that programme's release path and schedule	S2
10	B. Decision and Trigger	Assumption	A · B	What is the most frequent data complaint today — duplicate customer, outlet or product records, undefined fields, unflagged personal data, inconsistent reports	4a · 2.1, 3.2 (P1 focus areas)		Not answered		At start of work
11	B. Decision and Trigger	Assumption	A · B	Has a data governance, data quality or MDM project been carried out before; what was the outcome	4a · 3.2, 5.1; 4b · 2.4		Not answered	If so, P2 of A may be shorter	Sales knows
12	C. Applications and Development Model	BLOCKER	A · B	**Names and number of the operational systems in scope — ERP, CRM, in-house applications, SaaS**	4a · 2.3, 2.4 «SYSTEMS» (band driver); 4b · 2.3, wave plan		Not answered	≤ 5 · 6–15 · > 15; if systems are Large, the band is at least Medium. For B, taken from the Phase 0 output (D1)	S3
13	C. Applications and Development Model	BLOCKER	A · B	**Development model of each system — in-house / SAP + partner / SaaS — and who makes changes in each system (internal team, SI / implementation partner, vendor) · for B: the development model of the pilot system**	4a · 2.4 (band driver), 3.1, 7.2, 7.4; 4b · 3, 7.4		Not answered	First question of the technical block; per-system table in 3a. Models present 1 · 2 · 3. If unknown, marked "unknown" and settled in P1	S3
14	C. Applications and Development Model	Assumption	A · B	If SAP is used: its version (ECC, S/4HANA); is SAP MDG licensed and live, and for which domains · for B: are there MDG or in-application checks in the pilot system, has the coexistence decision been made	4a · 2.3, 5.1; 4b · 3, 5.1		Not answered	If MDG is present, the default starting position is a split by domain (option C)	Settled in Phase 0
15	C. Applications and Development Model	Assumption	A · B	Is there an API gateway or middleware — SAP Integration Suite, iPaaS; event or CDC infrastructure	4a · 3.1, 4 (D5 matrix); 4b · 3, 5.2		Not answered	For SaaS systems the check at entry sits in this layer; for B it is the layer between the pilot system and the rule service	S10
16	C. Applications and Development Model	Assumption	A	Is any system due to change or go live in the near term	4a · 2.1, 3.2 (P3 roadmap)		Not answered	An upcoming release or programme affects the order of the waves	Assumption in proposal
17	D. Governance and DQ Tools	BLOCKER	A · B	**Governance / DQ tools and licences — Informatica IDMC services (Cloud Data Governance and Catalog, Cloud Data Quality, MDM SaaS, API Center), Talend, OpenMetadata, none · for B: the tool through which rules are published as APIs**	4a/4b · 2.4 «TOOL», 3.1; 4a · 4 (D4); 4b · 5.1		Not answered	Blocker for B; assumption for A. If OpenMetadata is chosen, block 1 needs a separate rule service	S4
18	D. Governance and DQ Tools	Assumption	A · B	Is there a data governance programme on the analytical side (catalogue, glossary, DQ dashboards), or is one planned; who runs it	Service selection; 4a/4b · 2.1, 2.5		Not answered	This service extends the analytical programme; who delivers glossary and catalogue work for operational CDEs is written in 2.5	S4
19	D. Governance and DQ Tools	Assumption	A · B	In which tool and to what extent are the glossary and catalogue kept today · for B: what is the status of the glossary and catalogue entries for the pilot CDEs	4a · 2.3, 5.1; 4b · 2.3, 5.1		Not answered		Settled in Phase 0
20	D. Governance and DQ Tools	Assumption	A · B	Where do DQ rules run today — warehouse pipelines, in-application checks, none; approximate number of rules	4a · 2.3, 3.1		Not answered		Settled in Phase 0
21	D. Governance and DQ Tools	Assumption	A · B	If Informatica is used: IPU consumption and remaining capacity; can API Center be used for real-time rule calls; scanner coverage for the SAP version	4a · 4 (D4); 4b · 3, 5.2		Not answered		Settled in Phase 0
22	E. Change Process	BLOCKER	A · B	**SDLC tools — Jira, Azure DevOps, other; do they differ by system**	4a · 2.3, 4 (D3); 4b · 3, 5.1		Not answered		S5
23	E. Change Process	BLOCKER	A · B	**Is there a CAB or an equivalent change approval body, and how often does it meet; is there a design review step**	4a · 2.3, 3.1; 4b · 3 (PL2 gate)		Not answered		S5
24	E. Change Process	Assumption	A · B	SAP transport procedure and the implementation partner's functional spec template	4a · 2.3, 5.1; 4b · 3, 5.1		Not answered		S5

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
25	E. Change Process	Assumption	A · B	Partner / vendor change process — is the change process defined in the contract; for SaaS, vendor release review and configuration change control	4a · 5.1, 7.4; 4b · 5.1, 7.4		Not answered	The gate is written into the partner's process and, where needed, its contract; if the partner does not accept it, a risk in 7.4	S5
26	E. Change Process	Assumption	A · B	Is there any check on data-affecting changes today — DBA approval, data team review, checklist	4a · 3.2 (P1)		Not answered		At start of work
27	E. Change Process	Assumption	A · B	Release calendar and change freeze periods — year end, campaigns, audits	4a · 6; 4b · 6		Not answered		At start of work
28	F. Scope and Scale	BLOCKER	A	**Business processes / domains in scope — customer or outlet onboarding, product / material creation, supplier registration**	4a · 2.3, 2.4 (band driver)		Not answered	≤ 2 · 3–5 · > 5	S6
29	F. Scope and Scale	Assumption	A	Approximate number of CDEs (critical data elements)	4a · 2.4 (band driver), 5.1		Not answered	≤ 50 · 50–200 · > 200; if unknown, assumed from the number of processes and systems and confirmed	S6
30	F. Scope and Scale	Assumption	A	Number of legal entities / countries in scope	4a · 2.4 (band driver)		Not answered	1 · 2–3 · > 3	S6
31	F. Scope and Scale	Assumption	A	Is any system, domain or company to be left out of scope	4a · 2.5		Not answered		S6
32	F. Scope and Scale	Assumption	A · B	Processes holding personal data and the KVKK officer; is there a classification policy for personal data	4a · 2.3, 4 (D2); 4b · 3 (block 5)		Not answered	Without a policy, block 5 starts in Phase 0 with draft classes	Assumption in proposal
33	F. Scope and Scale	Assumption	A · B	Is there a data quality or change management obligation under BDDK or sector regulation; is there an open audit finding	4a/4b · 2.1, 5.1		Not answered		Assumption in proposal
34	F. Scope and Scale	Assumption	A · B	Record creation volume — new customer, outlet, product or supplier records per day or month; number and recording of known downstream data issues	4a · 4 (D7 pilot selection, KPI baseline)		Not answered		Settled in Phase 0
35	G. Stakeholders and Access	BLOCKER	A	**Are the process owners, IT and, where needed, partner / vendor representatives who can attend the workshops known**	4a · 3.2 (P1), 5.3, 7.2		Not answered	If the partner or vendor is not available, that system's matrix row is filled with assumptions; risk in 7.4	S7
36	G. Stakeholders and Access	Assumption	A	Number of interviewees (approximate)	4a · 2.4 (band driver), 7.2		Not answered	≤ 10 · 10–25 · > 25	S7
37	G. Stakeholders and Access	Assumption	A · B	Who is the project sponsor; is there a sponsor who can choose the pilot	4a/4b · 7.3		Not answered		At start of work
38	G. Stakeholders and Access	Assumption	A	Are data ownership roles defined today — data owner, data steward, governance council	4a · 4 (D6 operating model)		Not answered		Settled in Phase 0
39	G. Stakeholders and Access	Assumption	A	Can the change process documents (Jira / Azure DevOps workflows, CAB and transport procedure) and the licence list be shared in the first week of Phase 0	4a · 5.2, 5.3, 7.2		Not answered		At start of work
40	G. Stakeholders and Access	Assumption	A	Is access to business data needed — Phase 0 runs at the level of metadata, processes and documents; the KPI baseline queries are run by the customer team or the values are taken from existing reports	4a · 5.2		Not answered		Stated in proposal
41	G. Stakeholders and Access	Assumption	A · B	Will the work be remote, on site or mixed; is VDI or VPN mandatory	4a/4b · 5.4 «remote / on site / mixed»		Not answered		At start of work
42	H. Pilot Scope and Integration	BLOCKER	B	**Has Phase 0 (A) been done, or is there an equivalent design — system × building block matrix, CDE register, pilot design**	Proposal go/no-go; 4b · 2.2, 2.4		Not answered	If not, 4b is not written; A is proposed first	S8
43	H. Pilot Scope and Integration	BLOCKER	B	**Have the pilot process and pilot system been chosen — customer or outlet onboarding, product / material creation**	4b · 2.3, 2.4 «PILOT PROCESS» / «PILOT SYSTEM»		Not answered		S8
44	H. Pilot Scope and Integration	BLOCKER	B	**Number and list of pilot CDEs**	4b · 2.4 (pilot band driver)		Not answered	≤ 20 · 20–50 · > 50	S9
45	H. Pilot Scope and Integration	BLOCKER	B	**Number of pilot DQ rules (approximate)**	4b · 2.4 (pilot band driver)		Not answered	≤ 15 · 15–40 · > 40	S9
46	H. Pilot Scope and Integration	BLOCKER	B	**Integration pattern — synchronous (UI / API), asynchronous (event or CDC), batch remediation; how many patterns**	4b · 2.4 (pilot band driver), 3		Not answered	1 · 2 · 3; synchronous checks only where a bad record is costly	S9
47	H. Pilot Scope and Integration	BLOCKER	B	**Who will change the pilot application — in-house team / SI partner / vendor; how much time it can give during the pilot**	4b · 5.3, 7.2, 7.4		Not answered	The call inside the application is made by the party that changes the application; if it is not available, the pilot schedule does not hold	S10
48	H. Pilot Scope and Integration	Assumption	B	Lineage target — warehouse table and report	4b · 2.3, 4		Not answered		At start of work
49	H. Pilot Scope and Integration	Assumption	B	Can an owner and a steward be assigned for the pilot CDEs	4b · 7.2		Not answered		At start of work
50	H. Pilot Scope and Integration	Assumption	B	Behaviour of the business process when the rule service is unavailable — the record is saved and flagged for the asynchronous check; the business process does not stop	4b · 3, 7.4		Not answered		Stated in proposal
51	H. Pilot Scope and Integration	Assumption	B	MDM boundary — is matching on create (block 6) in the pilot; a full MDM implementation is out of scope	4b · 2.3, 2.5		Not answered		Stated in proposal
52	I. Acceptance and Release	BLOCKER	B	**Acceptance criteria — DQ check at entry live for the pilot CDEs, gate applied in a release, KPI measurement reported; KPI baseline and target values**	4b · 3 (PL3 «%»), 4		Not answered	There are no default targets; targets are set against the baseline measured in Phase 0	S11
53	I. Acceptance and Release	Assumption	B	Who will sign off the pilot — process owner, sponsor	4b · 7.3		Not answered		S11
54	I. Acceptance and Release	BLOCKER	B	**Is there a real release of the pilot system inside the pilot window; its date**	4b · 3 (PL3), 5.1, 6		Not answered	Without a release the gate cannot be proven; the pilot schedule is built around the release calendar	S12
55	I. Acceptance and Release	Assumption	B	Environments — dev / test / prod; are the pilot test environment and the tool environment ready	4b · 5.1, 5.3, 3 (PL2)		Not answered	Environments must be ready before PL2 starts	S12
56	J. Rollout and Commercial Framework	Assumption	A · B	Procurement process and approval steps	4a/4b · 9.1		Not answered		S1
57	J. Rollout and Commercial Framework	Assumption	A · B	Is there an approved budget	4a/4b · 8.1		Not answered		Sales knows

#	SECTION	PRIORITY	SERVICE	QUESTION	WHERE IT FILLS IN THE PROPOSAL	ANSWER	STATUS	NOTE	PROPOSAL SET
58	J. Rollout and Commercial Framework	Assumption	A	Is the Phase 0 fee expected to be credited against the fee for service B	4a · 9.1 «OPTIONAL» credit clause		Not answered	The period («N» months) is set by sales	Sales knows
59	J. Rollout and Commercial Framework	BLOCKER	B	**Rollout pricing model — «OPTION 1 — FIXED FEE PER WAVE» or «OPTION 2 — CAPPED T&M»**	4b · 8.3 / 8.4 option blocks		Not answered	No single fixed price is given for the whole landscape	S13
60	J. Rollout and Commercial Framework	Assumption	B	Day rate — per role or a single rate; payment plan — pilot at phase exit, waves per accepted wave or monthly	4b · 8.1, 8 payment schedule		Not answered		S13
61	J. Rollout and Commercial Framework	Assumption	B	Interest in a managed service for rule and metadata operations after the rollout	4b · 8 «OPTIONAL» paragraph		Not answered		S13
62	J. Rollout and Commercial Framework	BLOCKER	B	**Systems / processes to be covered after the pilot, and the number of waves**	4b · 2.4 «N» waves, wave table, 6		Not answered	The wave list comes from the Phase 0 roadmap (D8)	S14
63	J. Rollout and Commercial Framework	Assumption	B	Wave criterion — by process or by system; priority (CDEs with the most downstream issues, systems whose change process can carry the gate, upcoming releases)	4b · 3, 6		Not answered		S14
64	J. Rollout and Commercial Framework	Assumption	B	Who will operate the rules and metadata after the rollout — customer team, managed service	4b · 2.5, 4 (handover)		Not answered	Handover is in scope; operational support is the optional managed service	Stated in proposal

MINIMUM QUESTION SET FOR THE PROPOSAL — 14 QUESTIONS

When these fourteen questions are answered, selected by the SERVICE column, the proposal can be written: seven questions for A, twelve for B. Thirty-eight of the sixty-four questions in the list are combined here; the remaining twenty-six stay for the start of the work, on the sales side, in Phase 0, or in the proposal as an assumption or statement.

#	BLOCK	SERVICE	QUESTION	WHY IT IS NEEDED	IF NO ANSWER	ANSWER	STATUS	QUESTIONS COVERED
S1	COMMON · DETAILS	A · B	**Which legal entities are in scope; is there an RFP or specification; are there competitors; how does the procurement process work?**	The cover, 1. Executive Summary and the 9.1 conditions are written from this. If there is an RFP, the proposal is structured accordingly; the competitor situation affects the price position.	**Proposal cannot be written**		Not answered	1, 4, 5, 56
S2	COMMON · DECISION	A · B	**What triggers the work — data issues created at source, a KVKK or audit finding, a new ERP or application programme, AI initiatives? Which service is requested: A Phase 0 or B pilot + rollout? Who decides, and when?**	1. Executive Summary, 2.1 Programme Objective and 2.2 Service Structure are written from this. If an ERP or application programme is planned, the gate is attached to its release path and budgeted with it. The decision date sets the proposal validity.	Objective and summary cannot be written		Not answered	6, 7, 8, 9
S3	COMMON · APPLICATIONS	A · B	**Which operational systems are in scope, and how many? How is each one developed and changed — in-house, SAP + implementation partner, SaaS / packaged software?**	First question of the technical block; the development model decides through which lever each building block is applied. Two band drivers for A (2.4): systems ≤ 5 · 6–15 · > 15; models present 1 · 2 · 3. If systems are Large, the band is at least Medium. For B, the pilot system's model sets the integration work and the schedule.	**Band and lever cannot be selected**		Not answered	12, 13
S4	COMMON · TOOL	A · B	**Which governance / data quality tools and licences are in place — Informatica IDMC (which services), Qlik Talend Cloud, OpenMetadata, another product, none?**	The «TOOL» row in 2.4 and 3.1 are written from this answer; it selects the technology adapter. If OpenMetadata is chosen, block 1 needs a separate rule service and block 6 a separate matching tool. If there is no tool, a tool recommendation is part of D4 in A; licence costs are out of scope in both services.	Adapter cannot be selected		Not answered	17, 18
S5	COMMON · CHANGE PROCESS	A · B	**Which tool manages changes (Jira, Azure DevOps); is there a CAB and a design review; how do the SAP transport process and the partner / vendor change process work?**	Determines where the SDLC gate sits. For A it sets the number of change process workshops in P1 and the scope of D3; for B the gate work in PL2 and the partner or vendor coordination. A gate in the partner's process is written as a risk in 7.4.	Gate scope cannot be written		Not answered	22, 23, 24, 25
S6	A · SCOPE	A	**Which business processes / domains are in scope; approximately how many CDEs; how many legal entities / countries?**	4a 2.3 Scope Topics and 2.4 are filled in from this. Three band drivers: processes / domains ≤ 2 · 3–5 · > 5; CDEs ≤ 50 · 50–200 · > 200; legal entities / countries 1 · 2–3 · > 3. If the CDE count is unknown, it is assumed from the number of processes and systems and confirmed in P2.	Band cannot be selected		Not answered	28, 29, 30, 31
S7	A · STAKEHOLDERS	A	**Are process owners, IT, the implementation partner and vendors available for workshops; approximately how many people will be interviewed?**	The number of interviewees is a band driver (≤ 10 · 10–25 · > 25). 7.2 Expected participation and the 5.3 assumptions are written from this. If the partner or vendor is not available, that system's matrix row is filled with assumptions and written as a risk in 7.4.	Schedule cannot be given		Not answered	35, 36
S8	B · PILOT	B	**Has Phase 0 been done, or is there an equivalent design (system × building block matrix, CDE register, pilot design)? Are the pilot process and the pilot system named?**	B is not proposed on an undesigned landscape. The pilot process and system fill the «PILOT PROCESS» and «PILOT SYSTEM» fields in 4b 2.3 and 2.4; the pilot scope, integration work and schedule are built on them.	**Proposal cannot be written — A is proposed first**		Not answered	42, 43
S9	B · RULES	B	**How many CDEs and DQ rules are in the pilot; which integration patterns will be used — synchronous, asynchronous, batch?**	The three drivers of the pilot band (2.4): CDEs ≤ 20 · 20–50 · > 50; DQ rules ≤ 15 · 15–40 · > 40; patterns 1 · 2 · 3. The band sets the pilot fee (8.2) and the PL2 duration.	Pilot fee cannot be given		Not answered	44, 45, 46
S10	B · INTEGRATION	B	**Who will change the pilot application — in-house team, SI partner, vendor? Is there an API gateway or middleware between the pilot system and the rule service?**	The change inside the application is the application team's responsibility and is written into 5.3 and 7.2; the Komtaş integration developer works on the call and the integration layer. If an SI partner or vendor is needed, the coordination time is added to PL2 and written as a risk in 7.4.	Schedule cannot be given		Not answered	15, 47
S11	B · ACCEPTANCE	B	**What is the KPI baseline measured in Phase 0; what are the target values and pilot acceptance criteria; who signs off the result?**	Pilot acceptance is written in 4b 3 and 4 in measurable terms: KPI, baseline, target «%» and the business owner who signs off. There are no default targets; no percentage improvement is promised in advance.	Acceptance criterion cannot be written		Not answered	52, 53
S12	B · RELEASE	B	**Which environments exist (development, test, production; tool environment); is there a real release inside the pilot window, and when?**	In PL3 the gate is applied in a real release and the KPIs are measured after it. Without a release the pilot schedule is shifted to the release. 5.2, 5.3 and 6. Project Plan are written from this.	Schedule cannot be given		Not answered	54, 55
S13	B · PRICE	B	**Which pricing model for the rollout — fixed fee per wave or capped T&M; what are the day rate, the cap and the payment terms; is there interest in a managed service?**	One of 4b 8.3 and 8.4 is kept and the other is deleted. The pilot fee (8.2) is fixed in either case. No single fixed price is given for the whole landscape. If there is no interest in a managed service, the «OPTIONAL» paragraph is deleted.	Fees section cannot be written		Not answered	59, 60, 61
S14	B · ROLLOUT	B	**Which systems / processes will be covered after the pilot; how many waves; is the wave criterion process or system?**	The «N» waves in 4b 2.4 and the wave table are written from this. Wave size varies with the number of CDEs, rules and systems, the development model and the pattern; the list comes from the Phase 0 roadmap (D8).	Wave plan cannot be written		Not answered	62, 63

NOTE

S5 is not a document list. Items such as Jira / Azure DevOps workflows, the CAB and transport procedure and the licence list are requested once at the start of the work; S5 is asked at proposal stage because it changes where the gate sits and the number of workshops. S1–S5 are common to both services; if A and B are proposed to the same customer together, they are asked once. If A has been done, the S3–S5 answers for B are taken from A's output (D1, D3, D4). S6–S7 are asked for A only, S8–S14 for B only.

26 QUESTIONS OUTSIDE THE PROPOSAL SET

They were not deleted; when they are asked has been clarified. Some are never asked — they are written in the proposal as an assumption or statement.

WHEN	COUNT	RATIONALE
At start of work	8	Complaints, current checks on data-affecting changes, release calendar and change freeze periods, project sponsor, sharing of documents, work location; for B, the lineage target and the owner / steward assignment for the pilot CDEs. Asked in P0 for A (kick-off and inventory request) and in PL1 for B (design confirmation).
Sales knows	5	Proposal recipient, proposal date, previous governance, DQ or MDM projects, budget, crediting the Phase 0 fee against B. The commercial framework is the responsibility of sales; it is taken from the CRM or the sales representative.
Settled in Phase 0	6	SAP version and MDG coverage, glossary and catalogue status, existing DQ rules, Informatica IPU and API Center status, record creation volume and known downstream issues, data ownership roles. Settled in Phase 0 through interviews and documents (D1, D2, D4, D6, D7); not asked for the proposal. If the customer knows them, they are written into 2.4 as a statement.
Assumption in proposal	3	Systems due to change in the near term, KVKK classification policy, BDDK or sector obligations. If unanswered, they are written into 5.1 as an assumption: without a policy, block 5 starts with draft classes; an upcoming release or programme may change the order of the waves.
Stated in proposal	4	Access to business data, behaviour when the rule service is unavailable, the MDM boundary, operation after the rollout. These are to be stated, not asked: 4a 5.2 states that Phase 0 runs at the level of metadata, processes and documents; 4b 3 states that the record is saved and flagged when the rule service is unavailable; 4b 2.5 states that full MDM and operational support are out of scope.
Total	26	38 of the 64 questions were merged into the 14 questions of the Proposal Set; the remaining 26 were distributed across the five buckets above.

PROPOSAL READINESS STATUS

This sheet is calculated automatically. The decision on whether a proposal can be written is made separately for each service, based on the relevant questions on the Proposal Set sheet (SERVICE column).

MEASURE	A · PHASE 0	B · PILOT + ROLLOUT	DESCRIPTION
Number of proposal set questions	7	12	Common questions (S1–S5) and service-specific questions
Answered	0	0	STATUS column on the Proposal Set sheet
Partially answered	0	0	Written as an assumption in the proposal
Missing	7	12	Unanswered proposal question
Completion	0%	0%	Answered / total
CAN THE PROPOSAL BE WRITTEN	**NO — 7 questions missing**	**NO — 12 questions missing**	YES if missing is zero
Service questions (Questions)	44	53	Questions carrying the relevant letter in the SERVICE column of the full list
Service questions — deferred to start of work	6	7	Asked in P0 for A, in PL1 for B
Questions in the whole form	64		Reference: full list of 64 questions (3a, 3b deduplicated)
Deferred to start of work (all)	8		Asked in P0 for A, in PL1 for B

Rule: a service's proposal is not written until that service's proposal set is complete. If it must be written, each missing item is written into section 5 of the proposal as an assumption and it is stated that the scope will be reassessed if that assumption does not hold.

STATUS BY SECTION

SECTION	QUESTION	BLOCKER	ANSWERED	MISSING BLOCKER
A. Organisation and Proposal Details	5	2	0	2
B. Decision and Trigger	6	2	0	2
C. Applications and Development Model	5	2	0	2
D. Governance and DQ Tools	5	1	0	1

TO BE SENT TO THE SAT OFFICE AFTER THE MEETING

Once these items arrive, the proposal text can be produced.

#	ITEM	SENT	NOTE
1	This completed form (with the answers from the customer form entered)	No	
2	Your meeting notes — raw is fine, do not try to tidy them	No	
3	RFP / specification file, if any	No	
4	Input form, if filled in (operational-data-governance-3a-faz0-girdi-formu-tr.docx or -3b-pilot-yayginlastirma-girdi-formu-tr.docx)	No	
5	Application list, change process document (Jira / Azure DevOps workflow, CAB, transport procedure) or licence list shared by the customer	No	
6	For B, the Phase 0 outputs: system × building block matrix, CDE register, pilot design and KPI baseline	No	
7	Service decision: A, B or both; if B, the rollout pricing option (option 1 fixed fee per wave / option 2 capped T&M) and interest in a managed service	No	
8	Pricing decision: for A, the band (Small / Medium / Large); for B, the pilot band, the day rate and, for option 2, the cap	No	
9	Team decision: which consultants will be assigned (for table 7.1); the DQ engineer's tool expertise (Informatica, Talend, other)	No	

HOW TO USE

TWO-FILE SET-UP

Sent to the customer	operational-data-governance-5-musteri-soru-seti-en.xlsx — twenty-one questions and an information note. The first technical question is how each operational system that creates critical data is developed and changed. The regulatory questions (KVKK, BDDK) are in the main list. The SERVICE column states which service each question is required for. Building block selection, levers, rule design, tool component mapping and methodology are not asked of the customer; Komtaş proposes them based on the answers and they are finalised in Phase 0.
This file (internal)	operational-data-governance-6-ic-soru-seti-en.xlsx — full list of 64 questions, the 14-question minimum set required for the proposal (by service: A 7, B 12) and those deferred to the start of the work. Answers from the customer form are entered in this file and the proposal is written from here.
Minimum set logic	Thirty-eight of the sixty-four questions have been merged into fourteen questions. S1–S5 are common to both services; S6–S7 are the A block and S8–S14 the B block. Because the remaining twenty-six questions do not change the proposal, they are left to the start of the work, the sales side, Phase 0, or the proposal as an assumption or statement. Criterion: if doubling the number in the answer does not double the work, the question is not a proposal question.

SERVICE column	A · Phase 0 — Discovery and Design, B · Pilot + rollout. “A · B” marks a question asked in both services. Once the service to be proposed is known, only the questions carrying that letter are needed. B is not proposed without Phase 0 or an equivalent design (S8).
Fields to fill in	On the Questions sheet, only the ANSWER (G), STATUS (H) and NOTE (I) columns are filled in; on the Proposal Set sheet, ANSWER (G) and STATUS (H). Yellow cells show the fields to fill in. Pre-written short explanations in the NOTE column may be added to without being deleted.
Other sheets	Figures on the Summary, Section Breakdown and Remaining 26 sheets are calculated automatically; do not change them by hand.
PRIORITY — BLOCKER	The proposal is not written until this question is answered; it cannot be filled with an assumption. The row stays red. For questions that are a blocker in one service and an assumption in the other, the distinction is given in the NOTE column.
PRIORITY — Assumption	If left unanswered, it is written into section 5 of the proposal as an assumption.
STATUS — Answered	A clear answer was received. The row turns green.
STATUS — Partial	An answer was received but it is incomplete or unclear. Written as an assumption in the proposal.

STATUS — Not answered	Not yet asked, or no answer received.
“We don’t know” as an answer	This is also an answer and is often the first finding. STATUS is marked “Partial” and it is written in the NOTE field.
Writing the proposal	When the “CAN THE PROPOSAL BE WRITTEN” row for a service on the Summary sheet is YES, filling in that service's proposal template begins: for A operational-data-governance-4a-faz0-teklif-sablonu-en.docx, for B operational-data-governance-4b-pilot-yayginlastirma-teklif-sablonu-en.docx.
WHERE IT FILLS IN THE PROPOSAL	Format is “4b · 2.4”: template (4a, 4b) and section number. “4a/4b · 7.2” refers to the same section in both templates. «OPTION 1» / «OPTION 2» (4b 8.3 / 8.4) refer to alternative blocks in the template; the block not used is deleted. «OPTIONAL» marks the credit clause in 4a 9.1 and the managed service paragraph in 4b 8; it is deleted if not used. D1–D8 are the Phase 0 deliverables, P0–P4 the Phase 0 steps, PL1–PL4 the pilot steps.
Source	The questions were produced by deduplicating operational-data-governance-3a-faz0-girdi-formu-en.docx and operational-data-governance-3b-pilot-yayginlastirma-girdi-formu-en.docx. SECTION mapping: A combines section A of both forms; B the decision rows of 3a B and 3b B; C, D and E cover 3a C, D, E and 3b C; F covers 3a F; G the stakeholder rows of 3a G; H the pilot precondition in 3b B, 3b D and the integration rows of 3b E; I covers 3b F and the release and environment rows of 3b E; J the commercial and rollout rows in section G of both forms. A few rows that are not questions in the forms were added from the blueprint: service selection, BDDK obligations, Informatica IPU / API Center, record creation volume, current checks on data-affecting changes, release calendar, MDM boundary, wave criterion, operation after the rollout. When a question's wording changes, both Excel files are updated.
Linked files	operational-data-governance-1-blueprint-en.pptx — internal reference: building blocks, lever table, system × building block matrix, effort. operational-data-governance-2-musteri-sunumu-en.pptx — customer deck; this question set continues its “what is needed from you” page. The 3a / 3b input forms contain the band table, the service selection check and the blocker list.
Effort and band	A (Phase 0): duration Small 3 · Medium 3.5 · Large 4 weeks; Komtaş effort 25 · 30 · 35 person-days; customer effort 4 · 5 · 6 days. B pilot: 6–8 weeks; Komtaş effort 60 · 75 · 90 person-days (pilot band from S9). Each rollout wave 40–80 person-days. The Komtaş person-day figures are an initial SAT estimate, pending delivery confirmation. This note is not written into the customer-facing 4a / 4b text.

EXAMPLE ROW

QUESTION	ANSWER / STATUS / NOTE
How each system is developed and changed	“Outlet app built in-house, Jira in use; ERP is SAP, changed by the partner through transports; CRM is SaaS” · Partial · “Three models present (band driver Large); partner's transport process to be confirmed in P1”
